DEMOCRATIC ROAD MACHINE PLANNED

Passing Of Standard Oil

(Special Bulletin Cable.) NEW YORK, N. Y., Aug. 31.—The Standard Oil Company of New Jersey today dissolved in accordance with the mandate of the Supreme Court, the stock being apportioned among the subsidiary companies, which will operate independently, it is announced.

BISHOP AGENCY GETS SURETY BUSINESS

Arrangements have been completed whereby the Bishop Insurance Agency, for the Fidelity and Deposit Company of Maryland, will take over all the bonding insurance business done in the Territory by the Pacific Surety Company of San Francisco. The arrangement is already in effect and the Bishop agency is now reinsuring the bonds issued here by the California concern.

The financial difficulties and the past record here of the Pacific Surety Company have been given much publicity in the past few weeks, together with the fact that the Hawaiian Trust Company, which has been representing the Pacific Surety Company, had resigned the agency. This left the Pacific Surety Company without local agents. It appears that the arrangement between the Maryland company and the California company was effected in San Francisco, as Arthur Berg, president and manager of the Bishop Insurance Agency, received the news by mail that the Fidelity and Deposit Company will take over the bonding business of the Pacific Surety Company. The arrangements were made effective from August 1.

The Maryland company, which has its headquarters in Baltimore, is one of the strongest companies of its kind in existence. It had a surplus to policyholders on June 30 of this year of \$4,773,594.21, according to the report of the treasury.

The strength of the company is taken as evidence that with the Pacific Surety Company's bonding business here reinsured, patrons of the latter company are amply protected.

BIDS ON KAUAI WORK DELAYED

Changes of various kinds in the plans and specifications for two costly bridges on Kauai, one a steel and the other a four-span reinforced concrete structure, have necessitated a postponement of the date for calling in tenders for the work. The Kauai Loan Fund Commission has been advertising that bids must be in by September 6, but a howl has been raised by contractors of the Territory that they were not being given enough time in which to make their bids, and Superintendent Marston Campbell said today that the time will be extended. It was only last Sunday that the plans and specifications arrived from Kauai so that local contractors could have a basis on which to make their bids. Several of them say they have been unable to see the specifications. Superintendent Campbell explains the delay by saying that the plans had to be sent back and forth between the (Continued on Page 7)

McCandless Ties Up With Wilson?

Democrats Credited With Plan To Build Up Road Machine

Link McCandless, perennial and unsuccessful candidate for delegate to Congress, and Johnny Wilson, former road supervisor, have formed a working alliance in matters political and industrial, according to information that has been seeping out during the past few days. The two Democrats are busy laying the foundations for a political machine that includes the enrollment of the road laborers of Oahu under the McCandless banner. It is no secret that Link's ambitions, though oft dashed to the ground when the voters march up to the polls, has not been quenched. He has passed through his period of political convalescence after the blow of last fall, when he was handed a bad defeat, and is now nourishing his penchant for office and getting ready, it is supposed, to announce that he will again be a candidate for the suffrage of his fellow citizens. Johnny Wilson, who was an important cog in the Democratic city and county road organization, has been out of his element since he was deposed from office. He has suddenly appeared as a prospective bidder on the belt road contracts shortly to be parcelled out by the Oahu loan fund commission and the wise ones see the hand of Link McCandless as putting Wilson forward to pull his chestnuts out of the Republican fire. Wilson has secured from City Engineer Gere's office, which is also the office of Gere as consulting engineer of the loan fund mess, a copy of the plans and specifications for the first contract work, a five-mile stretch at Heala beach. It is pretty (Continued on Page 7)

MUNICIPAL PLUM HANGS HIGH BUT SEVERAL ASPIRANTS EAGERLY AWAIT ITS FALL

It's a tantalizing plum that hangs high on the municipal tree and holds with a tenacity that is exasperating to several gentlemen in waiting, who fondly hope that, when it does finally drop, it will land safely in their basket. A one hundred and fifty dollar a month job is soon to fall forth in search of the right man. Who will it be? Building and Plumbing Inspector J. J. Mehlstein says that business in his department has increased to such extent that he is in need of an assistant. He has partially convinced the health and sanitation committee of the Board of Supervisors of the necessity for additional help. Mayor Fern has come forward with a recommendation that the city fathers create a new office of assistant or deputy building and plumbing inspector and that one hundred and fifty dollars a month would be a fair and satisfactory salary.

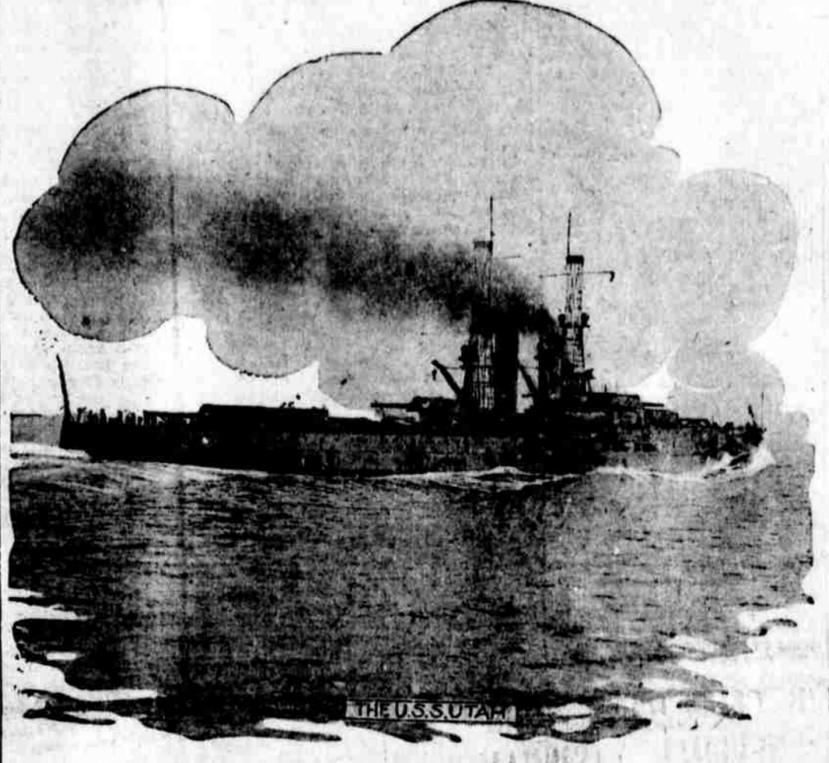

Who Wants a Fat Job? Who of the grand army of Republican patriots and party warhorses is willing to serve his municipality's call? Of course it is quite needless to state that no Democrat need apply. The ink had hardly dried on the document which brought the matter of creating another job, before one or more Republicans appeared on the scene willing to sacrifice themselves on the altar of a civic service. George W. Paty, a teacher connected with the Kamehameha Schools for Boys, was one of the first to offer his (Continued on Page 7)

15,000 BARRELS, CABLES KENNEDY REGULARS OFF FOR VOLCANO

Two companies of regulars for Fort Shafter left today on the Maui for the much-discussed Volcano "hike." The companies were E and G, in command of Capt. W. W. Chapman, with Lieut. McCleery in command of company E. They will land at Hilo and march to the Volcano. The hike is expected to take four days in all, and four days will be spent at the Volcano. They will return in ten days.

Calvin J. Kendall has been appointed commissioner of education for New Jersey at a salary of \$10,000 a year. Senator Black's constitutional amendment to raise the salary of the governor of New York from \$10,000 to \$20,000 was passed in the Assembly without dissent. \*\*\*\*\* former figure in the vicinity of two dollars a share. If this well continues to flow at the present rate, it means an income of something like three thousand dollars a day, which would seem to obviate the prospect of any assessment of the stock for development purposes.

Uncle Sam's Latest Dreadnought In Action

(Associated Press Cable.) PHILADELPHIA, Pa., Aug. 31.—The new battleship Utah, latest of the U. S. dreadnoughts, was commissioned here today, having completed her tests successfully.

WASHINGTON.—The new United States battleship Utah, which has completed her standardization tests off the Atlantic seaboard, is one of the most valuable of the new additions to the navy. She is of the Dreadnought class and a sister ship of the United States battleship Florida. Like the Florida, she carries ten twelve-inch guns and has a displacement of approximately 22,000 tons. The Utah will have a crew of from 850 to 950 men and officers. The photo shown herewith was taken of the Utah during her recent trial trip.

TO PLAN FIGHT ON COTTON WORM

A meeting of the Hawaiian Cotton Growers' Association has been called for next Saturday at 2 o'clock in the afternoon, at the Commercial Club, when the special committee named to raise a fund of \$3000 with which to fight the boll-worm pest is to make its report. "The cotton industry in the Islands will stand or fall on our ability to get rid of this pest," declared one grower yesterday, but another this morning said that the worm is injuring only about ten per cent of the crop. At any rate, the association will make a strong effort to raise the fund and send an entomologist to India to search out a parasitic enemy of the worm.

WILL IMPORT FINE STOCK

Alfred W. Carter, manager of the Parker ranch and member of the Hawaii County Road Commission, is going to the mainland on the Korea tomorrow for a three months' trip. It is a combined business and pleasure trip, he said this morning. He will bring back for the ranch a lot of high-bred stock, including both horses and cattle. The splendid Hereford herd will be added to.

Premier Is All For Peace

(Associated Press Cable.) TOKIO, Japan, Aug. 31.—Japan's policy of friendship toward the nations will be unchanged, according to formal announcement made today by the new premier, Marquis Kin-Mochi Saionji. He declared that the policy of the empire will be friendliness abroad and development at home.

SUGAR JUMPS IN NEW YORK

(Associated Press Cable.) NEW YORK, N. Y., Aug. 31.—Granulated sugar advanced five cents on the market today. Other sugars advanced ten cents.

TAFT TO BREAK GROUND OCT. 14

(Associated Press Cable.) SAN FRANCISCO, Cal., Aug. 31.—President Taft will be in San Francisco from October 13 to October 15, according to the latest plans announced, and will break ground for the Panama-Pacific exposition on October 14.

ILLINOIS MAN HEADS BAR ASSOCIATION

(Associated Press Cable.) BOSTON, Mass., Aug. 31.—Stephen Gregory of Illinois, one of the most prominent attorneys of the country, was today elected president of the American Bar Association.

MADERO SAYS ONE TERM ONLY FOR HIM

(Associated Press Cable.) MEXICO CITY, Mex., Aug. 31.—Francisco Madero, candidate for president at the coming elections, today endorsed a progressive platform and pledged himself to accept office for but one term.

AMBASSADOR O'BRIEN OFF FOR ROME POST

(Associated Press Cable.) TOKIO, Japan, Aug. 31.—Thomas J. O'Brien, ambassador to Japan from the United States since 1907, today sailed for his new post as ambassador to Italy.

PHILADELPHIA RAINSTORM LEAVES DESTRUCTION

(Associated Press Cable.) PHILADELPHIA, Pa., Aug. 31.—A terrific rainstorm here today did much damage.

GEORGE P. THILEN NAMED COURT STENOGRAPHER

George P. Thilen has been appointed to take the place of Court Stenographer Bell, who has resigned his position in the Circuit Court. Mr. Thilen was successful in passing his examination before Attorney E. C. Peters, taking down and transcribing 160 words a minute with ease.

ELEVEN THOUSAND TONS OF SUGAR TO GET TO THE MARKET UNDER PRESENT HIGH PRICES

Eleven thousand tons of sugar will get into the market at the present price of 5.36 cents a pound or better, according to the present prospects, based on the probable arrival of vessels now on the way with their cargoes. Some of this will go to San Francisco and some via the Tehuantepec railroad and so to New York while other cargoes have rounded the Horn and are now going up the Atlantic coast to the market. The ships Frye and Fooning Sney with a total combined cargo of seven thousand-odd tons are due in at market any day, having practically completed their long voyage around the Horn. The Lurline is now on her way to the Coast with 2,500 tons and the Hilonian with 1,500 tons and both cargoes will undoubtedly get high prices. The Virginian's first half-cargo, probably of six or seven thousand tons, is now on its way by the Tehuantepec road and up the Eastern coast, and will arrive at the market within a week. The present price should stand or an even higher price be obtained, as the Associated Press cablegram today brings news of a steady. The fact that these cargoes are getting in under the high prices means many thousands of extra dollars for the stockholders and sugar exporters.

YOUNG AVIATORS HAVE A NEW MACHINE SMASHED

There is pillkia among the youthful aviators of the Y. M. C. A., as their only machine has been smashed up and they are now unable to pull off their daring dip glides. Earl McTaggart is the one who has the worst kick coming, as he sent away to the Coast for a machine that was guaranteed to fly. It arrived by the last boat, and when the big box was taken up to the building the youths crowded around to see what a real machine was like. The lid was torn off and then they started in to take the wrapping off as well. Immediately there was a howl, however, as it was found that the machine was all smashed up and would not be any use. The matter of the smash-up is to be taken up with the shipping company and anyone else they can find to take the blame.

BERETANIA IN NEED OF OIL

Sixteen taxpayers and residents along that portion of Beretania avenue between Fort and Alani street are indignant at the condition of a business thoroughfare, and have gone to Mayor J. J. Fern with their troubles. They submit a petition which contains some lines of sarcasm at the expense of the Board of Supervisors. They ask that the section of the avenue be oiled. It is claimed that the dust arising has proved a detriment to business. They recite that inasmuch as the city fathers appear to have oil to scatter all over the city in a reckless manner, they believe that the spilling of some of it along Beretania avenue would be in order. They cite the oiling of a number of residential streets in Makiki district as incidents where oil is being distributed in a free and open-handed manner. Road Chairman Sam Dwight states that he will hearken to the call from Beretania merchants.

Masonic Temple Weekly Calendar MONDAY: Oceanic—Stated. TUESDAY: WEDNESDAY: Honolulu—Third Degree. THURSDAY: FRIDAY: Honolulu Chapter—Mark Master. SATURDAY: Aloha Temple—Regular. All visiting members of the Order are cordially invited to attend meetings of local lodges.

MEET on the 2nd and 4th Mondays of each month at K. P. Hall 7:30 P. M. Members of other Associations cordially invited. MARINE ENGINEERS' BENEFICIAL ASSOCIATION. HAWAIIAN TRIBE, No. 1, I. O. R. M.

Meets every first and third Thursdays of each month at Knights of Pythias Hall. Visiting brothers cordially invited to attend. W. J. ROBINSON, Sachem. E. V. TODD, C. of R. HONOLULU LODGE, 616, B. P. O. E. Honolulu Lodge No. 616, B. P. O. E. Meets in their hall, on King Street, near Fort, every Friday evening. Visiting brothers are cordially invited to attend. D. P. R. ISENBERG, E. R. GEO. T. KLUEGEL, Sec.

WM. MCKINLEY LODGE, NO. 8, K. of P. Meets every 2nd and 4th Saturday evening at 7:30 o'clock in K. of P. Hall, cor. Fort and Beretania. Visiting brothers cordially invited to attend. F. F. KILBEY, C. C. E. A. JACOBSON, K. R. S. OAHU LODGE NO. 1, K. of P. Meets every first and third Friday at 7:30 o'clock, Pythian Hall, corner Beretania and Fort streets. Visiting brothers cordially invited to attend. S. DECKER, C. C. O. HEINE, K. of R. & S. HONOLULU AERIE 140, F. O. E. Meets on second and fourth Wednesday evening of each month at 7:30 o'clock, in San Antonio Hall, Vineyard street, near Emma. Visiting brothers are invited to attend. GEO. A. DAVIS, W. P. WM. C. MCCOY, Secy.

RECREATIONS HYPNOTISTS MAKE GOOD. It is something unusual for a show to make good after having a fall-down on the first night, but Ayesha and Barnett have now shown they are there with the goods. Last night there were plenty of gentlemen ready to sacrifice themselves to the public amusement and the show went with a lively swing from start to finish. Ayesha hypnotized five men, whose rigid bodies were then placed across the backs of chairs and across one another, after which Barnett stood upon the topmost one. This demonstration was loudly applauded, as was the rock-breaking. The comedy element was excellent, and greatly appreciated by all. Barnett explains that their only desire is to amuse the public and they do not care whether the public is convinced of the genuineness of hypnotism or not. The performances certainly do amuse and there is always something new to raise a laugh. The heavier part of the show is now done by Ayesha, who acquires herself remarkably well in what must, for a woman, be a difficult role. The performances will be continued throughout the week and should be well attended. Those more deeply interested in hypnotism as a science can consult Barnett at the Orpheum from 3 to 5 o'clock daily. Eclipse Goes on the Dry Dock. This morning the erstwhile gasoline schooner Eclipse was hauled on the local marine railway and the vessel will remain there until all seams are thoroughly caulked. The Eclipse will probably be ready for sea and a resumption of the voyage to Manila, Philippine islands by the first of the week. Captain Helbig has hopes that he will retain the valued services of his former crew and officers including Chief Steward J. W. A. Redhouse and others.

HOME INS. CO. IS FLOURISHING New Company Decides Upon Policy for Writing Industrial Business. The Home Insurance company held an important meeting yesterday afternoon, an outcome of which was the announcement this morning by Manager Zeno K. Myers that the company is going to feature industrial insurance. This will take the form of insurance for workmen who cannot accumulate enough at a time to pay a quarterly or yearly premium, and arrangements will be made by the new company to have an agency plant for a system of monthly payments. Often the employers pay the premiums, not only in sickness, but on accident and health policies. This form of insurance, with the favorable start made by the new company, is expected to prove very popular here. The company has also decided to write plate glass insurance and also marine insurance for registered mail and small parcels, and arrangements are pending by which the company will be able to carry a large line of marine business by reinsuring part in other companies. Business is coming to the company along all lines now in a way, says Manager Myers that has simply amazed the company. Some big lines, as high as \$10,000, have developed, and the company handles this by carrying a small amount itself and reinsuring the surplus with some of the other agents here. The company has arranged for an advantageous lease of the rooms above the Gunst cigar store on Fort street and will move in the next few days.

MONEY WILL BE READY SATURDAY City and County Auditor James Bicknell and his staff will make lively work of preparing many hundred warrants for municipal road laborers in order that they can receive their money on Saturday. The City and County Supervisors are to meet at noon tomorrow for the sole purpose of passing upon labor pay bills. It is the intention to pay off the men on Saturday as Monday, being Labor Day, is a legal holiday. This morning, all municipal officers on the regular salary list were given their monthly stipends.

LOCAL AND GENERAL The matter of Esther K. Borega vs. John K. Apio to quit title has been discontinued. Michael Dillon, administrator of the estate of the late Fred Valkos, filed his application for discharge in the Circuit Court this morning. Order to show cause as to why certain land the property of Charles and John Johnson, minors, should not be sold, has been ordered by Judge W. J. Robinson. The defendants in the case of Lau Lam vs. A. A. Whitcomb, W. C. Aehl et al for ejectment have been allowed until September 23 to bring in their defenses. Twelve demurrers were filed yesterday afternoon in connection with the "labor recruiting" cases. These were in connection with the cases of Locampo, Casteneda, Owabb and Denso against Judge William L. Whitney et al. The appeal of Mollie Nash against the judgment given against her by S. S. Hookana, District Magistrate of Ewa, was filed in the Circuit Court this morning. She was fined \$100 and costs for selling liquor without a license. The bond of Phillip F. Frear was filed in the circuit court this morning in connection with the appeal against Judge Robinson's verdict in the Frear-Rosenblatt case. G. E. Bush and Marston Campbell are the sureties. The inventory in the estate of the late M. S. Gribbaum was filed in the Circuit Court this morning. At the time of his death he had 50,753 shares of the Kaeleku Sugar Co., Ltd., of a par value of \$19 each and 1000 shares of the Ewa plantation at par of \$29 each. The inventory also shows a number of lots of land and was filed by K. E. Singlehurst, the ancillary administrator. FLOORED JACK LONDON SAN FRANCISCO, Cal., Aug. 15.—From Eureka, where the man who looks for trouble speedily finds it, comes the news that Jack London, the author, and William K. Murphy Jr., son of a lumber king of Northern California, met in a Eureka cafe and failed to agree. There was an argument and then a fight and London went down. It was not as sanguinary an encounter as some of those described by London in his fiction, but it left its impress on London's face and on the mind of Eureka.

Furniture and Piano Movers City Transfer Co. Phone 1281 JAS. H. LOVE Shipping STRATHLYON CLOSE CALL FROM TYPHOON'S FURY

British Tramp Freighter Here On—Portland-Asiatic Hawaii—Santa Maria in P of Fuel Oil. Escaping the fury of a terrific typhoon which raged over a large area of Japan and China coast, the British tramp freighter Strathlyon steamed into the harbor this morning after a fairly pleasant voyage across the Pacific. The Strathlyon was the only steamer to leave the Japanese ports just before a typhoon which devastated a wide area of Tokio, had spent its strength and caused damage and devastation to a considerable number of craft both sailing and steam which had sought refuge from the storm at several Asiatic ports. One or more large vessels had become piled up on the beach at Yokohama and Kobe, as a result of the visit of the typhoon. The Strathlyon took on eleven hundred tons of sulphur while at Hakodate, Japan. In calling at other Japanese ports the vessel was supplied with other lines of merchandise including matting, rice and food-stuffs. Captain J. R. Shaw, is master of the vessel which succeeded in steaming out of the direct pathway of the storm and while his vessel encountered some very nasty weather just after leaving port, the remainder of the voyage was characterized as delightful. The Strathlyon is under charter with the Portland and Asiatic Steamship Company and takes the place of the Norwegian steamer Ryja which some months ago was wrecked. The vessel is now laying at the Railway wharf where the shipment of sulphur and some five hundred sacks of Manchurian corn is being discharged. It is the intention to dispatch the freighter for Portland and Pacific coast points on or about Saturday. In addition to half dozen European officers the Strathlyon is manned by a Chinese crew. Santa Maria Brought Oil. Forty-five thousand barrels of oil including a large number of drums of distillate was included in the shipment brought from the coast this morning in the Union Oil Company tanker Santa Maria. Captain Curtis, the master of the vessel reports that portion of the Pacific lying between the West coast and the Hawaiian islands as quiet and peaceful as a mill pond. The Santa Maria went to the Railway wharf before noon today to discharge. Captain Curtis reports that he succeeded in eluding the company of several stowaways who appear to await the opportunity to travel from the mainland to Hawaii in his vessel. He carries a number of Mexicans in his crew and that may account for the popularity that the Santa Maria has achieved among the dead broke Spanish immigrants who have drifted from Honolulu to the coast and now want to return to a more favored clime. Harbor Was Deserted. The departure of the American schooner Blakeley for Puget Sound yesterday afternoon followed by that of the American oil tanker J. A. Chanslor for a time left Honolulu harbor practically deserted of deep-sea shipping. Towards evening the British freighter Strathlyon made its appearance off the port from Hologate, Japan, with a shipment of sulphur, but this vessel arrived at too late an hour for entry, and was obliged to remain at anchor until this morning awaiting pratique by the Federal quarantine officers. Sparks from the Wireless. M. N. S. S. Lurline, en route from Honolulu to San Francisco, 9:30 p. m., Aug. 30—225 miles out; moderate N. E. wind and sea; all well. M. N. S. S. Honolulu, en route San Francisco to Honolulu, 8 p. m.—820 miles from Honolulu; moderate trade winds; smooth sea; rainy; all well. P. M. S. S. Mongolia, en route Honolulu to Yokohama, 8 p. m.—776 miles out; all well. P. M. S. S. Korea, en route Yokohama to Honolulu, 8 p. m.—510 miles off; strong breeze; all well. U. S. A. T. Sherman, en route Manila and Nagasaki to Honolulu, 8 p. m.—1086 miles out; all well. Korea Here in the Morning. It is expected that the Pacific Mail liner Korea with seven hundred tons Oriental freight for Honolulu will be off the port on or about eight o'clock tomorrow morning and this vessel should be alongside Alakea wharf by ten o'clock. The Korea is on the boards for an early dispatch to San Francisco it being the present intention that the vessel depart for the coast at five o'clock that afternoon. A late wireless from the Korea was to the effect that the liner was 570 miles off the port at eight o'clock last night, meeting with strong breeze. There is room for one hundred cabin passengers from this port. Another New Oil Tank. Another large oil tank steamer is being built for the Union Oil Company of California. She will be delivered early in 1912. Recently the company purchased the Oleum, which is being used to transport oil to various places along the coast, and when the new steamer is completed the company will have a fleet of fourteen large vessels. The vessel is being constructed by Swan, Hunter & Wigham, English shipbuilders and engineers, in the Woolle-End shipyard on the Tyne. She will have a tank capacity of 93,000 gallons, and will require a crew of twenty-five seamen. Company Branches Out. The Standard American Dredging Company who hold contracts for work in and about Honolulu are branching out and have recently acquired large additions to their already extensive equipment. One of the biggest dredging combinations in the history of the Pacific Coast will be formed as a result of negotiations that have been practically closed. The deal involves the purchase of all the dredgers and contracts of the North American Dredging Company of Nevada by the Standard American Dredging Company of San Francisco. Passing of the America Maru. The fast Japanese liner, America Maru, which is due to arrive here from San Francisco on next Tuesday will probably not be seen here for some time to come following the present visit. The America Maru has been sold to the Osaka Shosen Kaisha and the vessel is to be put into the trade between Kobe and Formosa, probably extending its run to Hongkong. The ship is an eighteen knotter and its presence in this trade plainly indicates to what extent the trade between the island of Formosa and Japan proper has developed. A Mad and Merry Day at the Customs House. A lanky ghost stalked through the corridors of the customs house today. It was the funniest and merriest of days, in that Uncle Sam authorized the payment of the monthly and princely stipends to his sixty or more young men who look after the business of the treasury department here. Pay day at the customs house is ever an enjoyable event. Its coming is not exactly regulated by the moon

or the stars, but this time the pay check was forthcoming at the appointed time. Nearing the Islands. The British freighter Crown of Castle, one of several chartered steamers operated on a run between the United Kingdom, the Continent, Honolulu and the West coast of the United States, is forty-seven days out from Liverpool and should arrive here along the middle part of September, according to the calculations of Fred L. Waldron, the local representative for the line. The Crown of Castle is bringing out a general cargo for the islands. It is reported that the vessel passed Magellan Straits on Aug. 20th. Lynch Takes Birth in Chanslor. Charles Lynch, assistant engineer in the Mamma Kea accepted the offer to go as chief engineer in the American oil tanker J. A. Chanslor, to take the position relinquished by Chief Moene, who was obliged to undergo treatment at the Queen's Hospital. The Chanslor sailed for the coast yesterday afternoon, after having discharged nearly fifty thousand barrels fuel oil at this port. Sherman Heard From. The United States Army transport Sherman from Manila by the way of Mariveles and Nagasaki, is due to arrive at Honolulu on Sunday afternoon. The latest wireless received from the troopship was to the effect that she was 1086 miles off the port at eight o'clock last night with all well on board. It is the present intention to give the Sherman a prompt dispatch for the coast. Driven Ashore, Soon a Wreck. Officers of the Oceanic liner Mariposa, at San Francisco, brought news that the bark Hjordis, formerly the Nairnsire, bound from Westport to Ponape with 1200 tons of coal, was driven ashore on a reef off the island on June 3 and within three hours was a total wreck. The captain and the crew were saved. Joins the Silent Majority. After having sailed for over a quarter of a century, the old American ship Abner Coburn will spend the remainder of her career as a coal barge. The Coburn was purchased from the California Shipping Company by the Western Fuel Company, and is at present being used as a coal-storage vessel. Militiamen to the Volcano. Two companies of militiamen from Fort Shafter to the number of a hundred or more took passage in the Inter-island steamer Maui at noon today and began a journey to Hawaii which will eventually land them at the volcano. Disembarking at Hilo the troops will march to the shrine of Pele. Maui Dispatched Today. The Inter-island steamer Maui was dispatched for Kohala, Paauilo, Laupahoehoe and Papaaloa shortly after noon today taking a general cargo including varieties of plantation supplies. The vessel is expected to soon return with sugar and a deck load of cattle. Navajo Repairs Completed. Repairs to the United States naval tug Navajo have been completed and the staunch vessel made a short excursion to sea this morning to try out the machinery. The Navajo is now ready for work of towing from Honolulu to Pearl Harbor. Hall for Kauai This Evening. Considerable fertilizer and lumber is included in the freight list for the steamer W. G. Hall which is on the boards for dispatch for Kauai ports at five o'clock this evening. The Lost Is Found. After having been given up for lost, the American schooner Espada arrived at Sydney, Australia, on August 1 after a hard passage of 160 days from Everett. Manila Asks for British Line. The business men of Manila are preparing a monster petition, asking that the Canadian-Pacific steamers make that city a regular port of call. Barkentine Gleaner Sold. The barkentine Gleaner has been sold to the Australia Box and Timber Co., Ltd., of Sydney, Australia. The old vessel brought \$2,796.41. Mrs. John Burke of Green Castle, Pa., has bequeathed a fortune of a million dollars to Rummel Ward, a poor wanderer in the West, who befriended her some years ago.

The Coburn was purchased from the California Shipping Company by the Western Fuel Company, and is at present being used as a coal-storage vessel.

TWO PROVISIONS IN DILLINGHAM BILL LET HAWAII'S WORK GO ON

Two provisions of the Dillingham naturalization effectively prevent that bill from hitting immigration here to any extent. The first is the exclusion of Hawaii from being affected by the terms of the "literacy test" regulation. The second is a general provision that excludes States and Territories from the provisions of the regulation against labor recruiting. Several copies of the bill have been received here. The Bulletin's Washington correspondent has sent to this paper the full text of the bill, as well as comments on it by the special immigration commission and a long explanation of the various provisions. The provision of the literacy test reads as follows: "That the following classes of aliens shall be excluded from admission into the United States: \* \* \* all male aliens sixteen years of age or over, who are physically capable of reading and writing, but who are unable to read and write in some language or dialect, such as to be tested in this regard in accordance with methods and rules to be prescribed by the secretary of commerce and labor, but an admissible alien may bring in or send for his father or grandfather over fifty-five years of age, or a son not over eighteen years of age, otherwise admissible, whether said father or grandfather or son are able to read and write or not. This provision, however, shall not apply to citizens of Canada, Newfoundland, Cuba, the Bermudas or Mexico, nor to alien residents of continental United States returning from foreign contiguous territory after a temporary sojourn therein, nor to aliens in continuous transit through the United States, nor to the inhabitants of the Philippine Islands, Guam, Porto Rico or Hawaii, except as hereinafter provided." (Continued on Page 8)

and writing, but who are unable to read and write in some language or dialect, such as to be tested in this regard in accordance with methods and rules to be prescribed by the secretary of commerce and labor, but an admissible alien may bring in or send for his father or grandfather over fifty-five years of age, or a son not over eighteen years of age, otherwise admissible, whether said father or grandfather or son are able to read and write or not. This provision, however, shall not apply to citizens of Canada, Newfoundland, Cuba, the Bermudas or Mexico, nor to alien residents of continental United States returning from foreign contiguous territory after a temporary sojourn therein, nor to aliens in continuous transit through the United States, nor to the inhabitants of the Philippine Islands, Guam, Porto Rico or Hawaii, except as hereinafter provided." (Continued on Page 8)

WEATHER TODAY

Temperatures—6 a. m., 76; 8 a. m., 80; 10 a. m., 82; noon, 83; morning minimum, 75. Barometer, 8 a. m., 29.95; absolute humidity, 8 a. m., 6.669 grains per cubic foot; relative humidity, 8 a. m., 61 per cent.; dew point, 8 a. m., 65. Wind—6 a. m., velocity 6, direction E; 8 a. m., velocity 6, direction NE; 10 a. m., velocity 11, direction NE; noon, velocity 11, direction NE. Rainfall during 24 hours ended 8 a. m., trace. Total wind movement during 24 hours ended at noon, 175 miles. W. M. B. STOCKMAN, Section Director, U. S. Weather Bureau.

ARRIVED Wednesday, Aug. 30. Grays Harbor—W. J. Patterson, Am. schr., p. m. Thursday, Aug. 31. Japan ports—Strathlyon, Br. stmr., a. m. DEPARTED Wednesday, Aug. 30. Port San Luis—J. A. Chanslor, Am. stmr., p. m. Grays Harbor—Blakeley, Am. schr., 4 p. m. Hawaii ports—Wallele, stmr., p. m. Thursday, Aug. 31. Hawaii ports—Maui, stmr., noon. MAILS. Mails are due from the following points as follows: San Francisco—Honolulu, Sept. 2. Yokohama—Korea, Sept. 1. Colonias—Makura, Sept. 12. Victoria—Marama, Sept. 13. Mails will depart for the following points as follows: Yokohama—America Maru, Sept. 5. Vancouver—Makura, Sept. 12. San Francisco—Korea, Sept. 1. Sydney—Marama, Sept. 13. TRANSPORT SERVICE. Dix at Seattle, out of commission. Logan, from Honolulu, for San Francisco, arrived May 12. Sheridan, from Honolulu for Manila, Aug. 14. Sherman, sailed from Manila, Aug. 14. Crook, arrived S. F., Apr. 13. Buford, sailed from Honolulu for San Francisco, arrived Aug. 15. Warren Stationed at the Philippines. Thomas at San Francisco under repairs. IN FOREIGN PORTS. Thursday, Aug. 31. YOKOHAMA—Sailed, Aug. 31: S. S. Shunyo Maru, for Honolulu (late—will arrive in Honolulu about September 9). PORT TOWNSEND—Arrived, Aug. 31: Bk. Albert, from Kailua. Wireless: U. S. A. T. Sherman, will probably arrive from Manila, Sunday.

WILL NOW BE TWO PATROLS OF Y. M. C. A. SCOUTS Scout Master Paul Super is starting another patrol of the Boy Scouts Saturday next owing to the large number of applications for enrollment that he has received. The Boy Scout department has been disbanded during the summer but now it is to start again and recently he called for twelve members to form a patrol, but six over this number applied so he decided to start a fresh patrol going. They will be known as the Owl troops, number one and two and next week will assemble on the roof of the Y. M. C. building and learn to hoot in the proper way. They will probably take a hike this Saturday and do some scouting and then after that they will get on with all usual stunts that are done by the boys. PERSONALITIES MRS. J. W. MASON, who resides in Hilo, will depart for the Coast on the Wilhelmina. COLONEL BAKER is again at home at Hilo after spending a pleasant vacation in Kohala and Hamakua. Following the closing of the streets of South Norwalk, a large number of residents have developed a disease known as "silly eye." Their eyelids turn yellow and lashes fall out.

Police Court Notes. The judicial chamber of Police Judge Monsarrat is getting lonesome nowadays, there being very few defendants brought in for trial. In his court room this morning, Mel Yin, the pincapple thief, who was brought in yesterday from Wahiawa by Police Officer A. McAngus, had his case put over until September 7. Attorney Wm. Crawford appeared for him. Kaula (w), charged with assault and battery, was discharged by the court. The evidence was so uncertain that Judge Monsarrat decided in favor of the discharge of the defendant. Hu Soong, who is alleged to have sold opium without a license, was fined fifty dollars and costs of court. Tim Moon, charged with the same offense waived examination and was committed to circuit court. C. Waldeyer, who paid no attention to the county ordinance covering the speed of automobiles, had his case continued until next week. It is believed he will plead guilty, when he appears in court again.

## ENGLAND, FRANCE AND GERMANY WORRIED OVER MOROCCAN AFFAIR

TYPICAL MOORISH HOUSE

POTTERY VENDORS

LONDON, August 5.—The Moroccan question is still the subject of real anxiety, and the attention of the British Cabinet is turned to it almost to the exclusion for the moment of home politics. The photos shown herewith show scenes in the important Moorish city of Tangier.

France hopes that a way will be found for a peaceful solution. To this

end she is prepared to go to the limit of conciliation, but cannot agree either to evacuate Morocco or hand over huge blocks of African territory merely in return for Germany's reiterated assurance that France will not be bothered in the future in Morocco. England has ordered her channel fleet to coal as for a lengthy cruise, which is an ominous sign.

## PLANS TO SHOW HOME PRODUCTS

The Public Service Association inaugurates today the first of a series of home products exhibitions. Every week or fortnight the large front window of the Public Service rooms on King street will be re-arranged with an exhibit of some Hawaiian home industry.

Today the masons are at work building a window exhibit of a wall made of Hawaiian lava brick from the factory of the Honolulu Lava Brick Co. This is one of the latest industries of Kaimuki, where the entire process may be seen in detail. Data concerning the uses of lava brick will be secured and kept on file at the Public Service rooms.

Arrangements are now being made with the Hawaiian Tobacco people, those interested in the Hawaiian honey, jam, cotton, hard woods, and other native industries for window exhibits that will later on be displayed permanently in the Public Service rooms. Data concerning possible new industries in Hawaii will be collected and kept on file for the use of possible investors.

The lava brick industry is something new to the islands, and it took a wise eye to see the possibilities of the hitherto useless lava fields and to induce local capital to invest money in the lava brick plant that turns out the remarkable island product now to be seen in the window of the Public Service rooms.

Chester H. Carmichael, superintendent of the brick factory, has recently successfully demonstrated that colored lava brick can be made, and has succeeded in making brick in six distinct shades.

## BIG HIKE ON FOR MONDAY

A great hike has been planned for Monday next by the Trail and Mountain Club. Governor Frear is expected to go along and show them how to do things. The secretary of the club, Alexander Hume Ford, will also be with the party.

This is one of the big hikes that the club undertakes every now and then, and the route planned out for Monday's trip is that of over the Pali. This will not be done by going down the road, but they will climb like flies over the precipitous edge and let themselves down hand over hand to the bottom.

It is thought that there will be a big party of them and that some daring deeds will be pulled off before they arrive at the bottom. Governor Frear is well known among the members of the club as a daring climber and one who can generally show the way to the rest of the bunch.

## NEW BOY SCOUT BOOK IS NOW READY FOR SALE

Charles F. Loomis, in charge of the boys department of the Y. M. C. A., has received a new book on the Boy Scout movement. It is illustrated throughout showing all the movements that the boys go through during their various stunts.

It has been approved by the Boy Scouts national committee and was edited under their direction. The cost of the book is ten cents and anyone who wishes to get one can fill in the order forms that Mr. Loomis has on hand.

It shows how the various games and other things are carried out and is done in colors.

## WATERFRONT NOTES

Mail, a Source of Pilikia.

Mail, placed in sacks awaiting at the office of the local steamship companies as well as at receptacles placed at the gateway of departing steamers is causing all sorts of worry to the representatives of the several lines.

The United States postoffice regulations call for a stamped envelope for all mail deposited in sacks after the close of the regular pouches at the postoffice. A glance over the letters left with the steamer officers has revealed the presence of many pieces of mail officers with the usual stamps affixed which is contrary to the law.

The steamship companies are in line for a stiff line for each infraction against this rule. Castle and Cooke have decided to place a representative to attend to the receipt of mail at their office and any such matter found not provided with stamped envelope will be turned over to the postoffice for disposal through the regular channels.

## CRITICISM OF OLONGAPO BITTER

That it is a short-sighted policy that would make Olongapo the naval base in the Philippines is evident from the following article, which itself is from a Manila paper:

OLONGAPO, July 18.—The U. S. S. General Alava reached this station today after a very rough trip from Cavite, and to say that this vessel's arrival was hailed with delight by the Americans stationed here is but putting it mildly. Well nigh a famine prevailed here until the arrival of this vessel, and the result is that quite a few civilian employes of the station are leaving for Manila, never to return. The typhoon weather has demonstrated the fact that it is not necessary for an invading army to besiege and isolate Olongapo from outside succor; typhoon weather can do the job to a nicety. The Meyer plan which caused the transfer of the bulk of the Cavite station to this place has but very few supporters here among the Americans, and the fact that Olongapo presents an admirable place to lay siege to successfully is one of their most stable arguments.

Another thing that seems to have escaped the strategists is the question of fresh water supply. One blow with an ax would cut off the entire fresh water supply of the station, as the water is procured miles from the station, being carried through a pipe line.

The Olongapo naval station is situated on the shores of Subic bay, Zamboales province, and is about three feet above the level of the sea. High mountains surround the entire bay. At the mouth of the bay is situated Grande island, which is heavily fortified. Within the last year naval work at Cavite has been abandoned, while at the same time the navy has been busy making great improvements at Olongapo. However, the question has not as yet been finally solved. Quite a few of the officials now stationed at Olongapo have made adverse reports against Olongapo for divers reasons. In one report it was stated that Olongapo was practically outside of the protective zone of Corregidor, also that a small invading army could establish themselves in the mountains that command the naval station, thus having it at their mercy. Communication by land with Olongapo in the event of hostilities would be hardly practicable. Although the army went over the trails about two years ago during the maneuvers, it would be utterly impossible to render aid to Olongapo during actual hostilities, inasmuch as the trails could be easily made impassable. Notwithstanding that the Americans have occupied the islands going on for fourteen years, there is no such thing as a wagon trail connecting Olongapo with Manila. When it is taken into consideration that an automobile could not get in or out of Olongapo by road, some idea of the utter isolation of this post may be had. The main object of any hostile force attacking Olongapo would be the capture or destruction of the drydock. Anent this question, when one takes into consideration the fact that the Hobson trick could be played to perfection in the west Grande island channel, which if obstructed would bottle up any fleet within, there is again demonstrated the short-sightedness of those who would make Olongapo the base. Even wireless communication with Olongapo cannot be depended upon, owing to the high mountains surrounding Olongapo, as also the peculiar atmospheric conditions that exist thereon.

## ARM-BREAKING IS NOW FASHIONABLE ON HAWAII

(Special Bulletin Correspondence.) HILLO, Aug. 29.—Appendix has long been out of fashion on this island, being as common to Orientals as to other nationalities, but a new stunt has come up to take its place, the breaking of arms by kicking of automobile cranks. This week two accidents of this character took place, one in Hilo and the other in Waimea, and the result two young men are laid up for repairs for some time. Both at Waimea, and it will be some little

time before he will be able to drive his Chalmers through to this city. Recruiting officers find very little difficulty in obtaining as many recruits for the naval service as they need.

## U. OF C. FACES HEAVY DEFICIT

BERKELEY, Aug. 21.—With a record-breaking attendance of nearly 4000 undergraduates, the formal opening of the State University for the fall term took place with a monster University meeting, in the Harmon Gymnasium building on the campus this morning. The meeting was the largest ever held here.

According to official announcement made by the University president at the meeting, the freshman class this year will pass the 1000 mark for the first time in the history of the institution. The total number of applications for entrance from freshmen numbered 1065. The registration for the same period last year numbered 838, for the preceding year 759 and for 1908, 593.

The meeting today was taken up with the annual address of the University president to members of the freshman class.

"The University today is almost bankrupt," he said. "In a financial way we are impoverished. We shall be forced to cut down expenditures, without replenishing equipment, and give up plans for the present as to any more buildings."

"There are two reasons for this condition. One, the amendment to the State Constitution regarding the payment of taxes on mortgages. This ruling has necessitated our paying taxes of \$40,000 on mortgages held by the University. The second cause is the abolition of the 3 cent tax for the support of the University. Under the new method, our income from the State, which comprises over half our revenue, is made by grant from the Legislature in the form of a lump sum, without tax, and without reference to the growth or prosperity of the State.

We shall close the year with a deficit of about \$30,000. There is no immediate relief in sight. Some of the classrooms will be crowded. We shall have to do the best we can. At the present time we cannot fill any vacancies in our teaching staff and shall have to ask your co-operation in getting along in the best way possible."

Declaring that failures among first-year students were partly traceable to the influence of fraternity life, and suggesting a plan to house freshmen in dormitories, forbidding their affiliation with the Greek letter organizations until the second year, the president closed with a short address of advice to members of the entering class.

Dr. William T. Hornaday of the Camp Fire Club charged before the House committee that Secretary Nagel and Fish Commissioner Bowers tried to suppress him.

## HONOLULU MAN FORGAVE IT ALL

(Special Bulletin Correspondence.) HILLO, Aug. 28.—Honolulu sad and Hilo triumphant, in the result of a romance which culminated here last Saturday in the wedding of Deputy County Attorney William H. Heen and Miss Mory Akau, both of this city. Had the wedding taken place two weeks ago it would have occasioned little surprise as the young couple have been expected by their friends to be preparing for such a step, but since the engagement of Miss Akau to Sam Wong, of Honolulu was announced only last week, the news of the wedding, which was of the elopement variety, came as rather a sudden shock.

The bride was up-to-date in every way, breaking the engagement with Wong by wireless, before the ceremony was performed. In reply a rather gathetic answer came from the Honolulu man who stated that he forgave her and asked that the blessing of the Lord be with her in her matrimonial venture.

The bride is very well known in this city and has always been a great favorite. She is the daughter of Mrs. Ah Hip, the wife of one of the most prominent of the local Oriental merchants, who commands the respect of the entire community. Heen is one of the youngest lawyers in Hilo but is rapidly advancing in his standing in legal circles and has a bright future before him in this line.

The wedding ceremony was performed by the Rev. Stephen Deaha at the home of Mrs. Thomas Forbes, a sister of the bride, after a rather stormy session at the home of the bride's parents, who, while they heartily approved of the choice of their daughter, did not like the sudden breaking of her engagement to Wong.

## A SKEETER TRAP AT LAST

Ethelbert Hoeyman has discovered a scheme by which he not only has beautified his lawn at Bloomfield, N. J., but has made mosquito traps so effective that his home has been rid of the pests.

Hoeyman buried three barrels in the lawn. In each barrel he put one foot of earth and planted lilies. Then the barrels were filled with water. While the lilies were growing goldfish were dropped in. Female mosquitoes came from all directions to lay their eggs among the lilies. As fast as a mosquito arrived the goldfish gobbled her up.

Screens have not been necessary in the Hoeyman home this summer.

THURSDAY . . . . . AUGUST 31, 1911

Nature never hurries: atom by atom, little by little, she achieves her work.—John Ruskin.

Nature never wears a mean appearance. Nature never became a toy to wise spirit.—Emerson.

Honolulu needs a thorough overhauling of its water pipe system because it needs water meters.

Just bear in mind that harbor matters and harbor rules should exist solely for promoting the business of the port of Honolulu.

Maine will be the hottest part of the country for the next ten days. The vote on Prohibition will be taken on the 11th of September.

Madero has the Progressives of Mexico perfectly well trained for nominating purposes. The next thing is whether they know how to carry elections.

When you let Politics alone it usually goes off on its own accord and us to the Devil for aid and counsel eventually takes the community along with it.

Honolulu business men should not waste a minute in picking out a candidate for Mayor. Half the troubles the usual campaign can be foretold by a little timely and sensible work, now.

When the politicians flock to the sor meetings and take the offices hand, you need no further instruction on the principal aim and purpose the men trying to get the laborers "organize."

If they could only find a pot of gold some of the mines where Honolulu may have been planted, the cup of gold would be full. Then might the greedy ones find sense, sell out and rest their money in home enterprises.

It is impossible to impress on the minds of our people too forcefully that prevention is better than cure. It is a business proposition, money making and money making for the busy man who "has no time" for public matters.

The Governor of Maine is thinking naming President Hyde of Bowdoin College as the successor to United States Senator Frye. Whether Hyde will become a second Woodrow Wilson is doubted, but if the report be true it shows that the Maine Democrats are mighty wise individuals.

Workingmen who see a lot of goods coming their way will be foolish indeed if they delay progress and shabby throw themselves out of advantageous employment by listening a lot of hee-lers who never do any work with their hands, but live off the money they make for laborers. The man who does his task better and quicker than another is the one who never fear for profit.

It is gratifying to have newly appointed officers come to the country recommended by those with whom they have been associated. Experience teaches us however that the payers of Hawaii must pay a good price for the education of these gentlemen.

## EVENING SMILES

Reminiscent.—"What did your wife do when you got home the other night?"  
"Not a word. She just sat down the piano and played 'Tell Me an Old Old Story.'—New York Evening Mail.  
"Who gave you that black eye?"  
"No one gave it to me; I had to at like the dickens for it."  
"Do you realize that the lee water

men who soon find conditions of soil, climate, material, labor, transportation, everything indeed, totally different. The people pay the price of the mistakes.

Women composed the larger part of the audience that listened to Dr. McCormack last evening, and yet when the women of the city were called together some months ago to hear a practical talk on the mosquito campaign, about a baker's dozen appeared. It must be that the women are interested in the sanitation of the city but the problem is how to use that interest in a practical, active way. Certainly every man, woman and child should have a part in the great work of making this a more healthful city, and keeping it so.

After more than a quarter of a century when the rancor of the time has subsided, James Ford Rhodes describes clearly and without prejudice "The National Republican Conventions of 1880 and 1884," in the September Scribner. These contests which nominated Garfield in one case and Blaine in the other were among the most dramatic in our political history and are of especial interest as the country is warming up to a national contest that bids fair to bring a repetition of the exciting days when conventions were stamped and great battles were fought.

### HONOLULU'S PROGRESSIVE BUSINESS METHODS.

This season has proved most satisfactory in the local business circles as summer seasons go. Usually there is a dropping away in publicity during the summer months but this year the progressive merchants have continued their appeal to the public. Adopting progressive methods they find that advertising pays the year round.

It is not too much to say that this month will make a new record as a selling period. All of the special sales, of which there have been a good number, during the first part of the month, have been good, according to the statements of advertisers who have used large space in the Evening Bulletin. The best proof of it is the continuance of the sales through September.

The Bulletin has had a steadily increasing patronage on merit. Much of its business is exclusive, and many Honolulu advertisers have found that no other newspaper is necessary to a successful sales campaign.

Regular advertisers who have used the columns of this paper in a generous measure are now, as always, welcome patrons who are getting a constantly advancing return for their money.

The fact that the Evening Bulletin has the largest circulation of any newspaper printed in the Islands is coming to the attention of the advertisers more convincingly every day.

Snarling pettifogging newspaper work has impeded the city's advancement, but the yellowest newspaper cannot fool all the people for long at a time. So those devoting their time to knocking the Bulletin have found that they cannot succeed by that route.

"Thank you have just drunk from may be swarming with microbes?" asked the fussy health faddist, just as we had finished refreshing ourselves.  
"Yes, I do," we answered, defiantly. We mopped our perspiring faces as we spoke and attempted to pull our wilted collar together in front, for dignity's sake.  
"And aren't you afraid of those microbes in the ice water?"  
"No, sir; we are jealous of them."  
—Cleveland Plain Dealer.

This town likes the Evening Bulletin and its progressive patrons are growing bigger and better all the time. The foolish ones who strive to increase trade by tearing down others find their place invariably at the bottom of the heap.

### CHILDREN RUNNING AUTOS.

Not many days ago a gentleman of the city happened to overhear two boys in their "teens" discussing the speed at which they had driven autos. They were seated at a sodawater stand, and seemed proud of the fact that those about them could hear their boasts of having broken the speed limit between town and Pearl City, and in various other sections of the city and its suburbs.

All of which brings up the topic of the age at which youngsters should be allowed to run an automobile.

The youth referred to made veritable jackasses of themselves with their boastfulness, and no doubt they are still at large jeopardizing the lives of Honolulu men, women and children.

But it appears Honolulu is not the only city with this brand of auto-fool humanity. There are others, and the question appears to be whether the children who run the machines or the parents who allow it, should be brought before the community and publicly spanked.

A somewhat similar condition as that related locally has caused the Newark (N. J.) Evening News to deliver itself as follows:

"Opinions differ as to the lowest age at which children should be allowed to run automobiles. Some authorities favor three years. Others maintain that the child is better off if made to wait until seven, or even eight. It will then very quickly make up for lost time, they say, and will soon overtake its fellows who started going to the garage at three or four; in fact, there is no advantage in forcing the child, for what it gains in proficiency at the steering apparatus it loses in dexterity with hammer and chisel, and walking ability. A child should not be sent on the road unable to repair a break or leg it home. It should be left free for several years to develop physically, theseervatives say, and it should at least be tall enough to reach the pedals without sliding off the seat.  
"The radicals maintain, on the other hand, that the sooner the child gets the helm into its hands, the better for its success at motoring. Auto driving should be an instinct with it, not an acquired habit. To make the little one a natural born motorist, prenatal influences should be evoked. By the time the baby is old enough to recognize the family, it should know the feel of the wheel, and at four years it ought to be able to take out a touring car unassisted and without fear. The early bird catches the worm.  
"Between these extremes in this matter, as in all things else, there is a happy mean. We believe the experience of several generations will show that the proper age to start a child on the road is five years. At five the child possesses a keen intelligence, as all parents will agree, to this being coupled shyness and caution not found in children of seven or eight. Equipped with this combination of good qualities, the child can be trusted with the family auto with the least possibility of danger to itself. Before that age the youngster is apt to rush into a harmful precocity; yet it is true that the primary instruction should not be given in the years of recklessness that follow. On the decision of the parents as to when little Johnny shall take his first joy ride much of Johnny's future happiness depends."

### ROOSEVELT / NO THE PANIC.

Roosevelt takes all the "blame" for allowing the Steel Trust to absorb the Tennessee Coal and Iron Company in order to check the panic of 1907, and he is entirely satisfied that he did exactly right.

The appearance of the ex-President before the investigating committee to give testimony on what he did as President has no parallel in American history. Nor has Roosevelt, so the incident need cause no surprise. The details of the hearing were lengthy, and Roosevelt has summarized what he said before the investigators, in a signed editorial of the latest Outlook. Though Mr. Roosevelt is now charged with having been beautifully bluffed by a pair of Steel Trust sharpers, he is not ashamed. He is proud of what he did. He writes:

"Nobody need feel either concerned as to whether anything done in my administration will be 'discovered' for the excellent reason that nothing was hidden. It was not my privilege or in my power to search in the hidden domain of motive. My action was not conditioned upon what I believed to be the motives actuating the steel corporation but upon the belief that the action they proposed would enormously benefit the general community at that particular moment.  
"Whether the chief motive for the steel corporation's action was to absorb the Tennessee Coal and Iron

company or whether it was to save a threatened New York firm from failure and thereby stop the panic did not concern me. That both motives were in their mind and thought I still think is possible. My concern was that action should be taken and the situation saved.  
"Most people have short memories, but if they will consider the situation carefully, they will understand that it was not a question of saving any bank or any trust company, but of saving the plain, common people in all parts of the country from dreadful misery and suffering. This my action did.

"Nobody need feel either concerned as to whether anything done in my administration will be 'discovered' for the excellent reason that nothing was hidden. It was not my privilege or in my power to search in the hidden domain of motive. My action was not conditioned upon what I believed to be the motives actuating the steel corporation but upon the belief that the action they proposed would enormously benefit the general community at that particular moment.  
"Whether the chief motive for the steel corporation's action was to absorb the Tennessee Coal and Iron

**SPOONING DRIVES HUSBAND TO SUICIDE**

ST. LOUIS, Mo., Aug. 8.—Philip H. Nickerson, a salesman, cut his arteries in an attempt to end his life because, he said at a hospital today, where he is recovering, his wife is too affectionate. He has been married three months.

"I'm fond of my wife," he said, "and want her to be fond of me. But there is a limit to all things. She wants to sit continually on my lap and hug and kiss me. If I stand up she stands up, too, and places her arms about me. It got on my nerves."

**Waterhouse Trust**

**Land of Puupueo**  
Manoa Valley

**WHEN** a man buys something useful which at the same time is steadily increasing in value he is twice fortunate. It is only a little over ten years ago since the pioneer settler on the land of Puupueo made his home there. Then there were none of the many conveniences required by the exacting suburbanite. Now all the advantages that can possibly be asked for are procurable: Mountain spring water, telephone, electric light and Rapid Transit service, and gas for cooking.

**BE TWICE FORTUNATE**, and purchase one of the most desirable house lots to be had within three miles of the Capitol.

Remember, Easy Terms Are Offered.

**WILL PROTECT THE EXPORTER**

Harbor Commission Handles Regulations and Adopts as Recommended.

The equal protection of the exporters as well as the importers was dealt with by the board of harbor commissioners at their meeting held yesterday afternoon. Commissioner Wakefield stated that the former should be given the same privileges for storing their freight on the wharves and accordingly outgoing inter-island freights originating in Oahu, are to have three days allowed for storing.

During the discussion as to the rules and regulations for the handling of freight the joint resolutions passed by the chamber of commerce and the merchants' association were considered by the commissioners and taken into consideration. Some of the proposals were adopted in toto while others were not. As foreshadowed by the Bulletin, the result will probably be a compromise.

The Mahukona wharf plans were again up and T. H. Petrie of Castle & Cooke told the board that the directors of the railroad thought that it would be a mistake if the government wharf were raised above its present height. At the present time the bags of sugar were brought to the wharf by chutes and then lifted over and dumped into the scows alongside. If the wharf were raised another couple of feet he said the height of the bags would interfere with this for they would be too heavy to stand the strain of dropping the extra couple of feet.

Finally after a lot of discussion over the question the commissioners voted to bring the wharf up to the same height as the railroad wharf. The footway also came up for some discussion and Mr. Petrie objected to several things in connection with the present proposed plans. When it came down to a matter of incline and it was pointed out that if this was too steep the public would be inconvenienced, he said that the public would only be inconvenienced a little. The commissioners could not see it this way, however, and the one-in-ten grade will stand.

With reference to the proposed new landing at Kiheli-Mau, which is to take the place of the present landing at McGregor's, a letter was read from Alexander & Baldwin. It stated that the president, F. F. Baldwin, was willing to sell the site for \$10. The fee simple of the land is owned by the estate of the late H. P. Baldwin. The estate will in all probability be wound up next March and then the title can be made over to the Territory.

C. K. Akai of the City Mill Company, who bid for 299,000 feet of timber for the Hackfeld wharf at \$17.75 per thousand feet, was present to explain that there had been a mistake. After they had heard his explanation the board decided that the best thing to do under the circumstances would be to call new tenders.

**WHERE CLEANLINESS IS KING**

We invite you to come unannounced to our Sheridan street milk depot, or to any of the dairies contributing to this Association.

It will show you to what lengths we go to assure absolute cleanliness in milk. We also treat every ounce of milk to our electric purifying apparatus.

**Honolulu Dairymen's Association**  
Phone 1542

**Advertising Talk**  
By Merl.

Advertising is the modern method of education in the business world. Every luxury, comfort, convenience and necessity of life is brought to the attention of the public through the daily papers.

A perusal of the advertisements in the Bulletin will at once show you the big concerns in your city. The live ones that are doing business every business day in the year.

Why? It is just this: Every day they are educating you as to style, quality and price. You know where you can purchase the articles and when and what you will have to pay for them.

The man who is in business for business' sake, long ago learned the importance of publicity and has not stunted himself in the purchase of newspaper space and keeps that space filled with his store's news.

The houses that advertise in the Bulletin have a reputation to maintain for honesty and square dealing. They are willing to stand out in the sunlight of investigation. The house that tells you just what it has for sale and the price is the house that inspired confidence. Bulletin advertisers are in this class.

**MAYORALTY NOSE OUT OF JOINT**

The mayoralty nasal appendage is out of repair and city hall corridors know not the presence of His Honor Mayor J. J. Fern today.

Mayor Fern has been troubled for some weeks past with a series of boils which appear with distressing persistence on a useful facial adornment.

The Mayor was obliged to leave his official duties yesterday and telephoned down to Chief Clerk Riverburgh that Bless would prevent his being in attendance at the Mayor's office today.

In event of "His Honor's" continued absence, Supervisor Eben Low may be called upon to preside over the deliberations of the city fathers who propose holding a brief meeting at noon tomorrow designated for the passing of labor payrolls.

With Low in the chair there is generally something doing.

A proposition to pension school teachers was voted down at Brattleboro, Vt.

Whitney & Marsh's sale of wash goods begins tomorrow morning. The biggest choiera germ known is on exhibition at the Anchor Saloon. Go and see Jos. Roman to have your hat cleaned. 123 Beretania St. Crystal White Soap has no equal in the laundry. Ask your grocer for it. 'Round the island summer rate, \$30 Lewis' Stables and Garage, Tel. 2141. The wise man buys the wise cigar—the O. W. L. Sold everywhere. Now 5c. Dr. J. J. Carey has resumed practice at his office, room 307, Boston building. Fine assortment of Lily Bulbs, \$1 per dozen. Mrs. Taylor, Florist, Phone 2339. The genuine Campbell Kid Dolls right from the factory at Wall, Nichols Co., Ltd. We have a new line of novelty toys and favors for children's parties. Arts and Crafts Shop. If you want a good job done on an auto or carriage take it to Hawaiian Carriage Mfg. Co., 427 Queen St. Don't miss seeing the fine display of hand-decorated Hawaiian scenes on China at the Curio Den, 1113 Fort St. Thirty-three cases of new goods, including Boy Scout suits. Everything free for Green Stamps. Fort and Beretania. The Hilo company of National Guard has planned to hold its six days' encampment commencing October 9. New Fall millinery to be shown at Sachs' on Friday. John Nott, pioneer plumber, is the right man for plumbing and tin-smithing. Office and shop Merchant near Alakea. For distilled water, Hire's Root Beer and all other popular drinks, ring up phone 2171. Consolidated Soda Works. An eighteen hole bogey golf match is scheduled for Sunday, Sept. 3, at the Country Club. Entries will close at 10 o'clock. Poles and wires have been strung as far as Hauula and in a few days there will be telephonic connection to that place. An important meeting of the Kamehameha Alumni Association will be held tomorrow evening at 7:30 o'clock. A large attendance is expected. Work on the Hilo-Hamakua extension of the railway is all ready for the steel bridge material that is expected to arrive by the Missouriian. Sale of white wash goods at Whitney & Marsh's begins tomorrow morning. Mail is too slow for anything of importance on the other islands. Use wireless. Perfect service; low rates. Office: Adams' lane above Hotel street. A requisition for a new diving suit was made yesterday on the harbor commissioners. There is much work in examination of piles, etc., below the surface. Honolulu Photo Supply Co. have all the requisites for home portraits—kodaks, portrait attachments, flash powders, adjustable backgrounds, etc. Travelers' cheques, sold by Bank of Hawaii, Ltd. are accepted at par all over the world. They constitute the most convenient form of carrying money in existence. Large Panama hats for ladies at Miss Power's Millinery Parlor, Boston Bldg., Fort street. The smooth working of the air-brakes that have been installed on a number of Rapid Transit cars, seems to give entire satisfaction to all concerned, especially the travelling public. Genuine Persian Angora kittens will be on display in A. B. Arleigh & Co's window on Hotel street on Friday and Saturday of this week. They are pure white in color with long silky fur and a beautiful house ornament. Bred from pedigreed stock in Honolulu. The old brick building at the corner of Hotel and Nuuanu streets, for a number of years occupied by a Chinese fruit store and a Japanese barber shop, is being completely renovated. A glass front is being put in and a large oven is being built in the back end. It will be opened up as a Chinese bakery in a short time. At Masonic Temple this evening at seven-thirty a joint entertainment will be given by the ladies of the "Order of the Eastern Star," in honor of Robert Morris' birthday. Members of Leahl Chapter No. 2, Lei Aloha No. 3, Harmony No. 4, and visiting members of the O. E. S. are cordially invited to attend. The Temple is being decorated today by a large number of the members of the order.

### SUDDEN TRIP ON SANITARY WORK

With the exception of Governor Frear and Land Commissioner Charles S. Judd, most of the heads of Territorial departments are out inspecting something today. Where ever an inquiry is made the response is "gone down the country" is received.

The board of health and the sanitary commission members are out on various missions. Some of them have gone to Kahuku and others to Waiakula. Secretary Mott-Smith gathered Dr. and Mrs. McCormack in and started off around the islands with them.

As the result of a meeting held yesterday afternoon between the president of the board of health, Dr. J. S. H. Pratt, and the sanitary commission certain matters were brought out which it was thought should be inspected straight away and accordingly they boarded their automobiles and went down to Kahuku. They gathered in Attorney General Alexander Lindsay, Jr., so that there should be no mistake or delay.

Dr. Pratt left word that he would be back again in time to attend the regular meeting of the board of health this afternoon at half past three.

Chicago is claimed to have four or the six leading pitchers of the National League. They are Brown, Ritchie, Overall and Cole. The other two are McQuillen of the Phillies and Mathewson of New York.

Letters and telegrams expressing confidence in Dr. Harvey W. Wiley, the pure food expert of the Department of Agriculture, are pouring into the White House from all over the country.

September 26—L. 7337. Thos. Watson vs. Mrs. Annie Watson; trial; (7), Schnack.

### NO HITCH ON OAHU TUNNEL

While the government is looking into the water rights that may be affected by the construction of the big Koolau tunnel to serve the Oahu Sugar Company, it was stated at the land office today that there is no hitch whatever arising and that what is really being done is making an investigation of the rights asked for across government land.

The blue print of the plan shows where the line of pipe or ditch will enter the Waialae first district, which is government ground. It passes straight along the side of the Pali until it meets the Waialae main stream where this bursts out of the mountain. Some hundreds of feet beyond this is where under the present plans the tunnels is to be started.

The only matters that have to be looked into very carefully is whether or not there are any water rights existing over the ground needed for the ditch, just at the point where the tunnel will take its main supply from the stream, and whether or not they have the right to take the water at all will all be investigated.

There is no doubt raised as yet, however, as to any probable hitch in the scheme. As a matter of fact the land department will work right ahead on it. The necessary information cannot be gathered for some considerable time and the matter will be undecided until then.

#### Link McCandless' Claim.

According to Governor Frear's version of the case it rests with Link McCandless' claim for title. The Governor said today: "It is a matter which we will have to make a very careful investigation of. I understand that Mr. McCandless claims a title to the water rights but on what grounds I do not know."

The matter has been before the government for a long time past but owing to more pressing matters cropping up from time to time it has never been gone thoroughly into. Mr. W. E. Rowell, when he was superintendent of public works, made a report of the situation in connection with a scheme for running an electric power plant out there. During Mr. Carter's time as governor an injunction suit was started against Mr. McCandless but it was never finished and I think is pending still.

"Prior appropriation does not apply here although it holds good throughout the Western states on the mainland. Neither can the adverse use of water be brought against the government. That is to say no one can simply jump in and take as much water as they want without consulting the government about it. At the same time a careful examination into the circumstances must be made before anything can be decided one way or the other."

### M'CANDLESS TIES UP WITH WILSON?

(Continued from Page 1)

certain that Wilson is getting the backing of McCandless, and the only explanation is that the two of them are planning on rebuilding the Democratic machine on the windward side of the island.

After Wilson went out of office, another shake-up was given the Democratic office-holders when Frank Pabla, Republican, was named road overseer of Koolau-poko district, and J. K. Paele, Democratic warhorse, was led from the public stable. Paele's plan for parcelling out the road work among good Democrats no longer worked, and the number of Republican enthusiasts in the district grew accordingly. This used to be a Democratic stronghold, but McCandless has realized that he will have few Democratic votes to count on unless he can make a play as the friend of the Koolau-poko wroking-man.

Practically the only public work that will be going on in this district for the next year will be belt-road work, hence the formation of the alliance between McCandless and Wilson. Should Wilson secure the contract, McCandless can back him with the ready money to get the work started, and between the two they can split down a bunch of Democratic votes that will come in mighty handy when Link Aguin comes forth as candidate for the delegateship.

### WANTS FOR SALE.

Diamond cluster ring, cost \$1000, at a sacrifice. Party leaving town; must have money. J. Carlo, 1117 Fort St. 5019-1f

### FOUND.

Sterling bicycle. Owner can have same by calling at the Owl Ice Cream Parlor, Iwilei, proving property and paying for this ad. 5019-6f

### LAND BOARD HAS BIG SCHEDULE

The land board has a big slate to clean up this afternoon, a special meeting having been called. It is thought that the matter of the Maui homestead and timber-cutting controversy will not come up, however, unless it is brought before the board by one of the members.

Among the unfinished business is the report of Chairman Carter on the Kaula land. This is on the application of Hackfeld & Co., which was brought up at the last meeting and on which the chairman was asked to bring in a report.

There are also reports to be received from Land Agent Williams on the Waialae camp sites and also on the proposed Lanipahoehoe camp site.

The new business will include the application of the Hutchinson Sugar Plantation Company for a lease of land at Manuka. Then there is an application from the Hawaiian Agricultural Company in connection with the lease of some land at Moaula and Palima.

There is also the matter of the exchange of lands at College Hills by the J. B. Atherton Estate.

The Waimea branch of the Hui Kaulamann is applying for the purchase of 12,625 square feet of land at Waimea, Hawaii. The ground is wanted for building purposes, the society wishing to erect a clubhouse.

Another application is that of Robert Hind to lease some land at Puuanahulu, North Kona, Hawaii.

### REAL ESTATE TRANSACTIONS.

### MUNICIPAL PLUM BIDS ON KAUAI HANGS HIGH WORK DELAYED

(Continued from Page 1)  
services. Paly is understood to have the backing of Territorial Secretary Mott-Smith in the race, and he is believed to be the one who will cross the tape.

Charles Muraskey, who for years has been associated with Lucas Bros. in the contracting and building business, might be induced to accept the bid, and it is said that he stands well with certain members of the board. Muraskey's record in Republican councils is likewise declared as above reproach by his supporters.

#### The Achi Machine Not Overlooked.

Then there is the Charlie Achi political machine, which is said upon good authority to have one or more men at its beck and call who would respond to the magic signal ordering them to appear in the running for the \$150 job. It is stated that when the new building ordinance was first under consideration by the supervisors, "Boss" Achi was a frequent and interested spectator. He on more than one occasion lifted up the voice of protest over the extension of the fire limits. It is understood that former Supervisor Ahia might be found in the arena wearing the regalia of an Achi man.

Chairman Kruger of the health and sanitation committee is not so sure that the necessary vote will be secured to grant Building and Plumbing Inspector Miehstein an assistant.

Should the mooted increase go through, it is stipulated that the successful applicant for the position must be a man well qualified in building and construction work of all kinds. He must be familiar with all the provisions incorporated in the new and rather lengthy building ordinance, and see to its enforcement.

If the new job is created, it is more than likely that such timber will be selected to fill the position.

F. C. Thompson of the Princeton University theological school successfully defended his title of A. A. U. all-around champion at Chicago with 6709 points. J. W. Donahue was second. Two new records were made, Thompson doing the half mile walk in 3 min. 37.2-5 sec., and E. Schobinger doing 11 ft. 10 in. in the pole vault. Seven others contested for the honors.

Colonel Gonzalez has begun work on barracks for three hundred men at Tijuana, Mex.

(Continued from Page 1)  
Public Works Department here and the Kauai engineer, J. H. Moragne, to prevent a mistake, and that the bids were really called before the plans and specifications could be completed.

A number of local contractors are figuring on the job and it is probable that several will go to Kauai to make estimates.

It has been the custom of the various county engineers to send in their proposed plans and specifications to the Department of Public Works. This is done in order that there shall be no mistake when the bids have been opened, says Campbell. There are a number of small details which must be provided for under the law, and the county engineers, rather than risk making a mistake, send their plans up to be O. K.'d here.

The plans for the Hanapepe bridges were sent up a couple of times and this somewhat delayed matters. At the same time, the bids were called a little early, said Superintendent of Public Works Marston Campbell today, and the board will meet the contractors by extending the time.

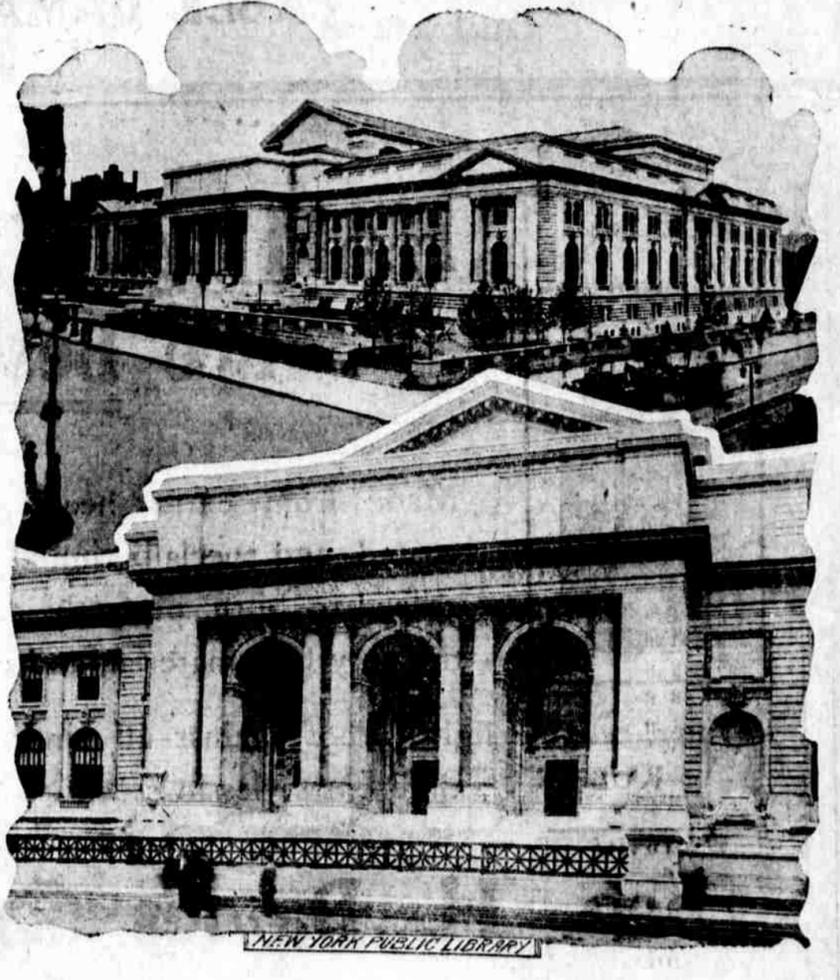

There is another point in connection with the matter that will delay the start of the work on the superstructure, anyway, and that is that the concrete piers are not yet finished, the contractors being still at work on them.

### CANAL WORK MAY BE PUT UNDER THE PROBE

WASHINGTON, Aug. 16.—The Panama canal work is now proposed for investigation by Chairman Wilson of the house committee on labor. He has introduced a resolution calling for an investigation of reports that American workmen are being discriminated against by canal officials employing discharged employees from South American railways, and that an agreement between President Taft, then secretary of war, and locomotive engineers, conductors and others employed in the canal work, for overtime and longevity pay, was being violated. The resolution was referred to the rules committee.

President Taft has accepted an invitation to attend the banquet of the New York State Bankers' Association in New York city on January 2.

### NEW YORK'S NEW LIBRARY—NOT FROM CARNEGIE

NEW YORK PUBLIC LIBRARY  
NEW YORK, August 16.—The New York public library's new \$7,000,000 home in Fifth avenue was dedicated and thrown open to the public recently. The structure has taken ten years to build, and occupies two en- Leffnox and Samuel J. Tilden, making blocks, from Fortieth to Forty-ing perhaps the most complete library second street. The new building system in the world. John Bigelow, houses under one roof the splendid former minister to France and now in libraries given to the people of New his ninety-fourth year, is president of York by John Jacob Astor, James the institution.

## BISHOP ESTATE ORDER HITS HIM

Placed in the position of losing \$3000 by the orders of the Bishop Estate to vacate his premises, a Japanese soy maker, T. Terada, is endeavoring to secure an extension of his tenancy. It is another phase of the Waipiole cesspool difficulty.

The Bishop Estate, after the cesspool nuisance had been protested against and again, has taken matters into its own hands and ordered the tenants of the property to vacate. The order was final, and though the soy makers endeavored to secure a stay of proceedings from F. S. Dodge, superintendent of the estate, they were unable to do so. Now Terada is opposing the order because he says it will result in great financial loss to him. The order goes into effect Saturday.

Terada declares that though he has sought diligently, he has been unable to find any place to move, and that if he does move now, he will ruin his soy mash. He has eighteen large tanks of soy mash, and says that if the stuff is moved while it is reaching the proper stage of fermentation, it is spoiled. His plant and stock are valued at \$3000. He has also twelve barrels of soy ready for use.

Terada wants two more months on the premises. He says he does not wish to have to take the matter into court, but that he can not move now without practically ruining his industry.

## PROVISIONS IN DILLINGHAM BILL

(Continued from Page 2)

Inafter provided, nor to aliens arriving in the Philippine Islands, Guam, Porto Rico, or Hawaii.

The other provision in which Hawaii is directly interested, though not affected, is the following:

"Sec. 5. That it shall be unlawful and deemed a violation of section 5 of this act to induce, assist, encourage or solicit any alien to come into the United States by promise of employment through advertisements printed, published or distributed in any foreign country, whether such promise is true or false, and either the civil or the criminal penalty imposed by said act shall be applicable to such a case; provided, that States or Territories, the District of Columbia, or places subject to the jurisdiction of the United States, may advertise and by written and oral communication with prospective alien settlers make known the inducements they offer for immigration thereto, respectively, and they may pay out of the ordinary State and Territorial funds, regularly appropriated for that purpose, the transportation of such alien settlers, provided always that such authority shall not be used as a means of evading the provisions of this and the preceding section."

## WARNS USERS OF INSECTICIDES

BY C. S. ALBERT.

(Special Bulletin Correspondence.)

WASHINGTON, D. C., August 16.—

Under the provisions of Section 4 of the Insecticide Act of 1910, the Department of Agriculture is charged with the duty of examining specimens of insecticides, Paris Green, lead arsenate and fungicides for the purpose of determining from such examination whether such articles are adulterated or misbranded within the meaning of the Act, and subsequently recommending such legal action, if any, as the findings may warrant.

Sections 1 and 2 of the Act are especially applicable to persons engaged in trade in the above articles in the Territories, and Insular Possessions of the United States, viz. Alaska, Arizona, Hawaii, New Mexico, Philippine Islands, and Porto Rico, in view of the fact that the manufacture or sale of any adulterated or misbranded insecticide, Paris Green, lead arsenate or fungicide within the Territories is punishable by fine or imprisonment. An insecticide or fungicide is any substance or mixture of substances intended to be used for preventing, destroying, repelling, or mitigating any insects or fungi in any environment, whatsoever. Inquiries on the part of those interested may be addressed to the Insecticide and Fungicide Board, Department of Agriculture, Washington, D. C., to whom application may be made for copies of the law and rules and regulations for its enforcement.

The Insecticide and Fungicide Board, composed of four members selected from the scientific staffs of the Bureau of Animal Industry, the Bureau of Plant Industry, the Bureau of Entomology and the Bureau of Chemistry, was organized by the Secretary of Agriculture to assist him in enforcing the provisions of the Insecticide Act of 1910 as provided by law, and has just issued Decision No. 1, relating to the subject of insect powders.

### MAINLANDER HAS MADE REPUTATION AS EXPERT

(Special Bulletin Correspondence.)

HILO, Aug. 29.—The engineer who

will have charge of the building of the Hawaii county roads, under the direction of the loan fund commission, which consists of Messrs. Horner, Carter, Lewis, Hind and Campbell, will be Robert K. Bishop of Albany, N. Y., who has resigned the position of first deputy in the New York State department of highways to accept the local position. He has been appointed upon

the recommendation of Paul D. Sargent, the acting director of the Federal bureau of good roads, and is most highly recommended by all the members of the New York State highway commission.

Mr. Bishop has been with the highway department of New York since its creation, and for the past two years has had direct charge of the repairs and maintenance of the highways of that State, particularly looking after the macadam work, which system of construction will, of course, be used on the roads of this island. He has also been a member of the commission specially appointed to investigate and report on the construction of bituminous and oiled roads. His work has evidently been of the most satisfactory character, to judge from the recommendations which come from his supervisors in office.

Acting Director Sargent writes as follows: "Bishop has had charge of the maintenance of the most complete system of highways in the United States for a period of three or four years, and I think he will be entirely competent to handle your situation."

The commission also received a letter from Mr. Bishop, applying for the local position, in regard to which he had been advised by Mr. Sargent, and after consultation cabled accepting his services and asking that he start for this Territory at once. Immediately upon his arrival, steps will be taken towards starting work on this island. The first work to be commenced, according to the plans of the commission, will be the road between this city and Papaikou, which will be hurried ahead as quickly as possible. It is believed that there is available at the present time enough general and detailed information to warrant the statement that bids for this work can be called for very shortly after the arrival of Mr. Bishop, as, beyond changing the grade in a few instances, the engineering features of this work will not be great.

### WORLD IS SOON TO END, SAYS ADVENTIST

INDIANAPOLIS, Ind., Aug. 8.—

"The world will come to an end within a very few years" declared Elder O. Montgomery, president of the Indiana conference of the Seventh Day Adventists, during the service at the camp meeting now progressing here.

"I cannot see the year. It may be next year it may be five years. But I do know that it will come before the death of the last man who saw the falling of the stars on November 13, 1833. There are few people living now who saw that night and I know that the end will come before all of them are gone."

Elder Montgomery said that science had been unable to solve the falling of the stars in 1833 and that he had proof that the millenium would occur within the generation following that event.

## ALL THREE CLUBS WORKING HARD FOR REGATTA DAY

**Puunene Club Training Hard—Every Boat Being Used By  
Crews—Hui Nalus Cannot Get Boat—Much Interest Is  
Shown In Coming Races.**

The rowing crews are out every evening now working hard for the coming regatta sports, which promise to be the best ever pulled off in Honolulu harbor.

With a new club entered in the races against the Myrtles and Healanis, the events are attracting more attention than ever. It is a pity that neither the Healanis nor the Myrtles can see fit to allow the Hui Nalu a barge to train in, as the Waikiki boys are just crying to enter. It is a newly-formed club, so could not do everything at once, and one of the things they wish to do was to enter the junior barge race, but have no boat to use. It looks as though the plan will fall through, as both the Myrtles and Healanis can not afford to aid charity at the present time, as they are out to win on Regatta Day and the boys are using all the barges each evening, as it means hard work to win this year, as both crews are very strong and with the Puunene Club as a surprise package they need to work extra hard in order to win this year.

The Puunene crew are in Honolulu now and are out on the water every evening under strict training. The boys will make their initial bow to the public on September 15. The boys are staying at the Myrtle Boat Club and this does not mean that they are not out to defeat the Myrtles, for they are and expect to when the races are pulled off.

Both the men and crew this year are the best ever and this goes to show that it will be a hard fight for the honors this year. Last Regatta Day the Myrtles had a cinch in all of the events, but it will no doubt be a different story for them to tell this year, as they will have something to work for.

Among all the three new barges that have arrived lately for the three clubs, the Myrtles seem to have the best, but, although the Puunene club has a dandy one also.

The three clubs will issue invitations to friends during the day, and the friends of the Puunene club will be welcomed to both the Healanis and Myrtle sheds. In the evening a dance will be given at the Young Hotel, and

admission to the dance will be one dollar. The receipts will be equally divided among the three clubs, and as the Hawaiian Rowing Association allows each club \$125 annually for expenses, the expenses are much larger, so what tickets are sold will help the clubs very much.

The committee in charge of the dance consists of Short and Hughes of Puunene; Clark and Foster Davis, Myrtles, and Bert Lightfoot and Lemke, Healanis.

Captain Cunha of the Healanis is keeping a close watch on the men who are out training each evening, as he wants only the best men in the race this year. Gus Bechert, Paul Jarrett and Jim Lloyd are the coaches of the club. The three crews are out every evening now, both the seniors and freshmen using the new Alfred Rogers, while the juniors are using the Healanis barge.

Another interesting event in the coming regatta will be the four-paddle canoe race. Both the Ukulele crew and the Myrtles will enter a crew in the coming event. The Hui Nalu and Outrigger boys are planning to enter a four-paddle crew. In the main event of the canoe races, which will be for six-paddle canoes, the Hui Nalu and Outrigger crew will be the only ones to compete, as the Kona crew will not be on hand this year to compete in the event.

When the Ukulele Patrol canoe crew meets the Myrtle paddling bunch there is going to be something doing in the way of getting through the water. The respective crews have been chosen and they are as follows:

Ukulele crew — K. Reidford, A. Brown, S. Nicholson, G. Bullentyne, W. Cowles and G. Brown.  
Myrtles—E. Podmore, F. Auerbach, C. Sullivan, R. Smith, K. Smith and W. Ross.

The Puunene crew is working hard in the harbor every evening and Captain Hughes believes that his men will give the other crews a run for the honors. The newly-formed crew includes the following: S. Short, R. E. Hughes (captain), W. Scholtz, Arthur Taylor, R. D. Walker, F. A. Lufkin and Jack Walker (cox).

## CHAMPION TEAM MAY PLAY HERE

**Both English and American  
Teams to Meet September  
7 in Semifinals.**

The possibility of the champion tennis players which are to compete for the Davis Cup in Australia next month, playing a match with a local team while passing through here are bright. A well-known tennis player of the city has taken the matter up, and as soon as he knows what members are coming he will try and make arrangements with them to play a match with a local team during their short stay in port if they come this way.

The American and English teams have been picked to represent the two countries in the preliminary matches to be played at the West Side Tennis Club in New York September 7, 8 and 9.

The American team will consist of W. A. Larned, national champion; R. D. Little of New York and M. C. McLoughlin and T. C. Bundy, the Pacific Coast stars.

The winning team will go to Australia to challenge for the international trophy now held in that country.

It has been unofficially stated that those who have been nominated by the U. S. L. T. A. to play in the Davis Cup preliminary match with the British team if successful will go to Australia.

W. A. Larned, the national champion, has played on other United States teams against the British, but has never before consented to go to the far-away country for the international match. This year, perhaps his last in defense of the national title, it is thought that he has changed his mind; at least, he has not stated emphatically that he will not go with the team if it comes through successfully.

R. D. Little is a veteran internationalist. He is known to every follower of the game at least by reputation, and it is believed that he stands ready to make the sacrifice the long journey will entail.

McLoughlin has visited Australia before, and both he and Bundy have stated they will go if everything works out in favor of the home team.

The English team is composed of the following, who arrived in New York yesterday: C. F. Dixon, A. H. Lowe and A. E. Beamish.

The local tennis players hope that the plan to have the coming team play a match with a Honolulu team when it reaches here will be a success.

## TEAMS PLAYING CLOSE GAMES

Baseball on the Garden Island is still going strong among the teams of the Kaula Baseball League.

Last Sunday the Makawela once more proved that they were going to be real champions of the series by defeating the Homebuds, beating them by a big margin—10-2. It was a one-sided game that failed to awake much enthusiasm.

To the other side of the island journeyed the Lihue team, twenty-five miles, to meet the Kilaueas, who once led the series but have now fallen to third place.

The Kilaueas were defeated on their own grounds to the tune of 5-5, but in the last half of the eighth the Kilaueas brightened up and were determined to enlarge their score, and they certainly succeeded in doing so after some hard slugging and base stealing. When the eighth was over the Kilaueas boys had piled up four runs. Things then looked dangerous for the Lihues, and they tried to get another lead in the first half of the ninth, but failed. The Kilaueas also failed to score in the last inning, and the visitors were therefore winners after a close and exciting game.

Another good game was played at Elese, when the home team slipped one over on the Kawaihans by 3 to 5. This was a rattling good go also.

Young Togo, the Japanese boxer who has made a wonderful showing in four and six-round bouts on the Coast, will arrive in Honolulu very soon. Togo is known on the Coast as the "Red Demon," and he is managed by Charles Robinson, who is also coming to Honolulu with him.

## W. K. SIXSMITH HERE TO TEACH

**Man Who Taught Roosevelt  
Manly Art Now Teaching  
at Leilehua.**

W. K. Sixsmith, the man who taught ex-President Roosevelt the manly art, is now visiting in Honolulu. While here Mr. Sixsmith will hold classes at Leilehua, where he will teach the officers and enlisted men the art of boxing, which is a great benefit to one's physical health.

Sixsmith is down here mostly for a vacation and sightseeing, but while in the Islands concluded that he would give a few lessons in his profession.

He went down to Leilehua and arranged his work during his stay here. He will start in with his classes early in September, and they will continue for about a month. While at Leilehua he will keep some of the officers and men busily engaged avoiding his left and right jabs.

Sixsmith has had a success of his teachings, and is carrying along a large file of recommendations from well-known army officers and schools. He is doing most of his work with the men of the army and navy.

The amateur pugilist is carrying out one of the ideas of ex-President Roosevelt, who expressed the opinion that it would be a good thing for the army and navy if the enlisted men and officers paid more attention to making themselves proficient at handling their "mitts."

When asked whether Teddy could use the mitts well, he said: "You bet he can. We went at it as if we were in a real fight, and he certainly mixed it up all right. He can take all kinds of punishment. We went through all the regular exercises."

On the trip to the Islands Sixsmith is accompanied by his Boston prize bull terrier, which answers to the name of "Jimmy." He takes Jimmy along with him wherever he goes.

Mr. Sixsmith fought in former years under the name of Jimmy Murphy. One of his hardest fought battles was away

back when he was young in the ring. It was a fifty-seven-round bout against Tommy Ryan, and it ended in a draw. The men used two-ounce gloves at the time. This fight took place in 1889.

He has fought in about fifty bouts and has never lost a fight over the ten-round limit. He lost a few of the four and six-round events.

Sixsmith has been with Roosevelt twice, first teaching him in 1908 and again before his trip to Africa in 1909. He has many recommendations from high officials whom he has instructed, among them being Major James R. Kewing, who was in command of the 9th Cavalry, who was a pupil under Sixsmith among many other officers of the regiment.

Lately Sixsmith has been instructing men of the 22nd Infantry, and they all took a great deal of interest in him. In some of his classes he had 124 men on the floor at one time, and he was kept busy right along. Last year he taught the students of the St. Antonio private school, in Texas, the art of boxing. If he finds time while here he may start to give lessons in town to those who wish to take up the art of using the mitts right. He is now stationed at Leilehua.

## COUNTRY CLUB WILL HOLD MEETING SEPTEMBER 14

On September 14 the Country Club members will hold their annual meeting. It will be at this time that a new schedule for golf will be arranged. The members are taking a great deal of interest in the outcome of the new schedule.

Improvements are being made at the clubhouse and the place is being put in the best of condition. At the annual meeting held September 14 the officers for the coming year will be elected.

President Walter Dillingham has offered a cup for competition and has been contested for during the past few months. The cup goes to the person who turns in the lowest score.

There will be a tournament pulled off at the Country Club next Sunday and a big crowd will no doubt turn out.

Marcelline bought another bat this week, which he will use next Sunday. The Stars may win the game next Sunday, since the bat is supposed to meet all curves at the right time.

# WATERFRONT NOTES

Captain Lashed to Deck by Jokers. The Portland Oregon Telegram says: Roped, thrown, tied down on the hurricane deck and rendered as helpless as a bunchgrass maverick which has been ready for the application of a branding iron, forms a part of the playful treatment accorded Captain C. E. Jahnson, master of the steam schooner J. B. Stetson, arriving yesterday, when the vessel was plowing her way up the coast from San Francisco. Except the following, everything in connection with the affair was the duplication of a cow-camp incident during a Fall roundup.

Frank Dingeman of San Diego, formerly a cowboy in Mexico, did the lassoing, and the skipper was taken completely by surprise. Dingeman, an expert with the rope, and at the first throw the loop dangled over the head of the mariner. In a jiffy the slack had been drawn up, pinioning his arms, and the next instant a half hitch was thrown around his legs as he was jumping about to see what had happened. Jahnson keeled over on his starboard side, and the chap who used to ride the prairies and sing Sam Bass pounced upon him. The navigator was securely tied in less than a minute after he had been roped.

Capers of various sorts were cut up by the passengers after they had recovered from seasickness. The captain appeared to enjoy the stunts they were pulling off so well that Dingeman decided to try his skill as a lassoist on him. After Jahnson had been released he concluded to get even with his risky passenger. Watching his opportunity, he placed a basin of water in the bed which the man from San Diego was to occupy that night. But Dingeman had a friend with whom he was sharing the same berth, and as fate would have it the latter was the first to retire. When he soused into the water he began to yell that the ship was sinking, and it was not long until every one aboard had heard of the joke the skipper attempted to play on the ex-cowboy.

"Key Route" in Trans-Pacific Trade. As soon as the \$15,000,000 docks which are projected by the United Properties Company, the \$200,000,000 corporation headed by F. M. (Borax) Smith, are ready to accommodate vessels, the United Properties Company will have its own line of steamers ready to travel the Pacific Ocean to the Orient and all along the coasts of the three Americas.

Plans for this gigantic steamship line were decided upon at a recent meeting of the board of directors of the United Properties Company. A few days ago the company announced that it would build great docks in Oakland, along the Key Route mole. The government has granted the company rights to extend the pier 500 feet on each side, making dockage space a thousand feet wide and a mile long.

The company, owning the Key Route transportation lines and making plans for other railroads to the north and south, expects to bring to Oakland and San Francisco the shipping business of the Pacific ocean. Besides the foreign lines, which will probably include Australia, China, Japan, the Philippines, Ceylon and India, the company will go after the traffic of the western coast.

While nothing definite has been settled regarding the Atlantic coast, it is understood that the steamers of

BY AUTHORITY.

Sealed proposals will be received by the Loan Fund Commission of the City and County of Honolulu up to 12 o'clock noon of September 28, 1911, for the constructing of twenty-six thousand, three hundred fifty-eight and seven-tenths (26,358.7) lin. feet of highway, designated as Section One of the Oahu Belt Road, and extending from the north end of the Heela rice fields to the Waihole bridge, in the district of Koolauapoko, City and County of Honolulu.

Proposals shall be on forms furnished by the Commission. Each bidder shall state in his proposal:

1. A specific sum for which he will furnish all labor, tools, and material, except as specified to be furnished by the City and County of Honolulu, necessary to complete the work in accordance with the plans and specifications.

2. The time within which he will agree to complete the work.

Proposals shall be in a sealed envelope, addressed to T. H. Petrie, Secretary of the Loan Fund Commission, City and County of Honolulu, and plainly marked on the outside, "Proposal for the Construction of Section One, Oahu Belt Road."

All proposals shall be accompanied by a certified check as provided for in the specifications for a sum equal to five per cent. (5%) of the amount of proposal.

The Commission reserves the right to reject any or all bids and to waive any defects.

Plans, Specifications and Forms can be had on application to the Engineer of the Commission, Room 10 McIntyre Building. A deposit of Ten Dollars (\$10.00) will be required on each set of plans and specifications.

ANDREW ADAMS, Chairman, Loan Fund Commission, City and County of Honolulu. 2010—Aug. 27, 28, 29, 30, 31; Sept. 1, 25, 26, 27.

Sealed proposals will be received by the City and County Clerk up to September 19, 1911, at 7:30 o'clock p. m. for resurfacing 2298 square yards of Queen street between Fort and Alakea streets with a two-inch (2") wearing surface.

Each bidder shall state in his proposal:

1. The material which he proposes to use in the construction of the wearing surface and the specifications under which he agrees to lay the same.

2. The price per square yard of such wearing surface, which price shall be understood to include the removal of the present wearing surface.

3. The price per cubic yard for such concrete as may be necessary.

4. The time within which he will complete the work.

Proposals shall be in a sealed envelope addressed to the City and County Clerk of the City and County of Honolulu, and plainly marked on the outside, "Proposals for Resurfacing Queen Street."

All proposals shall be accompanied by a certified check as provided for in the specifications for a sum equal to five per cent. (5%) of the amount of the proposal.

The Board of Supervisors of the City and County of Honolulu reserves the right to reject any or all bids and to waive all defects.

Plans and specifications can be had on application to the City and County Clerk. D. KALAUOKALANI JR., City and County Clerk. 5015—Aug. 26, 28, 29, 30, 31.

Sealed tenders will be received by the Superintendent of Public Works until 12 m. of Monday, October 16, 1911, for furnishing the Department of Public Works with three 15", one 12" and one 15" Venturi Meters with recording apparatus.

Specifications are on file in the office of the Superintendent of Public Works, Capitol Building. The Superintendent of Public Works reserves the right to reject any or all tenders. MARSTON CAMPBELL, Superintendent of Public Works. 5015-101

## Cable News

### REFINED SUGAR HIGHEST YET

(Associated Press Cable.)

NEW YORK, N. Y., Aug. 30.—Another material advance in the price of granulated sugar took place today, it reaching 6.25, the highest price recorded for years.

This advance in the price of refined sugar is attributed here to the news which has come from Europe of the poor beet crop, which dominates the price of sugars the world over. It is now certain that this crop will be greatly short of early expectations and much below normal.

### UNION HEADS TO SEE KRUTTSCHNITT

SAN FRANCISCO, Cal., Aug. 30.—There is hope here that a more conciliatory attitude by the officials of the Southern Pacific railroad toward the demands of the union shopmen will avert the threatened strike.

It is asserted that the federation system of railway shopmen operates satisfactorily and many railroads in the United States and Canada are recognizing the federation.

The presidents of five international unions have arrived here to confer with Julius Kruttschnitt of the Southern Pacific railroad, in an effort to avert the threatened strike.

### Refuses Recognition.

CHICAGO, Ill., Aug. 30.—It is reported here that the Illinois Central Railroad absolutely refuses to recognize the federation of railway shopmen or its representatives.

### MADERO NOMINATED WITHOUT OPPOSITION

CITY OF MEXICO, Aug. 30.—At the national convention of the Progressive party in this city today, General Francisco Madero was nominated as president of Mexico by a unanimous vote. There was no opposition.

Resolutions were adopted by the convention, evidently at the instigation of General Madero, advocating a bill in Congress to abolish the office of vice-president.

Strong resolutions were also passed indorsing the law for the separation of the church and state.

### ROBBERS TAKE GOLD FROM MINE HOUSE

WINNEMUCCA, Nev., Aug. 30.—Bandits made a raid on the buildings of the Mammoth Mine near here today and secured \$8000 worth of gold bullion.

As soon as news reached this town a posse was organized, headed by deputy sheriffs, and started in pursuit. So far the bandits have escaped capture.

### BREAD RIOTS IN FRANCE.

PARIS, France, Aug. 30.—Bread riots have broken out in some districts of northern France, and today squadrons of cavalry were sent to the city of Valenciennes to quell disturbances caused by distress among the poor.

In one place a band of women looted a farm, which it had been reported there was hidden some grain. The proprietor was so frightened that he died of heart failure.

### SOUTHERN CROPS DAMAGED.

BEAUFORT, S. C., Aug. 30.—The hurricane which caused so much damage at Charleston and elsewhere has practically destroyed the rice crop in this district. The cotton plants have been stripped of their bolls and the corn crop damaged fifty per cent.

### FIRES DESTROYING TIMBER.

PORTLAND, Ore., Aug. 30.—Forest fires on the Clackamas watershed are destroying hundreds of acres of valuable timber. Help has been asked for and two hundred men have been enlisted to fight the flames.

### LOGICAL ECZEMA REMEDY MILD, SOOTHING WASH

Although many different kinds of remedies have been tried for the cure of Eczema and other skin diseases, it has been proven by years of tests and thousands of cases that the only possible cure is in the form of a liquid. This is a mild, soothing, healing wash made of Oil of Wintergreen, Thymol, Glycerine, and a few other ingredients, compounded so carefully that each one has its proper effect.

This simple compound is now made up in the D. D. D. Prescription—so harmless that it will clear the blotchy face or wash away the pimples as readily as it will stop that awful-itch and cure the worst case of Eczema.

Try D. D. D. It is wonderful what it will do for any kind of skin trouble. No matter what it is—D. D. D. will prove to you that you can be cured. The very first drops will give you instant relief.

Get a bottle today, \$1.00. Benson, Smith & Co., Fort and Hotel streets.

New Fall millinery to be shown at Sachs' on Friday.

The report of the committee of lawyers appointed by Judge Wright to investigate the contempt charges against the officers of the American Federation of Labor has been completed and will soon be filed.

# SAFEGUARDING OF HONOLULU'S HEALTH URGED BY DR. McCORMACK

Safeguarding of Honolulu's health was most earnestly urged last night by Dr. J. N. McCormack, of Kentucky, chairman of the Organization Committee of the American Medical Association and a leading advocate of broad policies in medicine.

Dr. McCormack addressed an audience that practically filled the Hawaiian Opera House, although more could have been crowded in. Some-what remarkable for an occasion of the kind, probably fifty-five per cent of his hearers were women. It was an emphatic proof that the women of Honolulu are interested in the health and physical welfare of its citizens.

An extension of the present sewer system so that it will serve the entire city, the guarding of the purity of the water supply and general precautions to make and keep this one of the cleanest cities in the world were among the things urged by the distinguished physician. His talk, however, dealt only slightly with local conditions. Its main theme was the necessity for broader work among the medical profession and for a more sympathetic attitude on the part of the public.

On the stage were the speaker, Governor Frear, Secretary Mott-Smith and Dr. J. S. B. Pratt, President of the Board of Health. Governor Frear, in introducing Dr. McCormack, spoke of the progress of local sanitation work and the position that Hawaii is to occupy in that respect.

Dr. McCormack added to this his own advocacy of better health conditions. "The development of our sewer system until the city is adequately served is an important thing," he said. He spoke of the great natural water resources here that should be conserved, and favored the proposed plan of building a sea-wall on the waterfront at Kewalo and filling in lands until a great park and boulevard is created there.

Getting into the main theme of the evening, he said in part:

"As part of a nation-wide reform, one of the most important, far-reaching and unselfish ever undertaken, and as the official mouthpiece of eighty thousand doctors who live by the cure of disease, I am here to proclaim the gospel of health, and to try to persuade you men and women that, with a proper knowledge and practice of the laws of plain, clean, healthy living, personal, domestic and as communities, good health can and ought to be made more contagious than sickness.

"As an argument for peace it is often shown that 210,000 men were killed in both armies during the five years of the Civil War. In the movement for better living it may be shown that during the last five years 750,000 people have died from tuberculosis and 250,000 from typhoid fever, with an enormous sick and death rate from these and other diseases preventable with present knowledge, and with proper laboratory and research work by the government this life-saving knowledge should be constantly extended. It may then be shown that while in the last ten years our national government has very properly expended \$40,000,000, and now proposes to appropriate very much more, to prevent tick fever in cattle, cholera in hogs and chickens, peats to crops and trees, and to protect other interests having commercial value, in all of its history it has never spent a dollar or lifted a hand to protect human beings from these far more important domestic pestilences which bring constant sickness, sorrow and death into the homes of the people. There are abundant experts and funds at Washington to conduct investigations anywhere, or to furnish literature in regard to any animal or plant disease, agricultural resource, water power or other interest affecting business, but the citizen will inquire in vain for information as to how to protect his family from preventable sickness, unless it be yellow fever, cholera or other exotic diseases of little practical importance except as they affect commerce and trade.

"Most of these things have been long known to physicians, and for years they have systematically urged the reforms which would press this preventive work in the nation, the States and in the home, but have encountered a singular indifference or antagonism from most legislative bodies and from otherwise intelligent people. This was in part because to the laity medicine has always been a mystic science, and still more because until recent years ours has been a discordant profession. This discord was to some extent between the different systems of practice, but far more between physicians competing for patronage in the same community, often fostered by their lay friends. The same conditions existed in the clergy, dividing the religious world into hostile camps, and in all the other segregated callings until recent years, lawyers alone living in the aggregate and escaping the curse.

"You will first be shown how this feeling against doctors has affected us as a nation. For lack of authority for medical officers during our war with Spain, we lost sixteen of our soldiers from preventable disease for every one dying as a result of battle, and eighty-five of each hundred were inmates of the hospitals. During the longer and more severe war in Man-

churia, with full authority and rank for their doctors, Japan lost but one man from disease for every four killed in battle, and but fifteen of one hundred were in the hospitals. We had known of this danger to our armies, and had begged for proper authority for our army surgeons for twenty-five years, and since these wars, with the object lessons of Cuba and Manchuria before the Congress and country, we are still begging, and practically the same dangers yet face our armies in the event of a foreign war. Facts of the same kind almost without number might be given to show that except in the emergency of epidemics, no other nation has been and still is so criminally negligent of the health and lives of both its soldiers and its citizens.

"Had as in this record for the nation, that for most States is little better. Probably at least one-third of those sick and of those taken to your cemeteries every year are afflicted with diseases which ought not to occur.

"When we have urged legislation for these purposes, otherwise intelligent Congressmen and State legislators have not hesitated to say that doctors asked for these laws for their own benefit, without stopping to consider that in so far as they prevent sickness they diminish their own incomes, the very unselfishness of the movement causing it to be misjudged, as legislators saw no other vocation there working against its own interests. It was because ours is above all a humanitarian calling, charged with the duty of saving life and in daily contact with the sorrow caused by sickness and death, that it took up this work, just as for the same reason it does more actual charity every day in every year than all other people and organizations put together. Again, all others may profit by their discoveries or inventions, but doctors cannot, their vows requiring that they be made public for the good of humanity. All of this has involved altruistic labor without parallel in human history, unappreciated and obstructed, largely because of the public sentiment fostered by the past discord in our ranks.

"Had doctors been as united and taken the same pains to keep in touch with and guide the people during the formative period of our government as the lawyers did, health and medical boards would always have been as much a part of the warp and woof of our country, State and national machinery as the courts. They ought to have been, because more important, just in proportion as health and life are more important than property interests.

"For similar reasons a State board of health, with ample funds and laboratories and with members so compensated that they can give their full time to this life-saving work, is as important as the appellate court could possibly be. And, still more important, a board of health for each city and county, or for the two combined, with frequent inspections of schools, dairies, abattoirs, bakeries, groceries, factories, tenements, sewerage and garbage systems, and with laboratories to which any citizen may bring water, food, drugs, disease products or anything else suspected as a danger to his family for analysis, without personal expense, is of as much practical importance as any court or other judicial agency could be. And it is not worth while to try to do these things without a health officer with special training and aptitude for his work and such a salary that he can devote his entire time to it; for no man can be the kind of health officer here described and practice medicine.

"With such aims and possibilities before it, fully realizing the magnitude of the reforms, the obstacles and the self-sacrificing labor required to carry it on, the American Medical Association, with branches reaching into every State and county and about eighty thousand members, joining hands with all others, individual or organized, who will take part in it, has entered upon a broad campaign of education which it is hoped will ultimately reach every home in this land.

"Do not get the idea that it will be easy to do all this, or that there is much real popular interest on the subject at present. The newspapers are the best exponents of public sentiment and are most friendly to this movement, and so long as they give two or three pages a day to the races, foot and baseball and the brutalities of pugilism and a fourth of a column a week to health news, we may be certain that there is little demand for the latter. The enlistment of political economists and teachers in the movement was the first real encouragement. The insertion of planks in the national platforms of both political parties favoring a national health policy, and the campaign of education against tuberculosis, give promise of good if supported by systematic, wisely led lay organization in every section of the country, such as the American Health League is fostering.

"Whether it will be necessary for physicians to go into public life in the interests of these reforms, as they were forced to do in Europe, is a question for the future. For a century our legislative bodies, State and national, were dominated by high-

class lawyers. Better opportunities are now open to this class, and such positions are sought by a lower grade of lawyers and others who make a business of politics. With this change others have come. The problems before this country were never before so complex or difficult, and, instead of being legal and for the lawyer, they are mainly economic, with social and moral elements, which require a higher official class for the solution. Broadly trained business and literary men, teachers and industrial leaders should certainly be selected in such numbers that their voices and votes would be effective. There is a doctor in close touch with almost every voter in this country, and it may be better for them to assist in selecting men of the kind indicated than to go into public life themselves.

"In any event it is an educational work, and our profession has the knowledge which fits and imposes the duty of leadership. It will involve years of unselfish labor, and all may not be equal to it. How doctors are to be compensated under this new order, and whether as many will be needed, we have not stopped to inquire. We know that it opens a new field of unlimited possibilities, that the doctor of the future will be a far more important and useful man than the one of today, and we only ask for such a league with the people, offensive and defensive, as will insure success in every community."

# TEA QUESTION PUZZLES EXPERT

BY C. S. ALBERT.  
(Special Bulletin Correspondence.)  
WASHINGTON, D. C., Aug. 17.—The question, "What is tea?" threatens to take the place of a similar conundrum regarding whisky and beer. The tea importers are in a condition of unrest. It results from a ruling made operative by the Treasury Department against the admission of colored teas. It has never been a secret that heretofore both China and Japan have been selling to the United States tea which it was impossible to dispose of in any other way. The average Chinaman would not drink the sort of tea he sold to America, and the refuse, culls and even the sweepings of the sorting houses were put up and variously colored to be sold in the United States.

The entry of tea to this country is governed by a board of experts appointed by the Secretary of the Treasury, and this board this spring decided against the admission of any artificially colored tea to this country.

It is not generally understood by the tea-drinking public that America is not a tea country, and that no foreign coloring matter is used in the creation of the "black" and "green" teas used in this country. They do not even come from a different plant. The color depends merely on how far the process of fermentation is carried when the tea is cured. It is these gradations of color that frequently have been supplied by the tea grower, and now that the admission of this artificially colored tea has been prohibited the chances are for an advance in price. That always is the probability the consumer can count on if anything at all happens to affect any market.

The importers of tea on the Eastern seaboard are now complaining that the tea inspectors of the West and Middle West are willing to pass teas that could not gain entry at the port of New York. If this is the case it will tend to make the Pacific ports more popular with importers of cheap teas.

The tea trade wants the rulings of the tea board revised, and if the question comes it probably will be necessary to appoint a special commission to determine what is tea.

# NEW RESIDENTS PLEASED

Mrs. Josephine Yeo and son left on Thursday on a long journey to join the husband and father in far-off Honolulu, where Mr. Yeo has a position as engineer on the O. R. & L. Co. railway. Many friends will join in wishing Mrs. Yeo a pleasant and enjoyable trip and a delightful home-coming to her new home in that delightful island, where the spring breezes of the Pacific blow so softly. Mrs. Yeo is a bright and intelligent young woman, and she has already written for the magazines and papers several interesting stories.

From Wahiawa, Hawaii, of date July 30, we learn from Mrs. Yeo of her safe arrival there. "The pineapple season is on in full swing. There are several thousands of acres of this fruit to be picked and hauled to the canneries. The weather is fine and beautifully balmy and cool. The trade winds blow strongly every day. It gets dark at 7:30 p. m." Closing with "This is the finest climate in the world."—New Glasgow Enterprise, Picton County, Nova Scotia.

Robert Ingle, on his way to Marquette prison for forty years, jumped overboard from a ferryboat and was drowned.

TACOMA, Wash., Aug. 19.—Tacoma members of the Kappa Alpha Theta sorority and the Delta Tau Delta and Sigma Alpha Epsilon fraternities received notice today that they would not be permitted to re-enter the University of Washington this fall unless their societies changed building plans so that fraternity and sorority houses would not be located in proximity to each other.

The action by the university authorities is the result of a campaign waged by Miss Isabella Austin, dean of women, to secure greater isolation of the sexes at the institution.
