CANE on the shores and coffee on the mauka lands make a pretty picture.

SEVERAL of the important measures to be considered by the legislature are already in shape for presentation.

THE STAR's booklet on a trip to the Volcano for the 1896 "outbreak" will be a 10,000 edition. The entire issue has been sold.

AN ILLUSTRATED article on the National Guard of Hawaii is soon to appear in one of the leading magazines of the United States.

THE Kate Field letter given in this paper today will easily take rank as the most interesting and newsworthy of the special correspondents has yet sent the Times-Health. It is up to date, being an account of things present instead of portrayal of happenings far in the past.

WHILE the expenses of the government were \$156,000 more in 1895 than in 1894, the income was about the same. There are then, three things to be thought upon. These are reduction of expenses, increase of revenue or "a happy medium." Some sort of tax reform is certain to be proposed next month and the project of deriving revenue from the opium traffic will not be forgotten.

THE first duty of the Board of Health is to protect the community from threats of disease and epidemic and to spare no effort in the direction of insuring purity in the water and food supplies. Commerce and trade must be subordinated to these duties and considerations. The Board passed through a trying ordeal last August and September. It met and proved equal to such a test as it will find scarcely a problem which seems very simple and unimportant when compared with the armed quarantine and the suspension of traffic of last year. It seems to THE STAR that this matter of regulating the fresh fish supply can be handled by the Board without political clamor and newspaper controversy.

MONDAY is the birthday of the young Emperor of Germany and will not be permitted to pass unnoticed here. William II. was regarded rather as a doubtful experiment during the earlier months of his rule. He has shown, however, all the sturdy, diplomatic and advance qualities which make him fit to be the ruler of a great people and capable of using discreetly his power in shaping the destinies of Europe and of the world. The chroniclers and even his political rivals and enemies have already ceased calling him a youth or affecting to believe that he is other than what his position, lineage, education and personal qualities establish him. Firm and aggressive, William II. has so far avoided all entanglements, strengthened the empire and gained the enthusiastic love of his people. He is a remarkable man aside from his qualities as a ruler. At the age when most men are yet students in or out of tutelage, he is a master in many of the arts and sciences and an especial adept at the modern cuts of new diplomacy and war and trade by field and flood. He stands a distinguished man worthy the respectful attention of all sons of the fatherland and the highest consideration of all the men of civilization.

It is worthy of note that the first public utterances in Hawaii by the visiting Queensland statesman should be at a social gathering of Scots and friends in honor of Burns' memory. Premier Nelson was born in the Land of the Thistle and his grandfather and the bard were intimate friends. Some of the Nelson family yet reside in the country of Burns. Minister Philp opened his remarks by saying he did not hesitate to confess that he was Scotch. Both gentlemen expressed loyalty to Queensland and pride in their adopted home. They said they were immensely pleased with Hawaii and had enjoyed their visit far more than they had expected. Mr. Nelson spoke of the kindnesses they had received from all sides and remarked finally that he would tell of the Honolulu Scots at the next meeting he attended of the Scotch club of which he is President. Mr. Philp said a Scotchman was never at home unless he was abroad and in the course of his very pleasant address referred to the chief industry here, in which he had found many Scotchmen. He said Hawaii was away ahead in sugar production, leading all the older countries in methods and results. Queensland, he declared, would profit in the sugar branch by the visit of her officials to Hawaii. The colony has wide areas yet untouched. Mr. Byrnes, the third member of the Queensland party is an Australian of Irish parentage.

Timely Topics.

January 21, 1895.

The last mail brought good news for the people of these islands. It is stated that there will be no grinding of sugar cane in Cuba this year, owing to the rebellion, and consequently the world's supply will be decreased by 1,000,000 tons, one-fifth of the entire production of the world. A considerable increase in prices is therefore certain. On top of this comes the information that Senator Perkins is making a strong fight to secure a higher tariff on sugar, as he wished to encourage the beet sugar planters of California. Senator Perkins believes that where the Republicans can secure control of the Senate protection will be granted by bounty or increase of duty. The San Francisco Bulletin in commenting on the proposition says: "Senator Perkins has introduced a resolution instructing the Finance Committee to report an amendment to the revenue bill increasing the duty on raw sugar. He will support the resolution with a speech intended to enlighten the Senators as to the value of the beet-sugar industry. The beet-sugar industry is in line with the iron and steel industry, the woolen industry and the manufacture of tin plates. Sugar can easily be produced in the United States in quantities sufficient to supply the home demand, but the cost of production in this country is greater than in countries from which we import sugar. It is just a question whether the government shall impose duties on foreign sugar equal to the difference in the cost of production or whether we shall continue to buy our sugar abroad. This is a branch of industry in which farmers may be directly protected. So long as we export wheat we can extend to the farmer only indirect protection. But if we place a duty on sugar the producer is protected to the full amount of the duty. Farmers who find it difficult to make the two ends meet in producing wheat at present prices may make a good profit in producing sugar if the duty is raised to about 1 cent a pound." If the duty mentioned, is placed on sugar, Hawaii will be just that much ahead as our product will go in free under the terms of the Reciprocity Treaty.

Some say that the mungoose is a curse to this country; others think not. We have no opinion to express but have some good rat traps for sale. They will catch either rodents or mungoose and hold them fast. Recent arrivals brought us some handsome little Ornuu clocks. Keep little time. Are both good and cheap. You won't lose your keys if you have a ring. We have some in polished nickel-steel. Get one; you won't regret it. A handy little pocket piece is a combination nail cutter, cleaner and filer. They close up like a jack knife and don't cost half as much. Hunting season is now on. You may want a set with a game carver. Call and see one. Hanging lamps in all styles and sizes. Chandeliers in many patterns. Pretty boudoir lamps just opened. Any amount of new goods.

THE RELENTED. The Magic Word That Saved the Old Man's Reason. Frank Smith, the millionaire builder, contractor and real estate owner, was sitting at his desk. His dark, stern face from time to time without with an expression that bespoke agonized thought. It was evident that something terrible was preying on his mind. Presently his secretary entered and handed him a card which read: "Smythe? Smythe?" muttered the old man. "I know no one of that name. But show him in."

"Smythe? Smythe?" muttered the old man. "I know no one of that name. But show him in."

"The daughter of a ward heeler," sneered the son. "Yes," roared the father, "and the son of a bad carrier."

"What's that name again?" he exclaimed, a flush of joyous excitement coming through his rookline complexion.

"What's that name again?" he exclaimed, a flush of joyous excitement coming through his rookline complexion.
