

The Hawaiian Star

PUBLISHED EVERY AFTERNOON EXCEPT SUNDAY BY THE HAWAIIAN STAR NEWS-PAPER ASSOCIATION, Ltd.

ED. TOWSE, EDITOR F. L. HOOVER, BUSINESS MANAGER

MONDAY, APRIL 13, 1896

The absence of any feeling of alarm on account of the danger of sickness from the Asiatic side is a fine testimonial to the Board of Health. That body enjoys the fullest confidence of the entire community. It can be depended upon to use every precautionary measure without bias or prejudice, fear or favor. The Board seems to realize to the limit the old truism that an ounce of prevention is worth sixteen times as much cure.

It is the conviction of THE STAR and of a great number of citizens that the house is honest in its efforts to the end of economy in administration and should be aided and encouraged and directed along proper lines instead of being made the target for abuse and ridicule. Some of the best and ablest men in the country are in that branch of the legislature and are striving intelligently and in good faith for a business conduct of the affairs of the Republic. That there is opportunity for reform in some directions has long been evident.

It is about time for the legislature to begin planning for a wind-up of the session. Ninety days is the allotted time. Half of it has been used. About a half of the half might have been saved. It should be easy enough now to work rapidly and at the same time do good work. All the members are familiar with the routine and the policies and purposes are pretty well understood. The sitting of the assembly has its interest as well as its utility, but it forces an unrest that is perhaps felt more with our foreign relations than with our home affairs. Then it should be conceded that legislation enough to last this country two years can be accomplished in less than ninety days.

There would be no hard feeling at all if those urging a special law against Sunday shooting would first test the present quite ample, rather Puritan, Sabbath Observance Statute. While there is merit in the desires of those urging the proposed act, there is something to be said on the other side. There is not wanting evidence that the Militiamen and Citizens' Guardsmen who shoot on Sunday have due regard for the sanctity of the day. They go to the butts then for the very simple reason that it is the only time they have. If it is established that they are violating the law or infringing on the rights of others they will willingly cease the practice. That is, THE STAR believes they will and the paper knows most of them pretty well. What they object to just now is being singled out as disturbers against whom it is deemed necessary to direct special agitation and legislation.

THE COLONEL'S PLAN.
The Cable iron is hot and the thing to do is to keep on pounding it. In addition to what has already been published THE STAR has private advices to this effect: "Congress will not act unless the Hawaiian Government opens the field to any American company having the approval of the Congress of the United States. Under such conditions the Cable will be in operation within a year."

This statement comes from the largest patron of telegraph lines in the world. The informant is in the closest touch with all projects of the character under consideration and any data from this source can be acted upon with entire safety. The trouble has been with the fact or condition that an exclusive franchise is held by Col. Spalding. THE STAR pleads guilty to having advocated this bargain. There is ample justification. Otherwise the Cable matter would still be dormant.

A way out of the deadlock suggests itself readily. Col. Spalding should either amalgamate his corporation with the other company or yield. Advancement of the latter idea may seem cheeky, but it is not brought out thoughtlessly. Col. Spalding time and again volunteered the assurance that he interested himself in the enterprise very largely for the benefit of his adopted country and this was accepted and is still believed. The opposition to him in the States is but natural, as the New York capitalists argue that a strictly American company should be given the preference. They offer to take less money and accept greater risk than the Spalding company. Thus they block the deal and will stand indefinitely unless Col. Spalding cuts the knot.

"NEW PROCESS" COAL OIL STOVE

THE OLD STYLE. The difficulty in the past with all coal-oil stoves has been that the means at hand were entirely inadequate for the results desired. The flame being in all cases a yellow or illuminating flame made it impossible to place the article or utensil in direct contact with it.

As a result the time occupied in cooking or baking was so long that it was distressing, irksome and unsatisfactory. Again with the old style illuminating flame oil stove there is always a liability of the flame creeping up after the burner is lighted, sooting everything over it and sending forth a volume of smoke and odor into the room. A decidedly disagreeable occurrence, but what everyone has experienced who has operated the old style stove.

THE NEW STYLE. For many years the manufacturers of coal-oil stoves have been experimenting to produce a stove that would in its construction do away with any possibility of explosion. Atfield's Chemistry in speaking of "Explosion" and "Structure of Flame" says: "Hydrogen is a prominent constituent of all substances used for producing artificial light such as coal gas. . . . If a flame be applied to the delivery pipe before all the air is expelled, the probable result will be ignition of the mixture of hydrogen and oxygen (of the air) and a consequent explosion. . . . Air made, by a mechanical contrivance of burner, to mix with the interior of a flame at once burns up."

This is the principle of the "NEW PROCESS" BLUE FLAME STOVE. The reservoir is away from the flame and the hydrogen and oxygen meet in the reservoir and pass through the pipe. The result is the non-explosive "blue flame." "It only burns at the end and not within the pipe, partly because of the metal of the burner (and pipe) by conducting the heat away cools the mixture below the temperature at which it can ignite." Thus the coal oil reaches the wick in the desired state.

This wonderful stove has a powerful blue flame absolutely odorless. Any utensil or flat iron may be placed directly in the flame without a particle of soot being deposited upon it. By the use of the simplest device it is impossible to turn the wick too high, thus insuring a perfect flame at all times when in operation. The use of coal oil (kerosene) is so general that every household is provided with it, hence there is no annoyance in the matter of procuring fuel.

PROOF. Possibly the most positive proof of the success of this stove is the result obtained in baking. The inside measurements of the oven on the "NEW PROCESS" BLUE FLAME OIL STOVE are 19 1/2 inches wide, 12 inches deep and 13 1/2 inches high. With this large oven it is possible to cook as perfectly and quickly as in any coal or gas oven range.

MERITS. A coal oil stove that gives a powerful blue flame. A stove that operates without the slightest smoke or odor. A stove which uses common coal oil (kerosene). A stove in the operation of which there cannot be the slightest fear of accident. The most economical operating stove in the world. A stove that admits of drawing light and heat from the same barrel.

REASONS. Why it is safe to use the "NEW PROCESS" BLUE FLAME OIL STOVE than a lamp:
First Because there are no chimneys to break.
Second The reservoir is away from the fire and is consequently cold.
Third It is impossible to turn the wick too high, because the wick is simply turned to a top and light applied, which insures a perfect blue flame from start to finish.

Invitation is extended to those who are contemplating buying stoves to inspect this before making purchase.

The House Committee on Finance proposes to bring the Appropriation Bill down to a point where the Treasury vaults may get a whack at holding a surplus.

There's a method in cutting expenses just as there is a method in cutting prices or in starting right and making the prices right to begin with.

Our crockery sets have experienced something in the line of tipping high prices in the bud. You can get lots of cheap dishes in town, but they are cheap looking. No where in Honolulu is there such an array of high class crockery at low prices as can be found here. A handsomely decorated breakfast, dinner and tea set at \$15 is less than you can buy the same goods for in San Francisco; half what you can get it for anywhere in Honolulu.

Here's another—a proper leader. A fine plain, white set, breakfast, dinner and tea set for \$17.50. You will wonder at a 40 piece tea set, special, at \$3.75. Decorated.

Rheumatism
Nothing which we have heretofore sold has given the satisfaction that "Sequah's Oil" and Cure has given for the treatment of this common complaint rheumatism. Sequah's medicines have established for themselves a reputation which is remarkable. Hundreds of afflicted people have been cured of rheumatism by using these remedies. The Oil will relieve the pain, sometimes in almost a magical manner. The Cure is recommended for driving the impurities out of the blood; which causes rheumatism, and as long as the blood remains impure, attacks of rheumatism will occur. It will pay any one troubled with rheumatism to give these remedies a thorough trial because they have cured others and therefore you are most likely to derive benefit from them. Try them now. Wheels Have Gone Up.

COLUMBIAS IN A FIRE.
Destruction of Wheels in the Pope Building.

BOSTON, March 13.—The Pope Manufacturing Company's building was completely gutted by fire shortly before 4 o'clock today.

The block was a five-story structure of brick, profusely ornamented with terra cotta trimmings.

The contents, which were ruined, consisted of 1700 new bicycles, 175 second hand wheels and about 20,000 pieces of bicycle fittings, besides several thousand tires.

The Pope Company has a total loss on its stock and fixtures conservatively estimated at \$150,000 and \$200,000, on the building. The loss is covered by insurance.

The above shows that a good many wheels have gone up in smoke but that does not mean that they have gone up in price, or that we will not be able to furnish you with a wheel, for our 1896 stock is complete, and we have plenty of wheels to sell, though not "to burn."

When you come to us you have "Columbias," "Ramblers," "Stearns," "Pierce" and "Hartfords" to pick from, and with such a choice you are bound to be suited, but if you are not, buy a "Perkins," that is a wheel that will go around in a dead calm, even if you don't move a leg.

WITH THE SOLONS.

AN ANTI-GAMBLING BILL PASSED SENATE.

Other Measures—Reports and Petitions—House Working on Acts.

Forty-third day.

Mr. Brown reported on Mr. Hocking's Patent Bill, recommending certain amendments. Passed first reading.

Mr. Wright presented his bill relating to the importation of live stock. Passed two readings.

House Bill 16, prohibiting gambling, passed first and second times, and was referred to the Judiciary Committee. "Every person who bets or gambles upon any horse race, ball game, bicycle race or any athletic game or contest in any manner whatsoever, either by risking money or any other thing of value is guilty of a misdemeanor." Adjoined.

Rep. Rycroft presented a petition from residents in Puna praying that the road that the Government intends to build there be extended further into the district.

Rep. Robertson presented a petition from Chinese physicians and surgeons protesting against the proposed license.

Rep. Robertson presented the Judiciary Committee's report on Senate Bill for the reorganization and revision of the civil code or compiled laws of the Republic. The committee do not think it would be wise to make any special changes in the law just now and so favor a reorganization rather than a re-codification.

The item of Aid Kapilani Park Association \$5000 passed on motion of Rep. Bond.

Bill No. 17 to provide a punishment for libelous solicitation and procuring a divorce, passed.

Chalk Talk Terms.

At the Y. M. C. A. Sunday afternoon and the M. E. Church at evening, Rev. C. E. Rosecrans, a visiting divine, delivered what he calls "chalk talks" on Bible subjects. With crayons he pictured on the board the leading features of his sermon. His "The Two Houses," one on the rock and the other on the sand, at the M. E. Church Sunday night was very impressive.

At Last. The letter had been taken, and with confidence unshaken he tried his best to waken in her heart some sentiment.

With a wondrous burst or feeling round her waist his arms were stealing, yet her face showed no revealing of her mind's ingenuities.

His voice, quite low and pleading, for himself was interesting, but the maiden paid no heed to him that day.

And to have persevering ever had so dumb a loving to his terms of love enduring as he meant to him that day.

Until his hands, so waited with a gentle pressure, and then she shrieked unbidden and kissed her. Then she cried:

"There, you monster! I just knew if I was sure, or quite sure, that I would get you!"
