MATTERS OF INTEREST

REGULAR SESSION OF THE NATIONAL BOARD OF HEALTH.

Letters Received—Various Reports—Fish From Quarantine Physician Arraigned.

Board of Health met at 3 p.m. Wednesday, all members present. Mr. Kilipio reported 50,000 fish inspected during the past week. He remarked that quite a number of fish were salted.

Mrs. Dr. R. J. Bartow, a visiting physician, asked permission to visit the experimental station at Kalibhi. Mr. Smith thought it bad policy to permit anyone to visit the station unless accompanied by one of the examining physicians. Referred to Dr. Meyers.

A request from the I. O. O. F. insurance department for mortality statistics was read. It came through Mr. Hastings at Washington, and to him through Senator Sherman of Ohio. The information will be furnished. Mr. Smith remarked that insurance companies were becoming dubious about taking risks, that the death rate was extremely offensive. Her eyes became affected, and she was, in truth, a terrible state. My neighbors were greatly interested in the case. They persuaded me to try Ayer's Sarsaparilla, and I am most thankful to them for their advice. The medicine completely restored my daughter's health. She has now as good health as any girl of her age. Her eyes are perfectly clear, and she is a fine girl of eight years with every prospect of growing up to be a strong and healthy woman.

Dr. Smith presented questions of Representative Hanuna, asking if the Government knew people were living over graves, and what would be done about the matter. Members of the Board reported that natives were living over graves at Kawaiahae cemetery. Mr. Reynolds was instructed to investigate and report at next meeting.

Mr. Reynolds and Dr. Day reported a suitable cemetery location near the shooting range at Kalibhi. Deferred for future consideration.

A physician wrote the Board that on April 16th he was called to see a native woman. She had been attended by a Chinese doctor. He had made a most horrible botch of it. Nothing could be done for the poor woman and she died. The physician considered the criminal carelessness and ignorance of the Chinese doctor alone responsible for the woman's death. He hoped, if Chinese doctors had to practice they would be compelled to confine the practice to their own people.

Mr. Smith said he had investigated and found it to be within the province of the Board to have licenses cancelled. Mr. Lansing and Dr. Day thought the case mentioned above a proper one for criminal prosecution for malpractice.

It was decided to call the Chinese doctor before the Board first and hear his statement of the case.

David Kaapa was sent for and instructed to follow up the case. The Chinese doctor was summoned to appear before the Board.

In Plowing

We take pleasure in introducing to the planters of the Hawaiian Islands a Plow that will penetrate further into the soil with less wear than any known Plow made.

This Plow is called

The

Secretary.

The principle of this Plow is that it has a disk instead of a blade, thus reducing the cost of the wearing part to a minimum. The fact that the Plow is made by John Deere, Moline, Ill., is sufficient guarantee.

We will be pleased to explain the working of this Plow to all who wish to call at our store.

WHAT, not a candidate for Queen
of the May?

ALL 11:30 a.m. curfew seems to
suit the Legislature.

The people on Molokai are always pleased to have visitors, and members of the Legislature will be doubly welcome.

CAPITAL is proverbially shy, but it knows a good thing at sight. Capital knows by this time that Hawaiian securities are safe and profitable.

THERE will probably be enough netted for Honolulu out of the Loan Act realization for some new wharves. Harbor improvement is the most pressing local need.

CHANCES for settled good weather may be regarded as doubtful till Saturday morning. Col. McLean has ordered a drill of the Second Battalion for Friday evening.

Is the business men of San Francisco are so anxious about the trade of the Islands why doesn't the Half Million Club or the Manufacturers' Association maintain a bureau here?

Of course it is well understood that the Attorney General's department is pledged in advance to strict and impartial enforcement of the proposed Curfew Law. There are too many dead letter statutes on the books already.

The alleged unrest of the Portuguese colony seems to simmer down to the mouthings and the private grievances of one or two individuals. The course of the Legislature in granting a hearing to a delegation of the petitioners was wise. Not a great deal was learned, however. There remains the old and well warranted complaint that Asiatics are not very slowly capturing the trade pursuits and the small businesses. Every effort is being made to remedy this. All else in the Portuguese petition falls with the admission that scarcely any members of the colony are in need of work. The tax question, which was also mentioned, the Legislature has well in hand. The body of the Portuguese are to be commended for their coolness and good behavior and the Joint Committee has been patient and considerate and has so far exercised good judgment.

A BIT OF TRUTH.

It is the long established custom of at least one newspaper here to hatch up a mess of misrepresentation on affairs in Hawaii for each outgoing mail. Locally everyone understands the purpose, the animus and the transparency of the concoction. It is possible that some people abroad are deceived by the sheet in question. To these THE STAR would say that the Republic of Hawaii was never enjoying better health and never had more promising prospects than at this writing, even with a Legislature in session. There is more confidence than ever in the Republic and its leaders. The old bitter factional feeling has died out entirely. Business is good in most lines and the heaviest sugar crop ever sacked is being taken off.

PECULIAR ARGUMENT.

One of the very best ways of discussing a measure without discussing it is to gas at it irrelevantly. That is now the poise of the *Advertiser* to the refunding proposition. It says many people thought "there was a nigger in the fence." The intimation is entirely new and is not germane at the instant. What the people thought, as brought out in utterances of Senators, was that the measure was fatally faulty on account of figures and conditions. The integrity of the Minister of Finance was not questioned. This comment in its nature is of bad taste, out of date and hopelessly or uselessly irrelevant. Another suggestion advanced that has no bearing whatever on the issue is in relation to Senator McCandless, who was no more prominent in opposition to the original measure than Senator Brown, Senator Baldwin and several others. The *Advertiser* asks if Senator McCandless will guarantee to negotiate a loan on terms he has proposed. THE STAR cannot answer for the gentleman, but it is noticed that the Minister of Finance offered no positive assurance, and further that the *Advertiser* says, "if given a chance he may—we do not say he will—make a success." A venture on these lines may fairly be classed as doubtful. Now, let the by-play cease and the question of refunding be taken up as has been urged by those who really believe in the idea. The Minister demands latitude in this enormous transaction. Yet he came before the Senate to consult and advise with it, with a plan which he contended could not be varied from a hair's breadth. The plan was on that account rejected. It is now the Senate's turn to say if the body has at all any privilege of expression in the premises.

Timely Topics.

April 27, 1896.

Men and Issues for '96.

Forecasts and predictions regarding the next presidential elections are becoming very numerous. The preliminary campaign has opened in dead earnest, as may be observed by the way the various managers for candidates are working the conventions and fixing delegations. Chauncy M. Depew, the silvered tongued, after dinner speaker, gave one of his characteristic speeches at the Union League Club's banquet at the Palace Hotel, and from all reports it was satisfactory to the representative California present.

Mr. Depew has the happy faculty of keeping his audience in an agreeable mood and at the same time telling them some cold hard facts. In speaking of the financial condition of affairs in the United States he says: "Here we are declaring war on the whole world and borrowing money to do it with."

Now I am ready to fight the whole world, but I want something to do it on. In the last three years we have had the experience and Europe has had the business."

Mr. Depew seems to be an admirer of beautiful women and pays a very high tribute to the ladies of San Francisco.

They are beautiful indeed. I have known for a long time that in half an hour's walk in Louisville or Baltimore one may see many beautiful women. The admirers of Southern beauties should come to San Francisco, however, and walk down Kearny and Market streets as I have done. The array of female loveliness here is positively startling, sir. It is magnificent. Magnificent—that is the word."

It is a good thing that all people are not constituted the same as Mr. Depew as beauty and loveliness in women is rather a hard thing to live on. Most people desire something more substantial. If a man can have both loveliness in women and in those things that go to make up the joys of our everyday life, a magnificent "NEW PROCESSION" Blue Flame oil stove for instance, he is one of the most fortunate.

During the short time that we have had these stoves on exhibition we have had calls from a dozen or more people each day asking us to show them the merits of the stove and also to let them see it in operation.

We have had numerous applications for them, but as the stoves were only sample ones, and only two at that, we have had to explain that the regular consignment was on the way and would arrive shortly, when we will be pleased to fill their orders. We were surprised to see the number of people who took interest enough in the stove to ask about the working, cost of fuel, etc. The one essential point that appears to be very favorable with those who have investigated the stove is the cheapness for the fuel as compared with other stoves on the market.

The simplicity of construction commands it to one and all who are desirous of a stove that is ready for use at a minute's notice. While this stove is very simple in its construction and easily handled there has been nothing in the way of modern improvements left off that would tend to make it more practical. It is well to remember that the principle of the burner is the same as is used in all chemical laboratories. By the use of this burner obtained the "blue flame" which shows that the combustion is complete and there is no fear of an explosion. The mechanical construction of the burner is such that it is an utter impossibility to turn the wick too high, thus insuring a perfect flame at all times when in operation.

The alternating sun and showers during the past few months have acted as a tonic on the growing things in the yard and garden. The grass has grown greener and wherever the beetles have given the plants an opportunity buds have blossomed into beautiful flowers. But green grass and sweet smiling pansies fade in their attractiveness if the pathways and lawns are not kept tidy. Yard brooms and energy will do the work if the materials and energy are the right sort.

We have yard and push brooms made to wear, and we sell them cheaper than you ever knew of them being sold for.

No CAUSE TO WORRY.

Bill She Was a Tribe Anxious About Things in Howell.

There was a motherly old lady sitting in the middle of a small booth in the Faneuil Hall Street deposit when a man with a script sat down beside her and began to read a newspaper. She eyed him sharply for a moment and then said, "What's this news today?"

"Nothing very extraordinary," he replied.

"See anything in there from Howell?"

"Not yet."

"How far from Howell is party near there, Bill? Don't have visitin' my sister. Haven't been here but two weeks, but it seems a full year. Only got one letter from Joseph, though he's been in touch with me since he was born. He's been in touch with me to inform me that he was well and hoped these few lines would find me the same, which they did. I'm a little worried. Don't find any item there about house or barn burnin' up near Howell?"

"No, ma'am."

"Joseph was breakin' a colt when I came away. He didn't say anything about a farmer or his neck broke or being kicked to death?"

"Nothing of the sort, ma'am."

"Anythin' about one fall down a well?"

"No, ma'am."

"Joseph is awful reckless, but mebbe he's got through all right. Anything about a man's neck broken or a gun burst open under a man's head while he was shootin' at a hawk?"

"Nothing whatever. I think you will get along all right. I expect the plow has got out of the ground in three or four days, and I expect the tools have worked out again, and Joseph has left the collar door open every night, but if it won't be all I shall be a thankful woman."

"How far is it about a farmer runnin' away with the little girl while his wife was absent?" said the man as he turned the paper.

"I don't know. Want, that's all I know. I don't know anything about a farmer leave his wife and his little girl there, and Joseph is so awfully hasty that even the sheep dodge him. Much obliged to you. I expect to find things a little topsy turvy, but I hope this'll be all that's to worry about."

There are some rapids which require particular attention from the reader, but there is a young man in a New England city who, to judge from his own statements, finds nothing to check the speed with which roads, even in the most difficult books.

"I can't say I'm easy to pass," he remarked cheerfully to a friend. "Now, people call Euclid's Elements a hard book. I've heard men say, 'But I don't read Euclid's Elements.' I say, 'I'm not easy to pass.'"

Children's Aid Association will hold
its monthly meeting at 10 a. m. to-
morrow.Mr. Brown moved to strike out
the amendment. Fort street and
other owners would be greatly ben-
efited. It could not block work,
but would be on the other hand
greatly enhance values. On Maui
the people had deeded tracts in fee
simple for the advantage of roads,
simply for the increased values on
property.Mr. McCandless contended that
the principle was a sound one.There had been too much pro-
secution along this line. The gov-
ernment must be protected as far
as possible. Let us look beyond
the island of Honolulu. The gov-
ernment needed money for roads
into rich agricultural districts.
Here the money should come out of
those to be benefited.

Voted result as follows: Ayes

—Lyman, Northrup, Holstein,
Baldwin, Horner, McCandless and
Schmidt — 7. Noyes — Hocking,
Brown, Wright and Waterhouse
