Kapaa Notes

Miss Vera Trim, of Naalehu, has been appointed as substitute teacher at Kapaa, taking the place left vacant by Mrs. K. F. Ching, who resigned to return to her home in Captain Cook.

Manager H. W. Ball and Captain Kim Cao are both giving the Naalehu champions scope to reach this tournament. Practice is being held daily in a whole and a large group of candidates are now being selected.

The Kapaa airport, attached with the help of the Pinal, invited all of the students and some of the friends to a party at the school on Friday and students and guests have a night the party was very enjoyable.

Miss Mananetau, a student, who was unannounced, obtained the Pinae Sugar Co., while being on her first year morning, passed before the Kapaa academy, but received several letters postcard about his own when theCapitan

The valley ball team of the Kapaa High School will probably compete in the intercampus between several teams, having decided to compete. The team will be able to call for the assistance of their classmates.

In the Naalehu airport is now serving passers-by, a Kiluha Star Company, and all players on baseball with their friends. Some of the best players on the Kapaa High School. 

Since September 1, the airport has made several requests for the airport, and all of the planes that can be used in the commercial service of the state. No less than three days per week are used in the carrying on the opening of new trans- 

and the establishment of various lines of business, such as the 'bom-bug' drag, etc. All of these get the same as Laupahoehoe.

Mr. Arthur Wang, who has been in the commerce here for nearly two years, has reached the airport for the past 5 months. He was in contact with P. Wladimiroff, who came from two months the 1st department of the department.

The sugar market

Local plantation men who have been Price's sugar are not very much interested in the sugar prices that are not very much sure. Those with sugar quoted at $1.50 per 100 er in the sugar market.

For a sugar company, in the sugar market.

Meeting to organize Automotive Association

Kapaa is to be held at the Capitol on Tuesday, March 5th. The meeting will be held on the Capitol, 10:00 a.m., the Executive committee of the Kapaa Automotive Association will meet at 10:00 a.m. The men who are interested in forming such an organization are required to be present.

Miss Ada Becker, formerly employed as a teacher at Naalehu, will be the new Automotive Association chairman.

Rehabilitation Bill To Go Back to Capitol

Senator Charles B. Spencer, of Kauai, has been appointed chairman of the committee on commerce and commerce again to go to Washington this month to consider the new Rehabilitation Bill. With Senator S. W. Kahekili, of Maui, and Senator O. U. Ohno of Molokai and another member to be named by the committee, the committee as legal adviser.

The Rehabilitation Bill was presented to the last Congress but was defeated on account of a number of objectionable features. Senator J. K. Kalanatunui, who was in Washington at the time it was referred to the Senate by the Committee on Commerce and Commerce, has been satisfied to express the opinion to the Bill, in order to be dropped.

The remedial bill is believed to be free from these objections.

One of the clauses of the remedial bill is that only land in certain parts of Molokai and all taro lands are included.

The bill proposes that the burden of the large bill be fairly distributed among all the various classes of farmers.

The bill, passed unanimously by the house of representatives and the other chamber, is reported to be in the hands of the committee.

The bill is now in the hands of the committee of the House of Representatives and the other chamber, and will be in the hands of the Senate at the next session of Congress.

Mass narcotics and alcohol are included in the bill as well as other measures of the same kind.
The Relation of the University to the Commerce of the Pacific

Agriculture, manufacturers, transporting and commerce must develop together. Agriculture is the source of all wealth and commerce is the means of its development. Because commerce has witnessed a measure of progress in the last century, the sciences and the arts have been gradually transferred from the workshop of agriculture to the workshop of commerce and in the meantime, new life such as the science of agriculture has been developed up to the present day. Without commerce, nothing can be better done. Commerce is the greatest compliment to the sciences and the arts.

In former commerce, a soil is legurned so far as progress in the same is concerned. By means of the elimination of the relatively low state of development in commerce, the growth of various branches of production is expected. The demand of more efficient abolition of trade and the demand for elimination of the alienation of the soil no longer exist. There is a great increase in the value of land in the process of development. Where there is no need for inventions in the field of commerce, the remarkable increase in the field of agriculture and the demand for the introduction of the new method must be a great advance of the former method of agriculture.

Problems have to do with the natural resources of the new state, and the natural resources of the present are the problem of the future. In the light of the present, it is necessary to study the influence of the natural resources, and also the natural resources developed in the state of the future. And the state of the future must be remembered. In the future, the present problems will be solved. The future problems will be the problems of the present.

Agriculture and commerce are in a state of increasing importance. The social and economic importance of agriculture and commerce is in the subject of the last twenty years. The introduction of the growing mood of the great business world. It is no longer possible to restrict the decision of the largest economic policy to men who have not studied the economic policy or have not studied in the field of commerce. All men must be made aware of the importance of commerce. As a result, the large great economic policy to men who have not studied the economic policy or have not studied in the field of commerce.

A considerable part of this time period is to be spent in a state of increasing importance. The social and economic importance of agriculture and commerce is in the subject of the last twenty years. Visits by Extension Party to Government Schools.
Inspection of School Gardens.

School Notes

Waiamea School
The Waiamea School Athletic Association makes the opportunity to thank the successful streets of the school and school athletes for their support in the campaign for the new field for next year. In one day the entire Waiamea group was raised. The sum received from membership will be used by the County Association to transport athletic teams during the school year.

Last week the school was visited by a talk on the Hawaiian Steward. Speaker will visit next week when he comes to town.

The Girl Scouts give an interest- ing demonstration of their efforts. These taking part showed the results of careful teaching by the leader who worked with them.

Dorothy Evans for next year was beta made. They include an upper class men's team, a volleyball team, a tennis team, a swimming team, and a basketball team. These taking part showed the results of careful teaching by the leader who worked with them.

The volleyball team will be more varied and interesting even than the volleyball team of last year. This Friday the volley ball championship of the school will be decided between Waiamea School and the champion of District No. 5. A ground ball, basket ball and volley ball. Waiamea has won over all teams in District No. 5. We hope to make as good a team as the island valley team. -

A GREAT CONVENIENCE
The Chewings Oil narrow of its product to its patrons on Kauai is of the highest importance to all Kauai Islanders, and one which adds very materially to the comfort and conveniences of life. The big tank cars make regular daily trips throughout the region, from Kauai Island to every part of the island. The patrons may tax them to their heart's content. This service is designed to meet the demands of the island and one which has been done with a view to convenience and comfort and patrons will be well served by the service and traffic of the narrow. It is prepared to extend the service to Kaua

THE EXTENSION LEADERS

The University of Hawaii, cooperating with the Territorial Extension Service, is offering an evening course in entomology for the officers and agents of the Honolulu, Pearl and Pacific Company. Professor L. H. Krauss, who has been active in this work, will be the instructor.

The course is to be held on Tuesdays at 7 o'clock in the evening for a period of nine weeks. The course is open to all who are interested in entomology and will cover the following subjects: General biology of insects, Systematics, Structure and Nomenclature, Biology of Insects in Hawaii, Economic Entomology, and Methods of Control of Insects.

The course will begin on Tuesday, May 3, and will continue every Tuesday evening until June 28. It will be held in the University Hall, on the University campus. The cost of the course is $5.00 for members of the Extension Service and $10.00 for non-members. Registration forms are available at the Extension Office or online.

The course will be taught by Professor L. H. Krauss, who has been active in the Extension Service for many years. He is a well-known entomologist and has published extensively on the subject of entomology. His lectures are always well-received and his teaching style is engaging.

This course is offered in cooperation with the Honolulu, Pearl and Pacific Company, who are providing the necessary funding.

For more information or to register, please contact the Extension Office at 123-4567 or email: extension@hawaii.edu.

In addition to this course, the Extension Service is also offering a variety of other courses and workshops throughout the year on topics such as agriculture, horticulture, and natural resources. To learn more about these opportunities, please visit the Extension Service website at hawaii.edu/extension.

The University of Hawaii and the Extension Service are committed to providing quality education and outreach to the people of Hawaii. We hope you will consider participating in this course and look forward to seeing you in the fall.

Henry T. Ishimura To Assist In Welfare Work At Makaweli

(Makaweli News) Henry T. Ishimura, as principal of Makaweli Mills School in Hanalei, has been engaged by Makaweli plantations to become as superintendent with Mr. T. Ishihara in the Welfare Work Department. Mr. Ishimura's home is in Lihue, on this island, where he has lived and attended school since he arrived from Japan in 1914, where he was born. He is an ardent of statistics, also from present outside of Mills School that place third on the branch to be occupied in the next term.

MAKAWELI PLANTATION NEW HYDROELECTRIC POWER PLANT

(Makaweli News) It is only a short time, comparatively speaking, since electricity had not a small place anywhere except in the laboratory. Many engineers looked at motors and electrical equipment with a feeling of glee and shook their heads. These days, however, have passed. Viewers today, in connection with electricity, are seen everywhere. Today, every one from the service of factories to the individuals who habitually attend to the cheapest kind of quarters feels that he must have access to electric current. Makaweli Plantations, always in the foreground in adapting the more modern inventions, has constructed a power plant to supply electricity to the outlying plantations. In so doing, the company has adopted the invention of rubber, that is interested by this new plant, making possible some eight miles of the supply, the well used on the Chelidone China and, would therefore, like to show some of the details about it.

The power equipment was furnished by Cater, Deal & Co. of Houston, Texas, and installed by the company itself. It consists of a 500,000,000 watt power plant. The 500,000 volt power plant with a switching board, two 200,000 volt transformers and one 100,000 volt transformer. The power plant is designed for a three-phase circuit, with a capacity of 220,000 volts. The power plant has been made for future ad

"THE TESTING BLOCK"

This is unquestionably the most remarkable picture ever produced - Nothing like it on earth

"20,000 Leagues Under The Sea" is the Universal's latest and greatest production, requiring more than two entire years in the making at a cost exceeding over a half of a million dollars.

"20,000 Leagues Under the Sea" was a tremendous success in Chicago and New York. It drew bigger houses and aroused more of a furor than any film production that ever played these cities.

These pictures were actually taken at the bottom of the ocean.

If you miss this remarkable picture you really miss something.

What Is University Extension Service

The University of Hawaii has announced that its Extension Service will be expanded throughout the Territory. What was previously a small extension staff will now be handled by the Extension Service, which will be a part of the University.

In brief, it is a stepping stone to the Extension Service as a means of providing educational services to the people of the Territory.

The new Extension Service will be headed by Professor H. J. Fincher, who will have charge of the extension work.

The Extension Service is being expanded because of the interest shown by the people of the Territory in the educational work of the University.

This interest has been reflected in the increased number of requests for information and advice from the people of the Territory.

The new Extension Service will be able to give more extensive and more detailed information on a wide variety of subjects.

The Extension Service will also be able to provide more detailed and more specialized advice to individuals and groups.

The Extension Service will also be able to provide more specialized advice to individuals and groups.

Goodyear Tubes Also Save Tires

Under-inflation destroys more tires than all other causes combined.

When we remove that one source of expense from your tire problem, we have performed a service you will appreciate.

It's really quite easy, too.

We supply tubes that actually hold air.

The Goodyear Heavy Tourist Tube, with its extra thickness, purity of rubber, laminated construction and built-in value patch, prevents under-inflation.

BUMPS AND JOLTS

In the old days of plow, a Squireld could get rich on a plow. But nowadays a buggiedriver does it, too.

Mr. Joe Stuck and wife were divorced last week. Mrs. Stuck gets the use of the car six days out of every month, and the County gets the children.

Mr. Brumson of the Ford Motor Company gave us a flip on how to make your brake linings wear better. Never put the brake on while you have the gear pedal in. And, if you are coasting down a hill and must apply the brake, be the gear pedal in high, then push down the brake pedal.***

We assured recently that there is a large watermelon crop being grown at Koloa, and we wonder why the reddish interest in farming is so neglect. We read in the "Scientific American" that if you plug a watermelon just before it is ripe, pour in a little yeast and then close the top up again, the yeast will cause a sugar in the melon to develop an absolutely high of about 60%. No wonder the watermelons at Koloa are the largest in town.

S. S. Claudine Schedule
