## BRINGS TALES OF TURKISH ATROCITIES

### LYCURGUS RETURNS HOME

Unspeakable Deeds of Ottoman Troops Told by Returning Greek

### ALLIES FIRED BY FIENDISH CRUELITIES

Brutalities Unbelievable—The Common Weapon of Mussulman

Bringing with him the first real personal stories of an eye witness of the Balkan war against the Ottoman, George Lycurgus, proprietor of the Union Grill, reached home this morning on the Ventura after a two-year absence in his native Athens. Did they not bear out in general the stories sent by the correspondents of the big New York and London papers, some of the statements made by Lycurgus would be almost unbelievable. He tells of women, ravished and spit upon on red hot irons; of children as yet unborn being torn from the bodies of their murdered mothers, and in mockery placed in the dead arms of parents, who were propped up on the ground facing the charred remains of little cottages that had been their homes; of women and children driven in the dead of winter to flee into the mountains, slowly starving to death; of prisoners whose tongues were cut out, and with fingers chopped off so that they could neither speak nor write of the things they had seen in the Turkish lines.

Also the returned traveler spoke of the work that is being done by the Red Cross, to which he attached himself as soon as the war broke out last September, and with which he served until he left the Near East for Honolulu.

**Women Spitted on Red Hot Irons.** "I was in Athens when the war broke out and I at once put myself in the way of doing something for my people. The only way I could help was with the Red Cross, so I joined that and went to Salonika, which, if you remember, was taken by the Greeks without a struggle. But just the same the Turks made Christians pay heavily for the victory.

"We found women there—twenty of them—who had been assaulted by the Turkish soldiers the night before and then, in the morning, had been spit upon on red hot irons. When we found them some of them were still alive. Others had died in the agony of the torture.

"You find it hard to believe that such things happen anywhere in the world in this twentieth century. I tell you that it is impossible to credit half of the things the Turks have done during the six hundred years they have been masters of part of southeastern Europe. We were forced into the present war by just such things as this I am telling you. The difference is that for the first time in history the Balkan allies have been strong enough to bring the Turk to his knees.

**Find Murdered Mothers.** "The Red Cross detachment to which I belonged was in Salonika about a week, and then moved on to Verria. On the march we came across so many horrible things that it would be impossible to tell you all of them. In one place, Baniska, I think we found where the Turks had taken a number of women about to become mothers, ravished them, murdered them with knives and ripped from their still warm bodies the little unborn babies. These, in mockery, they placed in the arms of their dead parents, propped the latter up so sightless eyes faced the cottages where they had lived and fired the houses and when we reached the spot the

### SAY NO 'FREE SUGAR'

POWERS OF SENATE FINANCE TALK TO STAR-BULLETIN

### Smoot And Simmons Look For Small Cut

By C. S. ALBERT  
[Special Star-Bulletin Correspondence]

WASHINGTON, D. C., Jan. 18.—"Sugar will not be placed on the free list under any circumstances," said Senator Smoot of Utah to the Star-Bulletin correspondent. "There is no danger whatever of such radical legislation. There will of necessity be some reduction. It may go a trifle below the \$1.60 per hundred pounds, as fixed in the tariff revision measure of last session. It may even be a fraction below the \$1.52 1/2 which is the minimum fixed by the Progressive Republicans. There is no possibility of reduction much beyond that point."

Senator Smoot is a member of the finance committee and represents a state largely interested in the production of beet sugar. He will take an active part in all the fights against lowering the sugar tariff to a point where the industry would become unprofitable.

"The reduction in the sugar schedule will be a long distance short of free sugar," said Senator Simmons of North Carolina, who will be chairman of the finance committee when the senate is reconvened by the Democrats, after March 4. "There will be a reasonable and satisfactory modification, but nothing need be apprehended beyond that point. Neither the cane nor beet industry is in a position to stand free sugar or anything approximating it."

A large proportion of Republicans and Democrats agree with the views expressed by Senators Smoot and Simmons. It is admitted on all sides that free sugar is impossible, no matter what action the House takes in that direction.

It is now, as heretofore, barely possible the House may pass a free-sugar bill. That would be done solely to keep the record of that body straight and regular, such a measure having been adopted at the last session. Such action would be for form only and not with the expectation of concurrence by the senate.

### Probe Dynamite With A Pickaxe

Three Japanese laborers, Araki, Anoda and Fujina, were removed to the Queen's hospital by the police ambulance at a quarter-past eleven o'clock this morning, suffering slight injuries about the face and neck as the result of the explosion of a quantity of giant powder which they were using for blasting purposes. A fourth Japanese, whose name was not learned by the police, was also slightly injured.

According to the police report, the four Japanese were in the employ of William Ellsworth, the local contractor, and this morning were engaged in doing some blasting work on Magnolia avenue, Kaimuki. A light charge of giant powder had been set to remove some rocks, and the fuse lit, while the four Japanese retreated to a safe distance to watch results. After a few moments, during which time the blast refused to go off, the quartet approached the place, thinking that perhaps the fuse had gone out. One of the number attacked the blast with a pick with the result that the powder exploded with considerable violence, scattering small rocks and stones in all directions and throwing the four laborers to the ground. The three who were injured the most were struck about the face and neck by a number of small stones, and these were removed to the hospital by the police ambulance. The fourth, who, less injured than his comrades, disappeared in the direction of the car line before the ambulance arrived upon the scene. It is thought that neither of the three who are now in the hospital is seriously hurt.

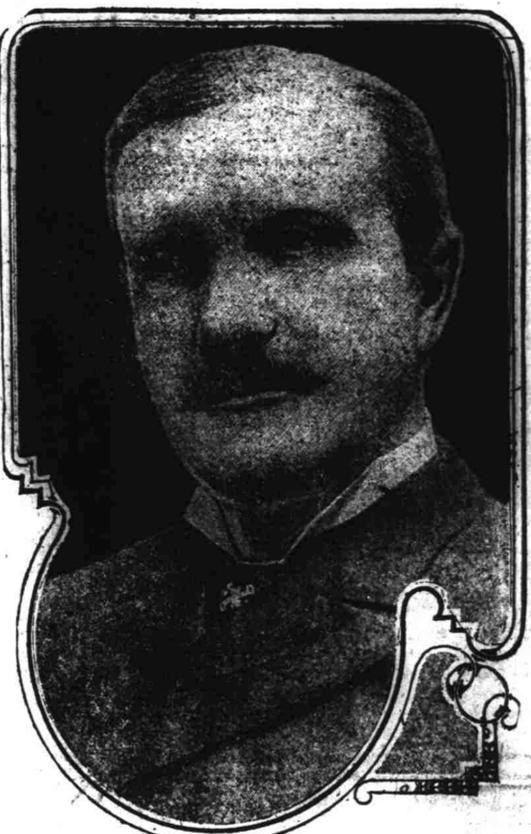

### BURNING MOSS IS POLE HERE TO INVESTIGATE CONDITIONS

To investigate wages, health and living and working conditions here with a view to aiding in the importation of immigrants from Poland, Joseph J. Okolowicz, director general of the Polish Emigration Society, with headquarters at Cracow, Austrian Poland, arrived in Honolulu this morning to spend several weeks on the islands.

He comes on the special invitation of Dr. Victor S. Clark, who, prior to his recent return from Europe, made arrangements with Mr. Okolowicz for the latter's visit. He will remain here several weeks. He was met at the dock this morning by Dr. Clark, who later took him to the capitol building and introduced him to the governor.

Okolowicz takes favorable labor conditions in the territory, a large shipment of Polish emigrants may be expected to arrive here in the course of the next year. The organization he represents conducts the transfer annually of large numbers of his countrymen to the United States, Brazil and several European countries such as France and Germany.

### MAY HAVE TO TALK TO COMMITTEE AFTER ALL

WILLIAM ROCKEFELLER  
The oil trust magnate, who is said to be unable to speak above a whisper, and that not for long, but who will probably have to answer some of the questions the money trust investigating committee wants replies to.

### Lieutenant Hume Again Convicted

First Lieutenant John K. Hume, Fifth Cavalry, who last year was tried by court martial for being absent for several days without leave, found guilty and sentenced to detention with the garrison limits for six months, with forfeiture of a portion of his pay, has again been disciplined by the army judicial authorities. Six weeks ago Lieutenant Hume was before another court martial at Schofield Barracks charged with the neglect of certain inspection duties, and the findings in the case have just been returned from the Western Division.

Lieutenant Hume was found guilty as charged, and in consequence will be confined to the limits of the post for a period of three months, as soon as the Fifth reaches its new station and will forfeit \$25 per month pay for that time.

Last year was an unlucky one for "Jack" Hume, for besides facing two courts martial, he was the only cavalry officer to fall in the Russian raid being thrown at one of the jumps and falling to complete the course. Also, he was the first officer of the Red army to be wounded during the maneuvers

last October, although that is what might be termed negative hard luck, as a theoretical bullet did the work. Kamehameha Real Post.

Capt. George A. Taylor, commanding the 68th company of coast artillery, and post commander at Fort Kamehameha, has sent a memorandum of the organization of his command to department headquarters. Kam is now a full-fledged two-company post, and while it may be shy on swivel chairs and mahogany desks, it has all the officers necessary to fill them.

Following is the post organization: Captain George A. Taylor, commanding post; First Lieutenant V. E. Clark, 68th company, acting adjutant, acting quartermaster, police officer and officer in charge of athletics; Second Lieutenant C. R. Baxter, post exchange officer; Captain Clifford Jones of the 75th company is summary court officer and fire marshal, while First Lieutenant E. L. Kelly and Second Lieutenant H. E. Ellis, 75th company, have no duty outside

### TURKISH WARSHIPS SUNK BY GREEKS

Two Vessels Destroyed by the Heavy Fire of the Grecian Battle Boats in Conflict off the Straits of Dardanelles—Further Details of the Sea Fight Missing

ATHENS, Greece, Jan. 20.—Further details of the great naval engagement between the fleet of the Turks and the warships of the Greeks last Saturday off the mouth of the Dardanelles have reached here this morning. According to these dispatches the Greeks were victors all along the line, in the most desperate engagement of the entire war. Two of the Turkish battleships were sunk by the tremendous fire from the guns of the Greek vessels and the havoc done to the other ships of the Turkish fleet was heavy. No estimate of the loss of life has been received as yet.

### Declined To Bond Dynamiter

CHICAGO, Jan. 20.—The bonds put up for the release of Eugene Chan, the San Francisco labor leader, convicted of conspiracy to dynamite non-union structures were today refused by the federal court here. The judge held that the liability for the entire sixty thousand dollars must be assumed by each of the bond holders individually and separately whereas the stipulation upon which the bondsmen agreed to furnish the bond was that each should be responsible for a part only. Chaney remains in jail.

### AUSTRALIANS FEAR CANAL

As the great Panama Canal nears completion, Australian coal operators become more interested in the result of the opening of the waterway, with its relation to the New South Wales fuel market.

The possibilities of shipping coal from Gulf of Mexico ports to the west coast of the United States or to Hawaii by the way of Panama Canal and in direct competition with Australian exporters was a matter that received much attention from Honorable Nell Neilson, special representative for the Australian Commonwealth, who is completing a tour to the United States and Canada, and is a through passenger in the Oceanic liner Ventura that called here today enroute to the colonies.

"I made exhaustive inquiry as well as investigation of trade conditions now existing between the United States and Australia during my stay abroad.

In the opinion of Mr. Neilson, the Panama Canal is to figure largely in the future calculations of big business interests on both continents.

Mr. Neilson spent some time at Washington, New York, Philadelphia and also visited large cities in Canadian and British Columbia. It has been some six months since he last passed through Honolulu.

This morning, the commissioner was taken in hand by Alexander Hume Ford and other promotionists and accorded every consideration.

Mr. Neilson kept in direct touch with commercial interests on the mainland and declares that he is returning to Australia well supplied with data and information that will prove of vast interest and usefulness.

"I devoted some time to looking into the methods in vogue in the large grain centers of the United States for the speedy handling of the product. In Australia we still use the sacks in shipment as well as in storage."

### BIG PARTY OF TOURISTS HERE

A big party of tourists and southern tourists arrived today on the Oceanic liner Ventura.

Some of the tourists will return on the Sierra and Sonoma while others will await the Ventura when that vessel comes up from Australia.

### FIGHT FOR THE ARMY CANTEEN

In favor of the restoration of the army canteen, Secretary Stimson, Surgeon General Torney, Brig. Gen. Wetherston and Representative Barthold of Missouri appeared recently before the house military affairs committee, to urge Mr. Barthold's bill for that purpose.

Secretary Stimson said that without the canteen conditions were worse than when the sale of beer and light wines was allowed at army posts.

Secretary Stimson testified that the government was anxious to clean out the red light district in Colon before the Panama canal opens for traffic.

He said that on his recent visit to Panama he attempted to open negotiations for the government to buy ten acres comprising the district, but was unable to do so despite his offer of a high price. Such acquisition would have to be by treaty with Panama.

Surgeon General Torney, U. S. A., said that at the Presidio in California there had been much intemperance among the soldiers because of the large number of saloons just outside the post.

### COMING HERE TO WED, SHE MISSES TRUNK AND TRIP

How a pretty young lady bound from Kansas City to Honolulu to be the bride of a young business man here, lost her trunk and trip on the pier in San Francisco, is told in papers arriving this morning from the Coast. Here is one account:

"It was not long since she was late that Miss Mary Kennedy, a pretty girl from Kansas City, missed the liner Siberia yesterday. Miss Kennedy has her passport booked for Honolulu, whether she was found, it is understood, to be the wife of a prominent young businessman of the island port.

### HONOLULU QUARANTINE SERVICE IS GROWING

By C. S. ALBERT  
[Special Star-Bulletin Correspondence]

WASHINGTON, D. C., Jan. 10.—Honolulu will soon have a new assistant in the quarantine service. Assistant Surgeon C. M. Fauntleroy has been instructed to report for service to the chief quarantine officer at Honolulu.

SAN FRANCISCO, Jan. 18.—Beets analysis, 98.41-44. Parity, 3.90 cents. Previous quotation, 98.44.

SONOMA NOW A DAY LATE

With but a port engine and propeller in commission, the Oceanic liner Sonoma, from Sydney by the way of Pago Pago and Honolulu is making excellent time, according to the receipt of a cable yesterday at the agency of C. Brewer & Company, which notified the local representatives that the vessel was expected to arrive at Honolulu on January 25, and but one day behind the regular schedule.

The Sonoma is predicted as making about thirteen knots according to the interesting text of the message received at the port yesterday. The vessel suffered damage to her machinery a few days after leaving Sydney, N. S. W. The starboard shaft was said to have been broken thereby causing the liner to steam along with her port engines.

The Sonoma sailed from Pago Pago on Saturday evening, and is now well on the way to Honolulu.

It is the present intention to dispatch the vessel from Honolulu to San Francisco Sunday, January 25.

Captain Cowell, master of the steamship Ventura now at this port and to sail this afternoon for the colonies has been advised to keep a lookout for the Sonoma. His vessel will also keep in wireless touch with the disabled liner.

Kinau Bringing Much Sugar.

A report has been received here to the effect that the inter-island steamer Kinau, expected to arrive from Kaula ports early tomorrow morning, will bring 6500 sacks of sugar, in addition to a quantity of general cargo. The Kinau's movements were reported through the arrival of the steamer Nona this morning, the latter vessel returning with 3350 sacks sugar, 677 sacks rice, and 68 packages sundries. Officers in the Nona believe that they passed the American schooner Mary E. Foster, at three o'clock yesterday afternoon, the sailing vessel at that time being about two miles to the windward.

Wilhelmina Report.

The following wireless message has been received by the agents of the S. S. Wilhelmina, bound for Honolulu: For Honolulu: 127 cabin passengers, 17 steerage passengers, 31 bags mail, 17 packages Wells-Fargo express matter, 3 automobiles, 2750 tons cargo. For Hilo: 195 tons cargo, 5 automobiles.

Ship will arrive Tuesday morning and dock at the Hackett wharf.

Salvator back on the Marine Railway.

It is believed that several weeks will be required to complete repairs to the bottom of the schooner Salvator, that has again been hauled on the local marine railway. The vessel will need a large section of new keel. Other damage has been done the vessel through a later collision with the railway wharf. The Salvator has been a visitor at the port since the middle of last December.

Hawaii Sugar Report.

Sugar is accumulating at the several plantation warehouses on the island of Hawaii, according to a report brought to this city this morning by Purser Charles Jones, in the inter-island steamer Mauna Kea. Sugar awaiting shipment includes the following: Oha 18,500, Waiakoa 11,500, Oomea 800, Laupahoehoe 6950, Hamakua 4000, Kukuihale 3500, Punahou 3550.

Dr. Nelson leaves the sea.

Dr. George Nelson, a well liked surgeon in the Oceanic steamship service, decided to remain ashore, just before the sailing of the liner Ventura for Honolulu. He may retire permanently from the sea. The new surgeon in the Ventura is Dr. H. E. Francke, who while a stranger to the Pacific has for years crossed the Atlantic in vessels in the Cunarder and French Mail lines.

PLAN TO PROMOTE BEAUTIFYING CITY

A regular meeting of the Oahu Central Improvement Committee will be held in the rooms of the Merchants' Association at 7:30 tomorrow (Tuesday) evening. In addition to the regular business an important publicity plan for the beautifying of Honolulu will be presented by the Outdoor Circle of the Kilauea Club. A full attendance is requested.

Mrs. Sarah McClees, one of the best known temperance workers in the country, has just died in Oakland, California.

HAVE YOUR BAGGAGE HANDLED BY RELIABLE BAGGAGE-MEN

City Transfer (JAS. H. LOVE)

FLOATING GARAGE WAS VENTURA

Thirty-seven automobiles and motor-driven cars and trucks afloat in the Pacific and aboard one liner comes pretty near becoming eligible for the big stovetop medallion, to a record breaker.

The Oceanic steamship Ventura from San Francisco steamed to a berth at the wharf this morning, and within fifteen minutes stoves and began work of discharging the first of the large number of cars. The machines were in some cases "knocked down," boxes and crates adding much to the seven hundred tons of general cargo for discharge at Honolulu.

Few instances can be recalled along the local waterfront where a steamer from the coast ever brought a larger number of motor cars than the contingent received this morning with the arrival of the Ventura.

For two days after leaving the coast the Ventura bucked a fierce opposing wind with an accompanying rough and disagreeable sea. Few were the passengers who failed to succumb to the prevailing mal de mer.

Many accustomed to trans-Pacific travel, were obliged to forgo active participation in out of door sports or even sit by and appear interested in any sort of entertainment prepared by the ship's officers.

The one consolation that afforded Ventura passengers a grain of comfort was the belief that the Matson Navigation steamer Wilhelmina fared no better at the hands of Old Neptune.

The Ventura arrived at her wharf about one hour later than is usual with Oceanic liners. Cabin passengers for Honolulu numbered 114, while there were 10 in the second class and 3 in the steerage.

The through list includes 30 cabin, 27 second and 25 steerage passengers for Pago Pago or Sydney.

In addition to the thirty-seven motor cars for the islands, the Ventura freight included a quantity of general merchandise and refrigerated provisions, to the amount of seven hundred tons.

The vessel is well laden with through freight, the principal lines being canned salmon, to the number of 19,000 cases.

The Ventura brought mail from the mainland to the amount of 334 sacks. The vessel is listed for dispatch to the colonies at four o'clock this afternoon.

One of the several interesting features connected with the large list of travelers in this liner is a large collection of birds and animals, belonging to the Great Scheg Shows. The circus is being transported to the colonies, there to open an extended season. Four ponies, 10 monkeys, a large and educated baboon, 10 dogs, a trick cat and 66 parrots are numbered in the company.

Purser Baker declared this morning that there was not a dull moment on the ship when the green and white "poils" began fitting up the voice of protest over the rough weather. The conversation never lagged. Some of it was highly spiced and really not fit for publication in a respectable wireless bulletin, such as is sometimes issued by Ventura officers.

When the parrots, aided by the si-mians, opened up a talkfest, the hum resembled that some times heard at a suffrage meeting.

A quartette of mainland railway men left the vessel on arrival here, to join the Hamburg American liner Cleveland with its crowd of five hundred round-the-world excursionists.

It was a delighted crowd of frost-bitten Los Angeles people who left the Ventura this morning. With a view of escaping the rigors and hardships of a southern California winter, a delegation of thirty well-to-do Los Angeles residents formed a party which booked passage in the Ventura.

In some instances they will remain in the islands until the return of the Ventura from the colonies. Others plan to take passage in the Sonoma and also in the Sierra.

The cold and snow prevailing throughout California is declared by steamship men as having greatly stimulated tourist travel from the coast to the islands.

The finishing touches to refitting the Sallor Boy are under way as that vessel lies in the stream. This vessel is believed may enter the island trade, carrying hard wood lumber from Hilo to Honolulu. Much labor has been expended on repairing the winchjammer since she first arrived here is distressed condition, following an eventful voyage from the south seas.

Per str. Likelike, from Maui and Molokai ports, Jan. 19.—Father Thomas, C. Crowell, S. E. Kalama, Mr. Kaal, H. R. Hitchcock, N. J. Bell and wife, Mrs. Kaalawahine, Master Kaalawahine, Mrs. Lucy Kupiela, A. Judd, A. B. Saloo, Loy Sam and nine deck.

WILHELMINA IS STORM-TOSSED

The Matson Navigation liner Wilhelmina from San Francisco to Honolulu is to arrive here early tomorrow morning with 127 cabin and 17 steerage passengers, is reported through wireless messages to have experienced a decidedly rough voyage for the first two days out from the coast port.

The Wilhelmina and the Oceanic liner Ventura were in almost constant wireless communication on the way down from San Francisco.

The Wilhelmina is to berth at Hackett wharf tomorrow morning where 2750 tons general cargo are to be discharged. Three automobiles are included in the shipment.

The vessel is also bringing down a later accumulation of mainland mail amounting to 91 sacks.

The Matson steamer is to proceed to Hilo there to be discharged of 195 tons freight and five autos. The liner should sail for the Hawaii port on or about Thursday evening.

Freighter Dollar at Kahului.

A wireless received this morning announces the arrival of the Dollar Steamship Company's freighter M. S. Dollar at Kahului. This vessel reached the Maui port late yesterday afternoon and brings a shipment of cement, Japanese coal and fire brick, consigned to the Kahului Railroad Co.

The M. S. Dollar is making her first visit to the island port. The vessel completed the voyage in twenty-four days. The coal on board the steamer amounts to 2,500 tons of "lump" and 350 tons of "blacksmiths." There are also 11,000 sacks of cement and 85,000 fire bricks on board.

VESSELS TO AND FROM THE ISLANDS

(Special Cable to Merchants' Exchange)

NORGAARD FINED FOR ILLEGAL SMOKING

On the docket of the police court this morning appeared the name of Dr. Norgaard, territorial veterinary surgeon, who has arrested on January 18 by wharf Officer Calvert, charged with smoking on one of the territorial wharves.

"Good morning, doctor," said Judge Nonsarrat, after the charge had been read. "Have you never been warned that it is against the law to smoke on the territorial wharves?"

"No, I never have," answered the doctor, as he smiled back at the judge. Officer Calvert was the called, who made the statement that on January 18 he had seen Dr. Norgaard smoking on one of the wharves, and upon his telling him that smoking was prohibited, threw his cigarette away. A few minutes later the officer said he saw him lighting another cigarette, and arrested him.

"The court finds you guilty and orders you to pay a fine of five dollars," said the judge, after some deliberation. "Ota."

Next, the proprietor of a Japanese billiard parlor, was found guilty of allowing minors to frequent his place of business, and ordered to pay a fine of twenty dollars. Kaaukea, an Hawaiian charged with assault and battery, pleaded not guilty and his case was set to come up for trial tomorrow morning.

Walter Williams, charged with having forged a couple of checks, one of which was for \$5 paid by the Y. M. C. A., asked that his case be postponed. Kwal Sing, who pleaded guilty of unlawfully dealing in opium, was ordered to pay a fine of fifty dollars.

SAMOA RIVAL TO HAWAII

Destined to enter into close rivalry with the Hawaiian islands as a health resort, Samoa is declared as coming rapidly to the front and with the establishment of a direct line of steamships between Pago Pago and San Francisco, as well as the continent of Australasia, a big husky boom down in the south seas is predicted will soon be in full swing.

For the third time in the same number of months, medical men have passed through Honolulu enroute to Samoa, with a view of making a careful and painstaking study of conditions existing there. It is the opinion of Drs. G. R. and J. A. McDonogh of Montreal, Canada, that Samoa offers to the seeker after renewed health and strength exceptional opportunities, not rivaled even by Hawaii.

"We are going to Pago Pago, there to remain for some time. We have in view the establishment of a large sanitarium, which will be constructed along lines suitable for the accommodation of hundreds of patients and health seekers.

Following the investigation of climatic conditions in Samoa and the feasibility of opening a health resort there on a large scale, Dr. McDonogh will return to the mainland where he expects to receive inguential financial backing for his enterprise.

The statement was made this morning, though not confirmed by interested parties, that the Oceanic Steamship Company might assist in carrying out the project, now mooted by the medical men, with a view of further developing and increasing travel between the mainland and the islands in the south Pacific.

The prediction is also made that the American port of Pago Pago is in line for increased business following the opening of the Panama Canal. Drs. McDonogh are also to make a study of elephantias, a disease that is said to exist among the natives of Samoa to considerable extent.

MORE COIN FOR PEARL HARBOR

BY C. S. ALBERT.

(Special Star-Bulletin Correspondence). WASHINGTON, D. C., Jan. 10.—A total of \$95,000 has been recommended by the house committee on interstate and foreign commerce for aids to navigation in Hawaii. The two items involved follow: "Aids to navigation in Pearl Harbor, Hawaii, at a cost not to exceed eighty thousand dollars." "Improvements of light station at Kaula Point, Hawaii, at a cost not to exceed fifteen thousand dollars." "For special mail facilities from the United States naval station at Pago Pago, Island of Tutuila, via Honolulu to San Francisco in connection with ocean mail route numbered eighty, for service from San Francisco to Sydney, Australia, thirteen trips per year, \$49,000." C. S. ALBERT.

ARTHUR G. SMITH, assistant attorney general, went to Wailua today on a short business trip.

GOVERNMENT WINS ORTERIC CASE

In a lengthy decision involving a host of complicated legal technicalities, U. S. District Judge Clemons this morning finds for the federal government in the latter's suit to recover a bond of \$7,960 from James F. Findlay, master of the British steamship Orteric, and his sureties, T. Clive Davies and W. H. Laird.

The suit is an old one, that has been hanging fire in the federal courts since some time in 1911, when the case of the Orteric, the immigrant ship, became famous.

On its face it involved merely a suit on a bond, given to secure the payment of penalties of \$7,960, which were incurred by the steamship on its voyage to Honolulu in 1911 with 1500 Portuguese and Spanish immigrants and which were the subject of an investigation and lengthy report of the federal grand jury of July of that year.

The ship had not complied with the "Passenger act of 1882" to secure health and safety of its passengers at sea, and as a result, among other things, the infant mortality was very high and the sanitary conditions of the vessel were declared by the acting secretary of commerce and labor to have been the worst ever reported to that department.

There were also violations of that provision of the law relating to the segregation of the sexes, for which the master pleaded the excuse of an unavoidable want of discipline due to a riot between the Spanish and Portuguese a few days out from Gibraltar, who thereafter had to be kept separated as much as possible, though this could not be done within the rigid provisions of the law.

There was considerable delay in the presentation of proof and the court suggested the re-opening of the case after it had first been submitted, in order to get certain evidence in the hands of the department at Washington.

CAPT. MATSON MAY BE COMING

Capt. William Matson may be aboard the Matson liner Wilhelmina, due to arrive here tomorrow. No definite advice that he is a passenger has been received, but on the other hand he is rather expected. Castle & Cooke, agents for the Matson line, have made an attempt to get in wireless communication with the vessel but have not yet succeeded in doing so. Capt. Matson makes a trip here about once a year and it is thought likely he is on this Wilhelmina. If he comes, he is expected to stay about a month.

# Malthoid Roofing

Covers buildings in every part of the world. You will find it in Japan. You will see it in Russia. It protects buildings in Alaska. It covers houses on the plains of South Africa. It is used extensively in Australia—Thousands of rolls have been shipped Indo China. You see it in nearly every South American port. Is very popular in Canada.

It roofs the best buildings in every large American City. The magnificent buildings of the Alaska Yukon Pacific Exposition are covered with it. The St. Francis and Fairmont Hotels in San Francisco are protected by it.

Malthoid has a world wide reputation. This is so because it is the original ready roofing.

Its makers have been making ready roofings for twenty-six years.

They have always made roofings that make good.

Send for it. A new and valuable book on the "Care of Roofing." No matter what your experience has been of what roofing you have used, this book will enable you to take better care of it. Sent free.

## BIG ELECTRICAL STORM SHOWERS HAILSTONES AS LARGE AS BEANS

Wahiawa was visited yesterday afternoon by a big electric storm, heavy rain lasting for two hours being accompanied simultaneously with hail at the start.

"The pellets of hail were as big as beans," said Henry Davis, who brought the news to town this morning.

The Wahiawa dam was running over the spillway last night, and all the gulches were full to the banks. Possibly some damage was done to the crops, but of this I have no information.

"Loud but distant thunder was heard in the direction of Kahuku, indicating that the center of the storm was off to sea."

No account of the storm had been received at the U. S. weather bureau when a reporter called there a little before noon, but this was explained by the fact that the bureau receives all its reports from country stations by mail.

Auto parties going round the island report having encountered a terrific storm on the windward side. Rain fell in torrents and forked lightning

played threateningly about the machines, while the thunder was deafening. One party that seems to have had the worst of the storm on the windward side on arriving at Haleiwa found about a dozen autos held there, which had put back after being stalled on the big hill this side of Wahiawa on account of the slippery roads.

District Attorney Breckons had a hard time of it returning from Waimanalo, his car making the sharp turns with difficulty.

There was heavy rain at the head of Nuuanu valley, the waterfalls on the Kahonani side being in fine display. This sight was witnessed by L. A. Thurston and Professor Pillsbury from another height. They were out hunting snails and when they saw the gathering thunder clouds thought they were in for an encounter with a cloudburst, but the storm traveled away from them.

Around the outskirts of Honolulu laundries were heard in the afternoon and bright lightning seen at night, but there was no rain and scarcely a breath of wind.

## CLIMAX OF 'THE MOVIES' TO BE SHOWN AT LIBERTY TONIGHT

Scene from Alaska-Siberia pictures at the Liberty theater tonight.

The most pretentious, and highest class moving picture entertainment ever seen in this city will be shown at the Liberty theater tonight, the subject being Captain Kleinschmidt's pictures of Alaska-Siberia, which pictures were originally made for scientific and educational purposes by an expedition financed by Andrew Carnegie for the Carnegie Museum.

A great deal has been said of Alaska's resources and wealth, but little is known of the grandeur and wonders of the Land of the Midnight

Sun, particularly the wild animal life, the fowl and fish existence and hundreds of kindred subjects that have hitherto remained a comparative secret of this vast frozen territory. In the pictures will be shown some wonderful scenes of actual occurrence in Polar bear hunting, Walrus capturing by lasso, seal snaring, and dozens of other interesting and exciting pictures in animated form, which, accompanied by a particularly interesting descriptive lecture give promise of furnishing, not only a novel exhibition but one of unusual interest.

## LIEUT. HUME

(Continued from Page 1)

their company. First Lieutenant R. C. McDonald, medical corps, is post surgeon.

Three field artillerymen stationed at Echofield barracks successfully passed the examination for gunner, according to an order received from the Western Division this morning. Privates Elmer Dakin, headquarters detachment, and William Rehl, F. battery, are gunners, first class, with percentages of 89.2 and 85.9 respectively. Private Thomas Kimball, F. battery, qualified as gunner, second class, with 79.6.

Captain Louis C. Scherer, Fourth Cavalry, has been ordered before the recently appointed cavalry board for examination for promotion.

Chief Clerk Robbins, of department headquarters' staff, is back at his desk after ten days in the hospital.

Lieutenant Frank M. Andrews, aide to General Macomb, will become a "Manchu" in about three months, and will have to go back to duty with troops. Lieutenant Andrews was recently promoted into the Second Cavalry, now stationed at El Paso, Texas, but there is a possibility that he will be transferred into the Fourth Cavalry, and continue to serve on Oahu.

## ACCIDENTAL SHOOTING AT FORT RUGER FATAL

Private John C. McCrann, 159th company, coast artillery, who was accidentally shot last Thursday by his friend and comrade, Sergeant Truer, died at the department hospital at Fort Shafter at 4 o'clock Saturday afternoon. The wound, inflicted at point-blank range from a 44 Colt automatic, was in the abdomen, and little hope of the soldier's recovery was held out from the first.

This morning at Fort Ruger a board of investigation was convened, and while the report has not yet been submitted, it is believed that Sergeant Truer will be tried for manslaughter, to clear his record. The shooting was purely accidental, being one of those "didn't know it was loaded" cases, and Truer will undoubtedly be acquitted. He is terribly broken up over the affair, for besides having involuntarily taken a human life, the dead man and Truer were close personal friends.

## RAILROAD MEN HERE TO AWAIT CLEVELANDERS

Jules Clerfayt, passenger agent for the Southern Pacific and for Atlantic steamship lines, with headquarters in San Francisco, declared this morning that when the passengers of the big Hamburg-American excursion steamer Cleveland arrive in the Golden Gate city, everything will be prepared for them. Their way will be smoothed through customs guards and other government officials, a special detachment of police will be on hand to facilitate in handling traffic, and there will not be anything left for the passengers to do but go ashore and enjoy themselves.

"That's what we are here for," smiled Mr. Clerfayt this morning, referring to the group of railroad men who arrived on the Ventura this morning to await the Cleveland here. By special dispensation they will be allowed to go back on the Cleveland and passengers can make arrangements through them to continue their journey by rail.

Mr. Clerfayt, capable, brisk and up to date, tells interestingly of the modern arrangements for handling the big excursion and says that Honolulu will benefit from these arrangements because as in this case the time of the passengers here can be spent wholly in looking around and enjoying their stay ashore and they will not have to worry about arrangements in San Francisco.

Representatives of mainland transcontinental lines, with headquarters at San Francisco, who arrived at Honolulu in the liner Ventura this morning included: J. Clerfayt and H. T. Holmes of the Southern Pacific company, J. N. Harrison of the Western Pacific Railway company, and J. F. Moses of the Atchison, Topeka & Santa Fe Railway company.

Collector of Customs Stackable received notification from the U. S. treasury department officials at Washington some days ago regarding the granting of a special dispensation which will permit the railway men to take passage in the Hamburg-American excursion steamer Cleveland from Honolulu to San Francisco.

On previous trips of the Cleveland from this port to the coast, prominent railway representatives were obliged to resort to all manner of humiliating tactics in order to travel with the excursionists. In several instances they either assumed the role of stowaways or signed the articles as "assistant stewards" or "purser."

## POPULAR UNDER NEW-MANAGER

The Popular theater on Hotel street opposite the Y. M. C. A. is now under the management of J. C. Gladstone, who will run the place as a first-class vaudeville and moving picture house. The same first run picture service will be continued and will be shown in conjunction with vaudeville acts that Mr. Gladstone will import from the theater centers.

Tonight's program will include the local favorites, the Gladstone Sisters who will feature their Spanish dance, besides doing their original acrobatic stunts. Their act is considered a very strong one in vaudeville circles. This versatile team incorporates singing, dancing and difficult acrobatic stunts in their act.

Another versatile artist who will also be seen tonight is Miss Edna Kendall, well known as a singer and monologist. Her songs are of the popular variety and her monologues are refreshing. Besides these two strong vaudeville acts five reels of the latest photo-plays will be shown.

Two performances will be given nightly, the first show beginning at 7 o'clock sharp, in order to get the long program through at a reasonable hour. The prices of admission are 10 and 20 cents with a reserved section at 30 cents.

With good vaudeville acts and pictures the Popular ought to be as its name implies—the most popular theater in the city. Sonny Cunha will furnish the music which is a guarantee of quality.

Men should be what they seem.—Shakespeare.

## WILSON AGAINST PARTISANSHIP

President-elect Wilson, according to the fond phrase of some of the most violently partisan Democrats in Hawaii, is a "party man." He is, they declare, a splendid example of the most advanced, the best, the truly progressive Democracy. And they refer to his party affiliation as an excuse for the partisan plan of local government.

Now it ought to be interesting to these gentlemen to see exactly what Woodrow Wilson says about partisanship in government. It might be said that he would be misrepresented in an interview for one paper, or one group of papers, but no charge of misrepresentation can be brought about the report of a speech stenographic copies of which were handed to the New York newspapers for publication. The speech referred to was made before the Southern Society of New York late in December, and here is the way that Woodrow Wilson, the strict "party" man, talked:

"The important thing now is what you, and men like you, think. The nation is made up of its thoughts and purposes.

"What we ought to think tonight is not that the Democratic party won a great victory, but that there is a vast deal to do with the United States, and that it can best be done by forgetting that we are partisans, and forgetting everything except the work for the prosperity and integrity of the nation.

"Some men had the idea that they had been appointed trustees to do the thinking of mankind, and the building up of wealth in conformity with their own plans and purposes. That sort of intolerance no longer characterizes audiences like this, as it once did."

To the Democratic county committee, which is insisting so loudly on Bourbonizing the city and county government, which is declaring that the Democratic party has been appointed by some high authority to take entire charge of city affairs, the second paragraph of the above furnishes room for consideration. The third paragraph might be scanned by those in the community who proceed on the theory that, as Wilson puts it, they can "do the thinking" and that the rest of the community is willing to have its thinking done by them.

## KUHIO'S COURSE

Kuhio's protest against Governor Frear's confirmation at last brings the delegate into the open, so that the people of Hawaii may know exactly where he stands. Had the delegate been as frank on November 1 or November 4 as he was on January 18, there is not the slightest doubt that the narrow margin by which he scraped through to re-election would have been considerably narrower.

Prior to election the delegate, while carefully guarding his words, led all his friends and followers to believe that he would accept Secretary Fisher's recommendations as final, that he would not oppose Frear's confirmation. For the benefit of those who take issue with the above statement, the following quotation from his speech on the night of election is re-published verbatim: "I have come out on record in a newspaper in a statement signed by myself that if Fisher came to this territory and made a fair and just investigation, I'll abide by his decision. That's what I said. And let me tell you, gentlemen, that his decision is the platform of the Republican party today, and I'll stand by it."

Fisher's decision was to recommend Governor Frear for reappointment. The governor's name was sent to the senate by Taft. And now comes Kuhio's protest.

Comment on this kind of tactics is unnecessary. The facts speak for themselves. Kuhio's action was taken evidently after a consultation with John F. Colburn in San Francisco. Not the least of Kuhio's weaknesses is his inability to differentiate between wise and deluding counsel.

## PRACTICAL SCHOOLS IN OREGON

How teachers in Oregon bring school and home closer together by giving school credit for industrial work at home is told with compelling interest by Hon. L. R. Alderman, state superintendent of public instruction in Oregon, in a pamphlet which the United States bureau of education is sending free at the request of teachers.

Building fires; milking a cow; cleaning the

harn; splitting and carrying in wood; turning cream separator; cleaning house; gathering eggs; feeding farm animals; churning butter; preparing breakfast; sweeping and scrubbing floors; dusting furniture; making beds; sewing, washing and ironing the child's own clothes; bathing; arriving at school with clean hands and face and with hair combed; practicing music lesson; going to bed by 9 o'clock every night; bathing and dressing the baby; sleeping with window boards in bedroom; these are a few of the duties for which the teacher at Spring Valley, Oregon, allows credit in connection with regular school work.

The work is definitely measured and allowed for. The child desiring credit for home tasks brings to school a slip signed by the parent testifying to what has been done; 10 per cent is added to the final examination results of all pupils, except eighth graders, who enter and continue in the voluntary contest to see which can obtain the most of such credits; a certain number of accumulated credits entitles the pupil to a holiday, at the discretion of the teacher; and in this one school, at least, cash rewards are given to pupils making the best record in accredited home tasks.

## ANOTHER INVESTIGATION?

Dispatches from Washington this morning reporting that Wilson will send a "small commission of personally-chosen investigators" to Hawaii, the Philippines and Porto Rico to investigate conditions, confirm what this paper editorially stated as long ago as December 20. On that date the Star-Bulletin printed the following:

One of the possibilities of the present governorship situation is that soon after Wilson's inauguration the new president will send a trusted emissary to the islands for an investigation, not only to determine which of the rival candidates for Frear's job is deserving of the crown, but also to get a new line on the same conditions that Fisher went into so thoroughly.

It is known probably to but a few outside of one of the several inner Democratic circles that another investigation may be asked for. The Star-Bulletin has information from two or three sources that indicates either sincere or pretended dissatisfaction among certain Bourbons with Fisher's probe. Not long ago there were rumors that an appeal to Wilson for a Democratic investigation had already been drafted. Whether this has been presented or not it is impossible now to say, but it is not at all unlikely that the gathering of prominent party members in Washington now has more significance than a lobbying-bee for any candidate for the governorship.

According to rumors from Washington, the appeal to Wilson for another investigation here has been drafted and presented, and this morning's dispatches evidently are the result. However, it should be kept in mind that the investigation quite evidently has not been entirely decided upon and may dissolve into thin air.

It's a pretty good guess that if President Wilson sends to Hawaii an investigating commission made up of college professors, one of the members thereof will be our old friend Dr. Charles W. Kent, of the University of Virginia. Dr. Kent spoke before the Pacific club here one night and genially prophesied the downfall of Taft and the election of Wilson. While he was in Hawaii he kept his eyes and ears open, but his speech was extremely limited. It is safe to say that Dr. Kent was not idle here.

Mayor Fern's humane plan of working the county prisoners outdoors—on his own premises—is simply an indication that Hizzoner has more advanced ideas than most of us on penology and anthropological somatology. Quick, Secretary Miles, the dictionary!

Col. Roosevelt will feel pretty envious when he hears about the challenges to duels in the election at Versailles yesterday.

That French presidential election was almost as exciting as a Bull Moose convention.

Gov. Wilson will perform the feat of setting the ball rolling without a ball.

The Wilson inaugural ball has simply flattened out.

Maybe it's going to be government by pedagogy.

Helen Gould is revising her trousseau downwards.

Give the Manoa school-children a fair chance in life!

Well, Bryan may get action at last!

## LETTERS ON TIMELY TOPICS

[The Star-Bulletin invites free and frank discussion in this column on all legitimate subjects of current interest. Communications are constantly received to which no signature is attached. This paper will treat as confidential signatures to letters if the writers so desire, but cannot give space to anonymous communications.]

### MORE FACTS ABOUT REV. MR. MASON.

Editor Honolulu Star-Bulletin, Sir:—In regard to the controversy in connection with Mr. Mason, whatever may be the merits or demerits of the divining rod, Mr. Mason does not use it to locate water, but believes that some force generated by the moving water underground affects his body whilst his arms are in an extended position. Now supposing that Mr. Mason is himself deceived and is only affected by imagination, how does this imaginary feeling tell him that there is water in the most unlikely places, where anyone using judgment would not expect to find it? For instance, when he located a supply for a small town on the side of a small volcanic hill on a narrow isthmus, a gravel quarry occupying the opposite side of the hill to where the water lies, and in another case where the bore was put down over one hundred feet, three feet away from his peg, failing to get water, and got it near

the surface when the bore was put down at the peg.

Knowing the localities where Mr. Mason operated, I could give many instances of his accuracy, and easily prove them.

Mr. Mason discovered his faculty for finding water, or, call it what you will, "magnation, aptitude, or 'nose'" incidentally, kept it to himself for a considerable time, fearing ridicule, until in an exceptionally dry season he began to assist the surrounding farmers in much need of water, his accuracy became known, and local bodies sought his aid, and finally the agricultural and tourist departments of the New Zealand government.

The only benefit he receives from it himself is his traveling expenses, and when the water is in sight a donation to his church, or one of the several charitable institutions, in his charge is usually made. Whatever money he receives for waterfinding he devotes to church or charitable purposes. A man like this is hardly a "menace" to the community, and the term "faker" is scarcely applicable to him.

Mr. Mason being of a scientific turn of mind, is devoting a good deal of time to experiment, to assist in clearing up the mystery of this unknown force, or whatever it may be, and I have no doubt but that much will yet be learned concerning it.

G. C. MUNRO.  
Lanai, Jan. 17th, 1913.

## LITTLE INTERVIEWS

HARRY POULSER—When I came here from San Francisco I expected to stay a week. Now I am sending back for my family.

CHARLIE HOPKINS—I think the "Night in Old Hawaii" scheme to entertain the Cleveland tourists is just the cheese. They ought to be mightily interested in the folk-dance.

WILLIAM THOMPSON—Judge Mahaulu is right in insisting that the advocates of a short-ballot form of government should place their ideas before the electorate. Otherwise the plan will never carry.

JULES CLERFAYT, San Francisco—San Francisco and Honolulu are co-operating in making arrangements for the passengers on the tourist excursion steamer Cleveland, and there will be no hitch anywhere.

M. M. JOHNSON—Some misunderstanding seems to have arisen as to the financial status of the merchants' association a year ago, one statement being that during the past year we cleared off a heavy indebtedness. As a matter of fact, when the change in directors was made, the outgoing treasurer handed over to the association a balance of \$2,100 and debts of only \$700.

## LYCURGUS HOME

(Continued from Page 1)

dead mothers and babes were sitting on the ground staring at the charred embers of their former homes.

"In another place we found women who had been forced by the same ruthless brutes to eat their babies. While the mothers were compelled to look on, the Turkish soldiers had butchered the babies and thrown the still warm little bodies into a big caldron. The boiling, hideous soup was then forced down the throats of the women.

"There were well authenticated stories of prisoners turned loose by retreating Turkish columns, after having their tongues torn out by the roots and the fingers of both hands chopped off so that they could neither speak or write of the things they had heard and seen while in the Ottoman lines.

Reason for Stand of Powers. "These are but a few of the atrocities which we of the Balkans have endured for six hundred years. Is it any wonder then that we have at last arisen against such a people? In all the years that he Turk has ruled the Balkan states he has produced nothing. Not a single poet, not a single artist, not a single statesman. Instead of building up they have laid waste instead of creating they have destroyed. Nothing but the desire of the Great Powers to maintain the money markets has stood in the way of their expulsion time and time again. It remains to be seen whether the money powers will again step in and protect them.

"Personally I wish, with Prime Minister Venizelos of Greece, that the United States would act promptly in this matter, as a Christian nation it is on no other ground.

"If the Powers keep their hands off, the allies will win, whether the fighting is resumed or not. If the Powers intervene, it will all have to

## PERSONALITIES

C. D. LUFKIN of Maui is expected back from the coast next week.

MR. AND MRS. GROVE AYERS of San Francisco are visiting in the islands.

MR. AND MRS. RICHARD IVERS returned this morning from a trip to the mainland.

WILLIAM F. COLTON, who has been stopping here some time, has gone to the volcano.

G. W. Galbraith and his daughter, Miss Margaret Galbraith, of Los Angeles, are here for the Floral Parade.

H. P. and MRS. DIMOND are among the passengers from the coast to arrive this morning in the Oceanic liner Ventura.

JOEL COHEN, and Mrs. Cohen, after an absence on the mainland covering a period of several months, returned to Honolulu this morning as passengers in the Oceanic liner Ventura.

J. N. HARRISON, representing the Western Pacific Railway Company, with headquarters at San Francisco, is an arrival in the Ventura this morning. He intends taking passage in the Cleveland, with the same transcontinental line.

C. A. BROWN, well known here some years ago, returned in the Oceanic liner Ventura this morning. "Cabby" immediately put in an application for membership in the local "Come Back Club."

J. F. MOSES, with the Sante Fe railway and identified with the passenger department, is an arrival in the Ventura this morning. He will join the Cleveland excursionists who are expected to pass through Honolulu on next Thursday.

J. CLERFAYT, representing the Southern Pacific Railway Company, and who will board the Hamburg-American steamer Cleveland as a passenger from Honolulu to San Francisco, is an arrival in the Oceanic liner Ventura this morning. With Mr. Clerfayt is H. T. Holmes, also identified from Los Angeles, with his wife and daughter, with a view of escaping the rigors of a southern California winter, arrived at Honolulu this morning in the Oceanic liner Ventura. Grove Ayers, a well-known Pacific coast commercial traveler, is making a trip to the colonies as a passenger in the Ventura.

GEORGE LYCURGUS, the hotel man and caterer, is back from a year's absence spent in Greece. At one time it was feared that Lycurgus was in line for military duty, and that he would return to Honolulu wearing the regalia of a full-fledged rear-admiral or a commanding general. Mrs. Lycurgus did not accompany her husband.

MISS ANEIDA MADISON, Miss Margaret Petteress of Alameda and

be done over again later on.

"The money sent from Honolulu did voeman service with the Red Cross workers, and I am going to see what can be done to raise additional sums should they be needed. At present I understand that the society has plenty of funds."

Mr. Lycurgus has been away from Honolulu nearly two years and was warmly greeted by many friends when he arrived here this morning.

## ARE YOUR DIAMONDS SAFE?

Many diamonds have been lost thru neglect to have worn-out settings repaired.

Our prices for resetting and remounting are quite moderate and the workmanship the best possible.

WICHMAN & CO.,  
Leading Jewelers

Miss Ethel Bishop of Honolulu will be house guests of Mrs. Alvin Woodwell Mitchell, who was a school chum of the three other girls. Mrs. Mitchell was Miss Anita Mathis, a belle of Pasadena, until her marriage a few months ago. Early in the summer, the devoted quartet of chums plans to visit Miss Bishop in Honolulu.—San Francisco Examiner.

## STOCK MARKET IS STRONGER

Stocks show a distinct strengthening today. There is activity in Ono- and Oahu among the sugar, and

Pineapple and Brewery among others. No decline is to be noted, while increases are registered by Onomea and Brewery. Sales were as follows: Between boards—Hawaiian Pineapple Co., 100 shares in three lots at 45; \$4000 and \$1000 California Refinery sixes at par; \$2000 Hilo Extension sixes at 94.50; Oahu Railway, 7 shares at 135.

Session—Onomea Sugar Co., 75 shares in four lots at 32.25, an advance of one-quarter; Oahu Sugar Co., 6 shares in three lots at 23.37 1/2; Haku Sugar Co., 20 shares at 125; Honolulu and Maiting 15 shares at 23.87 1/2 and 150 at 24, a total advance of one-quarter.

## LATEST DECREES OF FASHION GOWNS OF GLASS, STONE, PAPER

The very latest decrees of fashion are gowns of glass, stone and paper. The unbelieveable will perhaps perchance the idea of glass and stone garments though they may be known to a paper dress might be accomplished.

The first robe of spun glass was worn a short time ago by a member of a royal family. The gown was of pale lavender shot with pink and the effect was that of diamond dust. This glass fabric is being manufactured in Russia from a stone that comes from a mine in Siberia. The fabric is made from a filamentous stone which is said to be very durable. It is soft and pliable and when soiled needs only to be put in a fire and it becomes clean again. The only ornaments that have come to Honolulu of spun glass are little aigrettes for the hair. These are pliable and have a beautiful sheen in the evening.

The iron cloth is used everywhere by tailors for the purpose of stiffening collars in men's clothing. This cloth is manufactured from steel wool and looks like horsehair. In Europe many of the men's suits are made from a "wool" that does not come from sheep. It is known as limestone wool and is manufactured in an electric furnace. Certain chemicals are mixed with powdered limestone and are cast into a furnace after going through this process the mixture is passed through a furious air-blast and when it comes out it is like soft fluffy white wool. It is then put through a

eye and is cut in lengths like cloth. One of the great advantages of this material is that it cannot be damaged by dirt, grease or perspiration. The advantage here is to the wearer not the clothes cleaner.

Paper clothing has been known for sometime in the Orient. During the Japanese war the Japanese soldiers wore the paper clothing. It is said that the garments were not only very serviceable but that they were warmer than cloth would have been. In England, France and other European countries paper bathrobes, dressing gowns and similar articles of clothing are being turned out by the cart load and are used extensively in the British colonies. The paper of which these garments are made is similar to blotting paper and is dyed in most any color and often printed with some pretty floral design.

Paper garments made their first appearance in England but a short time ago. An English manufacturer succeeded in making a material from paper and rope. He got a quantity of old rope and cordage and unraveled it. By a secret process he wove it into a kind of cloth. The material has been readily accepted because it is durable and can be washed many times. The latest articles of paper material are gloves. These are said to be very useful even more so than the leather ones.

In Japan paper napkins, towels and handkerchiefs are used extensively. Many of the foreigners who have

## THE NEW ATTACK ON DIABETES

Ammonium Sulphate... 12 grammes  
Copper Sulphate... 26 grammes  
Potassium Hydrate... 20 grammes  
Glycerine... 100 cc.  
Ammonia Water (8%... 250 cc.  
Distilled Water... 500 cc.

To physicians—Heat one dram of above reagent to boiling. Add the Diabetic specimen by minims until reagent is colorless. The number of minims will indicate the percentage of sugar. Change the attack—put the patient on an agent to counteract hepatic degeneration. Test again in twenty days and you will know to a certainty whether the sugar is decreasing or not. Thus no physician or chemist need be in doubt.

The treatment of Diabetes has largely been held to Codelin. It quiets the patient but the prognosis is admitted to be hopeless. The new treatment, instead of locking up the secretions, as the opium in Codelin does, reverses the action by reducing hepatic degeneration, thus permitting the liver to oxidize more of the sugars and starches. Increasing strength and gradual recovery or prolongation of life naturally follows. That the new agent, Fulton's Diabetic Compound, does this in many cases, particularly between the ages of fifty and seventy, can be established in your own laboratories by the above formula.

Gradually retire the Codelin, giving a non-habit-forming substitute, if necessary, prescribe the new agent and if the patient is of middle age or over and has recuperative power you can look for some results in most cases by the twentieth day. The thirst and hunger often begin to abate before the sugar decreases. Thus in many cases patients know before the tests are made that they are getting results. (It does not seem to have much effect in young cases.)

Fulton's Diabetic Compound is a mild infusion without opiates. It does not conflict with physicians' prescriptions. The substance of the formula surrounds each bottle.

Honolulu Drug Company will fill prescriptions and supply the compound. Ask for pamphlet or write John J. Fulton Co., San Francisco—advertisement.

## KILOHANA CLUB TAKING UP PLAN FLOAT IN PARADE

After reading Mr. George G. Guild's reply to a letter in Sunday's paper, signed "Merchant," and criticizing the Kilohana Art League for not taking part in the Floral Parade, I think it necessary that some explanation be made," said Director General Chillingworth this morning. "In the first place, I have not criticized the Art League. At the start I, of course, expected that an organization of such a character would delight in participation in the parade, as it seemed to be an affair peculiarly in line with the objects of such an organization, as well as with the tastes of its members.

"On receiving a note from the secretary of the league, to the effect that the directors had decided that they cannot this year participate in the parade," I wrote stating that I should be interested in learning the reasons for the action of the directors in declining to take part in a celebration of the kind planned by Hawaii. In reply, I have received an invitation to confer with the secretary regarding the matter, and shall take the first opportunity of doing so. It is a matter of much importance, of course, as public clubs of this character, with their public spirit, their devotion to art, their interest in the community and their influential and able membership, are just the ones we expect to take the lead. It seems to me that the Kilohana Art League could manage a splendid parade all its own.

Says Mr. Guild in Error. "Mr. Guild is quoted in an interview this morning to the following effect, in reply to the article of Sunday, which was signed 'Merchant': 'Every organization mentioned by 'Merchant' in his letter is represented by delegates in the Central Improvement Committee which will have a float in the Floral Parade. The expense of preparing this float is being borne by the various organizations through the dues paid by their delegates for membership in the Central Improvement Committee.

"The criticism of the Kilohana Art League is particularly unjust for the reason that the float is to be decorated by a committee from the Kilohana Club."

"Now, the number of organizations mentioned by 'Merchant' was over a dozen. I am glad to be able to say, from personal knowledge, that there is no intention, at least on the part of some of these organizations, of combining on the enterprise of entering one float, and paying for it through dues. Some of the organizations in question are planning their own autos and floats, unless they have very recently changed their minds. If they have, and if Mr. Guild's idea is correct, a new meaning might be given to the term Honolulu United. The whole community, clubs and all, might unite in getting up one float.

A Suggestion Offered. "However, that isn't going to be done. Entries are being recorded every day, and the parade is going to be a big one.

## BAND CONCERT

The Hawaiian band will give a concert this evening at 7:30 o'clock at Liliuokalani school grounds, Kaimuki. Following is the program:  
March: Kaimuki... Berger  
Overture: Poet and Peasant... Suppe  
Intermezzo: Russian... Franke  
Selection: Nabucco... Verdi  
Vocal: Hawaiian Songs, arr. by Berger  
Selection: Runaway Girl... Monckton  
Waltz: Tender Kisses... Waldteufel  
Finale: Polichinelli... Fahrbaeh

I read it in the Star-Bulletin. It must be so.

## RECOLLECTIONS OF REVOLUTION IN HAWAII IS CASTLE'S THEME

"Reminiscences of the Revolution of Twenty Years Ago in Hawaii" was the subject of an interesting address delivered by W. R. Castle before the members of the Newcomers' Club at their fellowship supper in the Young Men's Christian Association last evening.

Mr. Castle was one of the band of patriots which faced the danger when the crisis came on Jan. 14, 1893, and which took a part in bringing the reign of royalty to a close in the Hawaiian Islands. Last Saturday night at the residence of Mr. Castle, the revolutionists of twenty years ago met for a reunion and recalled and talked over the events prior to the overthrow of the Hawaiian monarchy. When the queen selected the cabinet which was composed of Parker, Peterson, Colburn and Cornwell, the Americans became disgusted and it was at this time that the first movement toward the revolution was begun. On January 14, 1893, it was learned that the queen was endeavoring to force her cabinet to sign a new constitution which she proposed to promulgate immediately to her people, and as soon as this news was out, a meeting of the prominent American citizens was held in the office of W. O. Smith, where all present agreed that it was the duty of every citizen to resist the revolutionary encroachments of the queen, and a message was sent to the cabinet to this effect. At the meeting of the Newcomers' Club Mr. Castle told in detail the important events from the beginning of

the revolution until the final overthrow of the monarchy. Near the end of the revolution attempts at incendiaryism on the part of the disorderly element of the city were described by Mr. Castle, and he told of an act of loyalty on the part of a Portuguese smuggler who stood guard over the Castle home armed with a bowie knife on the night the monarchy went out of power.

"It was twenty years ago today," said Mr. Castle in conclusion, "that the special committee, of which I was a member, which was appointed to go to Washington with the news, set sail for the mainland on the Claudine. The incidents of that trip and the work of that commission at Washington are full of interest and perhaps I may talk to you about it in the future."

Of the little band of patriots, which, twenty years ago this month, overthrew a monarchy, established a provisional government, and paved the way for what is now the territory of Hawaii, the following, according to Mr. Castle, still survive:  
L. C. Ables, W. G. Ashley, Cecil Brown, Joseph Camara, W. R. Castle, Dr. C. B. Cooper, Judge S. B. Dole, Dr. N. B. Emerson, J. H. Fisher, A. Gartenberg, F. M. Hatch, G. W. R. King, T. F. Lansing, F. J. Lowrey, J. A. McCandless, F. B. McStocker, C. F. Peterson, G. W. Smith, W. O. Smith, J. H. Soper, L. A. Thurston, E. O. White, C. W. Ziegler, H. E. Cooper, E. D. Tenney, J. B. Castle, Dr. C. B. Wood, C. Bolte, Capt. J. W. Jones, Lieut. Coyne, Captain Kiwell, P. C. Jones and S. M. Damon.

## WILSON TO SEND BERKELEY HAS COMMISSION PROVED AN O. K. HERE? 'DRY' TOWN

Confirmatory of a report published by this paper December 20, the Advertiser this morning publishes as a special wireless dispatch from Washington the following:

WASHINGTON D. C., January 19.—It is understood here by personal friends of President-elect Wilson that he has practically made up his mind to hold in abeyance any contemplated change in the administration of Hawaii, the Philippines or Porto Rico until after a small commission of personally chosen investigators have visited the islands in question and after a thorough study of conditions have reported to him their recommendations.

It is currently reported that this commission will be headed by William Jennings Bryan and that an Eastern, Southern and a Western college professor will constitute the other members.

A report that Bryan is to succeed Governor-General Forbes at Manila has been going the rounds for some time here, but both Bryan and Wilson are understood to have dismissed this suggestion privately as mere gossip.

If President-elect Wilson names the commission as reported, it will mean that no appointments affecting the administration of Hawaii, the Philippines or Porto Rico will be made for at least six months following the inauguration of Wilson.

### KNIGHTS OF PYTHIAS ELECT NEW OFFICERS

Mystic Lodge No. 2, Knights of Pythias, elected officers for the new year at its last meeting Tuesday evening as follows: Henry A. Giles, C. C. F. Davis, V. C. E. W. Bull, Proctor; Wm. Gill, M. of W.; J. F. C. Abel, M. of Ex.; C. J. Hummel, M. of F.; A. B. Angus, K. of R. and S.; A. Anderson, M. of A.; B. Nott, I. G.; Thos. Foley, O. G.; M. McCheyney, Trustee.

The installation of the new officers will take place at the next meeting of the Knights, Tuesday evening January 28.

That prohibition in Berkeley, Cal., has worked so successfully that during the year only four persons were arrested for drunkenness, was the observation that George W. Paty of the Anti-Saloon League made during a recent sixty-day trip to the coast. Mr. Paty came back this week. Discussing California and some observations he made as to the strides of temperance in the state, he said:

The first impression on landing is when you strike the line of auto bus and hack drivers. The efforts of a drowning man or the frantic attempts of a person in a burning building to escape are not to be compared with it. However, the police are there to see that the whole of the passengers are not shanghaied to different parts of the city against their will and people generally get where they want to after awhile.

The next general observation on the following day in Oakland was the large number of small real estate offices, with a squash, an ear of corn, a few large potatoes, or other vegetables to attract attention, sometimes with oranges or other fruit on exhibition.

In the background was a map or sketch of the lands these wonderful productions of the earth were supposed to have grown on.

And if you want to stop a minute to look at the agricultural marvels, a locustous gentleman would invite you in and explain how it was that these lands were being offered so cheap and stated that this bargain was only for a short time. This was true of San Francisco and Los Angeles as well as Oakland.

As I was living in Berkeley, my next observation was the absence of signs advertising beer or other liquors, and also the fact that there were no saloons, which to one who believes that they are a detriment to any community, certainly was a great satisfaction.

I did not hear any one say they were suffering on account of the dry spell. In fact, the people in Berkeley seemed to be very well satisfied to have things as they were. I did not see a drunken man or any disorderly crowd in the 5 weeks I spent in Berkeley.

The records for 1912 show only 4 persons arrested for drunkenness during the year.

When Honolulu reaches that limit the temperance community will be satisfied.

I have always heard it said by those interested in the liquor traffic, if the saloons were closed there would be just as much drunkenness. This has not proven the fact in Berkeley. If such was true, why should those interested in the sale of liquor object so strenuously to prohibition?

I found considerable progress had been made in the state toward the drying up of the wet places, thereby making it a more healthy community to live in.

Here are a few facts:  
On the 5th of November, 1912, 101 towns voted dry, 80 districts and 14 incorporated cities in central and northern California have banished 815 saloons in 17 months. California has 682 dry towns.

### HILO JAIL UNDERGOES MUCH INVESTIGATION

HILO, Jan. 17.—Investigations of the health conditions at the Hilo Jail are renewed almost every day now. Dr. K. Eguchi, editor of the Hawaii Shokunin Shinbun, has investigated at the request of Japanese Consul General Itake; County Attorney Boers has investigated; Dr. Snow, the prison physician, has investigated; and the sheriff is working at the affair assiduously and continually, recently giving out a long interview which included a report of the physician, made after a thorough examination of the prisoners who are ill and said to be suffering from beri beri.

This report sets forth that a number of the cases of so-called beri beri proved not to be that dread malady, but there were probably seven bona fide cases of the disease. She sheriff admits conditions in the jail are not and have not been of the best, especially in the matter of cooking, but explains this by saying it is impossible to keep an efficient chef, because as soon as a prisoner has become proficient in his line of work his term expires and a new prisoner must be taught, and meantime the food is not prepared as it should be.

# HIT OR MISS IN THE WORLD OF SPORT

CORNELL HAS TURNED OUT some famous cross country runners, and Cornell graduates here are anxious to foster the sport.

They have therefore offered a cup to the annual interscholastic cross country event, in which four schools will enter teams this year, and have added considerable interest to the race through the naming of the event to govern the contest.

Heretofore the cross country race, has been such in name only, the runners plodding along the roads, and giving fields and furrow a wide berth. There has been no real cross country work, with natural obstacles to surmount, such as bringing out the true class of the competitors, and this has been a source of regret to those who appreciate the niceties of the sport.

Last year the Punahou-Kam race was from the Waikiki Inn to the High School, about the most uninteresting course that could have been selected, with the going over hard and uneven roads, far from easy on the men.

This year there is to be a decided innovation, for the course is to be laid out by the cup donors, and the runners themselves are to be kept in ignorance of the route until the last minute. Shortly before the start the captain of each team is to receive a map of the course, with full directions, and it is up to him to pilot his mates over it. Just what are the ideas of the college grads in regard to the race has not been definitely stated, but it is understood that they favor a cross country event in the broader sense of the word, and that the going will not be entirely confined to the highways this year.

If this is so, and a good stiff 4-mile course is laid out over obstacles, the event will be in every way an improvement on the former ones. It will be a better test of speed, skill and resourcefulness, and will be more entertaining for both competitors and spectators.

Four schools will probably enter teams this year, which will make a much larger field than formerly and will add considerably to the interest. Kam and Punahou were the only contenders last season, but High School and M.H.S. Institute have got into the game, and will send representatives. Last spring aamehameha and Punahou hooked up twice, the former winning both events, with J. Jones crossing the line first both times. The first run, from Waikiki Inn to Thomas Square, was extremely close, the Kams winning by the narrowest margin, but the second run, ten days later, over a more varied course in the neighborhood of the Kam school, was an easier victory for that team.

Ed Hedemann has started the fashion in motor boats with a speedy craft in which he burned up the waters of the harbor yesterday morning. The boat has a 40 h. p. engine only, but is so designed that it noses skyward in approved style, and makes everything else in the harbor look as if it were backing. The boat is christened Dot II. She is a classy little craft.

The local branch of the A. A. U. is doing the right thing in perfecting plans for the annual track and field championship and the spring swimming meet well ahead of time. It is planned to hold both these events on February 22 or, if this date clashes with other carnival attractions, a week later. The club representatives made a good selection at the meeting last Saturday, when they named the committee which is to set up the program and complete arrangements. A. T. Longley, G. H. Tuttle, J. F. Soper, W. L. Johnson and Lorrin Andrews are all experienced men, and capable of getting up the best kind of a card.

**CHINESE NOW JUNIOR CHAMPS**

The C. A. U.'s, with Luck Yee in the box, took their fourth game from the Asahis, in the pennant series of the Junior League yesterday, by the walkway score of 13 to 1. Victory gives them the flag and the undisputed claim to the championship of the Junior organization for 1912 and some of 1913. This business of stringing out the baseball season hopelessly mixes up the accepted conditions. How the Chinese ever took a game from the Asahis is a mystery over which the fans are still puzzling. There is absolutely no comparison between the two organizations, as to playing ability, or knowledge of baseball.

## DILLINGHAM STAR OF POLO GAME ON COAST

### Hawaiian Captain Puts Up a Splendid Exhibition and Gets Big Boost from Coast Papers. Hawaii Team Will Play in the Tournament at San Mateo Before Returning to Islands

HILLSBOROUGH, Jan. 12.—Backed by Walter Dillingham of the Honolulu polo team, Tom Driscoll's "Stockmen" swamped Tobin's "Erratics" to the tune of 10 goals to 2 on Ey Cerreto field this afternoon. "Swamped" is the literal word to use, for before the match was over, the hooters on the San Mateo polo grounds looked like a safe hiding place for half a million of the shyest marsh birds.

The sloppy condition of the field and a slow, drizzling rain that began to come down before the game was half over, did not dampen the ardor of the fans and players, however, for George Garritt returned from southern California this morning bringing glad tidings for everybody that takes an interest in polo.

The news brought up from the south by Garritt was to the effect that Canada, Hawaii, Kansas City, Pasadena and Coronado will enter strong teams in the tournament to be held in Hillsborough beginning March 20. While in Los Angeles, Garritt talked with representatives of all five teams and was authorized by them to accept the invitation of the San Mateo Polo club to participate in the coming tournaments.

Two Teams to Go South. As soon as the acceptances were received, Polo Manager Hastings began to lay plans for sending two local teams to take part in the Coronado tournament early in March. Walter Hobart will be unable to make the trip but Tobin, Devereux, Garritt, Hastings, Withers, Taxis, De Guigne and another will form the nucleus for two strong teams.

Although no definite word has been received in regard to the personnel of the five teams that will come here March 20, Canada will be represented by Major Colin G. Ross, O. A. Crichton, K. G. Snowden, Richard Clarke and H. Robertson and if the Coronado team is shy a man, Major Ross probably will fill the vacancy. Coronado already has three available players in John Hobbs, Captain J. C. Besley and Walter H. Dupree, the latter having given up the idea of entering a team from the Onwentsia club of Chicago. The Pasadena team will be Robert Newstadt, Reggie Weiss, Harry Weiss and Carleton Burke, with the possibility that Tom Weiss may come as a substitute. Arthur Rice, Harold Castle, Walter Dillingham and Frank and Sam Baldwin will be here for Honolulu, and the Kansas City representation will be a four organized by Stephen H. Velie, who spends the winter season at Coronado.

With the five challenging teams and three or four teams made up of local players, prospects are bright for the best tournament ever pulled off in northern California.

Dillingham Shows Well Judging from the brand of polo displayed by Walter Dillingham in the match between the "Stockmen" and "Erratics" this afternoon, the San Mateo players will have to hustle if they don't want to say goodbye to the tournament cups. Although at back, a position which rarely gives a player openings for goals, Dillingham scored 4 of the total of 10 goals made by the winning "Stockmen" today. By making the four capital goal shots, Dillingham even surpassed the invincible Driscoll, whose maket was responsible for only 3 of the goals.

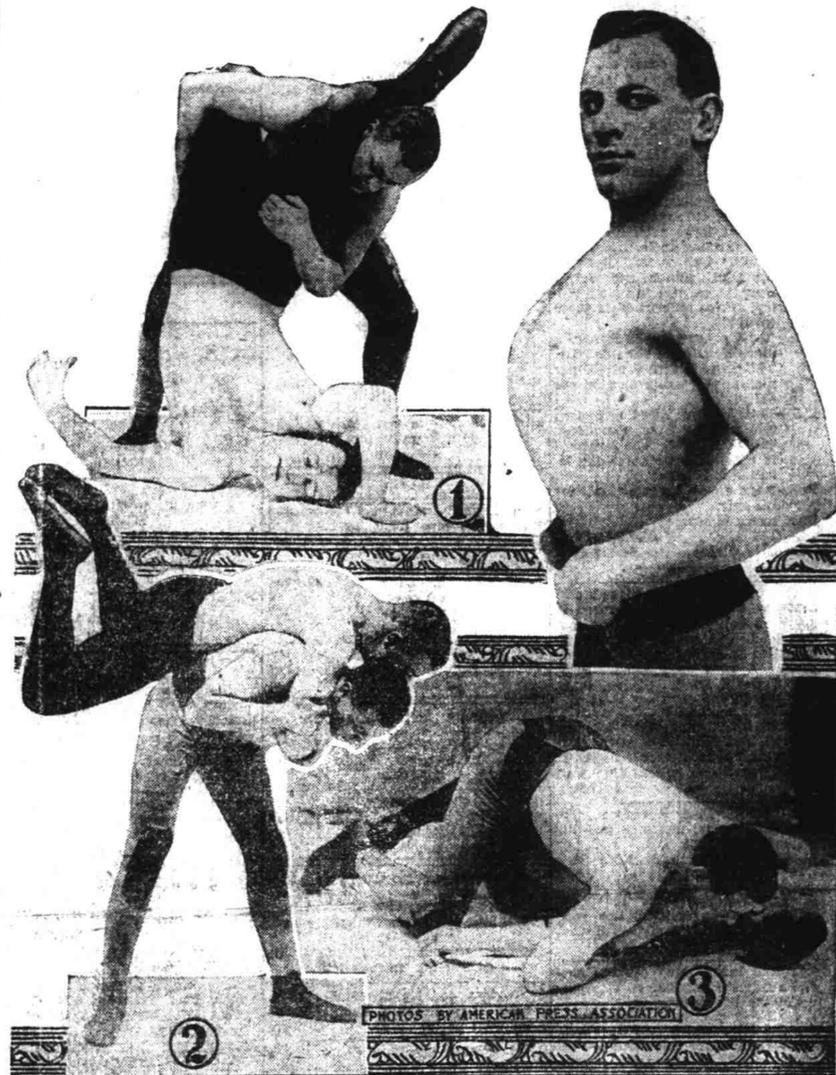

The Hawaiian captain exceeded all expectations. He rides like a true horseman, is quick on the ball both on the turn and straight away, and his powerful swing reminds me of the hard riding Lord Tweesmouth, who led the Britishers last year.

Dillingham scored the first goal of today's game with a neat backhand from a stiff angle near the paddock. All the local players seemed to be badly off their game as a result of the slow condition of the field, but Dillingham was after the ball all the time and nearly scored again before the end of the second chukkur. An accidental swing by Withers in Driscoll's direction caused Referee Hoag to call a foul and the "Erratics" ended the period with a score of minus 2.

Hawaiian Buys a Pony. Driscoll scored in the third and fourth and followed up by passing for another by De Guigne. A bit of teamwork by Driscoll and Dillingham ended in another by the left-handed captain in the fifth, and the Hawaiian leader came through for another. The match ended in a nasty drizzle and with the field checkerred with mud-holes.

Dillingham ended a good day of sport by purchasing Sailor Boy, a fast bay gelding, from the string of W.H. Dillingham managed to score from the rack at the end of the field, and when he sliced the ball toward the end of

## FOUR VIEWS OF IRSLINGER, MIDDLEWEIGHT CHAMPION OF EUROPE, WHO IS AFTER THE SCALPS OF AMERICAN WRESTLERS

NEW YORK—Zbyszco, the giant Pole, who is after a match with Frank Gotch for the world's championship, will not be the only foreign wrestler occupying the limelight in the grappling world this season. Another star recently arrived in this country who gives promise of helping to make mat history. He is Henry Irslinger of Austria, holder of the middleweight and light heavyweight championship of Europe. Henry's first big bout in this country will be with George Eothner, famous veteran, considered the cleverest man that ever appeared on the mat. In this battle Irslinger will be put to a severe test. He has agreed to throw George three times in an hour in this city January 23. The match will be decided under catch-as-catch-can rules at catch weights. In this Irslinger may have bitten off more than he can chew. Wrestling fans do not believe that there is a man in the world who can throw Eothner three times in an hour. Men half again as heavy as he is have tried to throw him once and failed. Tom Jenkins couldn't pin his shoulders to the mat, nor could dozens of others. It may be that Irslinger will accomplish the feat that baffled so many others. Eothner is not as young as he was. He is many years older than Irslinger, and if his youthful rival triumphs over him it will be due as much to the increasing weight of years as to the foreigner's superior ability. Then, too, Irslinger will outweigh Eothner many pounds. The American is always close to the 150 pound mark, while Irslinger will probably weigh around 175 pounds. Although Irslinger is a youth in years, he is old in experience. He is an Austrian by birth. He has been wrestling for many years and in many lands. He cleaned up all opponents in continental Europe and then crossed over to England and repeated his victories there. Irslinger has issued a challenge to Fred Beel, American (Gus Schoenlein) or any other light heavyweight wrestler in America. Unlike many foreigners who are solely Greco-Roman wrestlers, Irslinger is an expert catch-as-catch-can grappler. Picture No. 1 shows Irslinger executing crotch hold on his partner; No. 2, the flying mare; No. 3, pinning his opponent's shoulder to the mat. Best picture shows great chest development of Irslinger.

## LISTLESS GAME WON BY PICKS

Too much baseball. That's the reason why only a scattering crowd of bored fans saw yesterday's games at Athletic Park, and showed their indifference to very different playing by passing remarks on the weather, and admiring the lightning play up Manoa valley—the only place that saw any lightning play during the afternoon.

The closer of the double header was between the P. A. C.'s and Dave Desha's picked team, with Barney Joy in the box. He was much out of practice, and somewhat wild in consequence, but the best the Portuguese could get of his delivery was three safe ones, one a lucky homer off the end of La Mer's bat in the seventh, which just cleared the right field fence, and saved Manager Parson's men from an application of white-wash. The Picks got all three runs in the sixth, when sharp hitting and infield errors brought the men across. The Portuguese infield was very

Summary Home run, La Mer's sacrifice fly, Markham's sacrifice fly, Markham's home run, P. A. C. Picked Team 4; first base on errors, P. A. C. Picked Team 5; double plays, Chillingworth to Franco to A. Desha, A. Desha to Chillingworth, Franco to A. Desha; hit by pitched ball, La Mer's struck out, by J. G. by Bushnell 4; bases on called balls, off Joy 2; passed ball, Seligman, Empire; A. Akana and Delisk. Score, W. T. Raposa. Time of game, 1 hour and 12 minutes.

## SWIFTEST PLAY IN BASEBALL MADE BY KELLY, SAYS M'GRAW

According to John McGraw, the quickest thinking play he ever saw was made by King Kelly, the greatest of all catchers.

"There have been many instances of quick brain work," said McGraw, "but I'm sure that Kelly leads them all." "During the game I have in mind there were runners on second and third, and if both scored the game would be won against Kelly's team. The King was behind the bat and was fighting every inch of the way. Finally the batter drove a line single into left and of course one of the runs scored. It was up to him to step the other and save the game. The throw to the plate was wide and to the left of the plate. Kelly saw the runner coming and realized that he could not get the ball with his mitt hand. He also realized that if he jumped for it so as to get it in both hands he would not have a chance to touch the runner. When the runner was within seven feet of the plate his quick brain solved the question. He threw the ball from his left hand when the ball was right on him, speared it with the bare hand and tacked out the runner as he swept by.

"You must remember that Kelly had to figure all this out in a second's time. He did it and saved the game."

## MEEK VANQUISHES JACKSON IN A WALK

James G. Meek showed himself to be a real heel and toe man yesterday afternoon, when he easily defeated Nigel Jackson in a mile and a half event staged between ball games at Athletic Park yesterday afternoon. Meek had the best of it from the start, and after the first lap, which was the fastest of the nine, let down considerably, and walked in an easy winner.

There was considerable uncertainty over arrangements for the race. Some of the officials failed to put in an appearance, and it took some time to get the men started. Jackson having to mark off the limits of the track himself. Just as soon as the men got away behind the home plate the ball players rushed onto the diamond for the second game, and some of the spectators didn't know whether the two figures circling the track were special policemen or fly chasers.

Meek walks in fine form, putting heel and toe down fairly and squarely and covering ground with apparent ease. He was pretty badly blown when he finished though, and whether he could have beaten Jackson over a much longer route is uncertain. The latter broke several times, but he was so far behind that the judges let it go without a warning. Jackson has a peculiar style which is hard to judge whether or not he is walking fairly. He locks the knee well enough, but doesn't plant heel and toe square-

## HEALANIS AND MAILES BATTLE TO DESPERATE NO-SCORE TIE

### Fine Exhibition of Soccer Football at Moliili Saturday Afternoon Witnessed by Fair-Sized Crowd—Marines take Depleted and Disorganized Champions Down the line to the Tune of Three to One

STANDING OF THE ASSOCIATION FOOTBALL LEAGUE

	P	W	L	D	G.F.	G.A.	Pts.
Healanis	5	0	4	1	10	1	1
Mailes	5	4	0	1	14	0	9
Punahou	3	2	0	1	4	0	5
Camp Very	4	1	1	2	4	5	4
High School	5	1	3	1	4	12	3

Before a fair-sized crowd of rooters, the old-time rivals, the Mailes and the Healanis, two top strongest teams of the Association Football League, met on Moliili Field last Saturday afternoon and played a good fast game which resulted in neither eleven scoring. It was perhaps the most spirited and best-played game which has taken place this season, and as the result of the no-score, the Healanis still stand at the top of the list with the Mailes a close second.

At the beginning of the contest all indications pointed to the Healanis as being the best aggregation, and this eleven went onto the field with every expectation of taking the game. It was the strongest team of the two, and the Mailes are of the opinion that they did themselves proud by holding their opponents down to a scoreless contest. For the Mailes, "Bill" Paty bore the brunt of the work throughout the game, and it was by his work that many times the attempts of the Healanis to put the ball into the net failed. In each case Paty was on hand and with a well directed kick sent the ball back to the center of the field. On both offensive and defensive work, Ballentyne, Davis and Hollinger played well for the Mailes, while Grig, Dwight and McKinlay did the greater part of the star playing for the Healanis.

Mailes Open Strong The Mailes played well in the first period of the game. The players realized that this was their time to get nearer the top of the list, and all went after the game from the start. The Healanis kicked off, and the ball was soon taken into the Mailes' territory, where several times attempts to kick goals were made, nearly every one being felled by Paty. The score at the end of the first half looked as if neither team would make a goal and at the beginning of the second the Mailes, though somewhat tired, played harder than ever. Several times they got the ball near the Healanis' goal, but here they were met by Richard, who felled their attempts to boot the leather into the mesh. The game came to an end with no score by either side. Both teams played with all that was in them and the spectators were satisfied with the results, and are now looking forward to the next time the two teams meet.

A fairly good crowd attended the game, and so far, the turnout at the matches this year have been slowly on the increase, showing the gaining popularity of soccer.

The line-up: Mailes—Paty, goal; C. Davies and D. Center, fullbacks; J. Hollinger, E. Ballentyne and Watson, halfbacks; E. Gay, O. P. Soares, Harry Bailey, George Quintal and Billy Hoogs, forwards.

Healanis—Richard, goal; Walker and Forrest, fullbacks; McKinlay, Anderson and Rowat, halfbacks; Dwight, Low, Coombs, Greig and Oakley, forwards.

Score: Mailes 0, Healanis 0. Officials: Deas, referee; Walsh and Robinson, linesmen.

Marines Win. Immediately following the Mailes-Healanis contest, the Camp Very Marine team and the McKinlay High School eleven took possession of the field for the rest of the afternoon, the game between these two teams resulting in a victory for the former by a score of 3 to 0. For the second time this season the High team has come onto the field minus a number of players, and in the game Saturday the team played against the complete Marine eleven with seven men, this number being increased at the beginning of the second half by the arrival of another player.

During the first half of the contest the Highs put up a lot of good play, and held the Marines down so that when the whistle blew calling time for the end of that period, there was no score by either side. Then a hoodoo seemed to hit the ranks of the Highs, for, soon after the additional members of the team appeared and commenced playing in the second half, the Marines buckled down to work and three times shot the ball through the hands of the High goalkeepers and into the net. Shortly after time was called for the beginning of the second period, the Marines took the ball far into the Highs' territory, where, by a well-directed kick, Captain Morris scored the first goal of the game. The second goal of the Marines followed soon after by Dickson from a corner kick, and near the end of the contest Shears made the third, bringing the ball back from the center of the field, where it had been placed by the Highs.

The game was fast and there were several important stars on both sides. Dwight, Hickman, Kiegame and Chillingworth, of the Highs, played up to their usual standard, especially the latter, who several times presented the Marines from scoring by quick work. For the Marines, Dickson, Shears, Morris, Lemay and Gibson did good work.

The line-up: Camp Very Marines—Gibson, goal; Hupperton and Otsson, fullbacks; Martin, Fitzmaurice, Clifford, halfbacks; Morris (captain), Dickson, Shears, Levy and Lemay, forwards.

High School—Henry Chillingworth, goal; Moss, fullback; Hickman and Trotter, halfbacks; Klemme, Gray, Haney and Dwight, forwards.

### SAWED OFF SHORT

Abolition of the rating of tennis players is being considered by the officials of the United States National Lawn Tennis Association. It is declared that the rating committee finds the work too great a task because players fail to co-operate by sending in the data required for the ratings.

### TRUE TEST OF MERIT.

You judge a man not by what he promises to do but by what he has done. That is the only true test. Chamberlain's Cough Remedy Judged by this standard has no superior. People everywhere speak of it in the highest terms of praise. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii.—advertisement

STAR-BULLETIN WANT ADS

Say a good word for your town! Wear a smile upon your face! Nothing is gained by sullen frowns, smiles will help most any place...

ONE CENT A WORD

WANTED

Everyone with anything for sale, to "Buy Sale," considering the factors of sales, success in planning an ad is more satisfactory than knowing "how it happened" afterward.

All lovers of music to develop talent by taking lessons from Ernest K. Kaal, 69 Young Bldg., Tel. 3687.

Three bedroom cottage, furnished, for four months. State particulars, "G. A. C." this office.

Unfinished cottage, or three unfinished rooms. Address "G. L. S." this office.

A boy to feed press is wanted at the Star-Bulletin office. Apply to W. H. G.

Form has to be cleaned at Kaimuki Beretania St., Tel. 4024.

To buy acreage, any part of city or outside. P. O. box 63.

SITUATION WANTED. Engineer, American, desires position. Experienced in direct and alternating current, simple and compound engines, compressors and refrigeration.

Young American woman would like position as cashier. Busy place preferred, or can fill in life moments with small bookkeeping.

Experienced chauffeur; references; does own repairing. Address "D. P." this office.

HELP WANTED. Bright boys with bicycles to carry the Star-Bulletin. Apply Business Office, Alakea St.

Girl to help care for children in the country. Address "E." this office.

ANNOUNCEMENT. The Goetz Grocery, Ltd., is now established in the new Excelsior Building, Fort St., Tel. 4138.

Mr. Y. Shin, owner of sugar cane lands along King St., Palama and extending as far as railroad tracks, begs to hereby notify the public that he shall be obliged to prosecute anyone found taking the cane.

R. B. Irwin, Mgr. Home Candy Co., has opened a branch retail store at Kaimuki Terminus, Waiialea Road, where high grade candies, pure ice cream and his famous "Mixed Drinks" are to be had.

Our Household Department cordially invites you to call and inspect our splendid stock. Always a pleasure to show goods.

CITY AUTO STAND, opp. Catholic Mission, on Fort St. Phone 3664 or 1179. Has Packard and Stevens cars at your service night and day.

Honolulu Auto Stand, Tel. 2999. Best rent cars. Reasonable rates. Leave orders for trip around the Island.

Royal Hawaiian Garage. Most up-to-date in town. Experienced chauffeurs. Telephone 1916.

Two more passengers for "Round-the-Island" Auto Livery, Tel. 1326.

AUTO TIRES. 25% discount on Imperial Auto Tires. Nearly all Standard sizes. Entire stock to be cleared out.

AUTO REPAIRING. C. M. Kellogg, 875 South St., nr. Huletape. Phone 3392. First-class repairing. All work guaranteed.

AUTO STARTER. Ever-Ready Starter. Easily attached to any machine, no cranking, started on motion of foot.

AERATED WATERS. Hon. Soda Works, 34A N. Beretania; Tel. 3022. Chas. E. Frasher, mgr.

PROFESSIONAL CARDS

CIVIL ENGINEER. W. Vunch - Civil engineer, surveyor and draughtsman. 1008 Alakea St.

MODISTE. Miss Nellie Johnson, 1119 Union St. Evening gowns, lingerie dresses.

MANDOLIN ORCHESTRA. Honolulu Philharmonic Orchestra. Tel. 3022. Union & Beretania. Furnish music for dinners, dances, etc.

HAWAIIAN ORCHESTRA. Honolulu Glee Club. A. C. Tim Sin, Mgr. Tel. 1953 Hotel Delmonico.

MUSIC LESSONS. G. Domingo, lessons on violin, mandolin, mandola, guitar, cello, ukulele and clarinet.

VOICE CULTURE. Miss Annie I. Weiss, 490 S. Beretania; Tel. 3969.

MERCHANT TAILOR. Don't pay two prices; that is what you do when you buy ready-made clothes.

**MAY JOIN IN BIG STRIKE**

[Associated Press Cable]  
 CHICAGO, January 19.—The garment workers here will vote on the proposition to join in a general strike of the workers in this industry. The indications are that the workers will vote to strike by a large majority.

**OVER-NIGHT FEDERAL WIRELESS**  
 To the Advertiser

British and American warships are scouring the West Indian seas for the British pilot schooner No. 7, which has been missing from Bermuda since January 14. It is feared that she foundered with all hands on board during a gale.

The dirigible balloon Schuettelan, which was forced to land near Potsdam today because of the failure of the elevating rudder to work, was seized by a terrific wind and carried upon a housetop where it hung. The envelope was badly rent. A mechanic jumped from an altitude of sixty feet, breaking his arms and legs. The accident followed a three-hours' trip in a high wind.

The erection of one of the highest power wireless stations in the world will be started early this week at Point Bolinas, a few miles north of San Francisco. The plant will cost more than \$500,000 and will constitute the first link in the globe encircling chain of stations of the Marconi Company of America.

Because he had not the courage to kill King Victor Emmanuel, Enrico Delfero committed suicide at San Giovanni near Bologna. Delfero's confession made while lying at the point of death implicates several persons occupying high offices about the throne.

Federal soldiers were ordered to take possession of the North pier at Buffalo by Secretary of War Stimson at the request of Attorney General Wickersham, yesterday. The government disputed the Lackawanna railroad's right to the pier for many years. In 1910 an order was issued by the government forbidding the railroad boats to dock at the pier in question. Since then, however, permits have been issued by the war department granting temporary occupancy of the property.

After the lapse of almost a century, light is at last thrown on the illness which preceded the painful death of Napoleon the Great, by an English doctor of high standing. Dr. Chapin proves that Napoleon was killed by the neglect, incapacity and disagreement among the doctors appointed by the British government to attend the imperial captive. "Napoleon," says Chapin, "suffered in the first instance from a chronic ulcer of the stomach, from the edges of which a cancer developed about seven or eight months before his death."

The Pope wishes to be buried in the Vatican crypts near the tomb of St. Peter and this has raised a legal question. Under the Italian law the burial of bodies in churches is prohibited. A recess in the wall large enough for a coffin has now been prepared. It has been bricked over so as to resemble a slab of marble on which the name of His Holiness can be engraved, and has been prepared in such a way that there will be no delay about burial of the body which must be after nine days. The Pope has now decided that the body of his predecessor Leo XIII shall remain in Saint Peter's instead of being transferred to St. John Lateran as the late Pope wished. Plus X is afraid that the anticlericals might disturb the funeral cortege making the transfer of the body. m.d.r.j. u.s. \*9z&gd5del b5HRS11

The faculty and scholars of Saint Cecilia Academy at Nashville, Tenn., are in deep mourning for the death of Sister Mary De Sales from blood poisoning due to a dental operation. Until a year ago Sister Mary was known to society of the South as the beautiful Miss Semmes, granddaughter of the Confederate admiral and niece of Gen. Luke F. Wright, who succeeded Taft as governor general of the Philippines. Her renunciation of the vanities of life for the cloister created a sensation.

Discovery of extensive coal fields in the Belgian Congo near Katanga was confirmed today. Borings over an area of 400 square miles disclosed layers from six to seven feet in thickness of a quality similar to that of Bulgarian coal.

Lawyers are taking an unusual interest in an action brought in the supreme court by Miss Merred Estelle Woodford against John Willard Young, son of Brigham Young, the famous Mormon chieftain, to recover judgment for \$18,000 obtained in a British court eighteen years ago.

President Fallieres today invited Aristide Briand, the minister of justice, to form a cabinet to succeed the retiring Poincare ministry. The president followed the usual custom, consulting with Antonin Dubois and Paul Deschanel, president of the senate and president of the chamber of deputies respectively, before offering the task to M. Briand.

The Ottoman government's reply to

the note of the European Powers, which was presented to the Porte by the ambassadors at Constantinople yesterday, was a refusal to yield the fortress of Adrianople and the adjoining territory to the Balkan Allies according to a private dispatch received in London this afternoon from the Turkish capital.

Governor General William Cameron Forbes received a great ovation when he returned to Manila today. A parade of marines, which was formed in his honor, attracted great crowds and a number of receptions were held.

Although she is one of the richest women in America, Helen Miller Gould Miller will confine the expense of her wedding trousseau to within \$1000. The latter figure was that set by Madeline Force, now the widow of Col. John Jacob Astor when she was married. When Miss Gould marries Finley J. Shepard at her home in Tarrytown next Wednesday, she will be gowned in ivory white with satin and rose-point trimming and with a court train and a rose-point veil.

Rioting, which started after the passing in the British house of commons of the home rule bill, continued in Belfast today. Jeering crowds paraded the streets, firing blank cartridges and voicing threats. The accidental shooting of several persons showed that some of the revolvers carried real bullets.

Because the inaugural committee will bow to President-elect Wilson's wishes and abandon the inaugural ball, there may be a smaller inaugural parade than at any recent presidential induction into office.

Retirement from congress in March of Chairman Pajo, of the money trust investigating committee, and not a cessation of the inquiry because of unsatisfactory results, was authoritatively stated today as the cause of suspension of the investigation next week.

**CHINESE CHAMPS**  
 (Continued from page 9.)

that, coupled with some errors, brought six men across the wire before the side was retired. It was all over but the shouting, and to tell the truth, there was mighty little of that.

Luck Yee got off with four hits against him, while the C. A. U.'s touched up Iwasaki for thirteen safe ones.

The score:

**BEST MEDICINE MADE.**  
 There is no better medicine made for colds than Chamberlain's Cough Remedy. It acts on nature's plan, relieves the lungs, opens the secretions, aids expectoration; and restores the system to a healthy condition. For sale by all dealers. Benson, Smith & Co., Ltd., agents for Hawaii—advertisement.

**CRATER'S LAVA LEVEL GRADUALLY SUBSIDING**

TECHNOLOGY STATION, January 14.—Irregularly rising and falling, the surface of the lava lake of Halemauau has gradually receded during the period between January 8 and January 14. The fumes have been heavy and the glowing lava has been obscured by day, though it could be seen with a certain degree of clarity through the smoke at night or in the early morning. These were the only times that measurement of the lake's subsidence could be made.

On January 13 the surface level of the lava lake was 399.5 feet below the level of the instrument house, which has an elevation of 3700 feet above the sea. This distance between the instrument house and the lava lake level has been increased in the last week by several feet.

The Russian crown prince Alexis is again appearing in public after his recent illness. It was believed that he had been sent to Southern France, but his appearance in St. Petersburg on Christmas disposed of the rumor.

BY AUTHORITY. NOTICE OF PROPOSED CHANGE OF NAME FROM HILLSIDE AVENUE TO KUAHINE DRIVE

NOTICE is hereby given that the Superintendent of Public Works, upon petition of certain residents on Hillside Avenue, Manoa, proposes to change the name of that portion of Hillside Avenue, Manoa, extending from Lower Manoa Road to Upper Manoa Road to Kuaehine Drive.

A public hearing upon this question will be held in the office of the Superintendent of Public Works, Capitol Building, Honolulu, on Thursday afternoon, January 20, 1913, at two o'clock. All persons having any objections to this proposed change in name are requested to be present and set forth said objections at this hearing.

H. K. BISHOP, Superintendent of Public Works, Honolulu, January 16, 1913. 5445-101.

RESOLUTION NO. 7.

Be it resolved by the Board of Supervisors of the City and County of Honolulu, Territory of Hawaii, that the sum of Six Hundred and Twenty Dollars and Ten Cents (\$620.10), be and the same is hereby appropriated out of all moneys in the General Fund of the Treasury for an account known as "Treasurer, Material and Supplies."

M. C. PACHECO, Honolulu, January 17, 1913.

At a regular adjourned meeting of the Board of Supervisors of the City and County of Honolulu, held on Friday, January 17, 1913, the foregoing Resolution was passed on First Reading and ordered to print on the following vote of the said Board:

Ayes: Cox, Hardesty, Markham, Pacheco, Petrie, Wolter. Total 6.

Noes: None.

Absent and not voting: McClellan. Total 1.

E. BUFFANDEAU, Deputy City and County Clerk, 5447-31.

SEALED TENDERS.

Sealed tenders will be received by the Superintendent of Public Works up until 12 m., Tuesday, February 11, 1913, for the furnishing of a 30-inch Venturi Meter and recording apparatus for the Honolulu Water Works.

Specifications and blank forms for proposal are on file in the office of the Superintendent of Public Works, Capitol Building. The Superintendent of Public Works reserves the right to reject any or all tenders.

H. K. BISHOP, Superintendent of Public Works, Honolulu, January 18, 1913. 5447-101.

SEALED TENDERS.

Sealed Tenders will be received by the Superintendent of Public Works up until 12 m. of Wednesday, January 23, 1913, for furnishing the Honolulu Water Works 69 lengths of 12-inch cast iron pipe.

H. K. BISHOP, Superintendent of Public Works, Honolulu, January 18, 1913. 5447-101.

Order of Notice of Hearing Petition for Probate of Will. A document purporting to be the last will and testament of Mrs. Mary A. H. S. Rose, deceased, having on the 28th day of December, A. D. 1912, been presented to said Probate Court, and a petition for probate thereof, praying for the issuance of letters testamentary to Chas. H. Rose, having been filed by Minnie Elizabeth Charlock.

It is ordered, that Monday, the 3rd day of February, A. D. 1913, at 9 o'clock a. m., of said day, at the Court room of said Court in the old Y. M. C. A. Building in the city and county of Honolulu, be and the same is hereby appointed the time and place for proving said will and hearing said application.

By the Court: JOHN MARCALINO, Clerk First Circuit Court, Dated Honolulu, December 28, 1912. 5439-Dee, 30, Jan. 6, 13, 20.

I read it in the Star-Bulletin. It must be so.

DR. ELLIOTT MAKES STRIKING REPORT TO HILO TRADE BOARD

Public Questions of Vital Importance Taken Up by President

[Special Star-Bulletin Correspondence]

HILO, Hawaii, Jan. 17.—Growth and progress of Hilo and the Island of Hawaii, recommendations for a number of local improvements and suggestions for work that will benefit the entire territory were made by Dr. H. B. Elliott, president of the Hilo board of trade, at the annual meeting of that body last Tuesday.

Under the head of "Entertainment," dinners to Governor Frear, Secretary Fisher and others were mentioned, as were the receptions given the Los Angeles yachting party and Duke Kahanamoku. Another feature of this character was the series of lectures given by Messrs. Gooding Field, H. K. Bishop and T. A. Jaggar, Jr. The first territorial civic convention was reviewed, as was the suggestion of the finances of the County of Hawaii as made by Mr. Gooding Field.

Another matter of general interest which was reviewed was the erection of the Hilo Library, in which the sum of \$2000 was given as the amount needed by legislative appropriation. The statement was made that the institution will be handled by a board of nine trustees, five to be appointed by the library association, two by the supervisors and two by the board of trade. The credit for the new structure is given, as it belongs, to John A. Scott.

The desirability of completing the Hilo federal building was mentioned, as were the construction of the Hilo Union school and the new board of health structure. A short report of the mail handled at the Hilo post-office was given, showing a large increase in the past year. Under the head of shipping the need of a marine hospital station here was taken up as well as the necessity of further wharf accommodations in the near future.

The more important sections of the report read as follows: Incorporation of Hilo. The growing importance of the town of Hilo, its rapidly increasing population, and its development as a mercantile center and shipping port are forcing upon us unavoidable problems essentially different in nature from those of the rural districts which form the balance of the County of Hawaii. The time is approaching when the necessarily perfunctory and desultory attention of supervisors from remote districts will not suffice for the administration of this urban area.

Rapid growth in itself demands large expenditures of money within comparatively short periods of time, and so far as these have to be provided from current revenue they will be assumed with reluctance by the remainder of the county if they entail reductions elsewhere. It may be reasonably surmised even now that our present unstable financial equilibrium is maintained partly at the expense of our neighbors. The movement for separation will, therefore receive accessions from two sources, firstly, from the Hilo citizen who will be compelled to realize the need for a more intensive and concentrated administration, and, secondly, from the rural taxpayer who will grudge contributions from which his benefit is very indirect. A mere duplication of our existing system with all of its defects affords a cheerless outlook to the local taxpayer, and it is evident that any step in this direction must be accompanied with much greater efficiency and economy in administration than have yet been experienced on this island if it is to be a success.

The manifest desirability of any of Hilo is incorporation with a city charter. Whether we like it or not, this is a situation that must be faced before long, and it is one that should receive the earnest and thoughtful attention of every citizen. Public Health and Sanitation. A contract has been let and construction has commenced upon a building for the offices and pathological laboratory of the board of health. Under the able supervision of Chief Inspector D. S. Bowman sanitary conditions in the town and on the plantations are steadily being improved, the community enjoys freedom from serious outbreaks of endemic disease, and in these respects favorable comparisons can be made with similar communities on the mainland.

A glance at the vital statistics contained in the last report of the territorial board of health reveals that out of a total of 3296 deaths in this territory, 1042 occurred among infants under twelve months of age, and that for this county the figures were 858 and 360 respectively. These figures acquire startling significance when subjected to analysis and compared with others. Reduced to their simplest terms we find that two out of every eight children born on this island are doomed to the grave within twelve months, to be followed by one more in less than five years. This means an infant mortality of 240 to each 1000 births, and a combined infant and child mortality of 250 per 1000.

Authorities who have carefully studied this subject in England believe that by improving conditions in that country about 40 deaths to 1000 births should be about the normal rate. The actual figures at the beginning of this century were a proportion of 163, which has since been reduced to 109 by the introduction of very partial and incomplete measures of reform. Even if we allow liberally for incompleteness in local birth returns and possibilities of error in comparison these facts should make us pause and think. When we reflect upon the fearful handicap of infantile environment in the crowded and poverty-stricken slum areas of London and the great manufacturing centers of England we are forced to ask ourselves if some remedy cannot be found for this apparent wastage of

human life on Hawaii? Apart from those humanitarian considerations which should profoundly influence our action the conservation of human life has its monetary value equally with that of all other natural resources. We will need fewer immigrant ships from the ports of Southern Europe in days to come if we can do something now to minimize this irreparable drain upon our future citizenship.

Fire Protection and Prevention. A survey of the project for the improvement of Hilo harbor having been made the Secretary of War transmitted to Congress opinions from Colonel W. T. Russell, senior member of the Board of Engineers for Rivers and Harbors, and Chief of Engineers W. H. Bixby. In these reports it is cited briefly that the original project provided a rubble breakwater about 9700 ft in length at an estimated cost of \$1,700,000, but that, owing to miscalculation of the expense of material, the actual cost of a breakwater of this length will amount to \$555,208.00 more.

It is stated that Kulu Bay is the only part of the harbor that will be used by larger vessels for many years, that is will receive ample protection from a shorter breakwater, and recommendations are made that the length of the breakwater be limited to so much as can be built without making the total cost of the work to be done by the United States greater than the original estimate of the cost of construction, and further that out of this estimate funds shall be provided for the dredging of the entrance to Kulu Bay. We are informed that these recommendations are endorsed by the Delegate from Hawaii, the Hon. J. Kalaniana'ole, and Mr. Geo. M. McClellan, his secretary.

Competent observers whose opinions are entitled to respect differ from these conclusions on various grounds. They maintain that this port must be improved along the more ambitious lines of the original project if its usefulness to commerce is to be developed to the fullest extent.

Transportation. The extension of the Hilo Railroad company's lines toward Hamakua reached Launapohoe in September, and will be completed to Pauilo in the early part of 1913. Great difficulties have been overcome by those responsible for this splendid achievement, and the local merchants are already reaping benefit from the facilitation of communication with outlying districts.

The franchise granted by the last territorial legislature for a street railroad in Hilo has been confirmed by congress, and it is stated that the work of construction will begin at an early date. The perseverance and ability of those who have promoted this important project deserve the encouragement and support of every body interested in the development of this town.

The Port of Hilo. The future development of Hilo apart from that growth which is based upon the perfecting of internal communications, depends upon the exploitation of two great natural assets, the harbor and those scenic wonders which attract travelers from all over the world, and here the activities of this organization should find a wide and ample scope for their exertion. The far-reaching influences of the opening of the Panama canal upon the world's great trade routes can only be dimly foreseen.

We foresee a tremendous stream of navigation flowing across the Pacific, but its direction and calling places are still matter for speculation. The experiences of ocean traffic have hitherto shown that the most profitable ports are those where the shifting marts of trade were hitherto only a few hamlets existed, and reduced formerly prosperous and busy seaports to mere fishing villages. This much we can guess, however, that if Hilo is to play a prominent part in this development it can only be by making this port a great supply station for trans-Pacific navigation, and that the achievement of this calls for a much larger perception of the possibilities of the situation than have so far prevailed both here and in Washington.

This business community firmly believes that the advantageous geographical situation of this harbor and its immense possibilities should receive the utmost consideration in the final determination of the plans. It is not simply a problem of providing a safe harbor and the smallest expenditure of money for convenience of handling cargoes to and from this port. It is of extreme importance to the world's commerce that in this great, lonely expanse of waters there shall be one magnificent harbor easily accessible at all times of day and night, affording the safest anchorage and wharfage, and abundantly equipped with every modern facility for the quickest despatch of steamships of every size and tonnage. This is a worthy ambition, and at this time, when every port in the Pacific is feverishly laboring to provide for the unknown demands of the future, we must ask not merely for that minimum that will satisfy local needs, but for a maximum which will enable Hilo to take its proper place in the momentous political and commercial transformation that is now dawning in this hemisphere.

The Warehousing Problem. It seems very probable that no matter what scheme of improvement of the harbor is finally adopted, the vicinity of Kulu Bay is destined to be the warehouse section of this town. The fact of an abundant supply of reasonably priced, fee simple land will in itself prove a magnet to business interests now operating on short and uncertain tenures to attract expansion in this direction. The necessity for increased storage and warehouse facilities is already being felt, and there is a growing demand

for the opening and sale of government-owned land available for these purposes. The suggestion seems reasonable that the public interest will be best served by the sale of these lands to bona fide users rather than to speculators, by restrictions which will ensure a fireproof zone in the storage area, and by a careful regard for the necessities of the future.

Promotion Work and Tourist Traffic. At the regular meeting of this board in March a resolution was adopted requesting Mr. H. W. Kinney, editor of the "Hilo Tribune," to prepare a complete and authoritative guide book describing this island, and assuring him of the financial support of the business interests in this work. A committee was also appointed to give him such other assistance as might be required in its execution. Mr. Kinney spent several months in traveling all over the islands paying particular attention to the collection of folk lore and old traditions, and the completed work, with accompanying maps and photographs will shortly be issued from the press.

A SOUR, GASSY, UPSET STOMACH

"Pape's Diapepsin" Overcomes Your Indigestion in Five Minutes

Wonder what upset your stomach— which portion of the food did the damage—do you? Well, don't bother. If your stomach is in a revolt; if sour, gassy and upset, and what you just ate has fermented into stubborn lumps; if your head dizzy and aches; if belch gases and acids and eructate undigested food; if breath foul, tongue coated—just take a little Diapepsin and in five minutes you truly will wonder what became of the indigestion and distress. Millions of men and women today know that it is needless to have a bad stomach. A little Diapepsin occasionally keeps this delicate organ regulated and they eat their favorite foods without fear.

If your stomach doesn't take care of your liberal limit without rebellion; if your food is a damage instead of a help, remember the quickest, surest, most harmless relief is Pape's Diapepsin which costs only fifty-cents for a large case at drug stores. It's truly wonderful—it digests food and sets things straight, so gently and easily that it is really astonishing. Please, for your sake, don't go on and on with a weak disordered stomach; it's so unnecessary.—advertisement.

KAALI WILL GIVE UNIQUE PORTRAYAL

"A Night in Hawaii of Old" will recall to the memory of readers of Hawaiian history the days when the Kapu was destroyed and the Hawaiians adopted to some extent the manners and customs of the English speaking people. Ernest Kaali and the members of his Glee Club will portray scenes of this period on the twenty-third of January at the entertainment given for the passengers of the Cleveland. At a

ERNEST KAALI

rehearsal Thursday evening, Mr. Kaali cut the play so that there will be but three short acts, one full of interesting events. One of the scenes will show the Hawaiians when they are first learning the Hawaiian alphabet taught by the missionaries. Another part of the play which will be more exciting than the rest will be the battle scene when the first shot was fired by the whites. As dancing was one of the chief forms of entertainment in those days the services of some of the most talented of the Hawaiian dancers has been secured and they will give exhibitions of the most ancient of the dances during the evening.

There have been several of the concerts given by Kaali, but Mr. Kaali feels sure that the coming one will exceed all of the others.

A Tonic Free from Alcohol

Are you pale, weak, easily tired, and do you lack nerve power? Ask your doctor if Ayer's Sarsaparilla would not be good for you. He knows, and will advise you wisely. Not a drop of alcohol in this medicine. It puts red corpuscles into the blood, gives steady, even power to the nerves; and all without stimulation. Make no mistake. Take only those medicines the best doctors endorse. Ask your own doctor.

Ayer's Sarsaparilla
