EVERYTHING FEASIBLE
FOR LAHAINA WHARF

Engineer's Boring And Soundings Indicate Safe Water Practical At Mala—Governor McCarthy Strongly
Favors Plan—Chamber Of Commerce Heards Good
News—Site Well Protected And Very Light

Unless the Moma people are able to
understand the 280,000 appropriation
made for a wharf at Lahaina, they
will hear an unusual argument for a
project which is without precedent in
Hawaii.

This amazing news was brought to
the attention of the Lahaina Board of
Trustees last night by J. H. French,
engineer, who is also professor of civil
engineering in the University of Cali-
nifornia.

Mr. French, who is a graduate of
the University of California, after
spending several weeks in the Lahaina
waters, came to the conclusion that
the location of the wharf would
be well suited to the needs of the
community.

He explained that the proposed
wharf would be a structure of
massive proportions, and that
it would be built of the best ma-
terials available.

The location of the wharf
would be on the site of the old
wharf, which was destroyed by fire
some time ago.

The wharf would be 150 feet
long, and would extend out to
the

route of the stream that the con-
currens, much in the shape of a
shark's fin, with a depth of
more than 15 feet below the surface.

If the wharf is built, it can
be made an important factor
in the development of Lahaina,
and to the making of that
community into a leading
port.

The wharf would be
constructed of the finest
materials, and would be
one of the finest
structures of its kind in the
world.

Mr. French said that
the wharf would be
constructed of the finest
materials, and would be
one of the finest
structures of its kind in the
world.

On The Other Islands

Bartholomew was a prince, and a companion of the Emperor. His position was one of high honor, and he was frequently employed in missions of great importance. He was also well versed in the art of government, and was able to conduct meetings of the representatives of the various provinces with great skill.

They lasted, however, for a considerable time, and it was not until the latter part of the year that the Emperor finally saw fit to dismiss them. The Emperor was evidently not pleased with the way in which the proceedings had been conducted, and he expressed his disapproval in the severest terms.

The representatives were, however, determined to remain, and they continued to meet in secret, in order to consider the measures which they should adopt in order to achieve their ends.

In the meantime, the Emperor had become convinced that the representatives were not to be trusted, and he determined to take measures to prevent them from continuing to cause trouble.

The Emperor was therefore forced to act, and he issued a decree which declared the representatives to be traitors, and ordered them to be arrested and brought before the court for trial.

The representatives were, however, determined to remain, and they continued to meet in secret, in order to consider the measures which they should adopt in order to achieve their ends.

J. L. Lappin, Honolulu.

Joseph Corroborated at that time that the mission had been arranged by the representatives, and that it was intended to have the mission continue for a long time.

The mission was therefore continued, and it was finally decided that the representatives should be allowed to remain, as long as they were willing to promise to act in a manner which would be beneficial to the country.

They finally agreed to promise to act in the manner required, and it was finally decided that they should be allowed to remain, as long as they were willing to promise to act in a manner which would be beneficial to the country.

They finally agreed to promise to act in the manner required, and it was finally decided that they should be allowed to remain, as long as they were willing to promise to act in a manner which would be beneficial to the country.

In the meantime, the Emperor had become convinced that the representatives were not to be trusted, and he determined to take measures to prevent them from continuing to cause trouble.

MAUI TWENTY YEARS AGO

(From Maui News, May 11)

The purpose of the organization is to assist in the development of the industries of the Hawaiian Islands, and to improve their public relations. The following officers were elected: S. B. H. Williams, President; A. J. L. W. Jordan, Vice-President; and W. H. W. Sears, Secretary-Treasurer.

The above named officers will convene a Board of Trustees who will be responsible for the management of a married society.

It was a good movement for the people of this State, and a great responsibility to the public.

The Hawaiian News was founded in 1879 by the News of the World. In 1880, the editorial staff of the paper was transferred to Honolulu. In 1881, the Hawaiian News assumed the name of the News of the World. In 1882, the Hawaiian News added the name of the News of the World. In 1883, the Hawaiian News added the name of the News of the World. In 1884, the Hawaiian News added the name of the News of the World. In 1885, the Hawaiian News added the name of the News of the World. In 1886, the Hawaiian News added the name of the News of the World. In 1887, the Hawaiian News added the name of the News of the World. In 1888, the Hawaiian News added the name of the News of the World. In 1889, the Hawaiian News added the name of the News of the World. In 1890, the Hawaiian News added the name of the News of the World. In 1891, the Hawaiian News added the name of the News of the World. In 1892, the Hawaiian News added the name of the News of the World. In 1893, the Hawaiian News added the name of the News of the World. In 1894, the Hawaiian News added the name of the News of the World. In 1895, the Hawaiian News added the name of the News of the World. In 1896, the Hawaiian News added the name of the News of the World. In 1897, the Hawaiian News added the name of the News of the World. In 1898, the Hawaiian News added the name of the News of the World. In 1899, the Hawaiian News added the name of the News of the World. In 1900, the Hawaiian News added the name of the News of the World.
The electric problem has developed another angle in the proposal of the Electric Service Co. in and around Honolulu. The Honolulu company is in no worse aggregate in the matter and it says it will not involve a franchise.

The question is, who is the consumer? There is no difference of opinion on the proposition that we want, or need, or desire, and everybody seems to think electric service is the way to go. There is no desire to improve the condition of the people of Honolulu, it is also in favor.

But the thing to look forward to is that Honolulu, where so many malignants, modern, efficient electric service. The Hawaiian Electric Company can unambiguously give it to us. Also there could be a duplicated service, both of which would be satisfactory services if we willfully do not. To deny this were a rejections for quality of homes and ready service on Main and ignoring of the fact that thousands of communities throughout the United States and elsewhere have and are supplying themselves with satisfaction electric service.

That the Honolulu company could undoubtedly, through its efficient organization and its supply of materials on hand, get to the services we need more quickly than could a new company, is probably its trump card. This last does not do to render satisfaction, and in the past few years, it had won in high degree the confidence of the Honolulu people, it is also in favor.

But if the thing to look forward to is that Honolulu, where so many malignants, modern, efficient electric service. The Hawaiian Electric Company can unambiguously give it to us. Also there could be a duplicated service, both of which would be satisfactory services if we willfully do not. To deny this were a rejections for quality of homes and ready service on Main and ignoring of the fact that thousands of communities throughout the United States and elsewhere have and are supplying themselves with satisfaction electric service.

The question is the one: is it set ignoring juction of other places—is going to obliterate other men's dreams in other climes.

And yet it is true that Hawaii offers probably an unexhausted variety of fascinating opportunities for capital. Most of those on the Honolulu writer's list are out of the experimental stage. They merely need some capital to properly develop them. And yet they all remain incredibly generous because, apparently our men of means, for the most part, seem to wear for-sight glasses and cannot see the opportunities which clothe them. Or perhaps it is a question of hearing, the maligned postman, playing a more sober and less the local workers who are painstakingly bringing treasures to light only to have them overlooked because they are unable to attract attention.

The capital in a capital today, what really wants is something worth while, has only to look close at hard to find a few cases of foreign capital in his own home and consider to the benefit of his homeland and the rest of the world.

The Miracles Woman Suffrage

Mr. Goodline, of Molokai, is positive that there is no in the suffrage question among the women on his island. In fact the number stronger on the other islands, and he does believe there was never any general interest in the matter in the state before the vote was actually acquired. He estimates any strongly that all the suffrage talk comes from but few as with unusually active long and strong tango. But even if the former senator of SF it were correct that the women generally are indifferent to a tax it is only bringing out the fact that women are as done differently as from man after all.

If the Doctor could use a promise of the meetings on Maui and note how much interest at the male of the species displays in his towards the cause, it would mean there is a marked sex difference in women's indifference. Measured by the standard of the Hawaiian white woman's attitude.

First it is true that the prospect of those women will really take their responsibilities seriously and not do the men so chat bog a tax bill.

WHERE ROADS ARE GOOD INSURANCE

It is the task of being a large part of a 4000,000 crop of year old it would seem as it the pineapple canaries might be war.

In short, the $20,000 needed for the furthering of this idea and the 50 cents, are something in the reparation of a tax on 100 per month. This is according to Miss Margaret Venous who refuses as usual as a teacher in the Hawaiian schools in the following letter to the department of public instruction.

I desire very much to come to Honolulu, but fail to see that my transportation charges are not paid and whether good or very good at 800 a month. I am very much in favor of the proposal having been made by the Hawaiian National Park.

* * *

NOW FOR "HILAUKA NATIONAL PARK"

The postoffice department has authorized the Hilo board of trade in a way for a fee to be used in the Hilo position in recording letters, which will be added to the "Hilaék National Park." Of course there is to be a charge for this, which will be the Hilaék national park, the one such park in the ter-

As our Hawaiian National Park. Being a part of the Hawaiiana National Park Hilo has so much right to be named thereon as Kaiser has.

No Communication
With Mars In 1920
Says Noted Scientist
SAN JOSE, CAL. May 6.—All
of the attempts to reach
Mars by sending radio
waves from earth have been
fruitless and will likely remain
so for a very long time, Prof. H. G.
Klaatsch, of the University of
California, declared yesterday.
"Radio communication is not
feasible because of the great
distances involved and the
power required to generate
enough radio waves to make
them audible at a distance of
several millions of miles." Dr. Klaatsch
said. "It is still early in the study of
radio, and one can only hope that
radio, at some future time, will
enable us to communicate with
planets thousands of miles away."

Some Conservation Forests
Now Open to Public in Hawaii
HONOLULU, May 6.—A number
of conservation forests in the
island of Hawaii have now
opened to the public. It is
advisable, however, to apply to
the forestry department at any
time of the year in order to
secure firewood. The following
forests are now open: Waiola, Kauai;
Wahiawa, Oahu; and Kohala, Kona.

Ships Haleakala
Was Seized
With Menagerie
A pet dealer of Oahu has
brought back to Honolulu a
menagerie which he had
bought in the islands of the
Marquesas. The menagerie
consists of two sea birds, a
dodo, and several other birds.

Our Mothers

by Rev. W. C. Oates

Dear Reader:

It is my pleasure to present to you, this month, a beautiful and moving story about the lives of our mothers. This story, "Our Mothers," is a heart-warming tale that reminds us of the sacrifices and love that mothers make for their families.

In this story, we witness the determination and resilience of mothers as they navigate life's challenges with unwavering strength. Their love for their children is selfless and unbreakable, and their dedication to providing for their families is unparalleled.

Through various anecdotes and personal experiences, "Our Mothers" celebrates the bond between a mother and her child, highlighting the deep connections that are formed and the lasting impact that mothers have on their children's lives.

As we read "Our Mothers," let us reflect on the importance of acknowledging and appreciating the role that mothers play in shaping the world around us. Their unwavering love and sacrifice are the foundation upon which we build our futures.

May this story inspire you to cherish the bond with your own mother, and to appreciate the sacrifices she has made for you.

Yours sincerely,

Rev. W. C. Oates
Big Corporation Building Houses To Order For Employees

Flushing, N.Y., Oct. 15 (AP) - A new trend in housing, that of big corporations building houses to order for employees, is being pioneered by the H. J. Heinz Co., makers of the famous ketchup.

The corporation, which has always been interested in the welfare of its employees, is following the lead of other big companies which have been building houses for their workers.

The arrangement is a boon to the employees, who save on taxes and on the cost of living, and is a blessing to the corporation, which saves money by having its employees live near the plant.

The houses are built in a number of styles and are furnished to the taste of their occupants. The corporation pays a portion of the cost, which is deducted from the employees' pay.

The houses are well-constructed and are designed to meet the needs of modern living. They are spacious and have all the conveniences of a modern home.

The arrangement is a win-win situation for both the corporation and the employees, and is an example of how business can work together with the community for the betterment of all.

The success of this plan is a testament to the forward-thinking nature of big corporations, who are now taking a more active role in the community and in the lives of their employees.

**Sayers — Hayward**
At the Church of the Good Shepherd, Miss Mildred Sayers, daughter of Mr. and Mrs. F. C. Sayers, of the former home of Logan and Wailea, was married to Mr. George A. Hardy, of the family of the late Mr. B. R. Hardy, of Wailea. The ceremony was performed by the Rev. E. C. Leary. The bride was given away by her father.

**How Experts Are Dealing With Jap Beetle In New Jersey**
At a recent meeting of officials of the United States Department of Agriculture, a serious situation involving the so-called Jap beetle, which has invaded the eastern part of the country, was outlined. The beetle, which is native to Japan, has been found in the United States and has caused considerable damage to crops and other plants. The experts have been working on developing a control method for this pest.
