McDUFFIE TO FACE CHARGES ON ARRIVAL?

Members of Police Department Prominent in Working Up Affidavits—May Be Presented Tomorrow Morning When Detective Captain Returns from Orient.

JARRETT INSISTS HE IS TAKING NO HAND

But His Subordinates Are—Attorney-general's Office Hears Some Witnesses

While rumors are flying about the streets that the bomb aimed at Captain of Detectives Arthur McDuffie will be exploded tomorrow, a few hours before the return of that officer from Shanghai, informers, coming from the ranks of alleged gamblers and the detective force crowded the office of Arthur G. Smith, deputy attorney-general, this morning to tell what they will against the returning captain of detectives.

That the bomb, as it is called by detectives under McDuffie who have

HAWAII WILL HAVE NO HEAD FOR A MONTH

Organic Act and Statutes of the Territory Convince Attorney-general That He Has No Legal Right to Act as Chief Executive for Territory

BIG BUSINESS MUST WAIT UNTIL PINKHAM ARRIVES

Acting Official Will Care for Correspondence and Handle All Matters of Minor Importance Until December 3

Hawaii will be without a governor from Friday until December 3, unless the appointment of L. E. Pinkham is confirmed by the Senate and he arrives here and takes the oath of office before that time.

When Acting Governor Mott-Smith sails on the Siberia for San Francisco via a 12,000-mile period for Hawaii will begin to continue for an uncertain time. No documents requiring the signature of the chief executive will be signed during that period; no action will be taken by the gubernatorial department touching on the title to real property, or calling for the use of the discretionary powers of the governor.

W. W. Thayer, attorney-general, was at first believed to have the right to step into the place to be left vacant by Acting Governor Mott-Smith, who will spend a vacation in California to recover his health, weakened by his many official duties, but upon a study of the Organic Act and federal statutes relating to territories, the attorney-general has come to the conclusion that he has no legal right to act as governor, notwithstanding that he is directed to do so by the secretary of the interior.

He will, therefore, only attend to a few matters of minor importance and will in no wise attempt to exercise the powers of chief executive.

"I have gone over the Organic Act," he said this morning, "and find that it provides that the secretary of the territory may act in the absence of the governor, but it does not make a provision for such an emergency as this, where both governor and secretary are out of the territory."

The Organic Act is our constitution, and if the attorney-general has the right to act in the absence of the governor and secretary of territory, it should be provided for in that law. But on that point it is silent. It might be argued that as the attorney general is named first among the appointive positions of the governor, he would have the natural right by succession to fill the chief executive's place in a case similar to this.

"Though this may seem reasonable, it is not sufficient. And because the Organic Act is silent in this case, I do not believe the secretary of the interior has the right to name a person to fill the vacancy; for the law says that the governor is to be appointed by the president and confirmed by the Senate, and it doesn't delegate to the secretary of the interior any authority in this matter, or in the matter of filling the vacancy when the governor and secretary of territory leave the territory."

"However, in this case I don't think any great harm will be done. The confirmation of Mr. Pinkham may be within a short time. The different departments are merely marking time now until the new governor takes office, for they do not wish to begin on work requiring a policy to be followed out which may not be in accordance with the ideas of the new governor. They feel that it is better not to take up new work at this time."

"While I act as a sort of chief executive, I will only see that the correspondence is taken care of as far as possible, and attend to a few minor duties of the office."

Miss Jessie Wilson is to have a chrysanthemum wedding at the White House on November 25 when she becomes the bride of Francis Sayre.

Three thousand homesekers have taken advantage of the colonist rates to California.

SENATE HEARS PETITION FOR FRANCHISE BILL

Communication from the Merchants' Association Urging Action Received in Washington

(Special Star-Bulletin Cable)

WASHINGTON, D. C., Oct. 23.—The petition from the Merchants' Association, urging that early action be taken on granting the Rapid Transit Company its franchise extension as asked in the house bill recently introduced, was presented to the senate today.

C. S. ALBERT.

CABLES PART; LLOYD HURLED FIFTY FEET

Gaylord's Captain Miraculously Escapes Death—Suffers Broken Rib

Captain Harry Lloyd, in command of the Hawaiian Dredging Company dredge Gaylord, employed in attempting to remove the bark S. C. Allen from the reef at Diamond Head today, is receiving congratulations over what is declared a miraculous escape from a tragic death aboard that craft yesterday afternoon.

Struck a terrific blow by the broken end of a heavy steel cable and sent hurtling into the air for 50 feet, to drop into the boiling and shark-infested surf, Lloyd today is a patient at the Queen's hospital suffering from a broken rib and a few bruises of a minor nature.

The snapping of a 16-inch snatch-block, as a result of the tremendous strain imposed upon a number of steel and manila cables leading from the dredge to the bark, parted one of the lines. Before Captain Lloyd could be warned of the impending danger he was sent flying from the upper portion of the dredge.

The skipper narrowly missed striking on the deck of the dredge which at the time was littered with a quantity of machinery, and sections of chain and cables.

Superintendent Bowen, who has been a constant attendant at the attempt to save the Allen, also was injured by the breaking of the lines. Bowen received a severe cut across the face, the blow taking effect over the eye.

The members of the Hui Nalu Club will be guests at a masquerade dance at the clubhouse Saturday evening, the proceeds to be devoted to covering the deficit in the club's treasury caused by sending a swimming team to the Portola. The chaperones will be the Princess Kalanianaole, Mrs. J. T. Stacker, Mrs. Pierre Jones and Mrs. Eben Low.

Two of the three Chinese wanted by Assistant District-attorney Bitting in his investigation of the Chinese gambling conspiracy are now in custody, Au Lum Tin having been arrested yesterday afternoon by U. S. Marshal Hendry.

It is now understood that Lum Chan, who was taken in charge by the federal authorities yesterday, is the man against whom a Chinese

Upper picture, to the left, shows Mexican federalist soldiers in session; these same federal troops may be members of the rebel forces tomorrow. To right, Mexican rurales, at present members of the federal forces. Below, on left, Huerta, whether president or general, is a question that is most important to the United States. Personally, he claims the title of "Presidente Interino Constitucional de los Estados Unidos Mexicanos." To right, American automobile placed at the disposal of the American embassy to aid in humane work during the stormy days in Mexico City.

CLASH OF REDS AND BLUES IS EXPECTED IN FEW DAYS

Contending Armies Will Fight Until End of Month for Possession of the Mid-Pacific Stronghold—Recent Maneuvers Only Tactical

BY LAURENCE REDINGTON.

(Star-Bulletin Staff Correspondent in the Field with the Blue Army.)

WITH THE 4TH CAVALRY, NEAR EWA MILL, Oct. 23.—A state of warfare now exists on Oahu. The mobile garrison of the island, divided into Red and Blue forces, may clash within the next few days, and until the end of the month the two armies will fight for possession of the Mid-Pacific stronghold.

To date the present series of maneuvers have been merely tactical exercises, with Reds and Blues returning to the same camp each day to talk things over and compare notes. The action, as a rule, lasted only through a few morning hours, and it was difficult to simulate real war conditions.

Today, however, the real war game commences, the forces dividing to gain the positions from which they will take up the invasion and the defense of the island.

A dark mantle of mystery hangs over the coming operations, and even the respective commanders are more or less in the dark as to the plan of campaign and the probable points of contact. Even the division of the available troops is uncertain, although the departure this morning from the maneuver camp near Castle of General Macomb's brigade for a round-the-island march in the direction of Waialua indicates that it

is to form the backbone of the Red Force, General Macomb becoming the Red commander. The 4th Cavalry, commanded by Colonel W. D. Beach, left Schofield at 8 o'clock, coming toward, and this regiment will likely be a part of the Blue or defending army. The field artillery is expected to receive its marching orders within a few days.

The horse soldiers, in addition to playing their part in the war game

from the time they left Schofield, are being put through their annual field inspection by the department inspector.

Colonel J. G. Galbraith, who rode with the command this morning and who will likely keep close watch on the horse soldiers during the campaign. Besides Colonel Galbraith, Major M. V. Smith, senior umpire, and Lieutenant-Colonel Carl Reichmann, chief umpire, and also assistant to the department inspector, with special reference to foot troops, left with the 1st Hawaiian brigade. As the "war" progresses, we will be in touch with both armies.

Transportation is the problem that

is making everyone shake his head at present. It's a big question whether

two miles, even when attached to lightly loaded wagons, can do the work heretofore divided among four.

The present campaign should furnish the answer.

TO THE BACKBONE OF THE RED FORCE, GENERAL MACOMB BECOMING THE RED COMMANDER.

CARGO AND CABIN

NEW SKIPPER FOR TRANSPORT DIX

The United States army transport Dix, now on the Sound and expected to call at Honolulu en route to Guam and Manila within a short time, it is said, will be commanded by a new skipper in the person of Capt. Robert T. Bain, who some years ago was master of the transport Sheridan.

Captain Bain has of late served in the capacity of ensign of the government transports, making his headquarters at San Francisco. He is well known in navigation circles throughout the Pacific. Captain Bain succeeds Capt. George H. Pierce, the former skipper of the Dix, who died while a transpacific passenger in a transport proceeding from the Philippines to the mainland.

Bain made many friends here as a chief officer in the Dix. His rise from fourth officer to master in the transport service has been rapid. The Dix was expected to depart from the Sound for the Philippines by way of Honolulu in the middle of October. Several thousand tons of flour, grain and sugar are to be forwarded to the Far East in the trooper.

Siberia is Delayed.

The Pacific Mail liner Siberia will be delayed in making the port from the orient, the vessel now being scheduled to reach quarantine about 2 o'clock tomorrow afternoon. The Siberia is bringing 312 Asiatic steerage passengers to the islands. The vessel will be supplied with several hundred tons of bunker coal, discharged of 1300 tons of oil freight, and is believed will be dispatched for San Francisco at 10 o'clock Saturday morning.

Karnak to Brewer & Co.

The Konou Line freighter Karnak, now en route from Hamburg and European ports with several thousand tons of general cargo destined for the Hawaiian Islands, will be handled through the agency of C. Brewer & Co. during the stay at the port of Honolulu. The Karnak is expected here the middle of November. The vessel may be given a small return cargo for European ports.

Gladstone an Early Visitor.

The Inter-Island steamer Gladstone was an early visitor at the port this morning, this vessel returning from Maui ports with cargo including 12 tons of coconuts, 215 sacks of corn, 100 empty containers, 40 sacks of charcoal, 10 crates of chickens, and 47 packages of sundries. The Gladstone is scheduled to sail for Maui ports at 6 o'clock tomorrow evening.

Saint Helene Carried Pass.

Through the agency of Samuel De Prent, the steam schooner Saint Helene was dispatched for San Pedro yesterday afternoon, taking 16,000 cases of preserved pine as part cargo. The Saint Helene is under charter to return to Honolulu with 1,000 tons of lumber to be supplied from a Columbia river port and consigned to the U. S. Quartermaster department. The vessel has been discharged of a like amount of lumber during the stay at the port. The schooner, it is believed, will return here about November 26th.

The Matson Navigation steamer Wilhelmina has secured a large cargo destined for island ports, according to cables received at the agency of Castle & Cooke. The vessel sailed from San Francisco with 3257 tons of freight for Honolulu and also 715 tons for Hilo. Merchandise to the amount of 160 tons for Port Allen and Kaanapali will be transhipped to another steamer. The Wilhelmina is due to arrive at an early hour next Tuesday.

WEATHER TODAY

Thursday, Oct. 22.
Temperature—6 a. m., 72; 8 a. m., 75; 10 a. m., 79; 12 noon, 80. Minimum last night, 72.

Wind—6 a. m., velocity 2; 8 a. m., velocity 1; 10 a. m., velocity 8; 12 noon, velocity 8. Movement past 24 hours, 111 miles.

Barometer at 8 a. m., 30.05. Relative humidity, 8 a. m., 73. Dew-point at 8 a. m., 70. Absolute humidity, 8 a. m., 7.73. Rainfall, 0.

SUPERINTENDENT OF HYDROGRAPHY MAKES REPORT TO THE BOARD

(Extract from September report of superintendent of hydrography to the board of agriculture and forestry.) Data received from all islands except Hawaii by the hydrography division of the board of agriculture and forestry show practically all streams to have the lowest discharge recorded since the inauguration of the hydrographic work. On Oahu the city water supply has reached a low point that will necessitate further restrictions in the use of water unless considerable rainfall occurs within the next few days. All streams on Oahu are at minimum discharges except in the case of the Waiahole stream, the discharge of which has been steadily increased by the underground water induced by the Waiahole tunnel. The north and south branches of the Kauai konahua which supply Schofield Barracks and the Wahiawa Water Company's reservoir respectively have dropped below all known or estimated records. A measurement of the south fork on September 24th showed a discharge of but .4% of a million gallons per day while on October 1 the north fork discharge totaled .98 million gallons per day.

On Maui the ditches of both East and West Maui are below all known records, while on Kauai the same condition occurs in a lesser percentage of ditches. Insufficient rainfall data has been received to make a comparison of the rainfall and run-off at this time.

Methods of investigation.

There are two methods or plans of procedure under which the hydrographic investigation of this territory may be carried forward with the funds available. One method consists in covering a large amount of territory with a meager or limited amount of work and equipment. The second method is to concentrate equipment and operations at those localities in which the work seems most immediately needed and, as soon as the necessary equipment has been established and the investigation put in as nearly a self operating basis as possible, then to take up the work at other localities in the order of its importance in relation to the utilization, operation and development of water usage.

Previous to August 1912, the first named method was adopted by the engineers in charge of this work. An effort was made to obtain at least a little information of a general nature to all perennial streams, ditches, pumping plants, rainfall, etc., on the islands of Kauai, Oahu, Maui and Hawaii. Considering the limited funds available, a remarkable amount of data of a general nature was collected and has been published in Water Supply Paper No. 318 of the U. S. Geological Survey. While the data published furnishes a considerable amount of general information relative to the water supply of the territory, it does not go far enough to be of high engineering and economic value to those interested in the actual utilization of the sources of supply of irrigation, power and other hydraulic projects.

The presidential party, which included Madam Poincaré, several members of the cabinet and their wives, traveled in forty automobiles. They took intervals on dusty roads of from 300 to 400 yards apart so that the procession was often eight or ten miles long. The presence of Madam Poincaré and other women brought about an innovation at official dinners in France. It was arranged that the women should also be guests, and so were the wives of the provincial authorities. A white straw hat with velvet ribbons, such as are commonly worn in the Creuse, was presented to Madam Poincaré at Gueret. She laughingly took off her fashionable Paris toque and put on the peasant hat. She wore it at luncheon and drove away in it, the country people cheering. Four thousand persons dined with the president at Toulouse. When they drank his health 700 bottles of champagne were emptied to fill the glasses once.

Writes of America

M. Henri Labroue, history professor at the Bordeaux Lycee, recalls his souvenirs of America in an article appealing for certain reforms in French public instruction.

One of the things which particularly impressed M. Labroue in America was the reproduction of the Republican national convention of 1907 by the members of Columbia university. M. Labroue considers that such a scene would appear somewhat childish to students of French universities on account of the differences between the French and the American temperament, but he uses it as an illustration of the immense difference between the teaching of history in France and the United States. French professors are not expected to teach their pupils history after 1875. The Frenchman therefore must pick up his knowledge of modern politics as best he can, while the American boy enters manhood fully equipped to take an intelligent part in the political progress of his country.

M. Labroue has much admiration for the manner in which politics and political science are taught in American schools and colleges, and advocates the adoption of similar branches of teaching in France.

Constantine is Criticized

French public opinion considers France to have been humiliated by the recent speech of King Constantine of Greece at Potsdam, when, during the banquet given by the German emperor, he ascribed the successes of the Greek troops in the Balkans to their officers' knowledge of Prussian military training.

For a number of years a French military mission, with General Eyraud at its head, has been in Greece instructing Greek troops, and in consequence of this France had looked upon Greek victories as evidence of the superiority of her military science. She was, therefore, amazed to hear that the German military education of many of the Greek officers was deemed by the king to have been of more account in the victories over the Bulgarians and Turks than the efforts of her military mission.

The belief is general today that the Potsdam utterances of the Greco-king mark the decline of French influence in Greece and the beginning of a Germanophile policy which will finally attach Greece to the Triple Alliance. King Constantine is said to be personally less friendly to France than was his father, and the present queen, Sophie, was born a Hohenzollern.

King Constantine announced his intention of revisiting Paris incognito

or current meter to develop and maintain rating tables of discharge which may be applied to the recorded gauge heights, and which will give the mean or average discharge for every day in the year, as well as the maximum flood discharge and the minimum discharge.

3. Sufficient rainfall stations in the catchment areas of the streams to enable the relation of the rainfall to run-off to be worked out, if possible.

4. A careful study of the topographic geologic features, the vegetation, forestation, and erosive features of the catchment area in reference to possible cooperative work with forestry or other conservation procedure.

5. An examination and investigation of all diversions from the stream and its present utilization.

6. An investigation covering the possible utilization of any waste water, flood or otherwise, which might be economically utilized by diversion or storage.

7. An investigation of evaporation losses and of the amount of water utilized in plant transpiration and growth, or of, as it is commonly known, the water duty for various crops under various conditions of soil, locations, etc.

The first four operations are the only ones which strictly apply to hydrographic investigation work, but as the hydrographic survey is a necessary preliminary step toward the last three investigations named, the two phases of the work should be kept in view and should be considered in conjunction.

The first step necessary for this work is the installation of the proper gauge height recording equipment, as on this part of the investigation depend all further steps.

Acts 56 and 57 of the 1913 legislature have made the intensive study of streams and other sources of water supply in limited areas possible, and it is believed that this method has been inaugurated in parts of the Islands of Kauai, Oahu, Maui, and by December 31, 1913, 12 of the largest sources of supply on Kauai, six on Oahu, and 16 of the largest streams on Maui will be equipped with automatic registers, and will be ready for further steps of the investigating work. In selecting these streams those which are of the greatest economic value, or which may be utilized to supply water where crops are now suffering for lack of it, have been given preference. Should the present supply of funds continue to be available, it is estimated that within eight years all sources of supply will be under investigation; installation and construction work will be completed, and funds will be available to take up the features of investigations relative to utilization and duty. Pending the installation of clock register gauges, the practice of obtaining staff gauge readings by observers will be continued on those streams that are now under observation.

Hydrographic Records and Data.

From past experience it has been found best to work up records and data of perennial streams in annual units, and to publish these records and data for periods covering calendar years. Special investigations of seepages, losses, reconnaissances for small domestic or power investigations, etc., may be made and completed within a shorter period of time, but investigations of perennial streams of sufficient importance to be considered in connection with a general hydrographic investigation are best reported annually. For this reason monthly reports from this division are necessarily of a routine nature, and it is much more difficult to convey information regarding the results to be obtained and the ends being worked for, than in the case of other phases of governmental work.

1. At least 15 years' continuous gauge height records. These records should be obtained by automatic registers which give a continuous record and which cannot make a mistake or falsify records as is frequently the case in man-read and recorded gauge heights.

2. Sufficient measurements by weir

During the month of September a number of the larger dairy herds in the City and County have been retested for tuberculosis by the officials of the Board of Agriculture and Forestry, after an interval of only three months from the previous test as compared to one year, as hitherto practiced.

The results are gratifying in so far as the decrease in numbers of reacting animals is concerned, and careful post-mortem examinations of said reactors demonstrate fully that the disease is practically wiped out, though not entirely so. This condition corresponds exactly with what is met with in other countries where efforts are being made to eradicate bovine tuberculosis, and also demonstrates that the work must be pushed to a finish now in as many herds or dairy as possible—or the work of years will have been wasted. If, for some reason or other the disease cannot be eliminated from reactors' herds—such herds must be proclaimed or "posted" as infected, until they have been freed from infected animals. To allow milk from known reactors, that is, cows proved to be infected with tuberculosis, to be sold for human consumption should no longer be tolerated, and when the disease has been reduced to such slight minimum as that which persists here at the present time, it would seem unwise not to carry this great piece of work to a guard against infection in transit.

The International Medical Congress held in London this fall came to the conclusion that it is far cheaper and more effective to eradicate bovine tuberculosis than to build hospitals, sanatoriums, pasteurizing plants and surgical clinics to deal with the countless numbers of scrofulous (tuberculous) children which annually receive the

County be retested in short order, until the last reacting animal has been disposed of and the disease wiped out. There are now 74.28 per cent of clean herds and only 25.72 per cent remain to be dealt with further. When these have been attended to there only remains the problem of preventing a reinfection of the Island through diseased cows from the other Islands or from abroad. To this end it may become necessary to quarantine against the other counties, in so far as dairy cattle and products are concerned, until such time as these counties see fit to eradicate bovine tuberculosis. To prevent the entrance of fresh infection from abroad it will be necessary to amend the present regulations pertaining to the importation of live stock to require that dairy cattle intended for importation here must come from clean herds, that is, herds certified to by the local health authorities to have been free from tuberculosis for at least one year—and to guard against infection in transit.

EDITOR

THURSDAY OCTOBER 23, 1913

He that allows himself everything that is permitted is very near to that which is forbidden.
Augustine.

THE FIGHT ON McDUFFIE

According to all the signs and portents, affidavits making serious charges against Captain of Detectives Arthur McDuffie are to be sprung some time tomorrow, the attorney-general's office having been in consultation today with at least one member of the detective force, who presumably is assisting in furnishing the information against his superior.

McDuffie is expected to arrive on the Siberia from the Orient tomorrow, so that he is to be confronted at once with charges involving his honesty in office. The sheriff disclaims any hand in the fight that is to be made on McDuffie, though the information seems to have been collected by the sheriff's subordinates. It is hardly likely that the move is being made without Jarrett's tacit consent.

The Star-Bulletin will not adjudge McDuffie guilty or not guilty until he has had an opportunity to be heard in his own defense. The circumstances surrounding the fight against the captain of detectives are no guarantee of sincerity and good faith on the part of those making the fight, if advance rumors as to the charges are correct. Certainly the allegations have been a suspiciously long time in coming to the surface. Even though this paper has criticised McDuffie in some of his official acts, it is unwilling to see him made the "goat" for others.

The thing most needed in the police department is an upheaval that will reveal the general incompetence of the administration as well as the specific instances of wrongdoing, if such there are.

The kind of administration now in operation is shown by the fact that while members of the police department are prominent in working up the charges against McDuffie, the head of the department professes to have taken no hand in the affair whatever and says that he knows what is going on only in a vague way. Such is his idea of discipline and control of the police force.

SALOON CLOSING REDUCES CRIME

The Sacramento Union thus deals editorially with saloon-closing effects:

The liquor men are fond of sending out elaborate figures to show that prohibition does not prohibit. They have let their enthusiasm on this subject run away with their judgment as they now assert and present figures to uphold their contention that the increase of dry territory has increased the consumption of liquor.

In this connection the figures presented to the city trustees of Oroville by the city marshal are most interesting and instructive. The Oroville Register says editorially:

"According to City Marshal Curran, the trustees may as well abandon their lease on the city jail and thus save \$250 a year. During the quarter that ended September 30, but nine arrests were made by the police. During practically the whole time the jail doors have swung wide open.

"It is a significant fact that during the same period, according to the report of City Marshal McCoy of Marysville, 495 arrests were made by the Marysville police.

"The reason for the difference lies directly at the doors of the Marysville saloons. The saloon is the fountain-head of the great stream of American crime. Fortunately there appears to be a growing realization of this fact."

These figures speak for themselves. Oroville and Marysville are made up of similar people. Marysville men are not radically different from those of the neighboring city. The laws under which the two places operate are about the same except that in Oroville no liquor is sold, or at least there are no saloons.

In the dry town there were nine arrests for all causes in three months. In the wet town there were 495.

In Oroville the jail doors stood open during most of the quarter while in Marysville it is doubtful if the prison was ever without a tenant during the same period.

The logic of figures is hard to answer. Will any of those who plead the cause of the liquor interest answer the Oroville argument?

If the closing of the saloons of Oroville has increased the amount of liquor used there, the wholesale liquor men should rejoice. It has also practically eliminated crime.

STATESMAN REED

Senator Reed of Missouri, the statesman who is a member of the senate lobby probe committee and who, in that capacity, took violent issue with anything that looked like a good point for Hawaii and Hawaii's position, is the hero of the following story:

Washington, Oct. 4.—The senate judiciary committee room where the recent lobby investigation was held was the scene Friday of a personal encounter between Senator Reed of Missouri, one of the leading members of the investigating committee, and John McIntyre, said to be a former officer of the National Hypothecae, whose name figured in the correspondence of Martin M. Mulhall, the legislative agent for the National Association of Manufacturers.

There were few witnesses to the episode, but it is said Senator Reed struck McIntyre in the face, accompanying his action with an emphatic statement as to the falsity of certain allegations contained in an affidavit which McIntyre was supposed to have in his possession.

The report of the lobby probe committee shows again and again an attitude of mind on the part of the senator from Missouri that was more than prejudiced and his remarks often bordered on gratuitous insult. His caliber may be accurately measured from the episode told of above.

A FAMILIAR SOUND

Is there a familiar sound about this?

Washington, October 7.—President Wilson this afternoon sent to the senate the nomination of Edmund K. Billings, to be collector of customs at Boston, Mass. The nomination had been vigorously opposed by organization Democrats of Massachusetts on the ground that Mr. Billings had not been an active Democrat."

Evidently the Democratic organization in Hawaii has company.

KENT ON WILSON

Billy Kent, that hustling congressman from California, thus eulogizes President Wilson:

"President Wilson is the biggest man I know. He is absolutely clear-headed on every proposition. He knows exactly what he wants, and he has the ability to sit tight and make things happen the way he wants them to."

A large number of people in Hawaii will subscribe to that last sentence.

TAKE IT LIKE A LITTLE MAN

"Hawaii is glad" over the possibility of near confirmation, but the gladness is that of the boy with a dose of castor oil in him—glad he has it down, and willing to look pleasant because there's nothing else to do.—Advertiser.

Now that you have it down, keep it down, brother, and look pleasant. There's nothing else to do!

The Kukui dance-hall has proved to be nuisance enough to draw forth strong protests from the people in its neighborhood, which should be evidence enough to the supervisors that the resort is not wanted. And, by the way, what has become of the excellent plan for a municipally controlled, open-air dancing pavilion at Alaia park? Properly conducted, such a place would help solve the problem now made only more difficult by the uncontrolled dance-halls on side-streets and beyond police supervision.

Sheriff Jarrett is confronted with a mass of conflicting evidence in the Sizemore case, but the main point has never been clouded: The Korean prisoner went to the hospital from the effects of a brutal beating and if Officer Sizemore did not do the beating, then it was the Hawaiian lad who mixed into the affray. In the former case, Sizemore has shown himself unnecessarily brutal; in the latter case, he has shown himself unable to protect a prisoner.

Governor Johnson declares that the Republicans and Progressives may unite—when the Republicans adopt Progressive principles. And also, Hiram, when the Progressives decide not to insist on eliminating "everything that savors of Republicanism, even the name."

Bones of Columbus are to be displayed at the San Francisco exposition. That's the real "See America First" idea.

Mrs. Pankhurst's lecture engagements are now subject to criticism. W.J.B. please take notice.

Diaz is willin'.

Personal Mention

LESTER FISHEL returned this morning on the Claudine. He has been on a business trip to Hawaii and Maui.

JOHN CATHCART, city and county attorney, has been ill for several days. He is not expected to return to his office for a week. His physician has recommended that he take a two months' vacation, but because of the amount of work in his office, he says he will be unable to leave.

LITTLE NEWS

FIRE CHIEF THURSTON: This weather is hot enough without any tires and we will try to keep them down.

B. VON DAMM: Politics? No politics for me until we poor insurance men know what's going to be come of the wrecked S. C. Allen.

ATTORNEY-GENERAL THAYER: So far as I can see no executive powers are delegated to me by Mott-Smith or Governor Frear. All I will be able to do is to sit in the governor's chair and look the part.

WALTER A. ENGLE: News from Tucker? I should say not. Land affairs in the territory are the least of his worries when he's taking a vacation on the mainland. He probably will be back next Monday.

GOVERNOR FREAR (by Z-ray wireless): I think I know why Mott is so anxious to come East. He's figuring on taking me to that Yale-Harvard football game this fall, expecting to row over a Harvard victory.

D. L. CONKLING: I'd rather take a whipping than take that trip to New York to float the territorial bond issue. Some people seem to think those jaunts are pleasure excursions. But they're not fun for me. I'd rather stay right here in Hawaii.

TOM YELLEK: Football has been given an awful boost in Honolulu this year and the season has started off in fine shape. The game next Saturday between the Town team and Oahu College should prove to be the best in years.

GEORGE G. GUILD: The full report of the Merchants' Association on the Rapid Transit franchise bill will probably be forwarded to Congress next week, the communication received by the senate today having been passed some weeks ago.

CHARLES FREEMAN (McCabe, Hamilton & Remny): Every time I pass the judiciary building, which is at least two times a day, my estheticism is hurt by the fact that Kamehameha needs bath. I wish someone would have this attended to immediately, if not sooner.

H. P. WOOD: I have no doubt but what the exposition officials will allow Hawaii to place all her exhibits in her own building. The purpose of my trip to the coast is to place the matter before the fair officials and explain to them the damage that a divided exhibit would mean to the Islands.

W. H. HEINRICHS: Through quick action on the part of the sheriff's office, a stalwart policeman stood at Hotel and Alakea streets from an early hour until 7 o'clock this morning, with the result that men in the Y. M. C. A. dormitory were allowed to sleep and not awakened by the mournful shouts of street urchins. It is hoped that the policeman will continue to stand there each morning.

ARMY NOTES

Lieut. Harold Geiger, U. S. A., is reported to have made several good flights recently, in the vicinity of Pearl Harbor. Thus far he has made no efforts at altitude, contenting himself with rising a few hundred feet above the ground.

Captain Varian D. Dixon, Fourth cavalry, with station at Schofield barracks, has been transferred to the Ninth cavalry, exchanging with Captain Joseph E. Cusack, at present with the Ninth, stationed at Douglas, Ariz.

Target practice with the seven-inch guns at Ft. Kamehameha commenced this week, the 75th company firing at targets set on land. Sixty shots will be fired before the practice ends. The following officers were present at the opening firing: Colonel Rafferty, commanding the Coast Defense of Oahu; Major Cos, commandant of Fort Kamehameha; Captain Hinkie,

adjutant; Captain Jones of the 75th; Captain Taylor of the 68th; Captains Johnson and Carpenter of Fort Ringer; Captain Hatch, 1st Lieutenants Waller and Kelly; 2d Lieutenants Ellis, Jenkons and Baxter, and Doctor Mitchell, medical corps.

PHILIPPINES EDUCATIONAL REPORT SHOWS CONDITIONS SATISFACTORY

In discussing general Philippine conditions before a distinguished audience in one of the greatest universities of this country a few months ago, a lecturer, in referring to the school system there, spoke of it as constituting the "greatest primary school system in the world," not in respect of any great number of pupils in attendance nor in respect of great amounts of money expended, but in that it meets the needs of the people and is instrumental in bringing about decidedly better economic and social conditions among them.

The 13th annual report of the director of education of the Philippines which has just reached the bureau of insular affairs at Washington and covers the activities of the bureau of education for the year 1912-13 shows that the work is on a most satisfactory basis; that it is giving to the Filipino people a form of education peculiarly fitted to its needs and one which is substantially modern in every respect and that it can be depended upon to assist very materially in the realization of the best hopes of the Filipino people.

The director reports that a very steady and encouraging advance has been made during the past year. This marked advance is shown in the higher standard of the instruction in English, in the better school buildings and grounds becoming available, in the sounder basis on which industrial instruction has been organized, in the further and very marked improvement in the American and Filipino personnel connected with the work of the Bureau, in the notable improvement in the efficiency of the administrative side of the work and in the effectiveness with which the program for the physical training of the pupils en-

rolled in the public schools is becoming operative.

Due to the constantly increasing demand during the past few years upon appropriations for school purposes and the changed conditions resulting from the continually enlarging scope of the work of the bureau of industrial instruction and the organization of higher institutions of learning with no corresponding increase in the total amount of money available it has not been possible to make provision for such a large enrollment of pupils as heretofore. This, in the opinion of the director, is the only feature of the work which does not show decided progress during the past school year. This condition will, however, be remedied during the coming school year as an allotment of a sufficient amount of money has been made to permit of the opening of 1,000 new schools in which it is expected to accommodate 100,000 additional pupils.

Notwithstanding the fact that the total enrollment for the past year has been somewhat less than that for the preceding year, the percentage of attendance has increased from 83 to 87 per cent. Thus by the increased regularity of attendance in part compensating for the smaller number of pupils for whom school facilities were available.

Directorate and Teachers. N4 N There was no change in the directorate of the bureau during the past year. However, the director himself was absent a greater part of the year leave in the United States, thus leaving the first assistant in direct charge.

With the elimination of those American teachers whose services for one reason or another have been unsatisfactory, the director believes that it would be difficult to find a

more efficient force than that at present in the service of the bureau. The teachers selected from the United States have been almost without exception of splendid character and excellent preparation. This has been possible because of the greater interest taken in the United States in the work of the Philippine bureau of education.

While the quality of the American teaching force has advanced very materially, that of the Filipino teacher has kept pace and great advancement in their attainments and ability to teach is shown. Filipino teachers have been assigned to positions of greater responsibility as rapidly as possible and now 115 are serving as supervising and assistant supervising teachers which number does not include 21 Filipino industrial super-

Courses of Study.

The courses of study have been slightly modified during the past year. The changes made have been in the direction of simplification.

Conditions in the Philippines demand early specialization. In the prescribed course of study this specialization is introduced in the first year of the intermediate courses of which six are provided—the general course, the course for teaching, the course in farming, the trade course, the course in housekeeping and household arts, and the course in business.

To delay specialization until the secondary course is reached would result in sending out from the public schools the vast majority of the pupils without any special preparation to fit them for useful careers in the more or less humble stations in life to which the great majority of this or any other country must be confined.

It is planned to establish at least one school offering the course in farming in each division. At present six such schools are in operation while one additional school offers more extensive instruction in agriculture.

There are 239 intermediate schools offering the general course; 96 the housekeeping and household arts course; 49 the teaching course; 40 the trade course; 6 the farming course; and 2 the course in business.

School Sites and Buildings.

There are now in the Islands 1032 standard school sites, of which 643 are of 5000 to 10,000 square meters in size, and 389 are 10,000 square meters or more in extent. Of this total number 311 parochial school sites and 252 central school sites were secured during the past fiscal year.

During the past year 111 standard plan schoolhouses, most of them of reinforced concrete type, have been completed, containing 435 classrooms and providing ample accommodations for approximately 21,750 pupils. This makes a total of 180 standard plan school buildings containing 665 classrooms.

Insular Schools. All of the insular schools, which include the Philippine normal school, the Philippine school of arts and trades, the school of household industries, the Philippine school of commerce and the school for deaf and blind, are fulfilling the purposes for which they were established and are turning out large numbers of young men and women every year to take conspicuous places in community activities.

Schools for Non-Christians.

Substantial progress has been made in all of the school divisions organized among the non-Christians. Many first-class stone and reinforced concrete buildings have been constructed thus making it possible to do much more effective work. In some cases the schools have been instrumental in almost completely revolutionizing social conditions among the people.

Athletics.

Progress in the development of athletics and physical training during the past year has been very great. Particular attention has been given to the further development of group games and other forms of play in which the great majority of the pu-

Industrial Instruction.

The program for industrial instruction for the public schools has been carefully worked out and includes most of the important Philippine industrial activities. It covers seven years of work—the four years of the primary course, and the three years of the intermediate course, and provides instruction in agriculture, domestic science, needle work in its various forms, weaving of Philippine fibers, and work in wood, iron and clay. No provision is made for passing pupils through the primary and intermediate grades without some industrial instruction. Specialization along one of six lines is begun at once in the intermediate grades.

During the past year 83 per cent of the pupils did some form of industrial work. The 7 per cent not so engaged consisted of secondary pupils and those in the lowest grades for which work has not yet been provided. This means that practically every pupil in the primary and inter-

mediate grades is learning under intelligent direction to do something with his hands—a condition sought by up-to-date school systems everywhere.

The director's report shows that during the past year 19,958 boys were taking the trade and shop work; that 100,648 boys were engaged in gardening and farming; 12,369 girls were along the gardening work, and that 1,193 girls were studying house-keeping and household arts. Among other crafts and industries we find 12,593 girls learning lace making, 12,625 embroidery; 6660 cooking; 10,456 boys and 3031 girls making hats; 29,527 pupils were studying mat making; and 73,825 working on baskets.

In connection with the Philippine carnival, held in Manila, February 1-3, inclusive, a Far Eastern Olympic was held in which China, Japan and the Philippines took part. The majority of the contestants representing the Philippines were school boys. In track, field and general athletic events the Philippines were victorious. Japan won the baseball championship. It is difficult to over-estimate the significance of this series of games. It may be truthfully said that athletics in the public schools made such an international contest possible.

Vacation Assembly at Baguio.

Teachers' Camp located at Baguio offers to American and Filipino teachers an opportunity to spend the long vacation during the heated period in most congenial surroundings, where opportunities are given for participation in conferences; athletics and other amusements; and in social intercourse with their fellows. The past year was the best in the history of this institution. Teachers benefited greatly by the presence of two noted educators from the United States, Dr. Paul Monroe of the Department of Education, Columbia University, and Dr. Edwin A. Schell, president of the Iowa Wesleyan University.

The Corn Campaign.

The corn campaign conducted by the bureau of education was the most important of the special features of the work of the past school year. Two contests were arranged, one for the production of the best ears of corn, and the other for the production of the most corn on a given area. In addition to this, demonstrations were given in practically all of the municipalities of the Islands in the use of corn as a human food. The campaign received the enthusiastic support of the people and officials alike, and has resulted in an immense amount of good in disseminating knowledge of the most advanced methods of corn production, and the use of corn as human food.

One of the main purposes of this campaign was to impress upon the Filipino the fact that corn is a food for human consumption, with the hope that the cultivation of corn might be increased. Some idea of the extent of this campaign can be gained from the fact that 30,327 boys were enrolled in the contests; 6,660 girls were taught corn recipes; 235 demonstrations were held; and 247,048 people were served. Approximately one-half million people attended the demonstrations. The recipes used called for the use of utensils and ingredients found in the average Filipino home.

Other special features were: The celebration of Arbor Day, as a result of which 330,795 trees and shrubs were planted during the year by the children of the public schools, of which number 263,746 were alive and in good condition at the end of the year; the giving of civic educational lectures throughout the Islands on rights and duties of citizens, housing of public schools, the prevention of disease, diseases of animals, rice culture, coconuts, coconut beetles, and corn, the attendance at these lectures being 522,774 during the year; and the collection of local geographic material which brought together a valuable body of information which it is hoped will be productive of very material improvement in local geographic instruction.

Schools for Non-Christians. The bureau of education each year is developing a large number of boys and girls who are sufficiently skilled to make articles having a commercial value. It will not be possible, however, for them to reap the fullest advantage of their skill and labor until there is a more thorough industrial organization than at present. When sales facilities adapted to the necessities of the people have been generally provided the country will begin to realize fully on the industrial instruction given, and there will be tremendous activity along industrial lines.

Finances.

Aside from the appropriations for school house construction there was expended for the schools in the Philippines during the past fiscal year the sum of \$3,130,915.68. Of this amount over one-half came from insular sources and the remainder was appropriated by provincial and municipal governments. The federal government appropriated nothing for the support of schools in the Philippines, as in fact the United States makes no appropriation for the support of civil

government in the Islands in any of its branches.

The cost of education per capita of total population during the past year was \$0.42, while the cost per pupil, based on the average monthly enrollment, was \$9.49.

This thirteenth annual statement of the work of the educational department of the Philippines seems to substantiate in part the report made some time ago by a professor of Oriental history in one of our great universities, "In no part of the world has the past decade brought greater improvement than in the Philippines Islands."

THICK, GLOSSY HAIR FREE FROM DANDRUFF

Girls! Try it! Hair gets soft, fluffy and luxuriant at once—No more falling hair

If you care for heavy hair, that glistens with beauty and is radiant with life; has an incomparable softness and is fluffy and lustrous, try Danderine.

Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff; you cannot have nice, heavy, healthy hair if you have dandruff. This destructive scurf robs the hair of its lustre, its strength and its very life, and if not overcome it produces a feverishness and itching of the scalp; the hair roots fatten, loosen and die; then the hair falls out fast.

If your hair has been neglected and is thin, faded, dry, scraggly or oily, get a 25-cent bottle of Knowiton's Danderine at any drug store or toilet counter; apply it as directed and ten minutes after you will say this was the best investment you ever made.

We sincerely believe, regardless of everything else advertised that if you desire soft, lustrous, beautiful hair and lots of it—no dandruff—no itching scalp and no more falling hair—you must use Knowiton's Danderine. If eventually—why not now?—adver-

Cockroaches SHOULD BE KILLED

At the first sign of the repulsive cockroach or waterbug get from your druggist a box of the genuine Stearns' Electric Rat and Roach Paste and use it according to directions; and in the morning you can sweep up a handful of dead cockroaches. Ready for use; does not blow into the food like powder.

Sterns' Electric Paste is sold on guarantee of money back if it fails to exterminate cockroaches, rats, mice, etc.

Sold by druggists, 25¢ and \$1.00, or sent direct, charges prepaid, on receipt of price.

COMMERCIAL NOTES

Centrifugals closed in New York yesterday at 3.48.

The New York stock market remained weak yesterday after the strong activity the day before. There was an occasional bear pressure felt on the market, but the prevailing trend was upward.

For Hawaiian Commercial 25.25 was asked yesterday in San Francisco. Hawaiian Sugar was offered at 25; Honokaa was offered at 14; Hutchinson was offered at 14, and Onomea was bid at 20; Paauhau was offered for 13.50.

Paraguay has valuable forest resources, the most important of which is quebrachot, particularly rich in tanin.

The Turkish government refused the offer of the Standard Oil company for the petroleum monopoly in Turkey.

AT THE THEATERS

BIJOU THEATER

For the latter half of the week commencing today, Monte Carter and his aggregation of players will present "Izzy, the General," a bright and snappy show full of continuous laughter and quick action. Monte Carter as usual will be the star portion of the show and is liable to keep his audience in good spirits every minute. The plot of the show is as follows: Izzy is about to be married to a rich widow. He learns that this widow has been married four times before. All of her husbands disappeared very mysteriously after eating some bean soup which she prepared for them. One can easily imagine the hilarity that ensues when she attempts to feed some of this soup to Izzy. A double plot is brought to light when we see two characters in the show, father and son, trying to elope without letting one another know about it. Their respective sweethearts are mother and daughter and to make matters more complicated, it is learned that the father is in love with the daughter and the son with the mother. As can be seen, this show should be a riot of fun.

Carter promises some especially pleasing and novel music numbers during the action of the show when all your favorites will be heard.

"The Country Store" was given again last night and made a big impression with a packed house. Many valuable and useful presents were given away.

Tomorrow night the "Chorus Girls" Contest will be held in addition to the regular show when the Dancing Chicks will strive for three cash prizes. Many clever specialties are promised.

POPULAR THEATER

Truly she was "Not Like Other Girls," but she was certainly interesting through 2000 feet of film last night at the little cosy Popular theater, and a good sized audience saw the various entertaining events that led up to a happy denouement. Girls are supposed to be very much alike the world over, but that is hardly a fact—as once in a while one finds a girl like the heroine in "Not Like Other Girls" and he knows that broodie philosophy must take a back seat. It was a good comedy, and with its accompanying films of drama, story and semi-comedy made a good evening's entertainment. The feature repeats tonight, though there will be a complete change of the other picture.

Tomorrow night ushers in the first showing in Honolulu of that much discussed film, "The Romance of the Utah Pioneers." While this may be some be considered merely an "Indian picture," yet it has a deeper significance that will be appreciated by most people who are somewhat familiar with the history of the great West in the early days, and who see beneath the surface the things that cause additional pages to be written in the history of the whole United States. The Utah pioneers were Mormons, and what they did and said and thought has had a profound influence not only on the West but on the entire world.

Morning on 'CHANGE

Hawaiian Commercial dropped a

quarter of a point more this morning

at a small session sale. It went at

23.75, the lowest figure it has reached

in years. Oahu, between the boards,

lost an eighth of a point, selling at

12. Ewa dropped a quarter of a point,

25 shares selling at 15.75. Between

the boards Hawaiian Commercial was

disposed of, in a 50 share lot, at 24.

Only one sale, that of Hawaiian Com-

mercial, was made during the session.

MAHUKONA WHARF

BIDS ARE OPENED

In the presence of the members of the harbor commission tenders for the reconstruction of the Mahukona wharf on Hawaii were opened at the public works office yes-

terday.

A. Wilson and Hugh Howell of

Honolulu and Wailuku, Maui, \$23,850, \$24,850 and \$25,200 in 100 days;

J. C. Foss Jr., Walluku, Maui, \$21,340,

\$19,450, \$14,125 and \$14,425 in 120

days; E. Weyr and Son and John

Bohnenberg of Hilo, \$14,419, \$14,187,

\$14,354.50 and \$14,588.50 in 180 days.

Consideration of the bids will be

made at a special meeting of the

harbor commission Saturday morning at 10 o'clock, an award probably being made at that time.

SPORTS

M'KINLEY SECONDS WHITEWASHED BY SPEEDY H.S.F.B. RESERVES

Kaimuki Footballers Carry the
Highs Into Camp to Tune
of 21 to 0

H. S. F. B. 21, McKinley 0.

The Honolulu School for Boys' reserves defeated the McKinley High School second team by a score of 21 to 0 on Alexander Field yesterday afternoon.

Throughout the game the Honolulu team proved the stronger squad and at no time was McKinley anywhere near their danger-line. The main feature of the game was that nearly all the plays were old-fashioned backs and end runs. The winners worked somewhat short passes at different times and these, with their good interference on the backs through tackle and end runs, won them the game.

Honolulu began the slaughter by kicking off. The ball was received by Bush, who was downed immediately. The McKinley team started off with skin tackle backs which gave them one first down, but the ball soon went to Honolulu. Using new formation in which the four backs were in the same line, and by direct passing to them the H. S. F. B. team started the ball down the field. Gain after gain was made through tackle backs and end runs until it had the ball within the ten yards of its goal. Here the High School took a brace and the ball went to them. After a couple of unsuccessful backs they kicked. The ball again went to Honolulu and the same thing was repeated.

The second quarter began with the ball in Honolulu's possession on the High School 20-yard line. When High School got the ball the quarterback tried a forward pass which was caught by Kam Moon, who carried it over the McKinley line for the first touchdown. Makaiwa kicked the goal and the score stood: H. S. F. B. 7, High School 6. Cruiser took Ah Hin's place and kicked off for McKinley. The ball was received and again taken down the field by the H. S. F. B. At the end of the first half the score stood 7-0.

The second half went on as the first, the ball being in Honolulu's possession the greater part of the time. Cockett made a couple of long runs and the H. S. F. B. team played all around McKinley, making gains through both sides of the line, and now and then working a short forward pass. The winner's interference was the cause of McKinley's downfall. It was good at all times and the High School players found it invincible. In backs, the backs always found a hole in the McKinley line and on the end runs the High School men were easily put out of the way and the runner would carry the ball back to the secondary defense and many times farther.

In the last quarter the H. S. F. B. team worked a number of forward passes which netted them a few small gains and used a rush formation in which three of the backs were placed right behind the tackle while the fourth man took the ball. This play was successful at most all times. Other formations similar to this were used, besides a shift which was neatly played, and all of them were well manipulated. Overconfidence seemed to be the trouble with the High School team. Last year it easily defeated the Honoluluans and expected to do the same thing this year. They went into the game with the wrong spirit and when they found out that their opponents were playing loops around them it was too late to change their tactics. They did do better in the third quarter but not good enough to hold down the score.

For the H. S. F. B. team, Cockett, captain, played a star game. His work was good at all times and in every play he knew what he was about. It was largely through his good work that his team won the game yesterday, for every time he was given the ball his speed netted the team a gain. Three times he carried the ball for 40 or more yards and then it was luck that the McKinley

WILLIE RITCHIE READY TO FIGHT FOR HIS TITLE

Champion Expects to Meet
Leach Cross in New York
Next Tuesday

[By Latest Mail]

NEW YORK—Willie Ritchie, with his soft, pleasant voice and his pleasant smile, is the last fellow in the world one might take for a fighter. But Willie has delivered the goods and is full of confidence of his ability to continue delivering for some time to come.

"I expect to box Leach Cross here according to program October 28," said Willie yesterday afternoon. "I'd like to take on one or two more bouts afterward if I find time, but I'll probably fight Tommy Murphy on the coast on Thanksgiving day. Then I have very fair proposals from Kenosha and Milwaukee, where the sport is just opening up. I'd like to take them all in. There's nothing like hustling when business is good."

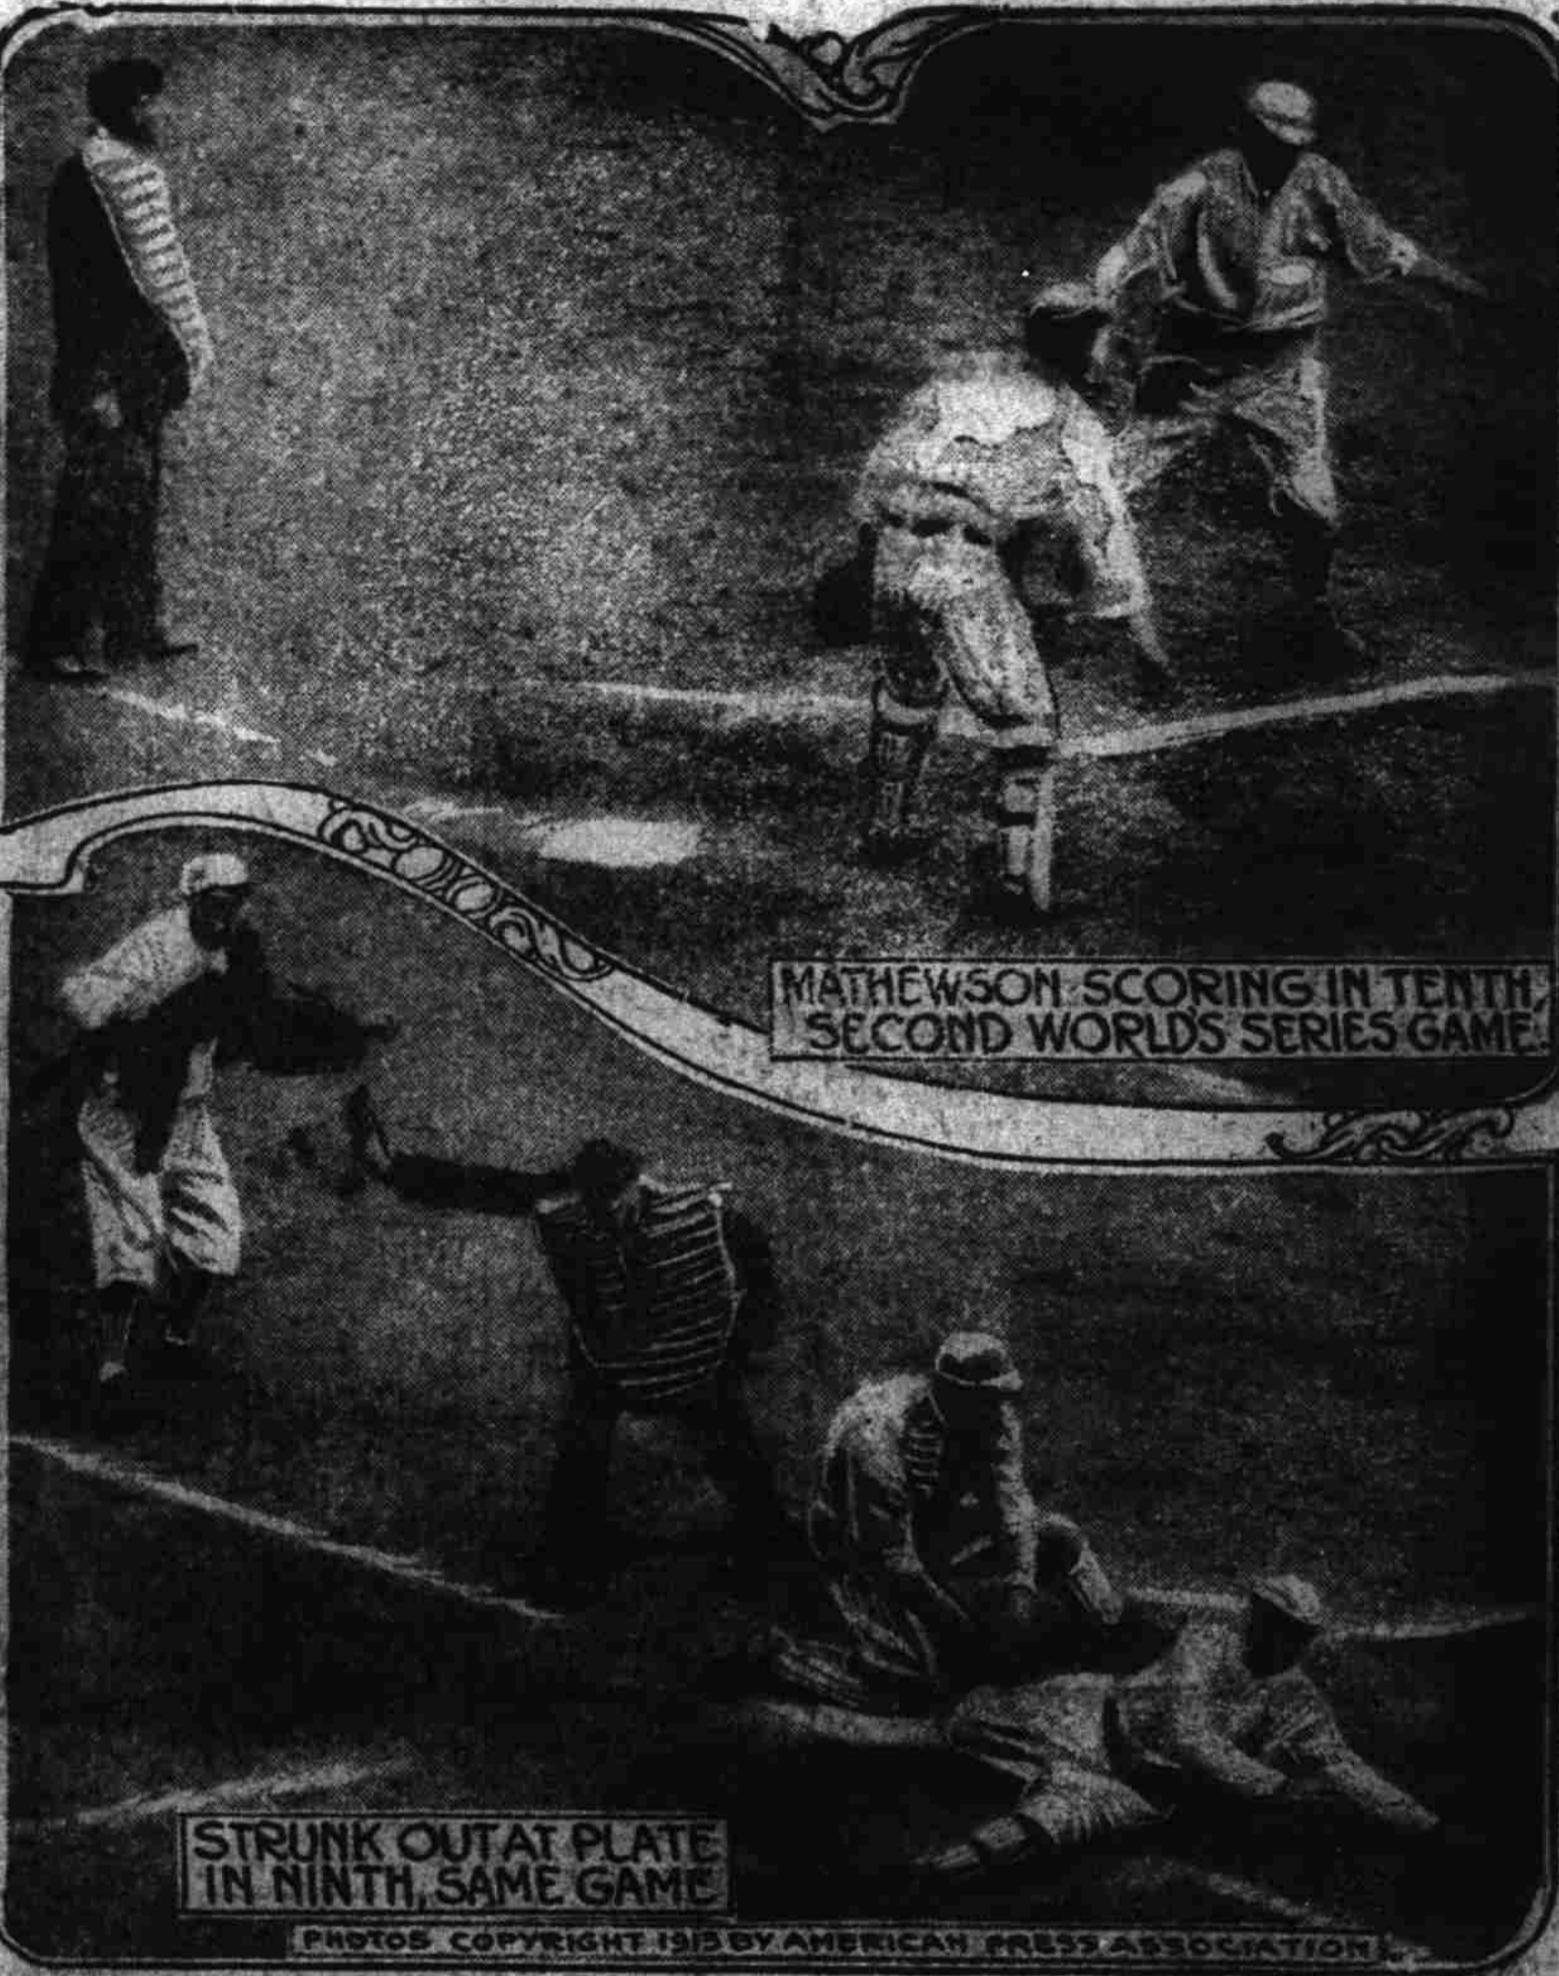

Don't Fear Murphy. "In California lots of people think I'll be afraid to tackle Murphy.

I'll be afraid to tackle Murphy. (Continued on page ten)

Mathewson Winning Contest; Strunk is Nipped at Plate

STRUNK OUT AT PLATE
IN NINTH SAME GAME

PHOTOS, COPYRIGHT 1913 BY AMERICAN PRESS ASSOCIATION

PHILADELPHIA.—Mathewson, the veteran New York Giant pitcher, was the hero of the second game, a sensational, hard-fought 10-inning clash, in the world's series at Shibe park. By his masterly twirling and his timely hitting he really won his own game. In the top picture of the accompanying illustration he is shown crossing the plate in the tenth inning on Fletcher's single, which also sent in Herzog. Matty's single had just a moment before sent in Grant, who ran for McLean. Thus the three winning runs were scored. The lower picture shows Strunk out at the plate in the ninth in the great defensive stand of the Giants in preventing the Athletics from scoring when they had a man on third and second with none out. Strunk is being tagged by big Larry McLean of the Giants on a perfect throw by Willets, the wiry Giant pitcher, who showed his versatility by playing a great game at first base. Umpire Connolly is calling Strunk out. Immediately following this close play Barry was run down between third and home for the second out, and then Murphy was easily out to Willets, thus retiring the side and completing the end of the rally of the Athletics to win the game.

PUNAHOU SOPHS PLAY TIE WITH PICKED TEAM

ENGINEERS AT SHAFTER FORM FOOTBALL TEAM

Lower Classmen Basketball Squad Hold Opponents to Score of 13-13

Soldiers to Go in for Army and Local Championship Laurels

Yesterday afternoon the sophomore girls of Oahu College, champions of the inter-class basketball series, played a tie game with a picked team composed of the best players from the junior and senior classes. The game was hard played and exciting throughout and it was only through the sophomores' spurt in the second half that they won.

At the end of the second half the score stood 11 to 6 in favor of the picked team and it looked then as if it would win.

The lower classmen put in all the extra effort they had in the second half and when the final whistle had blown they stood tie with their opponents, 13 to 13. The players on both teams played well during the whole period and the team work of both squads was good.

For the lower classmen, Ida Desha and Marie McVeigh, captain, played plucky games, while Elizabeth Woods and Violet Austin did especially well for the picked five.

Through these games the captain of the school will be able to pick out those to play on the team against other schools.

No schedule has been made out with outside teams as yet, but the first game will probably be played with McKinley.

Company E of the engineers is backing the team to a man, and the entire organization is watching the rapid improvement of those on the eleven.

Thus far, no definite team has been picked, but among those showing up particularly well are Marshall Elliott at fullback and Varner Bernstein and Ferrall at the backs.

Varner seems to be making good with long punts. With six army teams now in the field after the football title there should be some exciting contests in the next six weeks, which are scheduled to start immediately upon the conclusion of the maneuvers.

The service aggregations which are looking forward to the season are the two squads at Fort Shafter from A and B companies, a team from C company, 1st infantry, the 4th cavalry team, a squad from Battery F 1st field artillery, and a team from the engineers.

So far, the coast artillery has taken no active step to

have a team representing their branch of the service, but, after a splendid record on the East coast it is anticipated that the 55th company at Fort Ruger will come forward with an eleven that should be able to provide a hot opponent for the Coast Defense.

WILLIE RITCHIE
READY TO FIGHT
FOR HIS TITLE

(Continued from page nine)

Tommy has done some great fighting there and they think the world of him.

Yelsh can have a fight whenever there's a good offer for it. I dropped that match in Vancouver simply because the promoters failed to make good their contract. They were rich men, undoubtedly—race track men. If the fight had come off Labor day it would have been all right, for with Saturday, Sunday and Monday clear people would have come to Vancouver from Portland, Seattle, Tacoma, Medford and lots of other places. Why, there was to have been an excursion train from Manitoba, 48 hours away. There would have been a tremendous crowd and the fight promoters counted upon having that crowd go right across the street after the fight into the race track, which would have doubled their profits. But unfortunately Freddy hurt his ankle and had to postpone it. Before the latter date arrived the authorities closed the race track, which could run only 30 days under Canadian law, and which had already run over 80. When that happened the promoters began to figure how much money they might lose on the postponed fight, with their guarantee and advertising expenses amounting to \$25,000 before they opened the gates. They began to look for a loophole and they soon found it. They shifted the responsibility from one to another and refused to put up the certified check payable to Willie Ritchie, as agreed upon. It looked as if there'd be no crowd, a fight run at a loss, and very much doubt whether I'd get my money or not. I gave the promoter 24 hours to go through with his agreement, telling him I would leave Vancouver if he failed to do so. He must have wanted me to leave, for instead of stopping at my camp every day he kept out of sight entirely.

Want to Motor.

"There's one thing I want to do before very long if I can find time. I want to take a leisurely ride from New York to San Francisco in my auto. I'd like to do that while I'm champion, because it would be so much more fun. Nobody ever knows how long he can last as a champion, you know. I expect to last as long as any, because I take the best care of myself and live like any boy at home with his folks. But as soon as a better man can take my title away he'll be welcome to it. I don't bar any opponent. Even McFarland can have chance if he wishes it. Packey can weigh 135 pounds ringside for me; I could hardly let him come in any heavier. I can go under that easily myself. Today I probably weigh out of training, about 141. I meet Cross at 135."

PHILADELPHIA.—Hundreds of letters and telegrams congratulating him on the winning by the Philadelphia Athletics of the world's baseball championship were received today by Connie Mack, manager of the team. Among them the following from President Johnson of the American League:

"Hearty congratulations to you and your world's champions on their splendid showing. As the American League representatives, with three series to their credit, their record may never be equaled."

HIT OR * MISS * IN THE * WORLD OF SPORT

JOHNNY WILLIAMS has been Cap

Wolverton's best winner against Hap Hogan's Venetians thus far this season, while Roy Hitt and Elmer Koestner have been Hogan's best winners against the Sacramento Wolves. Sacramento has won 17 and lost 16 games with Venice in the five series in which these two teams have met thus far this season. Among Sacramento pitchers against Venice Williams has won four and lost one; Livings and Stroud have each won three and lost two; Mansell and released pitcher Kinsella each won two and lost two; Klawitter has won two and lost three; Arellanes has won one and lost four. Among Venice pitchers against Sacramento Hitt has won four and lost one; Koestner has won four and lost one; Baum has won three and lost three; Raleigh has won two and lost one; Harkness has won two and lost one; Ferguson has won none and lost two; Klepper and released pitcher Drucke each won none and lost one.

ACCORDING to a wireless received this morning, Gunboat Smith and Tony Ross engaged in a lustyistic battle at Boston last evening which resulted in the knockout of the latter in the tenth round of a scheduled 12-round bout. Ross appeared to be in the lead up until the tenth, when Smith rallied and sent him to the mat for the full count.

PRINCETON and Yale men will be gratified to learn that the rowing authorities of the two universities have settled upon either Saturday, October 25, or Saturday, November 25, as the date for the race on Lake Carnegie between the Varsity crews. It is agreed by Princeton that the Tigers will give Yale a return race next spring, the time and place of holding to be decided upon later. It is considered likely that a third crew, possibly Cornell—if the Cornellians are willing—will be included in the spring regatta. Thus it would appear that Yale has profited by one of the lessons she learned last year, when she reserved everything for the first race against Harvard. It is expected that Yale's policy in this respect next season will be of the cleanest sort. For the present it is believed both at Princeton and Yale that the fall regatta will serve to stimulate interest in rowing at a time when the training is of the drabdest sort—nothing but hard grind in cool weather, with no event to give spirit to the men or to stimulate their imagination. Yale crews are already at work on the Quinipiac and Dr. Spaeth has had his crews boated on Lake Carnegie for the last two weeks. Visiting Yale oarsmen will find the new Nassau boathouse ready for their accommodation and there is some talk of postponing the formal opening of that building until the day of the Yale regatta. This, however, has not definitely been decided.—Exchange.

In the dressing room after the first game of the world's series, they say that McGraw's flow of sarcasm at the expense of Marquard was something that the players will never forget. The New York manager, say those close to him, believes that Marquard did the unforgivable thing in "grooving" a ball to J. Franklin Baker. Still, J. Franklin may have more than one "groove." If so, Matty kept out of them all.

HAUGHTON has deserted the side lines in practice games at the Harvard stadium, now occupying a post at the top of the stadium whence he hurls down his comments and directions through a megaphone. If spectators would but realize how advanced the lofty positions are for following the trend of games, they would not fight so for the lower sections, or yearn for side line positions. Haughton has lectured his men every day on shortcomings as revealed in the Bates game, his idea, apparently, being to make sure that his eleven does not become too confident.

THE Harvard Crimson rated the students soundly for their lack-luster behavior at the Harvard-Maine game, with the result that Yale-game enthusiasm was on tap at the Bates contest. The system of announcing plays and changes of players was carried on at the stadium just as in the big games, with the result that spectators knew who were playing in the various positions and what they were doing. Yale and Princeton might well copy this idea, especially these days, when one new man follows another into play. The Harvard management has programs for each game and players are numbered thereon just as on the

CHILDREN TAKE "CASCARETS" WHEN CROSS, CONSTIPATED-DIME A BOX

Any child will gladly take "Cascarets Candy Cathartic" which act gently—never grieve or produce the slightest uneasiness—though cleanses the little one's Constipated Bowels, sweetens the stomach and puts the liver in

a healthy condition. Full directions for children and grown-ups in each package. Mothers can rest easy after giving this gentle, harmless laxative to children.—Advertisement.

CASCARETS WORK WHILE YOU SLEEP.

score cards at the Polo grounds. The bulletin board signifies the number of the player retiring as well as the number of the man who takes his place. It is very helpful and considerable.

BOWLING CHAT

Captain Scott: The worm has turned.

Haney: What's the matter with you boos? We needed all of those games.

Winne: Well, we got the long end of it, after all. We should worry!

Reitow: That's right, Haney, bunch your splits and then strike out.

Franz: Talk about consistency!

Kentner: I think we can handle you fellows nicely next time.

Chamberlain: Only sorry we didn't get the whole cheese.

Yap: I believe I could bowl better if they would let me get closer to the pins.

Rose: Every dog has his day—bow, wow!

Cleveland Ties Pittsburgh

(By Latest Mail)

PITTSBURG.—The Cleveland Americans defeated the Pittsburgh Nationals by a score of 1 to 0 in a game of 13 innings. It was a remarkable pitchers' battle between Gregg of Cleveland, who struck out 19 men, and Hendrix of Pittsburgh, who fanned nine batters.

The post series now stands a tie at three each between Cleveland and Pittsburgh, with the deciding game to be played here. The game today was won when Gregg doubled with one man out in the thirteenth and scored on a single by Leibold. The official attendance was 3641 and the receipts announced by the national commission were \$2688.75.

AILING WOMEN OF MIDDLE AGE

Mrs. Hilbert Tells of Her Distressing Symptoms During Change of Life and How She Found Relief.

Fleetwood, Pa.—"During the Change of Life I was hardly able to be around at all. I always had a headache and I was so dizzy and nervous that I had no rest at night. The flashes of heat were so bad sometimes that I did not know what to do."

"One day a friend advised me to take Lydia E. Pinkham's Vegetable Compound and it made me a strong well woman. I am very thankful that I followed my friend's advice and I shall recommend it as long as I live. Before I took the Compound I was always sickly and now I have not had medicine from a doctor for years. You may publish my letter." —Mrs. EDWARD B. HILBERT, Fleetwood, Pa.

Such warning symptoms as suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude, and dizziness, are promptly heeded by intelligent women who are approaching the period in life when woman's great change may be expected.

Lydia E. Pinkham's Vegetable Compound invigorates and strengthens the female organism and builds up the weakened nervous system. It has carried many women safely through this crisis.

FIND STOLEN JEWELS HIDDEN IN THE MEAT

[By Latest Mail]

PARIS—Some extraordinary stories have just been told of the character and exploits of a girl desperado, the leader of a gang of eight international thieves who are in jail in Paris.

At one time she kept a small liquor saloon in London, where she used to tell fortunes by cards. Her real vocation, however, was that of ringleader to a band of thieves and after having left London she was heard of in Paris and many provincial towns, where the gang committed jewel robberies.

One of the receivers was a butcher by trade and stolen jewels often reached Paris embedded in butcher's meat consigned to his care. The girl was finally arrested and while in jail she set to work to batter her face against the cell walls in order to read as follows:

BY AUTHORITY

BILL NO. 63.

AN ORDINANCE TO AMEND ORDINANCE NO. 43 OF THE CITY AND COUNTY OF HONOLULU, ENTITLED "AN ORDINANCE ESTABLISHING RULES AND REGULATIONS FOR THE PLUMBING AND DRAINAGE OF BUILDINGS AND THE CONSTRUCTION OF HOUSE SEWERS IN THE CITY AND COUNTY OF HONOLULU, TERRITORY OF HAWAII; PROVIDING FOR THE APPOINTMENT OF PLUMBING INSPECTORS OF THE CITY AND COUNTY OF HONOLULU, AND PRESCRIBING THEIR POWERS AND DUTIES; PROVIDING FOR THE EXAMINATION, REGISTRATION, LICENSING AND BONDING OF PLUMBERS IN THE CITY AND COUNTY OF HONOLULU; AND PRESCRIBING PENALTIES FOR VIOLATIONS OF THE PROVISIONS OF THE ORDINANCE."

Be it Ordained by the People of the City and County of Honolulu: Section 1. Section 2 of Ordinance No. 43 of the City and County of Honolulu is hereby amended so as to read as follows:

BOARD OF EXAMINERS.

Section 2. The Board of Supervisors shall appoint five suitable persons, one of whom shall be a general contractor, one a sanitary engineer, one an architect, one a journeyman plumber and one a master plumber, who shall act as an examining board and be known as the Board of Plumbing Examiners. Three members of said Board shall constitute a quorum for the transaction of any business. The Plumbing Inspector shall act as Secretary of the Board, but shall not be a member thereof. The compensation of the members of such Board of Plumbing Examiners shall be fixed by the Board of Supervisors. The members of the Board of Plumbing Examiners shall hold office at the pleasure of the Board of Supervisors.

In case of the absence from the Territory, inability or disability, or illness of any member of such Board, the Board of Supervisors is hereby given power to declare the office of such examiner vacant, and to appoint a new examiner in his place to serve until his successor is appointed and qualified.

Section 3. This Ordinance shall take effect from and after the date of its approval.

Introduced by

EDWARD H. F. WOLTER, Supervisor.

Date of Introduction, October 21, 1913.

At a regular meeting of the Board of Supervisors of the City and County of Honolulu held on Tuesday, October 21, 1913, the foregoing Bill was passed on First Reading and ordered to print on the following vote of said Board:

Ayes: Cox, Hardesty, Markham, McClellan, Pacheco, Petrie, Wolter. Total 7.

Nos. None.

D. KALAUOKALANI, JR., City and County Clerk. 5673-3t.

SEALED TENDERS.

Sealed tenders will be received by the Superintendent of Public Works up until 12 m. on the 4th day of November, 1913, at the Office of the Clerk of the City and County of Honolulu, Room 8, McIntyre Building, for furnishing all material, tools and labor necessary to construct a 4,170 square feet of concrete sidewalk; to lay 340 linear feet of lava rock curbing, and to reset 110 linear feet of present curbing on Pauahi Street, between Fort and River Streets, City and County of Honolulu.

Plans, specifications and form of proposal may be had upon application and a deposit of Ten Dollars (\$10.00) at the City and County Clerk's Office.

The Board of Supervisors reserves the right to reject any or all tenders and to waive all defects.

D. KALAUOKALANI, JR., Clerk, City and County of Honolulu. 5673-10t.

SEALED TENDERS.

Sealed tenders will be received up to 12 m. on the 4th day of November, 1913, at the Office of the Clerk of the City and County of Honolulu, Room 8, McIntyre Building, for furnishing all material, tools and labor necessary to construct a 60-foot reinforced concrete bridge with two bents, on the abutments of the present bridge, in Kaukonahua Gulch, just below the Wahiawa Dam, Honolulu, Hawaii.

Plans, specifications and form of proposal may be had upon application and a deposit of Ten Dollars (\$10.00) at the City and County Clerk's Office.

The Board of Supervisors reserves the right to reject any or all tenders and to waive all defects.

D. KALAUOKALANI, JR., Clerk, City and County of Honolulu. 5673-10t.
