COMMERCIAL.

SAURDAY, January 13th, 1883.
Business during the past week has not been of an exciting nature. Settlements of last year's accounts have not much time that the ordinary routine has not yet been resumed.

The receipt of domestic produce for the week has been: Sugar, 9,771 bags; Rice, 68 bags; Paddy, 500 bags; Molasses, 38 lbs.

The schooner Julia arrived on Thursday from the New Hebrides, with 85 able-bodied plantation laborers. The Planters' Labor and Supply Company, by whom this vessel was chartered, are so much pleased with the success of this trip for labor, that they contemplate dispatching her again with all convenient speed for the New Hebrides in quest of more of these desirable Islanders.

The island steamer Likelike has occupied the cradle of the Marine Railway since Tuesday last, and when her repairs are completed there are several other companies who are ready to be placed in a similar position for repairs.

The steamer Suez is expected on Thursday next with dates to the 9th inst.

Stock Quotations for the Week.

Table with columns for various stocks like Hawaiian Sugar Co., Kilauea Sugar Co., etc., and their respective prices.

PORT OF HONOLULU, H. I.

ARRIVALS.

Table listing arrivals from various ports including Honolulu, Kilauea, and others, with dates and agents.

DEPARTURES.

Table listing departures to various ports including Honolulu, Kilauea, and others, with dates and agents.

FOREIGN TRADERS IN PORT.

Table listing foreign traders and their respective companies and agents.

Vessels Expected from Foreign Ports.

Table listing vessels expected from foreign ports, including ship names, origins, and arrival dates.

SHIPPING NOTES.

The steamer p.m. is expected to arrive on the 15th inst. The American brig W. W. Irwin, left San Francisco on the 21st inst. and is expected to arrive on the 24th inst.

MEMORANDA.

The American three-masted schooner Amelia, Captain Newhall, left Fort Townsend on the 15th inst. The bark Kalkalaka, Captain Miller, sailed from Honolulu on the 11th inst.

IMPORTS.

From Port Townsend, on the 12th inst., 100 M shingles, and 10 lbs potatoes. From San Francisco, per W. H. Meyer, Jan 10-25, 250 boxes...

PASSENGERS.

From Kahlolu, per Kilauea, Jan 6-11 Armstrong, S. M. Allen, Miss C. T. Ross, Miss M. D. Ross, Mrs. W. H. Cummings and 3 children, Mr. Kaul, 3 children...

From Kilauea, per Kilauea, Jan 6-11 Armstrong, S. M. Allen, Miss C. T. Ross, Miss M. D. Ross, Mrs. W. H. Cummings and 3 children, Mr. Kaul, 3 children...

From Kilauea, per Kilauea, Jan 6-11 Armstrong, S. M. Allen, Miss C. T. Ross, Miss M. D. Ross, Mrs. W. H. Cummings and 3 children, Mr. Kaul, 3 children...

From Kilauea, per Kilauea, Jan 6-11 Armstrong, S. M. Allen, Miss C. T. Ross, Miss M. D. Ross, Mrs. W. H. Cummings and 3 children, Mr. Kaul, 3 children...

BIRTHS.

MOLTENO—in this city, December 12th, 1882, to the wife of Mr. CHARLES MOLTENO, a daughter.

DEATHS.

ROSE—in this city on the 8th inst., MRS. J. ROSE, aged 53 years and 7 months. The deceased was a native of H. I. and was the wife of J. ROSE, a well-known merchant of the Sacred Heart, in the 25th year of his age.

THE PACIFIC Commercial Advertiser.

SATURDAY, JANUARY 13, 1883.

SEVERAL cases in which employers have taken proceedings against laborers bound to them by contracts in the usual form have lately come up, on appeal, to the Supreme Court for decision.

It is manifest that in one direction this restriction on the assignability of a labor contract tells against the industrial progress of the country. There is a growing disposition on the part of residents in the neighboring Republic to invest in Hawaiian plantation stocks. No doubt many of our plantations would become more prosperous and more productive if they were in the hands of companies possessing capital.

There is a growing feeling among the students of industrial problems that our whole conception of education in general, and of industrial training in particular, needs revision and enlargement. This feeling is based on such easily observed facts as the following:

1. Pupils are not on the increase. 2. Our schools too often educate their pupils in harmony with their environment, thus justifying the charge that education (falsely so called) unfits its possessors for useful industry.

3. The simpler and less important positions in the world's work-shop are as a rule greatly overcrowded, while in the upper stories there is a vast amount of unoccupied space.

4. The work done in the lower stories is often exceedingly shabby. 5. Many who aspire to the upper stories fail to enter, or if they apparently enter, soon end in failure.

6. The chosen few who truly enter, and build up magnificent industrial fabrics, with the splendid fortunes which such fabric imply, fail to educate their children to carry on the work, or to do work of similar value in some other department of useful industry.

7. A whole community of prosperous workmen may be well nigh reduced to beggary by the loss of some new invention, or by change in the fortunes or tastes of consumers.

8. When old industries are swept away, and new ones established on the wrecks, there is usually little power on the part of workmen to adapt themselves to the new conditions.

9. The relentless law of the survival of the fittest and most unscrupulous, instead of the Christian law of mutual consideration and co-operation, too generally prevails among individuals and all kinds of human organizations.

That all education should be industrial, and that everybody should be industrially educated, we believe to be a perfectly tenable proposition.

A cable message has been received by the Government that a chartered steamer to take emigrants from the Azores to these Islands will leave London on the 15th inst. She is chartered to carry 1,200 passengers.

A CAREFUL review of the present condition of the question reveals the fact that one of the most virulent enemies of the Reciprocity Treaty has proven its best friend—the San Francisco Chronicle.

The new addition to the Insane Hospital, for which \$8,000 was appropriated by the Government, is a credit to the nation and admirably exemplifies the generous philanthropy of the country and Government.

In contrast with the old buildings, the new structure is a vast improvement. It is large and capacious. The rooms are of good dimensions and well ventilated. Each is furnished neatly and splendidly adapted to the comfort and convalescence of patients.

That gentleman's interest and solicitude for the well being of those entrusted to his care and treatment, and his comprehensive knowledge of the wants and necessities appertaining to everything connected with his charge, was deeply impressed on the officers of the Government and members of the Press on Thursday last.

The old buildings are decayed and out of date. In no particular are they adequate to the rapidly increasing demands and growing popularity and importance of the institution.

The Inspector must, by every means in his power, point out to the Insular Government the advantages attained when their moneys are placed in the Government Savings Bank; and, on his inspection visits to the Estates Commission, whether they desire to lodge moneys, in order that he may at once furnish them with the necessary extract from the Ship's Register, or, if they prefer, to transmit the same to the Manager of the Estate by post on his return to his office.

At 7 o'clock in the morning those under treatment are first for breakfast. An earlier hour is not chosen because sleep and rest is beneficial to the majority of patients.

The grounds are neat, carefully laid out and beautiful. A fragrant air pervades all the environments; the sight is healthful, somewhat sequestered and in all respects advantageously situated.

Any land now free for such a philanthropic institution, so admirably planned, so ably conducted, and so agreeably arranged in all the minutiae of its management. It is a place where relatives can be sent, who are unfortunate, without begetting misgivings in the sympathizing bosoms of their nearest friends.

By the arrival on Tuesday last, we received the Christmas number of the S. F. News Letter. It contains about double the usual amount of matter, and some very good engravings.

Our exchanges just now are beginning to note the fact that a Canadian weather prophet predicted that a storm would sweep across the Gulf of Mexico, etc. As this predicted track is out of our hemisphere, we can go on with our preparations for securing a good crop of sugar next summer.

THE KALIA INSANE ASYLUM.

The new addition to the Insane Hospital, for which \$8,000 was appropriated by the Government, is a credit to the nation and admirably exemplifies the generous philanthropy of the country and Government.

In many other countries hospitals and asylums of this description are almost entirely dependent upon private subscription. In the most advanced and civilized lands, these institutions have only quite recently received any degree of completeness and comfortable capacity.

Moreover, by beginning its attack upon the good name of Hawaiian planters and the Hawaiian Government so early as it did, it has given ample time for conclusive refutation of all slanders on our employers and our labor system generally.

In another part of this issue will be found the emphatic utterances of the business men of San Francisco as to the benefits reaped by America from the treaty, and as to its commercial and political value to that country.

Before the S. F. Chronicle began to abuse us, there was a good deal of indifference on the subject. Even in that city, which has reaped the greatest benefit from that development of commerce which is due to the treaty, little attention was given to Island affairs, or to the bearing of the treaty on American commercial interests, except by a comparatively few individuals who had themselves close relations with us of a commercial or financial character.

To-day every business man in San Francisco has an opinion of his own on the Hawaiian question, and considers it to be quite as much a national question for himself as an American as it is for us as Hawaiians.

A knowledge of the true bearings of the subject is widely spread, statistics are glibly quoted, and two years ago would have been quite unknown to the majority of the Islands to America as a commercial enterprise, and manufactures is everywhere recognized (on this side of the continent at any rate), whilst at the same time this important matter is still looked upon as secondary to the political value of the treaty in giving a special and pre-eminent position here to the United States.

The change is marked, it is most important, and from an Island point of view most valuable and although the Government is our diplomatic representative at Washington and our special envoy sent to the assistance of the latter have done all that lay in their power, and though private individuals interested in the Islands have helped the work to the best of their ability, and although most valuable assistance has been given by a section of the American press, yet the thorough advertising of Hawaii and Hawaiian affairs which we owe to the malice directed the course of the Government.

The Inspector must, by every means in his power, point out to the Insular Government the advantages attained when their moneys are placed in the Government Savings Bank; and, on his inspection visits to the Estates Commission, whether they desire to lodge moneys, in order that he may at once furnish them with the necessary extract from the Ship's Register, or, if they prefer, to transmit the same to the Manager of the Estate by post on his return to his office.

At 7 o'clock in the morning those under treatment are first for breakfast. An earlier hour is not chosen because sleep and rest is beneficial to the majority of patients.

The grounds are neat, carefully laid out and beautiful. A fragrant air pervades all the environments; the sight is healthful, somewhat sequestered and in all respects advantageously situated.

It is a place where relatives can be sent, who are unfortunate, without begetting misgivings in the sympathizing bosoms of their nearest friends.

By the arrival on Tuesday last, we received the Christmas number of the S. F. News Letter. It contains about double the usual amount of matter, and some very good engravings.

Foreign Correspondence.

PARIS, November 29. M. Jules Verne, a name dear to boys who love science in sport, has already affected a "personally conducted tour" of—readers, in 97 hours from our earth to the moon.

The travelling party comprises George Hatters, his fiancée, Dr. Ox, his rival and a materialist; Valrus, the guardian angel and a spiritualist; Tartlet, a French dandy; and Waldemar, a kind of heavy matter. Neither the science of Ox, nor the theology of Tartlet, nor the materialism of Hatters is a young man of the Excelsior class; to flatter his hobby for visiting impossible places, Dr. Ox gives him a few drops of an elixir; this will preserve him from fire, water, and accidents in general. He thus hoped to rid himself of a rival. But Era secretly drank some also, to qualify her to follow her lover. The doctor had to follow suit, to keep an eye on Era. Finally, the whole party having drunk out of the magic bottle, were rendered profane against geological and astronomical dangers.

Arrived at Vesuvius, the travellers selected, not the overground, but the underground railway. In olden times when people desired to pass into the nether world—Orpheus to wit, it was only necessary to strike the ground and invoke the name of Pluto, and the gates into the bowels of the land were thrown open. Perhaps Era was the talis-man on this occasion, for we know, what women—beautiful ones of course, wish, the gods wish, the party descends through the various strata of the rocks compassing the crust of the earth, until the center of our globe is reached, and which scientists allege to be all fire. Era route to the ground center, the travellers meet with a race of people, having manners akin to our own; possessing long, white hair, like birds, with a weakness case concert music. The fiery furnace is a Terra del Fuego, tenanted not by imps, but by inhabitants only occupied dancing ballets, in costumes to suit the regions of fame. Passing unharmed through the volcanic Pluta, who enters the volcano with other great sights, the wreck of matter—in the case of an extinct world. While thus gazing, Waldemar was all but gobbled up by an anaesthetic shark; rescued, he fell next into the arms of an octopus. Arriving at the other side of our earth, the party was shot through a kind of rocket tube, into the planet Altar, and which lone star confirms the more world's than one theory. The inhabitants of this new world were all given to singing, ballets, and boating. The streets of their cities were paved with diamonds—the only kind of pavement Paris has not yet tried. Candide, in his travels through El Dorado, found towns where gold was, as the clergy say, flung through the houses, in a word, where they had panacles and the lanes paved with penny leaves. The planet, however, burst, and one of the fragments obligingly fell as a holiday at Copenhagen, with all the parties therein—or thereon—safe and sound. Mother Shipton's mode of aerial locomotion was nothing to this. The piece of M. Jules Verne and his benchman D'Emery, is made for the eyes; neither the thread of love which runs through it, nor the scientific data, must be examined more closely than cooking or politics. The scenery, costumes, electric lights, and explosives are, as the Spaniards would say, grandissimos. The pot pours has been composed from Jules Verne's wonderful stories generally, and while being a success, will lack in interest Michel Strogoff or the Tour de Monde.

It is impossible now to calculate the exact period of its return, but I judge approximately that it will reach and pass its aphelion and return about the month of November, 1883. The theory of Captain Thomas Spencer as it regards the origin of the comet is a correct one.

The discovery of the great comet must be accorded to Hawaii. In the forenoon of the 11th day of June, 1882, I am informed, some slight distance to the north-eastern slope of Maunaloa, saw it in broad daylight, and reported it to Hilo, where the clouded atmosphere prevented any observation for some days afterwards. On the night of the 17th Captain E. D. Crane, of the schooner Haleakala, sailing between Honolulu and Hawaii, was awakened by one of his seamen, with the intelligence that a star was on fire—a smoking star, as he called it. About the same date D. H. Hitchcock, Esq., with others, was on the slope of Maunaloa and saw the comet in broad daylight. If scientists wish a name for the comet, let them call it after Hawaii, for here it was first discovered. It was not until the 17th of September that any astronomer east of Hawaii discovered it.

It was not until the 1st October that the atmosphere permitted it to be observed in Hilo. In my letter of the 5th of that month I wrote the following: "The early rising comet gazers have been gratified by their heart's content in looking at the embryo world, that in a few millions of years will be shorn of its tail, have more solidity, and a less eccentric orbit." This was only a hint thrown out to learn if any one would advert to it. It passed unnoticed, however.

Captain Thomas Spencer in several communications has set both the true theory of comets being thrown from the sun, and of the sun being fed by nebula or the cosmic matter in space, as he calls it by "molecules." It alludes to the same atomic matter which the German astronomer call "star dust," and which is diffused through interstellar space. This is a resisting medium near the sun. It now generally conceded, and what is that but the cosmic vapor, referred to by Captain Spencer as "molecules?" Hilo.

Colonial questions promise to cut out in interest a form of odium destined to please materialists and offend the religious: the revision of the Constitution in the sense of not leaving a portion for a museum; the passion for laicizing public edifices, cemeteries, courts, and cross roads. M. de Bragg has won all along the line; he has presented a bill to France, and that merits a few huzzas, Congo to be made, and much soft soldier. Stanley is forgotten, because De Bragg annexes the natives by love and the tricolor; Stanley by Remington rifles and the flag of all nations. We are now going for Madagascar, as Queen R—II declines, without thanks, the conditions which won King Makoko—liberty, equality, and fraternity. It is for the powder now to explode in the hands of the British.

Having failed to realize the dreams of Duplex in Hindostan, due to Clives forsaking the desk for the loss by annexing, India—the Oriental Poland—demanding to be entrenched, it seems, from the Russian Annex. Some millions of francs will be voted to make free men of the near relatives of the heathen Chinese. It is to be hoped French merchants will know and follow the commercial wants of the natives, and not imitate the blunder which once shipped rice to Saigon, equivalent to coals to Newcastle, or, as of old, wool to Adelaide.

We were so lately won without a good robbery. Some time ago a woman claimed to discover treasure in the plains of St. Denis by her driving rod. She captured the belief of many respectable persons—among others, the Canon of the Cathedral of St. Denis. As proof of her success, the rubbers broke into the holiest of the

Notes.

We acknowledge with thanks the receipt of the Planter's Monthly for January. It comprises 24 pages of matter particularly interesting to planters. The decisions of the Supreme Court relating to the Masters and Servants' law, in which Mr. August Driser was the plaintiff, and Mr. S. B. Dole his counsel, are published in full, but we regret that the editor, or acting editor, does not seem to make any comment thereon.

This important matter has been lightly touched upon by the Honolulu newspapers, and it would have been interesting to learn the views of the defeated lawyers on the subject. The state of the roads form a serious source of complaint, but as that is a matter that is receiving the special attention of the Executive just now, the desired improvement will no doubt soon be observed. The non-observance of the amended Section of the Civil Code relating to labor, is rather surprising, as those most interested are generally the first, or ought to be, to observe a change in the laws. Mr. S. N. Castle contributes a valuable communication on Reciprocity, in his usual clear and readable style. The article on the "State of the Roads" is particularly interesting. The state of the roads form a serious source of complaint, but as that is a matter that is receiving the special attention of the Executive just now, the desired improvement will no doubt soon be observed. The state of the roads form a serious source of complaint, but as that is a matter that is receiving the special attention of the Executive just now, the desired improvement will no doubt soon be observed. The non-observance of the amended Section of the Civil Code relating to labor, is rather surprising, as those most interested are generally the first, or ought to be, to observe a change in the laws. Mr. S. N. Castle contributes a valuable communication on Reciprocity, in his usual clear and readable style. The article on the "State of the Roads" is particularly interesting. MEMORY.

Reflection with a ruthless hand, Hard pressed on my throbbing brain— While Memory with her specter hand Of Hopes which ne'er can live again.

Now that Life's day is on the wane— That Love and Hope are well nigh sped. These and shades come, under my brain Is but a charnel of the dead.

Each an accusing spirit seems, Of duties left, alas, undone. And whether waking, or in dreams, Point to the goal I might have won— Life's sands are ebbing fast.

On the cross, the repentant thief Turned in his anguish, Lord to thee. And in Thy mercy found relief— Not less kind, good Lord, to me— Tho' I have grieved Thee sore.

Some day I shall be dead, Some day this tired head, With all the anxious thoughts it now doth know, Shall be laid low.

This body, pain-racked, ill, Shall lie at length, and still, Under the clover and the wind-swept grass, Nor hear you pass.

That were, indeed, strange sleep, When even you might weep, And come, and go—even you—unheard of me As bird or bee.

Nay, sweetheart, nay! believe Here is no cause to grieve. One so wayward, of trouble so oppress'd, Is glad of rest.

Perchance when that release Hath wrought its spell of peace O'er this unquiet heart, long vex'd with woe, Heart's ease may grow.

Who loves me will not weep When that I lie asleep, But rather joy to think such sorrow may Have an end some day.

THE PANAMA CANAL. It is given out, on what appears to be authority, that the whole plan of the Panama Canal has had to be changed, and that Lesseps will now proceed to build it after the old fashion, with locks.

It is often noticed by hospital surgeons, says the Lancet, that severe, curious or out-of-the-way accidents seem to occur in groups, but of this no adequate explanation has ever been given.

Some correspondence has occurred in Le Motte with regard to a statement by De Bonardet that a girl who lately committed suicide by jumping from one of the towers of Notre Dame had probably died from asphyxia caused by the rapid fall.

During the latter part of the last century a sailor on board an English man-of-war in the Mediterranean fell from the mainyard to the deck, striking on his head. He was taken up insensible and carried below—his mates thought—dead. But it proved otherwise upon examination.

One of the most curious and baffling of nervous diseases is aphasia, which consists in the loss of power in the subject of it to recall certain words, and which in serious cases destroys all power of expression.

An eminent French Judge, who suffered from it, would say to his wife: 'Give me my—dear me! my—you know,' and he would point to his head.

While in the Deptford Hospital the man became an object of great interest as well as curiosity. At length he was visited by Mr. Davy, of Guy's Hospital, who had heard of the case, and was eager to see it.

Mr. Cline found the patient lying on his back, breathing with considerable difficulty, with a regular pulse, and, what was very singular, each time the pulse beat there was a distinct motion of the fingers, so that the pulses might at any time be counted simply by counting the lifting and the falling of the fingers.

While in the simpler forms of the disease only a few words are lost by the sufferer, in more complicated cases his vocabulary is limited to perhaps not more than half a dozen words.

Thirteen months and six days previous the man had fallen. As soon as the bone of the skull had been restored to its proper place and the pressure upon the brain removed, the fingers ceased their pulsating motion, the patient drew a long deep respiration, the breast rose and fell, then the eyes opened, with a quivering motion at first, but their light became clear very quickly, and he exclaimed, 'I have fallen! Where am I?'

The operator asked him if he had any pain. He slowly raised his hand to his head and to the injured spot, and answered: 'I think I am hurt—here. It feels—not right.'

It was assuredly a curious case, to say the least. Such a length of time, during which there had been almost a total cessation of every bodily and mental function, and yet on the performing of that simple operation the whole wonderful machine, with all its powers of body and mind, was restored to health and vigor.

IMPROVEMENTS IN THE ELECTRIC LIGHT.

We extract the following from the city article of the Times—It has been evident from the first introduction of the electric light by the arc and incandescent systems that inventors would busy themselves to discover some means of producing the current at less expense.

The great feature in the new machine is the absence of iron in the revolving armature, very greatly decreasing its weight, and by enabling the field magnets to be brought very close together, greatly increasing its efficiency.

The experiment which has been made by the makers of the new machine is the absence of iron in the revolving armature, very greatly decreasing its weight, and by enabling the field magnets to be brought very close together, greatly increasing its efficiency.

MISCELLANEOUS ITEMS.

There will be an International Art Exhibition at Munich this year. A gentleman residing in the Duchy of Posen lately sold a table service of Saxon porcelain dated 1720, and consisting of 158 pieces for 500,000 francs.

A beautiful 'Adoration of the Shepherds,' by Leonardo da Vinci, has been discovered in the workshop of a tailor at Turin. The picture bears Leonardo's monogram in the corner, and measures 3 feet by 2 feet 3/4 inches.

A man threatened to shoot his wife at Sacramento, Cal., if she didn't confess a fault of which he had accused her, and then shot her because she did.

Miss Braddon's next issue of the 'Miscellaneous Bough,' will consist of one complete story, written by herself. It will be illustrated by Mr. Henry French.

It is shown by statistics just issued that last year there were 16,251 known thieves at large in England, of whom 1260 were in the city of London.

Words are butt hinges, and a small drop of ink falling, like dew, upon a thought, produces that which makes thousands, perhaps millions, think.

Workmen while digging in Upper Hanover township, Montgomery county, Pa., recently examined the bones of a human body, which are supposed to be those of an Indian chief named Chooroan.

The experiment which has been made by the makers of the new machine is the absence of iron in the revolving armature, very greatly decreasing its weight, and by enabling the field magnets to be brought very close together, greatly increasing its efficiency.

Only words of necessity are now permitted in New York on Sunday. It is a question among some of the people whether all of the sermons delivered on that day come legitimately under that head.

The following is told of a Saphir, a deformed Jew, who lived centuries ago in Germany. He was travelling in a stage-coach in company with two Jesuits, who made allusions to the personal appearance of Saphir, and were disposed to make fun of him generally.

A Pair of Them.—The Governor—'Now Tom, this won't do. I come in at 12 and you are not home yet; I come in at 1 and still you have not arrived. It is too bad—your mother don't like it. Tom—'Never mind, dad, I'll take your part with the old lady.'

They were talking one day before Mr. Mignet, the perpetual secretary of the Academy of Moral and Political Sciences, about the merits of a candidate. 'Oh,' said Mr. Mignet, 'I shall vote for him because he has some unquestionable merits. To begin with, he is decorated; then he is very polite, he appears well, and does not parade his opinions. You will say that he has written some books. Well, who of us has not his faults?'

The King of Italy has signed a decree for a gallery of modern art at Rome. It will be situated in the palace of Michael Angelo, in the Baths of Diocletian, and will be opened next month. There will be 100,000 francs in the budget for the purchase of works by contemporary artists.

A Chinese teacher in Hongkong has completed a present which he intended for the Royal Princess. It consists of a stanza of poetry, composed by the teacher himself and contains thirty-three distinct and well-formed Chinese characters written out in the full style without any contractions, on one grain of unshelled rice. The grain of paddy is enclosed, under a magnifying glass, in a silver locker. Another Chinaman has inscribed sixty Chinese characters on a single Sesamum seed.

Charles Williams, of Twickenham, who served in the ship Bellerophon at the battle of Trafalgar, has just died at Leyton, Essex, in his 101st year.

Mirrors forty-five by fifty-two feet, and weighing from twelve hundred to sixteen hundred pounds, have been lately placed in the Paris Opera House.

Crazed by the misconduct of her two daughters, a woman chipped off one of her hands at Parkville, Conn., striking not less than a dozen blows with a hatchet.

The London Times, in an article on the Suez Canal, says that England cannot allow the Suez Canal Company to arrogate to itself such extensive powers as it claims.

A steam whistle has just been finished at Bridgeport of which the sound can be heard fifty miles, but do not tell any circus man about it, or next season he will have a whole series of them.

A Russian Pole, who was banished to Siberia, owing to participation in the Polish insurrection of 1832, has just returned home after nearly fifty years' imprisonment.

The London World has statistics to prove that lawyers have less sickness as a class than physicians, but as an offset, physicians can get their medicines for about 50 per cent. off.

In the American Critic we read:—'The many thousand admirers of the Plymouth Pastor will be pleased to hear that Ford, Howard, and Hulbert have decided to come, after an interval of seven years, the publication of Plymouth Pulpit—the weekly pamphlet edition of Mr. Beecher's sermons. The first number was issued on Saturday, October 14. Single copies will be sold for seven instead of ten cents, as formerly, and the subscription price will be two dollars instead of three dollars.'

Miscellaneous.

GRATEFUL-COMFORTING. EPP'S COCOA. BREAKFAST.

By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epp has prepared a food which is the most delicate and nourishing beverage which can be made of any heavy material. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle poisons are floating around us ready to attack wherever there is a weak point. We may escape many a fatal ailment by keeping ourselves fortified with pure blood and a properly nourished frame. See article in the Civil Service Gazette.

JAMES DUNN, MERCHANT, ALL KINDS OF (HAWAIIAN CONSUL) Undertakes the purchase and shipment of all kinds of British and Continental Goods, and will be glad to receive Orders, at rates either free on board at shipping port in Europe, or delivered ex ship (but with duty for buyer's account) at Honolulu. Such Orders may be accompanied by remittance, payable in London or San Francisco, or he will draw at 60 days sight, against confirmed credits from Honolulu Bankers, or otherwise, to suit the convenience of buyers.

MESSRS. W. G. IRWIN & CO., Honolulu. BOS. J. S. WALKER, Honolulu. THE AGRA BANK, (Limited), London. JAN 13/83

THE HONOLULU IRON WORKS HAVE just received an Invoice of 3 in. Best ENGLISH LEATHER BELTING Also some 3 in. Helvetican Belting for Centrifugals.

THE QUIET GARDEN.

All silent in the garden Where the children used to stray: The children, men and women now Grown up and gone away. And the strife and toil of life Have never time to play! Here in the rustling beeches Once the linnets loved to sing; The bird still seeks the old home-nest While human hearts take wing. For man has less of faithfulness Than any living thing.

Oh heart! grown weary with sorrow While the swift years fly apace, Is there no everlasting love, That knows not time nor space? All loves revive, and grow and thrive In God's great resting-place. The treasures of His kingdom Are our old things all made new. Oh! hope, old scenes, and faded flowers Baptized with heavenly dew; The sin and doubt he washes out; And leaves the pure and true. Wait in the quiet garden While the linnets thrills its song; The other voices, silent now, Shall come out there ere long; Earth's weakness past, love's tone at last Shall ring out clear and strong!

L. L. COSHAM.

FOREIGN NOTES.

THE HAWAIIAN TREATY. A resident of California now visiting Washington said that while he might, if he were a San Francisco merchant, oppose the abrogation of the Hawaiian Reciprocity Treaty, yet he would labor for its abrogation if he were a member of Congress. He declared that although the sugar used on the Pacific Coast is imported from the Hawaiian Islands free of duty, yet it costs the consumer more than imported duty-paid sugar costs the consumer in the East. The entire crop of sugar on the Islands is controlled by the millionaire planter and refiner Spreckels, who brings the sugar to San Francisco and refines it there. The entire sugar business of the Islands and the Pacific Slope is in Spreckels' hands. It was asserted by this gentleman from California, that while Spreckels, as a consequence of the treaty, affords to place his sugar on the Pacific Slope market at a price 25 cents lower than the price of duty-paid sugar in the East, he charges consumers there 25 cents more than the price in the East so that California, which ought to have the benefit of free-trade in sugar, is compelled to pay 25 cents per pound more for the Hawaiian Islands produce than residents of the East pay for duty-paid sugar from Cuba. He also said that by means of the arrangement with the transcontinental railway lines in relation to freight charges on Westward bound sugar, Spreckels defies competition from the East, and that his sugar can be bought much cheaper in Montana and other Territories than in San Francisco itself. This great sugar monopolist seems, therefore, to have control of the sugar market west of the Rocky Mountains. The gentleman was asked if the abrogation of the treaty would benefit the consumers of sugar on the Pacific Slope, and he replied that he was not sure that it would; it might do them more harm than good. Spreckels could then sell his sugar at the price which now prevails there, and, by a combination with the trans-continental railroad companies, could control the market as he does now. Eastern refiners could not affect the Pacific market in either case so long as the railroads could be induced to take the place of a prohibitory tariff. It is possible that if the treaty should be abrogated the price of sugar to consumers on the Pacific Slope would be raised, in order to make good to the monopolist the duty which he would be obliged to pay.

The Indian papers are all of the Salvation Army. We take the following from a Calcutta paper:—A Moulvie Shaik Hussein has been bothring "Major" Tucker of the Salvation Army. The Moulvie sent the Major a present of some books and some fruit, and then proceeded to put him several questions, and finally to offer him refuge in Islam. The first question was:—In what verse of the Bible is it enjoined to preach the Gospel whilst singing and playing the music? The other questions referred to the birth of Mahommed having been foretold in the New Testament. "Major" Tucker declined discussion on the ground that "We have no leisure to engage in questions and answers, for this reason, that we are soldiers, and when everyone is before the bayonet we are ready to fight, then there is no time for verbal discussion." Whereupon the Moulvie repeated his questions, repeated his offer to receive the Major into Mahommedanism, and finally concluded thus:—"If you will satisfactorily answer our questions in a reasonable time, I hereby offer you a reward of Rs. 100."

The Lord Lieutenant of Ireland has issued three new proclamations, offering rewards for information relative to the Phoenix Park murders, namely \$25,000 for information leading to the conviction of the assassins. The authorities promise to insure that the names of the informants will not be divulged, and will give \$5000 to any accomplice in the crime, not the actual murderer who will give information leading to the conviction of any actual murderer or accomplices; \$2500 for information leading to the identification of any accomplice, or of the horse-car upon which the assassins rode, or of the assassins' clothes or weapons, the money to be paid on corroboration of the information given by that in possession of the authorities, even though no person be convicted. Persons desiring to tender information under the proclamation offering \$2500 reward can communicate to the police anonymously, and will receive answer by advertisement.

It is heartrending to learn that Manila, in the midst of her ruined houses, has been again visited by cholera. The return of the disease is no doubt attributable to the typhoon, which left many homeless, and in the deepest misery. Even the well-to-do have suffered much loss and inconvenience, and it can be imagined what the distress of the poorer classes must be. Captain Field of the Mary L. Stone, and Captain W. H. Swap of the Neacrus, both succumbed to the epidemic. In another column we reprint an account of the typhoon at Manila in October last. To the residents of these islands who have had the misfortune to encounter one of these terrible hurricanes either at sea or on land, it may tend to convey some idea of their destruction and death dealing power.

It is the present plan of the Republican leaders, if the Civil Service Reform Bill before the Senate be passed, to use it as a basis for the House's action, instead of the Kasson Bill, which is on the calendar. The opposition which has been made to the passage of the bill in the Senate by Senators Brown, Maxey, Cockerill, and Voorhees has disappointed Democratic Senators generally, who fear that the party will be placed in a position of antagonism to the reformation of civil service. James of Florida echoed the opinions of nine-tenths of the Democrats in Congress when he said:—"The Democratic party cannot succeed in the next election without the support of the conservative and independent members of the people, who are sincere in their demand for civil service reform."

The S.F. News Letter says the Kingston, Jamaica, fire has destroyed property to the value of \$15,000,000, which is a pretty big loss for so small a community to suffer. The fire, which was of incendiary origin, began in a quantity of shingles, and in the high wind prevailing gained great proportions. All warehouses, wharves and stores were consumed. Four hundred stores, in all, were destroyed. Buildings regarded as fireproof did not escape the destruction, and nearly every one of that class which the fire attacked succumbed to the flames. The fire was attended with loss of life. Five persons are known to have burned to death. A new law will be passed, which will regulate the use of shingles hereafter. Richard Sanderson, agent of the Wilson Steamship Company, one of whose boats, the Belle, plies between New York and Jamaica, said he thought that the fire was "a Godsend to Kingston. It was a miserable town, filled principally with lazy, shiftless negroes. Their lives do all the work, while they attend to the home consumption of rum. We have to depend upon women entirely for the coaling of our steamers. The fire has destroyed the business portion of the town, and the destruction of the houses, nearly all the buildings were frame structures, and only one and two stories high.

The committee appointed in behalf of several commercial organizations of New Orleans has prepared an address in behalf of the commercial interests of that city to present to the special committee appointed to investigate the improvement of the Mississippi River, and through it to Congress. The address is:—"A Godsend to Kingston. It was a miserable town, filled principally with lazy, shiftless negroes. Their lives do all the work, while they attend to the home consumption of rum. We have to depend upon women entirely for the coaling of our steamers. The fire has destroyed the business portion of the town, and the destruction of the houses, nearly all the buildings were frame structures, and only one and two stories high.

The electric light is far advanced in Victoria. The negotiation which has for some time past been pending between the Australian Electric Company and the Swan Electric Company in England have now been concluded. A telegram from London, received on November 3, places the Australian Company in possession of the patent rights for all the Australian colonies. It is the intention of the company to at once issue 50,000 additional shares. With the exception of London and New York, Melbourne is the only city supplying consumers with electric light from a central station. The company's works have been inspected by a great many visitors, including Judge Bouquet of South Australia, and many of the leading councillors and mining managers from Ballarat, Creswick, and Maryborough.

It is impossible to predict, a correspondent says, to what excess Italian Agoraphobia will finally reach. The "Opinion" of the 1st August informed its readers of the authority of the "Corriere del Mattino" of Naples, that one of the English tri-sports en route to Egypt carries reinforcements to Sir Garnet Wolseley in the form of 2,000 bloodhounds, to hunt down the Egyptian, and describes how the English General will keep them by his side to inspire their ferocity in pursuit of their prey.—St. James' Gazette.

M. Morin, the illustrator of La Vie Parisienne is dead. This artist of large eye, was waist-d, fashionable, well-dressed, and the special public for which he worked. He used to go to the watering-places to study his subjects, and called these visits "baths in purgatory." He had a habit of smoking rag-mat, and led the life of a hmit, and he never ceased to regret that he did not, like Millet, elect for what was true and beautiful in art.

Some important experiments with submarine mines have been made at Chatham. They were organized to ascertain whether the explosion of a large mine submerged in the water in the centre of a ch- in of other mines would cause the explosion of the others. A mine of 50wt. of gun-cotton was fired, but the surrounding mines were not injured. The force of the explosion was felt at a distance of two miles.

Dr. Bell, of New York is sure that germs of disease remain in ice after it is frozen.—Exchange. If they are in ice at all, it must be after it is frozen. We don't have any un-frozen ice in this country.—Norristown Herald.

A Constantinople dispatch says: The Sultan, in conversation with a political prisoner, denied all rumors of disunion in the Government. He said reports of conspiracies against himself were false. He lived in no fear of such dangers. The blood of the Ottoman ran in his veins, and he had his share of the well-known courage of his race. He knew the wants and miseries of his people. He had over- vigorous suppression of corruption, and measures to restore prosperity and order.

Parnell believes that since the commencement of the rent war, the Government have received the rents has been earned for the people. And about the same sum has been expended in the support of troops, extra police and prosecutions; to say nothing of the distress and loss of life attendant upon the "blaming" of this sum.

Abd-ul-Hamid II., who occupies the throne of the Sultan is said to be insane. In other words he is doomed. Whether his threat of life will be cut with a pair of scissors, or whether he will meet his fate by other means, is not yet decided upon. It may be that the party who wish to get rid of him will simply discharge him; that is, give him the "snack." The Sultan must go.

Page, Chairman House Committee on Commerce says he believes that the interests of the people of the Pacific Coast was against the abrogation of the Hawaiian sugar-treaty, and General Rosecrans agrees with him. The New York Post however thinks it is a "monstrous perversion of justice that a bounty should be voted from the Treasury to a lot of cane-growers in a foreign country."

Sometime last summer a special agent was appointed by the United States Treasury Department to look after reported evasions of the Chinese Restriction Act by Chinese coming into the States by way of British Columbia. Last week some inquiry was made after him, and it was discovered that he was in Minnesota, "on his way" to report for duty!

The commercial treaty between Germany and Mexico has been ratified.

BROGLIE, SPEAR & CO., Manufacturing and Importing Jewelers!!
