...DUCATION FOR THE HAWAIIANS.

(From the Maile Wreath.)

...stoms, old traditions, old super...s, and old ideas die hard.

...se who have watched the battle ...ucation in Europe and America ...last quarter of a century, is plain ...e war is over and the victory won. ...y, the answer to any argument ...in favor of such an established ...d assured success would be: open ...yes, the fact is here.

...here lingers an occasional one ...wakened by some such occur...as the opening of the Medical ...of John Hopkins' University to ..., cry out "the victory is won." ...tory was won nearly half a cen...o where Emily Blackwell crossed ...shold of the New York College. ...minds one of the head lines that ...d over the notice of Jeff Davis' ...year or two ago. "The war is ...the press cried out from New ...o New Orleans. The war was ...hen Gettysburg was fought some ...ieve.

...ctory won in the centers of civil...it only remains to carry a few ...and take possession of the out...lands; for like the English the ...educationist does not know when ...eaten and his territory must be ...d from him inch by inch.

...ything that is urged against co...on in Hawaii to-day, and more, ...ed against it over and over again ...United States in the early years ...ruggle; and when, after the de...nated success of the experiment ...the Caucasians there was no ...left for the opposition to stand ...they retreated into the trenches of ...servatism and sent back a cry ...n when it was proposed that the ...and Indian—the behind races of ...—should follow the successful ...co-education to new victories.

...s one who has intimately known ...e history of one of the largest of ...xperiments for over one half of its ...inally successful existence, I as...e the victories were won so easily; ...se to pass so naturally that few ...t there was any strife.

...growth of manliness, of self-re... self-control, of courtesy and ...ness among the boys; of dignity ...lylike bearing among the girls; ...all times been so marked as to ..., for the most part, among the ..., all realization that there had ...en doubts as to the practicability ...has long since ceased to be an ...ment.

...not wish to be understood as say...t there have been no individual ...s and no lapses. We are still hu...white or black or red or brown ...we may be. What I do affirm is ...e great mass moves upward. And ...y a darker background be found ...y similar future experiment ...furnished by the history ...e negro in slavery? Where ...future more beset with fiery ...and fierce temptation than that of ...Indian camp? If, with the cess...the slave pen behind and the ...e of the camp before, such results ...obtained at Hampton can be ob...why despair of any people? ...s an axiom that no nation or race ...s above the level of its women. ...what we demand. If we com...respect we receive it. The Ha-waiian girl needs to learn self-respect, and to demand respectful and courteous treatment at the hands of her brothers. The thing that must strike every observer is that she does not expect it or ask it or receive it. She has yet to learn what belongs to her. She can nowhere do this better than in school, where boys and girls mingle in class room, or dining room, or social hall, under proper and competent surveillance. In a country where the proprieties of family and social life are lacking, where familiarity is the rule, the need of co-education in self-restraint and self-respect is more imperative than elsewhere. Mutual respect is a certain outcome when men and women stand equal in the class room. The Senators and Representatives from the central and western States of America, who, in Ann Arbor and other western universities, stood side by side with their sisters in lecture room and laboratory, cannot understand the point of view of the opposition who deny them equal place and pay. They had reason there to respect the minds of their classmates. Men so educated leave to Mrs. Harriet Beecher Stowe's old negro gardener the argument against progress. Said the old negro to Mrs. Stowe: "No, missus, no woman caynt wote; she aint got no sense." So I think the co-educated Hawaiian will not argue, as I have heard a young native argue, "But we must beat our wives; native women no smart. What we do then, if we no beat them?" He will have learned in the class room that a native woman as well as a native man may be "smart."

Now where the "flower of the kingdom" is selected and sent to different schools, kept separate and apart for a number of years, and at just the time when the society of each is most attractive to the other; it is a little wonder that when set free they should throw restraint to the winds.

Daily companionship in class-room and dining hall in the presence of their teachers would by very familiarity lessen the danger in their homes, where such restraint should be withdrawn.

"It is better to make men and women than to make money," is the motto of one of the foremost of America's educators, one of the noblest of her sons.

Happy is he who has learned this. Happy are they who have here and now the opportunity to "lend a hand" in the making of a nation.

Margaret Kenwill.

ILLUSTRATED

TOURISTS' GUIDE

Through the Hawaiian Islands

Price in Honolulu, 60 Cents per Copy

The Guide will be mailed to any part of the islands for 64 Cents per Copy.

Or, to any foreign country for 75 Cents.

The Book has 176 pages of text, with

20 Full Page Illustrations of Island Scenery,

and a description of the Pearl Harbor Railway enterprise, and surrounding country.

It has also FOUR MAPS of the larger islands, prepared expressly for it.

The GUIDE gives a full description of each of the principal Islands and Settlements in this Group, and will prove an invaluable hand-book for tourists, and for residents to send to their friends abroad.

Some of the illustrations in the new book are very fine specimens of the Phototint process of engraving, and accurately represent the scenes portrayed.

THE DAILY
PACIFIC COMMERCIAL ADVERTISER

THURSDAY, : AUGUST 6, 1891.

FROM the following telegram it will be seen that the American Government has taken measures to ascertain the views of the New Zealand Government respecting the new service for carrying the mails between San Francisco and that colony and the ports at which the ships shall touch. It is presumable that similar notice has been given to the New South Wales and Victorian Governments:

Postmaster General Wanamaker has informed the Postmaster-General of New Zealand that under the recent act of Congress to provide ocean mail service between the United States and foreign ports, limiting the compensation to outward voyages, he is endeavoring to arrange for a fast fortnightly service between San Francisco and Australia via New Zealand, calling alternately at Wellington and Auckland. He says he transmits this information in order that the Postmaster-General of New Zealand, if he thinks best, may co-operate in securing quicker communication and regulating the return voyages in the interests of his country.

A COMMERCIAL TREATY WITH THE UNITED STATES.

We have several times had occasion to censure the Ka Leo for its blackguardism. It is a relief to find in its columns a grain of sober sense.

We quote elsewhere from a Ka Leo editorial, written in a somewhat festive style, which contains more truth than poetry.

There is no question but that this is a "golden opportunity."

"Reciprocity" is the popular thing in American politics at present.

If we are ever to get a free trade treaty with the United States now is the time.

If the Cabinet do not attend to this matter at once, they will be neglecting their duty, and the country will hold them accountable for it.

Give us free trade, and the people will do the rest.

Everybody wants it. Nobody opposes it.

The United States is willing to give it to us.

Why do we wait?

Gentlemen of the Cabinet, this is your opportunity. Do not let the "wave roll by," but take the tide at its flood and get us free trade, and you will have the united backing of the country.

RAMIE AGAIN.

Our attention has been directed to an article on the subject or ramie, printed in the Weekly Examiner of San Francisco, giving the opinion of Mr. William C. Stubbs, the director of the Louisianian Sugar Experiment Station.

By the use of head-lines and large print, farmers are warned against ramie for sundry reasons, some of which, at all events, do not really exist in the actual experience of ramie cultivators.

Mr. W. C. Stubbs is no doubt a very intelligent man of considerable experience in cultivation in general, and not without experience of ramie, but, after all, what he does say does not really make a very formidable indictment, because that which condemns the endeavor to grow this staple is largely based on negative evidence, whilst whatever he admits in its favor stands upon solid experience.

Mr. Stubbs says: "The Exposition of 1885 at New Orleans gave ramie-culture a great boom in our State. Some ramie cloth and fibre were shown there, as a matter of fact. I exhibited a card which illustrated the whole process, from the gathering of the plant to the manufacture of fabrics." So far good, but further on he states: "No machine yet tried has been able to work over an acre a day." This statement should stand thus: "I have never seen" any machine tried which would do so and so. Now we are assured that the Hawaiian Ramie Company's machine will work over two acres, and they hope yet to improve it up to five or more acres, for with Mr. Toppan's system of degumming it is not necessary for the decorticating machine to strip the stalks of all woody matter so absolutely as has been the object with most inventors of decorticators, because the subsequent boiling lessens and brings away all woody matter.

Mr. Stubbs says that when the machine is invented that will get ramie ready for the market economically it will be a great blessing to the world, in which we agree with him, but we think him mistaken in saying that the inventor can collect the prize of $25,000 offered by the British Government for such a machine, being under the impression that a portion of this sum was awarded for an improved machine, and the rest was withdrawn. However, whoever puts ramie fabrics into the market economically will not have to depend upon any government for a reward.

Again, Mr. Stubbs says, "once planted it is almost impossible to get it out." We may quote Mr. J. K. Farley of Koloa, Kauai, for experience the opposite of this.

But now we will see what else Mr. Stubbs says even of the machine which he has seen. "Each one does what it claims to do—gets the tissue and woody parts out, and prepares and bleaches the fibre, each one produces * * much better and finer fibre than can ever be produced in China by the wet rotting process," but until you can "get through ten or fifteen acres a day it will not be profitable."

Yet he says it is "easy to get five or six crops a year," it needs very little water and is a hardy plant, and "it grew luxuriantly, there will never be any trouble about that part of it."

Now if the Hawaiian Company's decorticating machine, followed by boiling and chemical treatment by Toppan's will do what it is claimed, we may take Mr. Stubbs' account as eminently favorable to the value of this new industry.

KOHALA NOTES.

It looks as though there was a fire fiend in the district. On the night of July 26th the house occupied by Mr. and Mrs. Tulloch was destroyed by fire, everything being consumed—a total loss. The occupants had been absent several days—one on business connected with the telephone, and the other on a visit. A meeting was held in the Court-house to consider the matter of incendiary fires, but nothing was done. A subscription was circulated in behalf of Mr. Tulloch, and it is said that $450 was collected.

Telephone connection through to Hilo was effected August 1st.

On July 17th a very pleasant and well-attended party was given by Mrs. C. S. Kynnersley and Mrs. Wallace, at the house of the former.

There are good reasons why work on the road across Walachia gulch, complained of by "Kenehu," has been delayed, and that on the road in Amakea continued. It is but right that an unfinished job in the central part of the district, where considerable heavy carting is done, should be completed. A road well made will better stand wear and tear in wet weather, and pay better in the end, than one but poorly or cheaply done—where the water can collect in pools and wear into deep mud holes. People living at the eastern side of the district should also take notice that a large portion of heavy road work has been done on the gulches in their end of the district before complaining of the "selfish extravagance" of the Road Board, or charging them with making work for the hands on a certain plantation during slack times, when everyone knows that it is very fortunate for the Road Board that there are slack times when gangs of men from these plantations are available for doing those heavy jobs of work on the roads.

Furthermore, when the Road Board finds it impossible to get a foot of hill or other land for the purpose of making improvements without paying the highest price therefor, it certainly is no encouragement to undertake such work. People who have no public spirit—a seemingly scarce commodity in this district—should not ask too much.

There has been rain enough here now to make planting safe, and the growing crops begin to look a little greener than they did a few weeks ago.

New York Recorder: What an extraordinary year this is in the way of physical convulsions! The entire world seems to be disturbed. Under the crust the lava works; in the air tornadoes sweep to destruction; even the sure foundations of the seas appear to be shaken, and the sands of the desert for the first time in thousands of years are weighted with great bodies of restless moving waters.

LONDON, July 24.—The Educational Bill passed the third reading in the House of Lords to-day.

EXTRACTS.

[From a Ka Leo o Na Lahui editorial.]

WHAT ARE THE MINISTERS DOING TO EARN THEIR SALARIES?

This is a question that many people are asking, and echo answers back the last word—"salaries." If anybody can give us a better answer than echo we will willingly publish it for nothing and present the author with Premier Parker's speeches bound in Waimea sheep. However, the ministers are quite prompt in drawing their salaries. The sun never goes down at the end of the month with this important ministerial function left neglected, in fact this part of the public work is the most successfully performed of any of the public works authorized by the last Legislature. The exertion required, however, in drawing out the draft is apparently so great that mental prostration immediately follows, and the poor victims do not again recover strength or courage sufficient to more than renew the struggle of drawing their salaries when pay day rolls around again.

* * * *

So far as is known, we find that our minister-in-chief is being used for a glib tongue, to tag around with the Queen, thus placing himself in the not very enviable position with a lot of attendants and flunkeys, making catch speeches to his countrymen in favor of Her Majesty and in palliation of the anti-Hawaiian and non-progressive attitude of her government. Now, we submit, that if there is any necessity for such work to be done in the interest of Her Majesty's royal progress, some cheaper official may be employed, who could more gracefully and succesefully compete in praising second-rate school teachers, and who could talk with greater effect than the premier, who is more widely known as a thinker than an orator.

If, then, a substitute can be obtained for the government leader for stumping the country in favor of waning royalty and against budding democracy and annexation tendencies, it would be wise and for the benefit of all to make the change, and allow the honorable gentleman at the head of the administration to attend to the more important duties required of him at the present time.

The necessity for the consideration of questions of vital importance to the welfare of the country demands strict attention to duty on the part of every member of the Cabinet. * * * The last Legislature, foreseeing the necessity for a reconsideration of our treaty relations, passed by an almost unanimous vote a resolution directing the Cabinet to endeavor to extend our commercial relations with the United States. The editor of this paper said then that there was no need for political treaties, but the country required an extension of our commercial treaty relations with the United States. * * *

Now the golden opportunity opens up to our embrionic Premier to show his statesmanship, and to initiate a foreign policy that will restore joy to the capitalist, contentment to the agriculturist and grazier, and hope to the mechanic, laborer and people throughout the country. What Hawaii needs is full reciprocity with the United States. We want all our products to be admitted duty free into the United States, as nearly everything is now received here from that country.

* * * *

Why is the Cabinet not attending to this matter? Our Ministry seem to be better adapted to play the role of courtiers at Her Majesty's Court than of men suited or capable of appreciating their duties as public servants.

If Hawaii is to receive the benefits of the reciprocal exchange of commodities which nations are endeavoring to make between one another, her rulers should arouse themselves from that lethargic condition which they have been in since they took office, and apply themselves to the task of opening up negotiations for full reciprocity or free trade with the United States.

Brain workers, and all who have to stand the severe mental strain consequent on intellectual employment, find **Clements' Tonic** invaluable. HOLLISTER & Co. are the Agents for the islands.

PARAFFINE PAINT CO.'S
IDEAL ROOFING!

EXTRACTS FROM LETTERS:

HARDMAN PECK CO.,
Piano Manufacturers,
Warerooms, 138 Fifth avenue.
Office and Factories, 48th and 49th sts. and 11th and 12th avenues.
NEW YORK.

GENTLEMEN—Your P. & B Roofing has been on the roof of our Piano Factory, 49th st. and North River, during one summer and winter, and we take pleasure in stating that it has given us better satisfaction than any roofing material we have ever had * * * With Your Roofing we have had NO TROUBLE WHATEVER * * * we have a solid protection against all sorts of weather, and no danger of leakages. There is no place on the roof (as your paint cements the joints solidly) where any moisture can enter or even fine drifting snow find a lodgment. As the New York Board of Fire Underwriters class it the same in Fire Risks as a TIN ROOF, we feel as well protected as regards risks of ignition. We gladly allow you to refer any one to this factory or to print this letter if you so desire.

WHITE, GILLESPIE & THAYER,
Stamford, Conn.

GENTLEMEN—Whatever value an unsolicited, spontaneous indorsement of your Roofing may have (and it ought to be the best kind of testimony), you are entitled to it. Last fall we covered a large warehouse with your material, laying it according to your directions and our own common sense, and we are much satisfied with how it turned out. * * * Our factories here have gravel roofs, and pitch roofs, and tin roofs, but NONE give the SATISFACTION or promise of YOURS, and we want more of it.

AFTER SIX YEARS.
EAST OAKLAND, CALA.,
Aug. 8th, 1890.

GENTLEMEN—We have been using your heavy Roofing on our out buildings for over SIX YEARS, and it has proved itself to be a very durable roofing, giving no trouble, THOROUGHLY WATERTIGHT and even better than you represent it to be; we can confidently recommend it as a first class roofing.
[Signed] THE CALA. COTTON MILLS CO.,
Per T. Y. Miller, Sec'y.

N. CLARK & SONS,
San Francisco.

GENTLEMEN—We take great pleasure in recommending your Paraffine Roofing not only for its superior water proof qualities, but as a roof that is light, requiring in large buildings no heavy truss system, as is the case with shingle or metal roofs, and as a roof that can be laid with the least possible pitch.

On our factory at Alameda Point which is 110 ft. wide, we gave it a pitch of one inch to the foot, which is all that is required.

There is on our roofs over 4,000 square yards of the roofing, and notwithstanding the heavy rains last winter and the snowstorm, not a drop of water has entered the building through the roof.
[Signed] N. CLARK & SONS,
M'frs. and Dealers in Vitrified Ironstone Sewer Pipes, Water & Chimney Pipes and Tops.

NEW YORK BOARD OF FIRE UNDERWRITERS,
Board of Surveys, Bowel Building,
New York.

The Paraffine Paint Co., 48 Maiden lane:
DEAR SIRS—At the last meeting of the Committee, the Roofing Material presented by your company was duly considered and the same will rank at the same rate as tin roofs. [Signed.] JAS. HARRISON,
Manager.

A. A. GRIFFING IRON CO.,
Jersey City, N. J.

GENTLEMEN—* * * As we manufacture only radiators which are quite heavy, our works, which cover six acres, are necessarily but one story high, and require a large amount of roofing. After trying nearly everything we could find, we have come to the conclusion that your P. & B. Roofing is the best, and our continued orders are perhaps the best recommendation we can offer you.
[Signed.] A. A. GRIFFING IRON CO.

P. & B. PAINT AS A FIRE-RESISTING COMPOUND.

CHINESE CAMP,
Tuolumne Co., Cala.,
June 24th, 1890.

Paraffine Paint Co.:
DEAR SIRS—The following experience that I have had with your P. & B. compound will speak for itself, as to the merits of your article, and I take much pleasure in giving you the facts.

On June 15 a fire broke out in a building adjoining mine. The building was totally consumed by the flames, and the flying sparks and cinders were falling in great numbers on my roof covered with your P. & B. The effect was to soften the material only, the paint came off in flakes but did not ignite or burn. Please send me a bund of your P. & B. Paint. Needless to add I am highly pleased with it.
[Signed.] HENRY MORRIS.

Wm G. Irwin & Co., L'd.,

Hawaiian Hardware Co., L'd.

MONDAY, August 3.

"Now good digestion waits on Appetite: and health on both."
—SHAKESPEARE.

We've been waiting for weeks for a big shipment of Fischer's wrought steel ranges and have had to lose sales because they were delayed in reaching us. We're all right now—a warehouse full of them and every size you ask for.

These ranges merit more than a passing notice, and we are going to tell you something about them you never knew before. Housewives don't like to get new stoves because there's a something about them that's unpleasant. A sort of dread that the dampers won't work, or the stove will not draw, crops out, and the good wife prefers to suffer "the ills that are rather than fly to those they know not of." The term "range" suggests bricks and mortar, and a weeks' fuss and dirt in placing in position. Not so with the Fischer—there's no bricking up to do. All there is to it is to place it where you want and connect the pipe. Your range is ready to receive the meats and in less than the time it usually takes to cook things, your food is on the table, more palatable than it has ever been before.

You wonder why the Fischer range should be better than any other stove! We'll tell you. In this country the matter of fuel is a very large item of expense. As you have turned over a new leaf and intend economizing where you never thought of before, you may begin on your coal and wood. It is a positive fact that the Fischer range uses only about one-half the quantity of fuel any other stove does. That's one point.

Every one who uses the ordinary stoves knows that once in so often the fire bricks burn out or break. The fire bricks in the Fischer range are made of steel, and you could'nt break them if you'd let the wheels of a loaded dray run over them. That's another good point.

The ovens, as with every other part, are constructed of wrought steel, and it is an acknowledged fact that this material will absorb the heat quicker, more evenly, more intensely and retain it much longer than one made of cast iron. The heat is more moist, consequently the food, when prepared, is not so dry and void of nutrition, besides being more palatable. Two or three good points in one.

The walls of the Fischer range are double with asbestos between the two sheets of steel, thus making them more durable, and prevents the radiation of too much heat into the kitchen, as does the cast stove or range. It also protects the lining from being torn out when cleaning the flues. The joints of the oven are riveted closely, thus, preventing ashes, dust, soot or coal gas coming in contact with the food and making it worthless. Now then! These are a few of the good points in the Fischer Wrought Steel Range. Do you want one?

They burn wood or coal, and each has the hot water pipes in position ready to attach to the boiler. The larger ranges have the broilers attached and the smaller ones have everything ready if you wish to add the broiler. If you simply want to broil a steak or a fish, just light a charcoal fire in the broiler and in a few minutes you have a delicious morsel for a meal.

We can't tell you all about them, the best thing to do is to come and look at them.

REFRIGERATORS
—AND—
ICE CHESTS

After an importing experience of years, and considerable ill luck in buying the "latest and best," notably a fibre-lined Refrigerator, which we had to take back on account of their failure to fill any of the requirements of a Refrigerator, we have at last found something, made on scientific principles, which will keep ice longer and your food in better condition than anything yet introduced in this market.

The Gurney,

of which this diagram shows the construction and circulation, is the best in every respect, as many persons who have substituted them for others can testify.

The EDDY Refrigerators and Ice Chests, of which we carry a line, have always given satisfaction. They are plain, well made and durable.

The WHITE MOUNTAIN ICE CREAM FREEZERS, of which we have sold hundreds, are generally known and appreciated. We have an assortment on hand from a large invoice just received from the factory. These are the latest patterns.

☞ We keep reliable goods and sell at reasonable prices.

The Weekly Gazette and Daily P. C. Advertiser

LOCAL AND GENERAL.

A lady's gold pin found.

Meeting of the Arion this evening as usual.

Kamehamehas and Hawaiis play ball on Saturday.

An article on Co-education will be found on the first page.

Another English eruption broke out in the Ka Leo. In two late issues it devotes a column or two to the Ministry.

Mr. H. A. Parmalee and family, who were rusticating at the Volcano for some time, returned home Wednesday morning.

The fire at Mrs. Haalelea's premises was the work of a Portuguese girl, who confessed she lighted the fire at another's instigation.

Thirty trotting horses, ten Durham cattle and a hundred hogs, are included in the cargo of the barkentine S. G. Wilder from San Francisco, shortly due here.

The Hawaiian Camera Club holds a meeting to-morrow (Friday) evening, for the purpose of making arrangements for a public exhibition. A full attendance of the members is requested.

The Ewa Plantation Company has received per Zealandia the third set of pumps for the wells on the plantation. The pumps are monsters, one piece of the machinery alone weighing eleven tons.

The lava lake is daily becoming more interesting as the molten lava gradually fills up the chasm. The fires continue very bright. The work on the hotel is also progressing finely, and in a month or so it will be ready for all who may arrive.

The Board of Health, on Wednesday, appointed Dr. Chas. B. Cooper Government Physician for the district of Kau, Dr. Foote resigned. There were five applications for the position. No appointment has been made for the districts of North and South Kona, as no one has made an application for it.

The Kinau brought 181 passengers from windward ports; of these 20 were from the Volcano; 44 were cabin and 137 deck passengers. On freight she had 977 packages. The visitors to the Volcano are steadily increasing, and when the new hotel is completed there will be a constant stream to and fro.

Two half-caste women, driving at a furious rate along Beretania street on Wednesday, were thrown out of their brake in front of Mr. C. M. Cooke's residence. One of them received a severe wound on the left shoulder, necessitating the services of Dr. H. McGrew. The other escaped uninjured.

In the report of the proceedings of the California Dental Association it is stated that papers were read by Dr. E. A. Lundy, of Honolulu, on "Pyorrhœa Alveolaris," and by Dr. W. J. Younger, on "The Treatment of Pyorrhœa Alveolaris." Among the silly things which the association did was to taboo advertising by dentists. That rule strictly adhered to will make dentists a class of paupers.

Killed on the Railroad.

About 2 o'clock Wednesday afternoon one of the chains that hold in position the dump carts used by the Oahu Railway was broken while the train was running near the Kamehameha Schools. A Japanese laborer was riding on the top of the car although the laborers have been prohibited riding that way. As the chain broke, the car turned and the Jap while trying to keep on top was thrown under the wheels which passed over his body, killing him almost immediately. Superintendent Ashley sent for Marshal Wilson at once, who viewed the body at the depot where it had been taken, and examined a number of witnesses who showed that it was the laborer's carelessness that resulted in his death.

Police Court.

Sing Loy vs. G. W. Knalaku, assumpsit for $33.75, balance for goods sold defendant's wife. Judgment for plaintiff for that amount, attorney's commission and costs, making a total of $42.85. S. K. Kane, for plaintiff; J. L. Kaulukou, for defendant.

Benson, Smith & Co. vs. T. P. Severin, assumpsit. Defendant defaulted. On evidence of G. W. Burgess, clerk, judgment was given in favor of plaintiffs for $235. A. P. Peterson for plaintiffs.

J. H. Irwin vs. M. C. Peel, assumpsit for $18, money loaned. Judgment in favor of plaintiff for amount sued for and costs.

Supreme Court—At Chambers.

BEFORE DOLE, J.

WEDNESDAY, Aug. 5.

In re bankruptcy of M. R. De Sa. Proof of claims. Eight creditors proved their claims, amounting to $2567.38, and F. W. McChesney appointed assignee under $1000 bond.

Justice Dole filed his decision in the case of J. E. Brown vs. the Pactolus. The decision allows Captain Beadle's claims for demurrage, and grants costs to the ship. Upon the settlement of the ship's claims, the goods must be delivered to the plaintiff. F. M. Hatch, for libellant; Thurston & Frear, for the ship.

To those who need a pleasant **Tonic** for any kind of debility, we can recommend **Clements'** as the best. For sale by HOLLISTER & Co.

HILO NOTES.

The Volcano Road stilll bids fair to be a long time coming. We hear, incidentally, that Minister Spencer is intending to put the prisoners on to the work before long. But the question is "how long before?" Even this will be better than not to have any work at all done on it. We understand that a force of fifty or sixty men can be put on at once, and if this were done, there would be some prospect of its going ahead slowly. Let us have even that much done on it, and the sooner the better.

The materials for the new Volcano Hotel are all on the ground, and the work is being pushed forward rapidly, thanks to Mr. Thurston, who has charge of it. The amount of travel to that place has increased wonderfully since the new company started in. There are several shares of stock not yet taken up, and the company need every dollar they can get to finish up their work. Subscription lists can be found at the office of D. H. Hitchcock, and also at Mr. Wilson's, for signature. All wanting to help on this work are invited to put their names down, even if it is only for one share, the price of which is $25.

The tug Rover arrived safely from San Diego, after a passage of 22 days. She will be a great help in towing sailing vessels in and out our harbor.

The Road Board has been doing good work in Hilo, and soon all our main streets will be graded and mettaled. A fine culvert has been put over the small stream on Wainuenue street, near the Catholic School premises, which greatly needed it.

There are 46,000 oil-wells in the United States, representing a capital of $120,000,000, with an output of 130,000 barrels per day, while 15,000 barrels are consumed as fuel. A surplus stock is held in tanks of more than 35,000,000 barrels.

London city covers 77,410 acres, and has 4,211,056 inhabitants, an increase of 400,000 in the last ten years. This is the census of April 5, 1891. The police district of London comprises 448,334 acres, or about 700 square miles, and has 5,633,332 inhabitants.

Dr. Jaeger's Sanitary Woolen System.

IT IS NOT A "FAD!" BUT a system of adapting the covering to the body, instead of, as hereto, the body to the covering.

It is not "Coddling!" because the continuous draining of Water from the Tissues Hardens them, and Strengthens the Whole Body.

It is not Irritating to the Skin! In a short time any feeling of the kind vanishes and the skin is maintained in a healthy glow.

It is not oppressively warm in Summer, but Cool! Oppressive heat is felt when the skin cannot exhale freely through linen or lined outer clothing. The most signal instance of this is the discomfort caused by a Mackintosh. Clothing of Porous Animal Wool throughout allow the skin to freely throw off the Superfluous Heat of the body, hence the use of flannels for Cricketing, Rowing, etc.

Look for Diamond Trade Mark enclosing Portrait of Dr. Gustav Jaeger.

M. McINERNY, FORT STREET. 2829-1w

NO ENGINEER REQUIRED TO run the Regan Vapor Egnine.

"German Syrup"

A Throat and Lung Specialty.

Those who have not used Boschee's German Syrup for some severe and chronic trouble of the Throat and Lungs can hardly appreciate what a truly wonderful medicine it is. The delicious sensations of healing, easing, clearing, strength-gathering and recovering are unknown joys. For German Syrup we do not ask easy cases. Sugar and water may smooth a throat or stop a tickling—for a while. This is as far as the ordinary cough medicine goes. Boschee's German Syrup is a discovery, a great Throat and Lung Specialty. Where for years there have been sensitiveness, pain, coughing, spitting, hemorrhage, voice failure, weakness, slipping down hill, where doctors and medicine and advice have been swallowed and followed to the gulf of despair, where there is the sickening conviction that all is over and the end is inevitable, there we place German Syrup. It cures. You are a live man yet if you take it.

THIS PAPER IS KEPT ON FILE at E. C. DAKE'S ADVERTISING AGENCY, 64 & 65 Merchant's Exchange, San Francisco, Cal., where contracts for advertising can be made for it.

NINE RULES FOR BATHERS.

Avoid bathing within two hours after a meal.

Avoid bathing when exhausted by fatigue or from any other cause.

Avoid bathing when the body is cooling after perspiration.

Avoid bathing altogether in the open air if, after having been a short time in the water, it causes a sense of chilliness and numbness of the hands and feet.

Bathe when the body is warm, provided no time is lost in getting into the water.

Avoid chilling the body by sitting or standing undressed on the banks or in boats after having been in the water.

Avoid remaining too long in the water; leave the water immediately if there is the slightest feeling of chillness.

The vigorous and strong may bathe early in the morning on an empty stomach. The young and those who are weak had better bathe two or three hours after breakfast.

Those who are subject to attacks of giddiness or faintness, and those who suffer from palpitation and other sense of discomfort at the heart, should not bathe.—Ladies' Home Journal.

Germany publishes more periodicals than all the rest of Europe.

From observations made in Switzerland it appears that mortality from organic disease of the heart decreases as the altitude of the population rises.

A Maine farmer recenly sent a 10-cent. stamp to a man who advertised to send for that amount the way to run a farm without being troubled with potato bugs. The answer received was as follows: "Plant fruit trees instead of potatoes."

The President of the United States has awarded to Captain R. E. Saeter, of the British ship Marlboro, a massive gold medal for rescuing the crew of the American schooner Nellie Potter on March 2, 1891. The other is a gold watch and chain for Martin Mahoney, of Kingston, Ont., who on June 9 last year rescued one woman and ten men of the crew of the shipwrecked propeller Charles Ryan. The presents have been sent to the Canadian Minister of Marine for distribution.—Ex.

Why She Goes.

"I go to the seashore," said the Summer Girl, for "father thinks it necessary. I play tennis and bathe all the morning; walk, talk and eat ice cream all the afternoon; dance from 8 in the evening until 2, and in that way get myself in such a condition that I am sick all winter. That makes it necessary for him to send me again the next summer. See? And yet they tell us a young girl doesn't know anything."—Puck.
