Libue, Kauai, Sept. 26, 1895.

President Smith believed that the
action of Drs. Walters and Weddick
and Sheriff Wilcox, all employees of
the Government, should be condemn-
ed and the officials named discharged.
The physicians must continue to act
as health agents.

There was some discussion regard-
ing the Australia landing her freight
at the Pacific Mail dock. It was
found this course would result in
heavy expense to the local agents. In
order that the cargo of the ship might
be handled without fear of the least
possible contagion, fifty native lab-
orers went into quarantine yesterday.
The Australia will be due on Monday
next, but on account of having to
make necessary repairs at the Califor-
nia end, she may not arrive till
two or three days later. All sailing
vessels coming from the Coast will
discharge at the Pacific Mail wharf.

The usual requests for shipping dif-
ferent articles to the other islands
came up for consideration. Several of
the members were opposed to making
any new additions to the list. After
considerable discussion this was de-
cided on. Machine oil, which has

been stricken off the list, was ordered
replaced. With this exception there
is no change in the list of goods that
is allowed to be shipped.

The Board was informed that the
new fumigating plant would be ready
for service during the latter part of
October.

C. Von Hamm, having spent ten
days in quarantine, was granted a per-
mit to go to Kauai.

A communication from the San
Francisco office of the Pacific Mail
Company informed the Board that the
freight for Honolulu which had been
carried by, had been thoroughly fum-
igated. They wanted to know wheth-
er there would be any objection to its
being landed. Action deferred.

Another outbreak of cholera having
occurred, it was not deemed advisable
to open the schools on the 30th of the
present month. They will remain
closed until further notice.

A letter was read from George Fair-
child stating that a number of Kauai
people desired to leave for home as
soon as possible. It was decided to
use the quarantine station for the
purpose. Those intending to go into
quarantine there for a period of five
days must be at the place by 9 o'clock
Saturday morning. All expenses to be
borne by the individuals.

The committee appointed to report
on the matter of soil and water pre-
sented the following:

ONCE AGAIN CHOLERA HAS MADE ITS
presence felt in Honolulu. It was be-
lieved by the physicians and many of
the citizens that more cases of the dis-
ease were likely to make their appear-
ance, but as eight days had gone by
without any indication of the dread
monster, it was hoped the town had
seen and heard the last of the disease.

There was general regret yesterday
morning when it became known that
a new case of cholera had been dis-
covered. The patient was an aged
Hawaiian woman named Paina and
resided in a small frame hut on Hotel
street, just where the road runs into
Nuuanu stream, and in the locality
known as Kikihale.

Detective David Kaapa reported the
case to Dr. Day at 6:40 o'clock yester-
day morning. The woman was taken
sick early the night before. When
the authorities reached the house the
woman was found lying in the corner
of a room on the ground floor and but
a few inches above the water of Nu-
uanu stream. Evidences of vomiting
were found on the floor. The patient
was removed to the cholera hospital
at once, and fourteen other residents
of the house placed in quarantine at
the same place.

It is believed the woman ate crabs
caught from the stream. Just under
the floor of the room in which she was
found were numerous crabs floating
in the water. Dr. Day is of the opin-
ion that the woman became ill from
drinking or using the water of the
stream. The case is said to be a very
pronounced one and the patient was
very ill when removed to the hospital.

As the hospital was in order for the
reception of patients, it took but a few
minutes for Armstrong Smith and
Louisa, both having acted in the cap-
acity of nurses, to arrive and assume
their former positions. The total
number of cases has now reached
eighty-six, with sixty deaths.

Physicians say the new case of chol-
era is another and separate outbreak
and must be treated as such. The
woman had but little communication
with persons outside of the fourteen
residing in the same house with her,
and it is believed the infection
will not spread.

MEETING OF HEALTH BOARD.

A special meeting of the Board of
Health was held yesterday morning
at 11:30, the new case of cholera
being responsible for the session. All
the members of the Board and several
physicians were present.

In opening the meeting, President
Smith spoke of the new case of chol-
era. He was of the opinion that the
woman had been using water of the
Nuuanu stream, which caused her
illness.

The following letter was read from
the Kauai Health Committee:

"The undersigned, representing the
Health Committee of this island, ap-
pointed by the Central Board, and
feeling that the recent events have put
us in an uncertain position, beg to say
that we have no desire now to oppose
the views of the Honolulu Board of
Health, and will leave the matters of
quarantine, passengers and disinfect-
ment to their authority with the au-
thority of the Honolulu Board, and would
suggest further that we be relieved of our
responsibility.

The committee appointed to report
on the matter of soil and water pre-
sented the following:

ONCE AGAIN CHOLERA HAS MADE ITS
presence felt in Honolulu. It was be-
lieved by the physicians and many of
the citizens that more cases of the dis-

low its continuation by the now-infected Pauoa creek.

This house stands about 330 yards down stream from the one last described. Other cases appeared near the mouth of the Nuuanu stream.

To the left of the point at which the Nuuanu stream enters the harbor is a coral ledge which is uncovered at low tide. The filth bearing waters of the stream spread over this ledge and stand in pools when the tide is low. Houses have been built upon piles over this coral ledge and in these houses and the neighboring ones upon King street cholera promptly gained a foothold. As all discharges from the persons sick in these houses were emptied into the waters over which the houses stand, fresh contamination was added to the already infected waters.

Across from the Oahu Railway depot is a block of stores fronting on King street. The rear portions of these buildings—used as dwellings—overhang an old fish pond, and in one of these overhanging rooms cholera appeared. The discharges were thrown into the fish pond. This pond receives water from other ponds farther mauka and discharges its surplus water through a drain which runs under King street and the Oahu Railway lands into the harbor.

This pond is full of filth and the wash water from the neighboring houses empties directly into it. Cases appeared in one other house in this locality.

The other localities where cholera has appeared are all remote from any streams or stagnant water.

Soil. The infectious material has undoubtedly found its way into the soil in many localities. This is not a serious matter where the land is dry and there is no surface drainage into any well, spring, stream or pool of water.

In a number of places clothing and bed linen soiled with infectious discharges have been washed in wash houses on the premises. These wash houses are generally rough board affairs about six or eight feet square; roofless, but having loose board floors. The water in these cases has gone through the floor and onto the ground beneath.

In numerous instances the infectious discharges have been thrown down privy vaults. Since the discovery of the cholera spirillum by Prof. Koch, numerous experiments have been made by physicians to determine the length of time it may live in soil, water and other media, and some important facts have been established. There is however a wide difference between the results of experiments conducted in the laboratory and those attained in nature.

The greatest enemies of the spirillum of Asiatic cholera are other micro-organisms found in nature. At all times many varieties of bacteria find their natural habitat in air, soil and water, both fresh and salt.

The cholera spirillum will for a time live and multiply in the soil and in water, but eventually it will be overcome and destroyed by the other bacteria whose territory has been temporarily invaded.

The following is taken from Sternberg's Bacteriology: "Koch found the cholera spirillum in water in a tank at Calcutta during a period of fourteen days, and in his experiments showed that it preserved its vitality in well water for thirty days, in Berlin sewer water for six to seven days and in the same mixed with faeces for twenty-seven hours only. In the experiments of Nicati and Rietsch the cholera spirillum preserved its vitality in distilled water for twenty days, in sewer water (of Marcellis) thirty-eight days and in water of the harbor for eighty-one days. The numerous experiments recorded by the observer named and by Bolton Hueppe, Hochstetter, Maschek, Krans and others, show that while the cholera spirillum may sometimes quickly die out in distilled water, in other experiments it preserves its vitality for several weeks (Maschek) and that it lives still longer in water of bad quality, such as is found in sewers, narrows, etc."

It has been found that harbor water contains many varieties of bacteria, and that the numbers present near the surface and at different depths do not vary in any great degree. In marked contrast to this it is found that the mud at the bottom of harbors contains many thousands of times as many bacteria per c. c. as are contained in the harbor water.

Water at a temperature of 70° F (or that of the water in and around Honolulu) is much more favorable to the life of the cholera spirillum than water at a lower temperature.

Again quoting from Sternberg, "Glaxa has made extended and interesting experiments with the cholera spirillum, cultures of which he added to different kinds of soil (garden earth, clay, sand) and placed at different depths below the surface—one quarter, one-half and one metre. Some of the earth was sterilized and some was not. In unsterilized earth he found the cholera spirillum in considerable numbers at the end of twenty-four hours at the greatest depth tested (one metre) but at the end of forty-eight hours it had disappeared in five experiments out of seven. The lowest temperature at this depth was 20° C (68° F).

In sterilized soil the result was different; the cholera spirillum was present in enormous numbers at the end of four days at a depth of a metre and was still found in smaller numbers at the end of twelve days, but had disappeared at the end of twenty-one days.

This indicates that the presence of the common saprophytes in the soil is prejudicial to the development of the cholera spirillum and that under ordinary circumstances it succumbs in the struggle for existence with these more hardy micro-organisms."

The temperature of the atmosphere and of the water in this country, together with the moist condition of the soil and the prevalence of surface pools of water render it extremely probable that the cholera spirillum may live here for a great many days.

The Nuuanu stream and the harbor seem to possess all of the conditions necessary for the preservation of the vitality of the germ for a long time. That portion of the harbor in the neighborhood of the mouth of the stream is a particularly dangerous locality. The water of the stream carries in solution the elements most favorable to the preservation of the spirillum. The current is sluggish. The bottom of the harbor and the

coral ledge bordering it are covered with mud rich in organic material. The crabs, shrimps and small fish which are present in myriads may have some office in preserving and carrying the germs of the disease.

Bacteriological experiments are now being made with specimens of water taken from various sources known to be infected.

The following are the recommendations of your committee:

GENERAL RECOMMENDATIONS.

1. That the local wash houses in infected localities be torn down and the ground beneath them disinfected and then allowed to dry thoroughly; that all persons be prohibited from washing any clothing or throwing any soiled water, discharge or other organic matter into any stream or pool of water; that all persons who wash their clothing at home be requested to do so in a dry, sunny spot, where there is no drainage into any pool or stream of water.
2. That as far as practicable all unnecessary pools or ponds of stagnant and semi-stagnant water be filled in, beginning with the infected localities.
3. That the building of houses, wash-houses or closets over streams, ponds or portions of the harbor be prohibited, and that all such houses now standing be removed.
4. That all sewer pipes emptying into the harbor be abolished.

SPECIAL RECOMMENDATIONS.

5. In the Waipiole district we recommend the immediate condemnation of the infected rice fields; the enforcement of the bank dividing the ditch from the uninfected rice fields; measures to disinfect as thoroughly as possible the infected rice fields and the ditch; the filling up of all surface wells in the district; the prevention as far as is practicable of all use of this water or the fish therein by any person for any purpose for a period of time to be determined by the Board of Health.
6. In the Kunawai district disinfection seems to have been thorough, and there is considerable doubt as to the infectious material having reached the taro patches. In case it has done so the committee are of the opinion that it has passed beyond control. We recommend keeping up a rigid inspection over this district and all others through which the water from this district drains. If other cases of cholera occur lower down the question of drying up the taro will have to be considered.
7. In the Puunui district we make the same recommendations as in the Kunawai district.
8. *The Nuuanu stream.* Your committee regards this locality, together with the harbor, to be by far the most serious problem with which the Board of Health has to deal. The lower portion of Pauoa creek and the Nuuanu stream, from the point where the Pauoa creek joins it down to the sea, are unquestionably infected, and all persons should be absolutely prohibited from using any water from these infected sources or taking any fish from them until such a time as nature has purified them. It is also important that no discharges, wash water, poi water, sewage or other organic material should be thrown or discharged into the stream for a like period of time. Periodical flushing of the stream should be continued for several months—say, throughout the rainy season.
9. We urge upon the Board of Health the importance of walling the stream in upon both sides at the earliest possible date as a necessary health measure.

THE HARBOR.

9. In view of the fact that there is direct evidence that a number of the persons who were taken sick with cholera during the late outbreak had been eating raw fish or crabs from the harbor, and further, that there is good authority for the statement that harbor water is particularly dangerous, the cholera spirillum having been found in at least one instance after eighty-one days in harbor water. Your committee recommends that all persons be prohibited from bathing in the waters of the harbor or from taking crabs, shrimps or fish of any kind from the harbor or the coral reef bordering it for a period of three months from the present time. Further, that immediate steps be taken to improve that portion of the harbor in the neighborhood of the outlet of the Nuuanu stream in such manner that the present unsanitary condition shall be removed.
10. We recommend the filling in of the old fish pond across from the railway depot.

JUVENILE THIEVES.

Gang of Portuguese Boys Who Pilfer for Fun.

An investigation in the cases of the six Portuguese boys arrested Thursday proved them to be a band of juvenile thieves, not in the ordinary sense, but "just for fun," as one of the boys expressed it.

Ignacio Fraga, a youngster of eight years, was the recognized leader of the gang, which was made up of boys from his age up to thirteen years. The job of opening windows was allotted to him.

The gang entered the Miller street mission school three times—once Friday week, again last Monday and for the last time Thursday. It was soon after this that the arrests were made. A dozen pairs of scissors and various other articles were taken during the three raids. It seems the boys had no intention of selling the goods, but were simply fascinated by the novelty of getting in through a locked window and appropriating articles owned by other persons. The cases of the boys will come up in the Police court today.

The Gazette issued every Tuesday and Friday.

MAY BURN CORN FOR FUEL.

It Will Soon Be Cheaper Than Coal.

This Year's Crop the Largest Known in the History of the Trade.

CHICAGO, Sept. 17.—With a 2,500,000 bushel crop the West will have corn to burn. According to a Kansas City dispatch, a packing house company has already issued orders to its Wichita house to begin the use of corn for fuel as soon as it can be bought for 12 cents a bushel. On the basis of the May price, with due allowance for freight and for the discount from the contract price for off grades, corn on the Western farms is not much over 10 cents a bushel.

The '95 crop of corn is practically made, and without doubt it will be a record breaker. It is figured that the total yield of corn this year will be 2,325,000,000 bushels. It will not be far from double the quantity of corn produced last year, and far in excess of the quantity of corn produced in any of the star crops in the history of the trade.

The prices have become demoralized simply on anticipation. December corn touched 27 cents last week. On the basis of present prices corn will be cheaper than coal for fuel during this fall and winter in the States west of the Mississippi river. It is said that experiments have shown that a ton of dry corn will go further in producing steam than a ton of coal.

Anthracite coal laid down in Kansas City even at reduced freight rates costs \$6 a ton in car lots. At points in the interior of Kansas, Nebraska and Western Iowa it costs all the way from \$7 to \$9 a ton. At these same points corn is worth only from \$2.50 to \$4 a ton on the cob. Iowa soft coal can be delivered in Central Nebraska at about \$3.50 a ton, and Illinois coal at \$4. In Iowa native bituminous coal costs over \$2 a ton.

A prominent operator on the Board of Trade today offered to forfeit \$10,000 if he could not furnish the "Alley L" with corn for fuel at a less cost than that of coal.

ANOTHER KAMAAINA GONE.

M. Davis, a Well Known Business Man, Passes Away.

M. Davis, an old kamaaina, died yesterday morning after quite a long illness. He was a native of England, and born November 3, 1823. When but a boy he found his way to the United States and came to the islands on a whaler fifty years ago. After remaining for some little time, he returned to New York.

Eighteen years ago he took up his permanent residence in Honolulu and went into business, amassing considerable wealth in the mercantile line.

Mr. Davis was a popular and good citizen, and enjoyed a large circle of friends and acquaintances. Funeral services will be held in hall of Lodge le Progres Oceanic at 3 p. m. today.

Deceased leaves a wife and three sons, the widow and one son, Richard H. Davis residing in Honolulu.

Band Concert.

The Hawaiian band, under the direction of Acting Bandmaster H. Heitmann, will give a public concert at Emma Square this afternoon, commencing at 4 o'clock. The following program will be rendered:

1. March—"The Salute".....Roeder

Punahou College Tract!

BIG VALUE FOR YOUR MONEY.

Building lots in that beautiful tract of land directly opposite Punahou College, facing Punahou and Makiki Streets, and Wilder Avenue are now offered for sale.

The location is one of the choicest in Honolulu for Home-seekers. We claim every advantage for these lots—High and Dry, away from the noise of the city. On the street car line (5 cent fare). City Water, Electric Lights. The pleasantest drive on macadamized streets the entire distance from the city. The night blooming Cereus is in constant view. Luxuriant shade tree line the street. This is one of the most select and retired districts of Honolulu.

The elevation is sufficient to give you a magnificent panoramic view of the city and surroundings, and the location is far enough from the business center to reduce to a minimum the danger of contracting the contagious diseases peculiar to the low lands of the city. A cool and invigorating breeze is constantly wafted down from the valleys.

LOTS 75 FEET FRONTAGE--125 FEET DEEP.

TO RENT-PAYERS:

By purchasing a lot from us in our PUNAHOU COLLEGE TRACT we will build you a house thereon according to your own plans and specifications, payable in monthly installments to suit you.

For further information and particulars apply to.

BRUCE WARING & CO.,

DESCRIPTION AND TERMS:

CREOLE is the gamest, fastest and best bred stallion that has ever been imported into the Hawaiian Islands. He reduced his record of 2:20 to 2:18 in Petaluma, Cal., August 24, 1894, distancing his whole field in the first heat; then again to 2:15 in Stockton, Cal., September 23, 1894, winning the first heat in 2:15, fourth heat in 2:15, and fifth heat in 2:19, proving that he is a remarkably game as well as a speedy race horse. ("Creole by Prompter out of Grace by Buccaneer shows that he is capable of getting a mark of 2:10 and is one of the gamest stallions ever this year, and besides being game, is one of the best formed, and remarkably intelligent."—Breeder and Sportsman, Sept. 25, 1894.) He is 15 1/2 hands high and of powerful build throughout. His color is glossy black with one white hind foot. His disposition is all that could be desired, and his action superb. He is a sure foal getter.

Terms, \$50, with usual return privilege. Will make the season at the

A DREAM OF THE FUTURE.

BLAZE AT KIKIHALE.

Officer David Kaapa's Residence Has a Close Call.

An alarm of fire was turned in a little after 2:30 p. m. yesterday, and the engines were sent hurrying in the direction of Kikihaile, where it was found that the house of David Kaapa had just narrowly escaped being burned.

A shanty in the vicinity of the house in which the last cholera patient lived had been torn down, and a bonfire made on the edge of the stream blowing hard by. A strong breeze was blowing, and some of the sparks were carried under Kaapa's house a few yards away. A pile of mats in the corner caught fire. A couple of well-directed buckets of water put out the flames. Before word could be got to the inmates of the house that the danger was over all the furnishings of the house had been thrown out of doors.

The engines found no work, but the policemen could not boast of such good luck, for they had all they wanted to do keeping back the crowd, which persisted in nosing about where they were not wanted.

TIME TODAY IS GOOD.

Demand for the Paper Causes Issue to be Doubled.

The first page of today's Time is given up to Artist Harry Mist this week in illustrating his retrospective views of the events which have transpired during the month just closing.

A good "write up," with a fine half-tone picture of the new high school, is given, together with a short article on Tennis, with portraits of Singlehurst and Beardmore. "Jack de Ripper" sings a lay to the Kaula exiles, and Hilary Neal Weston treats of the men whose whiskers were scorched off by cholera. Barney Gilligan tells more of his experience with his "new loidy" and about what he saw house-cleaning day.

The demand for the new weekly is such that the editor has been obliged to double the issue.

WAGNER AS A CYCLIST.

Ex-Detective Thrown Into a Ditch By a Street Car.

Ex-Detective Wagner had an experience last night which he will probably remember for some time. Riding down Alapai street on a bicycle he spied a King street car, and wishing to save his legs from too vigorous exercise, he thought struck him to catch hold of the car as he had seen other riders do, which he did in a most ungainly manner. Wagner has just learned to ride a wheel and did not seem to possess full control of the machine. As he caught hold of the rear platform of the car the bicycle swerved, whirling the ex-detective and his pipe into a ditch near by. Nothing daunted, he rose from his muddy bed and attempted to mount his wheel, which he succeeded in doing after falling off three or four times.

War Cry in Native.

The last number of the War Cry is replete with good reading matter and furnishes all the latest Salvation Army news, together with several fine illustrations of island scenery. An article in the style of a sermon, written in Hawaiian by Sergeant-Major Kabelemauna, is a feature. The number of natives joining the ranks of the Army is increasing, and the necessity for native literature has been recognized.

HONOLULU NEWSPAPERS.

Libel Suit in Connection With Burial of a Native.

That Honolulu has a large complement of newspapers for a city of its size is attested by a correspondent, who says in a recent letter: "We have four English dailies, and two in Hawaiian; besides these, there are two Hawaiian weeklies, two Japanese and two in Chinese." He relates a peculiar incident connected with the burial of a native, which resulted in a libel suit against one of the papers which printed an account of the funeral. Two doctors had attended the deceased, and while one had pronounced him dead, the other decided he was in a cataleptic state, and would recover. The relatives were divided into two factions, one of which insisted on his burial, while the other objected. At the end of ten days certain symptoms indicated that the spirit must have fled, but the anti-burial faction still refused to yield. A compromise was finally effected, the native being interred in a sitting posture, with his head above ground.—American Exchange.

On the Test.

Millie—"If you were in love with two men, and didn't know which one to choose, what would you do?"
 Tillie—"Put them to the test."
 Millie—"A duel?"
 Tillie—"Nothing so absurd. Walk them by an ice cream parlor and see which one turns the palest."—Toledo Blade.

Geo. W. Lincoln

Is building a fine building called the Von Holt Block.

Watch Progress of the new home of this paper.

The Pacific Commercial Advertiser

Issued Every Morning, Except Sunday, by the HAWAIIAN GAZETTE COMPANY at No. 318 Merchant Street.

WALLACE R. FARRINGTON, EDITOR.

SATURDAY, SEPTEMBER 28, 1895.

ONE enthusiastic New England editor has sent little Marion Cleveland a poodle. This is a new and interesting departure. The majority of the American editors have been busy giving the child's father pointers.

KATE FIELD in a series of letters "On the Wing" to the Chicago Times-Herald gives Chicagoans numerous points on bacteria and drainage. This versatile writer will find plenty of food for thought along this line when she arrives in Honolulu.

THE new British Parliament has 240 members pledged to female enfranchisement, for all of which the champions of woman suffrage are duly jubilant. The majority of these members are on the Union and Conservative side of the house and number Mr. Balfour among the leaders. What legislation will be obtained, is hard to forecast, but it is quite certain the female suffragists will be heard from.

CONSUL GORMAN D. GILMAN in a communication to the Boston Transcript on "Filibustering in Hawaii," says there is as much probability of the success of any filibustering expedition attacking Honolulu as of any similar attempt to attack London from the United States via Ireland. Mr. Gilman has the right view of it, but so long as newspapers will accept these yarns it will be hard work to make the industrious space writers believe it.

MORE CLEANSING NEEDED.

The report of the committee appointed to investigate the sanitary conditions in the infected districts recommends vigorous treatment, and from the nature of the case in hand the Government cannot be too rapid in following out the suggestions made. The house cleaning has been a very good thing in its way, but the recurrence of the plague gives evidence that with all the sanitary measures carried into effect thus far, the fountain head of the disease has not been reached. We must get to the bottom of the matter even to wiping out Chinatown if necessary. If the laws of the country do not give the authorities sufficient power to condemn property on account of its unsanitary condition, let new laws be made. Personal interests, commercial interests, and national interest demand that there shall be no delays in this forced sanitary march into which the community has been thrust. The discoveries made during the past two weeks have awakened a determination among the intelligent people to clean the city at all hazards and once having reached that happy state, to keep it clean.

Existing circumstances have made it necessary to begin at the top and work toward the bottom. White wash brushes and garbage carts have served their purpose and now comes the time when carpenters and the fire department need to be brought into play. The work that has been so well begun will not be complete till every one of the wooden hovels that are built out over the Nuuanu stream is wiped out of existence, and, if it is required to keep the ignorant people in that vicinity coming in contact with the water and its contents, the stream in that section guarded night and day. The report of the committee given in another column shows conclusively that there are no two ways of dealing with these infected districts. If the destruction of houses will turn people out of their homes, the Government

can well afford to erect buildings where the residents will at least have the benefit of sunlight and fresh air. It would be hard to put up a house where the occupants will have more unsanitary surroundings. The committee has couched its conclusions in very conservative language. There is but one course for the Government to follow and that is a radical one.

THE request of members of the Kauai board of health to be relieved from responsibility reads very much as if they were in the position of the young man, who on being given suggestions by his employers on how he should conduct their business replied, "That's my way, and if you don't like it you can get some one else." The employers immediately got some one else. We do not consider, however, that the Government in this case is called upon to follow the employer's example. These men lost their heads like the majority of the people on the other islands. The mistake under such extenuating circumstances ought to be and undoubtedly will make them more careful in the future and more liable to think twice before shooting off on a tangent than new recruits.

A LIVELY discussion on evolution is promised at the Catholic Summer School at Plattsburg between Father Zahm, of the Congregation of the Holy Cross, Professor of Physical Sciences in the Notre Dame University, and Father Doonan, a Jesuit, stationed over a Boston church. Father Doonan objects to evolution being taught at a Roman Catholic Summer School, and proposes to refute the heresy. Father Zahm, who will uphold the cause of evolution, visited these islands several years ago and published an interesting book concerning them.

Marshal's Sale.

Timely Topics

September 26, 1895.

A great many of the modern inventions are conceived, to a large extent, by accident, as will be seen by the following from the pen of Thomas A. Edison. In speaking of the invention of the phonograph he says:

"I was engaged upon a machine intended to repeat Morse characters which were recorded upon paper by indentations that transferred their message to another circuit automatically when passed under a tracing point connected with a circuit closing apparatus.

"In manipulating this machine I found that when the cylinder carrying the indented paper was turned with great swiftness, it gave out a humming noise from the indentations—a musical rhythmic sound resembling that of human talk heard indistinctly.

"This led me to try fitting a diaphragm to the machine which would receive the vibrations or sound waves made by my voice when I talked into it, and register these vibrations upon an impressible material placed upon the cylinder. The material selected for immediate use was paraffined paper, and the results obtained were excellent. The indentations on the cylinder when rapidly revolved caused a repetition of the original vibration to reach the ear through a recorder just as if the machine itself were talking. I saw at once that the problem of registering the human voice, so that it could be repeated by mechanical means as often as might be desired, was solved."

About this time the summer pleasures end, the damp rainy weather commences, and the housewife's duties begin; right methods make these duties a pleasure also. If you are in search of a stove that will lessen the trials of cooking examine the merits of the GOLDEN ANVIL RANGE. This range is made from the very best cold rolled sheet steel constructed on principles best known to us for strength and convenience. It is guaranteed to use one-third less wood or coal per day than any stove made. The baking qualities for either roasts or pastry are unsurpassed. The grate of the fire box is made three cornered shape thus presenting a new, clean surface each day. At the back and above the range is a full length shelf with nickled racks for the placing and keeping dishes warm. With each range we furnish a coil connection for hot water purposes. To those who desire a first class, A1 range, nothing better is to be found on the market than the GOLDEN ANVIL. We also have the PANSY stove in three sizes, suitable for coal or wood. The PANSY is a modern made stove in every respect, with complete free draft and is built to wear. To those who desire a stove and not a range the PANSY should be considered as we have found them an excellent seller and they have given perfect satisfaction.

Oil stoves seem to be a favorite with people who do not wish a lasting fire and to those we say do not make a purchase until you have seen the "DIETZ" TUBULAR in operation. This stove given a thorough unprejudiced test, will convince the most skeptical of its superior merits, which completely supercedes all previous efforts in producing a perfectly satisfactory stove for burning oil or gas successfully.

FIRST METHODIST EPISCOPAL CHURCH.—Rev. H. W. Peck, pastor. Sunday services, Sept. 29th, 10 a.m., Sunday school, Mr. C. J. Day, superintendent. 11 a.m., sermon. Subject: "Forfeited Birthright."

CHRISTIAN CHURCH—Harmony Hall, King street, between Fort and Alakea streets. T. D. Garvin, pastor. Lord's day school, 9:45 a.m. Preaching at 11 a.m. Subject: "Sins Physical and Spiritual that are Unpardonable."

SALVATION ARMY.—Sunday, 7 a.m., 11 a.m. and 3 p.m. Subjects: 7 a.m., "Amunition." 11 a.m., "Inspection." 3 p.m., "Short Weight."

Sadden Change of Mind.

Watts—"You won't mind my leaving my wheel here in your office, will you? I know you don't ride one, but—"

Potts—"No, I don't ride one very well yet, but I began taking lessons yesterday—"

"Er—come to think of it, I guess I won't impose on your good nature, old man."—Indianapolis Journal.

Small Boy and the Sea.

The small boy had gone out with his father for a sail, and the bounding billows had shaken him up to the extent that he had parted with his breakfast.

"Oh, papa," he exclaimed, after the second attack, "what makes me unswallow that way?"—Detroit Free Press.

ORIENTAL LUXURY AT HOME

The wonders of the Orient lay revealed before the eyes of all who care to see them, and that, too, without it being necessary to journey to lands across the seas.

The Oriental never does any more work than is necessary, and when not working, his engrossing care is to make himself comfortable. In many respects the art of living appears better understood in the East than in our bustling Western world.

There is now hardly a fashionable home that has not its Oriental room or rooms, or at least its cozy corner, sometimes the latter is Japanese in effect, sometimes Turkish; but whatever it is, be sure it is the result of an inner craving for the beautiful things of life.

Porcelain Ware, Silks, Cushions, Rugs, Mattings, Chinese Silverware, Open-Work Linen Doilies. TO CLOSE THEM OUT FROM THIS DATE, LADIES' SHIRT-WAISTS WILL BE SOLD AT \$1.00 EACH. THESE ARE MADE FROM NO. 1 CREPE, PITH HATS, COLORED AND WHITE, HAVE ALSO BEEN REDUCED FROM \$2 TO \$1 EACH.

Four-in-Hand Neckties, which will be sold for 20 cents a-piece or \$2.25 a dozen. I make a specialty of taking orders for matting ranging from plain solid to others with colors so blended as to be almost too pretty to use. Crepes will be made in any design imaginable.

Do not fail to visit the store, examine my stock and samples. It costs nothing to look. A. BARNES, New Republic Building.

NOT PROPERLY QUOTED.

Miss Burhans' Letter Twisted by a Reporter.

MR. EDITOR:—I would like to make a correction in an article copied by the ADVERTISER from Tacoma. In quoting from a purely personal letter to my sister, the Tacoma paper has not quoted verbatim, and has in several instances changed connection of words and meaning. Writing in reference to the difficulty of securing early report of cases from natives, I said: "It was reported, in one instance, that the natives were dressing the man for burial before he was dead."

The graphic picture of a newly-dug grave was not mine. Fortunately for me it was not stated that the white people were burying the native, or I might have been presented with a feather robe. As the letter was private I have no copy of it, so make the statement as nearly as I remember it.

As I do not wish to have the appearance of exaggeration, or making false reports even in private correspondence, you will greatly oblige me by making this statement public.

Respectfully yours, NETTIE BURHANS.

Honolulu, Sept. 27, 1895.

THAT JAPANESE TRANSLATION.

Statement of Errors Made in Board of Health Regulations.

MR. EDITOR:—Kindly allow me to insert a few lines in your paper. The fact that the Japanese translation of the regulation of the Board of Health was full with ludicrous mistakes and inexcusable errors, has been brought to light by Mr. A. Robashin in the ADVERTISER of Wednesday last. I fully corroborate the above statement. The translation is so written that the meaning is entirely different from the original. Any one who has a little knowledge of the two languages cannot doubt for a moment. I am sorry to hear that those who are concerned in the affair, are too obstinate to regret or make an apology; but instead, they go so far as to try to justify them by some means. I understand that the translation and printing was done at the Hawaiian Shinto Sha, a Japanese newspaper on Nuuanu, near Merchant street.

A certain individual, who is no doubt connected with the affair, claims to have got the endorsement of the leading Japanese, including the consul. This is misleading. The consul has actually refused and desired to have nothing to do with it, so a certain party tells me upon good authority. What other signatures he had, must be comparatively few and moreover, they would never have dared to sign it, if they had been a little careful. I think it is proper for me to state a few of the gross number of errors that attract the reader's attention immediately, saying nothing of what is ambiguous and phrases that are hard to make out the head or tail.

I find that all "makais" with the exception of one or two, are translated as "maukas" and vice versa. These would thereby make many uninfected districts infected. The line of extension of such and such a street is construed as the whole of such and such a street. The word "white-wash" was written "to wash thoroughly with water," "verandas" was taken as "under house," "matting" was translated as "straw," "rug" as "rag," and many other similar mistakes. If the Japanese were to follow these instructions, a great deal of trouble would have ensued, but luckily the calamity was avoided through the wise counsel and guidance of several of the Japanese inspectors. The Board of Health is not to be blamed but the newspaper that translated and printed them ought to be held responsible. Great care should be exercised in regard to Japanese translations of all kinds, since it is through these small errors that gross ones occur. JAPANESE. Sept. 27, 1895.

STRIKES :-

Great strikes as a rule entail much hardship and loss to both sides. Blacksmiths are always striking; they also employ strikers. We do not hear of many strikes in Honolulu, but one occurred here the other day—the clocks in Brown & Kube's store struck because the knives and scissors made some cutting and sarcastic remarks about Brown's stamps being "stuck up" things. Come and see our stock and prices before buying elsewhere.

The Beauty OF SOME PIANOS

Is only "case deep." It is much easier to make a handsome case than it is to put music into it. A tolerable mechanic can do the one—the other requires the best thought of a musical artist.

The Kroeger Pianos

All have handsome, tasteful, durable cases; but in their factory constant, careful, studious attention is given to the production of a perfect and lasting tone. The beauty and honesty of a Kroeger begins with the varnish on the case, and goes straight through to the iron plate that holds the strings. We'd like to show you the inside of a Kroeger.

Pianos kept in tune for one year gratis. Old instruments taken in part payment. Tuning and Repairing a specialty.

LUXURY

In House Decorations—something that will give a cool, comfortable appearance, but not exclude the summer breezes or look close and stuffy, is what every progressive housekeepers' heart longs to obtain.

Via S. S. Australia, we received an assortment of SILKELINE DRAPERIES, ART DENIMS (all shades), the very finest, every one of artistic taste will appreciate them.

LADIES EQUIPOISE WAISTS (all sizes), P. D. CORSETS all lengths and sizes.

The homelike feeling which pervades the entire atmosphere of the store, we believe, comes from the confidence and knowledge that all will be treated right and that they can purchase as they like, the store is at your disposal—enjoy it.

B. F. EHLERS & CO.

WE'RE NOT ALL ALIKE.

It is vain to treat merchants as if they were equal. They are unequal by methods as men generally are by nature and circumstances.

Our methods are such that it enables us to place goods to you and save the usual profit.

In Ship Chandlery we quote you: Blocks, patent and complex, from 3 to 6 inches; Manila Rope 5 threads to 6 inches; Ratline, Lanyard, Seizing Marlin, Spun Yarn and all kinds of tarred rope; Pig Lead for yacht keels; copper paint; sail duck; Cotton and Flax, every size; Iron Wire Rope 1 to 4 inches; Flexible Steel Wire Rope, 3/4 to 3 inches; Stockholm and American Pine Tar, Paints in oil and dry.

In fact every conceivable article needed to make up a complete ship chandlery store.

E. O. HALL & SON, LIMITED.

Why is The Peoples Preserving Paint The Best? Because: It is a disinfectant. It is the cheapest. It will last longer. It will give better satisfaction. It will give entire satisfaction. It is not attacked by heat, moisture or salt atmosphere. It will not crack, scale or pull off. It will positively prevent moisture. It will stop leaks and decay in shingle roofs. It will stop rust or corrosion on metal roofs. It will make any tin or composition roof tight. It is the best water-proof paint known. It contains no oils or other evaporative ingredients. It gives a good finish. When once used on a roof it will always be used. We guarantee all work done. Examinations made and estimates given free of charge.

HIGH SCHOOL OF HONOLULU.

Plans for Construction Taken from a New England Building.

GOOD SANITARY ARRANGEMENTS.

No Change Made in the Inner Construction—Plenty of Light and Air—New System of Blackboards—Structure Well Adapted for School Purposes.

It is said of Princess Ruth that in looking over various plans for the construction of a mansion on Emma street, she was particularly struck with those of a normal school building in the States. Drawing those plans from among many others she said in her imperious manner to the architect standing near by, "Build me a house like that." Those few words were the foundation of the Bishop mansion, and now the Honolulu high school.

At the very first suggestion of using the building for a high school, people

without doing an injustice. In the first place the building is isolated from a number of others surrounding by a large yard, which enhances to a great degree the beauty of the place. This allows of the admittance of both light and air without the slightest interference. The large windows and doors, together with the spacious halls, make all the ventilation necessary. It has been noticed that on the very hottest of days the building is always cool.

Perhaps one of the best school rooms in the building is the old dining room, separated from the main portion by a wide veranda, which runs nearly around the latter. This is completely isolated from the rest of the rooms, and has the additional advantage of laboratory facilities. In glancing over the equipment of this, as well as the other school rooms, Professor Scott called special attention to the blackboards, which are something new in the islands and which were being used so successfully when he visited the Coast recently. They are made of wood pulp—the second growth of maple—which is subjected to enormous hydraulic pressure, and, when turned out in the form of wide strips, is known as Hylo plate. Aside from the excellent manner in which the board takes chalk, it possesses the additional advantage of making no scratching sound when being written upon. The whole set of blackboards in a room may be in use without the slightest noise being made by contact of the chalk.

The desks to be used are single, so that the old fashioned punishment, or

Honolulu may well feel proud of its new high school building, for it is undoubtedly one of the finest for the purpose designed, even among those of the United States. It possesses, among many other attributes, beauty, durability, excellence of finish and all modern conveniences. The faculty will consist of Professor Scott, principal; J. Lightfoot, mathematics and Latin; Miss Brewer and Miss Needham in the grammar department; Miss Beckwith, a graduate of Pratt Institute, drawing, and Mrs. Tucker, music.

Mrs. Eliza Logree Westery, R. I.

Once I Was Blind But Now I Can See \$3.50

Thanks to Hood's Sarsaparilla. C. I. Hood & Co., Lowell, Mass. "I have suffered everything possible with sore eyes and headache, the sores so severe that I was blind. I tried everything I heard of without benefit, and went to the Rhode

Hood's Sarsaparilla Cures

Island Hospital, but found no relief there. A friend told me of Hood's Sarsaparilla, so I bought a bottle and a box of Hood's Pills.

With More Than Thanks I want everybody to know that since I have been taking these medicines, I have become as well as ever. My eyes have perfectly healed and the headache is cured. From my picture you can see there is nothing the matter with my eyes now." Mrs. ELIZA LOGREE, Potter Hill, Westery, R. I.

Hood's Pills cure nausea, sick headache, indigestion, biliousness. Sold by all druggists.

HOBSON DRUG COMPANY, S. Wholesale Agents.

Bicycle Digest.

The Bicycle has established itself. It is an institution. Though it has become a necessity of modern life, it has not ceased to be a source of pleasure and those who ride it for business purposes still find their greatest enjoyment in the saddle.

Taking it for granted that you have decided to ride, and naturally want the best wheel for your money, we wish to point out to you some of the superior features of the BARNES' SPECIAL.

One taking and distinctive feature of the Barnes' wheel, is the method of brazing the frame joint. When a Bicycle is reinforced from the outside it resembles a sore thumb with a rag around it—an apt but homely simile. Our joint is not a sore thumb. The connections are punched from steel formed into pieces of such shape that they encircle one tube, rendering it doubly strong and project therefrom to form a stud at the desired angle over which the adjoining tube can be fitted and brazed firmly. The steel connections are secured on each side by secondary pieces, and all of them brazed as one piece serve as a pointed reinforcement to the second tube.

Bearings—First quality tool steel hardened and ground to such a degree that there is no possibility of their becoming worn. On such grounds as these fair, frank and honorable, we solicit the patronage of the bicycle riding public. An examination will prove that they are all we claim for them.

LOCAL BREVITIES.

Services in all the churches to-morrow.

The Board of Health meets at 3 p. m. today.

Band concert at Emma Square this afternoon.

The Mokolii came from Molokai last night.

The Warrimoo and the Miowera may meet at this port on October 2d.

A very pleasant wagonette party was given by Mrs. Hermann Focke last evening.

The Russian physician that arrived here recently will engage in coffee raising.

By order of the Board of Health the opening of schools is postponed until further notice.

Miss Maud Stevenson, sister of Mrs. Charles Day, will leave for the Coast on the Irwin.

The September term of the Supreme Court will not open on next Monday, as announced.

The current number of Time is good. Buy a copy and take it home for Sunday reading.

Brown & Kubey tell about various kinds of "strikes" in their change of advertisement this morning.

Opening of the Oahu College and Punahou Preparatory school has been postponed until further notice.

W. A. Bowen will lead the Y. M. C. A. services Sunday afternoon at 4 o'clock. Subject: "Marching Orders."

The Pacific Lodge, U. D., A. F. & A. M., did not meet last night, owing to the breaking out of cholera yesterday.

Colonel James Sherwood sports a new buggy. He was showing it to his numerous friends yesterday afternoon.

E. B. Barthrop and others will go into quarantine tomorrow in order to be available for passage to the big island.

For non-payment of board the Club Stables Company will sell a bay mare at the auction rooms of James Morgan on October 29th.

Taxpayers are notified that ten per cent. penalty will be added to personal taxes remaining unpaid after the 30th of this month.

The brick block on the corner of Hotel and Smith streets, and the iron house makai of the same, are for rent by Barnes, the live real estate dealer.

Purchasers of lots in the Punahou tract have begun improvements. Bruce Waring & Co. report increased sales of that desirable property.

The W. G. Irwin will not sail until after the arrival of the Australia. If a mail is sent by the vessel, due notice of the closing will be announced.

Don't forget the bicycle meet on Union Square this afternoon at 4 o'clock. A run will be made about the city and Emma Square visited during the band concert.

All members of the Masonic fraternity are invited to attend the funeral of the late Moss Davis from the hall of Lodge Le Progres de Oceanic this afternoon at 3 o'clock.

The steamship China, due here on October 29th, will probably bring neither mail or freight from Japan to Honolulu, nor will she take mail or freight from this port.

The Hawaiian band gave a concert on the Executive building grounds yesterday afternoon. Concerts may be given there on Wednesday afternoons instead of Tuesday.

Castle & Cooke, Ltd., have on the Pacific Mail wharf and available for shipment to the other islands vacuoline engine oil, 600 w. cylinder oil, hoe handles, brown laundry soap and crown flour.

J. A. Hopper and family are at the Occidental hotel, San Francisco. It was their intention to visit the Atlanta exposition, but the cholera epidemic caused a change in their plans. They are not expected home for some time.

John J. Sullivan, manager of the Pantheon livery stables, has about recovered from a severe attack of illness, the result of the grippe. On the recommendation of his physician, Mr. Sullivan will take a lengthy vacation and visit the principal cities of California and Puget Sound.

GOING INTO QUARANTINE.

Number of Kanai People and Others Preparing to Leave.

Permits will be issued by the Board of Health this morning to those desiring to go to Kauai. It is expected that about twenty-one people will avail themselves of the

opportunity and go into quarantine at the quarantine station on the island for the regulation period of five days.

Among those to go are Geo. Fairchild and wife, R. C. Spalding and wife, C. H. Willis and wife, Mr. Brehans and several traveling representatives of local business houses.

Masonic Funeral Notice.

THE FUNERAL OF OUR late Brother MOSS DAVIS will be held from the Hall of Lodge Le Progres de Oceanic at 3 o'clock THIS SATURDAY AFTERNOON. All brethren of Hawaiian Lodge No. 21 and Pacific Lodge U. D. and sojourning brethren are respectfully invited to attend.

By order of the Master. A. FERNANDEZ, Secretary.

ARRIVALS

Bark C D Bryant, Jacobsen, from Laysan Island.

DEPARTURES

Steamer Ke Au Hou, Thompson, for Lihue and Waimea, Kauai.

DIAMOND HEAD, Sept 27.—10 P.M.—Weather, clear; wind, light N.

The S. P. Hitchcock is anchored in naval row.

The J. A. Cummins came in from Oahu ports yesterday.

The tug Elen is on the Marine railway undergoing a thorough cleaning.

The James Makee arrived from Kauai yesterday morning with a few passengers.

The case of cholera yesterday stirred up considerable activity along the water front.

The Matilda has about finished discharging her deck load of lumber at Allen & Robinson's wharf.

The date of sailing of the W. G. Irwin has been postponed until after the arrival of the Australia.

There is considerable uncertainty about the movements of the island steamers now, since the development of the new case of cholera.

The Ke Au Hou sailed for Kauai yesterday after thorough fumigation.

The bark C. D. Bryant arrived from Laysan island yesterday with 1500 tons of guano.

At 5 p.m. yesterday the Oceanic wharf with Custom House officers, stevedores and others were put into quarantine, to await the arrival of the Australia.

WASHINGTON, Sept. 12.—The first of four large guns intended as a part of the armament of the United States cruiser Oregon was shipped from the navy yard this afternoon.

MONTEVIDEO, Uruguay, Sept. 14.—The Italian bark Broomhall, from the Tyne for Caleta Buena, has been sunk in collision with the British bark Condor, Captain Roberts, from Rio Janeiro for Caleta Buena.

The British ship Merioneth, Captain Rowland, has arrived at San Francisco from Rio Janeiro in ballast.

The Customs authorities are confronted with a problem hard to solve, says a late San Francisco exchange.

Opium is coming from Victoria through this port for Honolulu, and how to catch it and how to hold it is the question.

On her last trip to the islands, took 250 tons of the drug, and the R. P. Rithet 200 tons.

The opium on the Diamond was stowed in an air tank of the lifeboat, a hole being cut for that purpose.

The steamer Mackinaw, on her last arrival here, carried up to Port Costa 300 tons of opium, which was finally seized by the sheriff of Solano county.

TOPSY TURVY LAND

How Things Seem to Be Inverted in Australia.

Professor Ullathorne, in his work on Australia, gives the following points concerning which that country is dissimilar to the other countries of the world:

Australia is really the antipodes of the remainder of the world in all respects.

Summer time comes during the time of European winter; the rising barometer indicates rain and the falling the opposite;

the swans are all black, and the eagles white; the male lays eggs, and has a bill like a duck;

the native dogs never bark; the serpents have tails like fishes and wings like bats;

the prickly pear grows to be a tall tree, and the poplars and oaks seldom grow above breast high;

ferns grow from twenty to fifty feet in height, the elm has hairs instead of feathers;

the birds are without song; the sun is in the north at noon; the chief river flows inland;

the pear tree grows a fruit that is beautiful to look upon, but which, when ripe, is as hard as though fashioned from the wood of the tree itself;

the leaves of the trees all stand edgewise and cast no shadows; the stone or pit of the cherry is on the outside, and must be cracked in order to get at the meat;

the opossums fly like bats; the kingfisher never catches fish, but lives on fruits; the peas are poisonous; the oak bears no acorns;

the chestnuts are without burr, and, in many instances, the trees are hollow, with the bark on the inside.

New American Revenue Cutters

The United States will soon possess two new revenue cutters authorized by the late Congress, which will, says a New York exchange, eclipse the Gorman gunboats.

The new vessels will be called the Manning and the Gresham, in honor of the late Secretaries of the State and Treasury Departments.

The contracts under which these vessels will be built call for their completion by July 1, 1896.

The vessels are to be identical in dimensions. The Manning will be a composite vessel, however, while the Gresham will be built of steel throughout.

The principal dimensions are: Length 205 feet 6 inches, beam 22 feet, mean draught 12 feet 3 inches, and displacement 980 tons; cost \$175,000 for each.

The horse-power will not be less than 2000, exerted by direct-acting, vertical, inverted, triple-expansion engines.

When the engines are making 160 revolutions per minute the 2000 required horse-power will be developed.

The resulting speed is put down at sixteen knots per hour.

The new cutters are the most speedy and seaworthy of their class yet designed by the United States Government.

They will be far superior to the Machias and the Castine, and, of course, to the six new Gorman gunboats authorized by the last Congress.

While the Machias and the Castine are almost identical with the Manning and Gresham in dimensions, the former vessels have only about 1500 horse-power, in comparison with the 2000 horse-power in the cutters.

She Had No Papers.

PORT TOWNSEND (Wash.), Sept. 16.—The British steamer Yanariva arrived today, twenty days from Yokohama, with a cargo of 1000 tons of tea for shipment over the Canadian Pacific.

Upon being boarded by the Customs and Health Officers she was found to have no clearance papers or bill of health from the port last touched.

After leaving Yokohama the Yanariva stopped at a coaling station where there were neither customs officials nor consul and was obliged to leave without papers.

The facts were immediately wired the Secretary of the Treasury and the vessel will remain here at anchor until a reply is received.

FITS CURED

Prof. W. H. Pecke, who makes a specialty of Epilepsy, has without doubt treated and cured more cases than any living Physician; his success is astonishing.

We have heard of cases of 20 years' standing cured by him. He publishes a valuable work on this disease which he sends with a large bottle of his absolute cure, free to any sufferer who may send their P.O. and Express address.

We advise anyone wishing a cure to address, Prof. W. H. PECKE, F. D., 4 Cedar St., New York.

ONCE A YEAR.

On or about the 1st of September each year it becomes necessary for us to clear away all odd lots of Dry Goods and Tailorings.

On an average, we expect to sell Goods for about one-half of what we actually PAID for them.

We are satisfied to know that they are GONE—and that our counters are clear for Fall stock.

We'll let the price do the rest of the talking. Four big bargain tables in the front of our store loaded down with these goods.

G. G. KIM, 411 Nuuanu Street.

INDURINE

A COLD WATER PAINT ESPECIALLY DESIGNED FOR INSIDE WORK ON FACTORIES AND PUBLIC BUILDINGS.

It is a dry powder which can be prepared for use by simply stirring in COLD WATER and can be applied by anyone and will always produce good work.

It is VERY WHITE, extremely reflective and hardens on a wall like stone and will take any tint.

It will last for years, and is unaffected by gases.

One coat covers better than two coats of oil paint or whitewash.

It can be used on any surface and for all classes of work, even for the finest decorating.

OUTSIDE -:- INDURINE

This is for Outside Work, Such as Fences, Outbuildings and Laborers' Quarters.

It is a thick paste to be diluted with cold water; stands rain and exposure as well as oil paint, and costs but a trifle as much.

Cold Water Kalsomine.

Adapted for Dwellings, Offices and Public Dwellings, or any other place where KALSUMINE is used.

It will not rub, discolor or scale off.

LUCOL

A new Paint Oil. It comes raw and boiled; is superior to Linseed, and covers with one-third less lead and pigment to the gallon.

P. and B. Compounds and Papers.

Of Interest to Managers of Plantations.

A Model Plant is not complete without Electric Power, thus dispensing with small Engines.

Why not generate your power from one CENTRAL Station? One generator can furnish power to your Pumps, Centrifugals, Elevators, Plovers, Railways and Hoists; also furnish light and power for a radius of from 15 to 20 miles.

Electric Power being used saves the labor of hauling coal in your field, also water, and does away with ching friends engineers, and only have one engine to look after in your mill.

Where water power is available, it costs nothing to generate Electric Power.

THE HAWAIIAN ELECTRIC COMPANY is now ready to furnish Electric Plants and Generators of all descriptions at short notice, and also has on hand a large stock of Wire, Chandellers, and all Electrical Goods.

All orders will be given prompt attention, and estimates furnished for Lighting and Power Plants; also attention is given to House and Marine Wiring.

TREO. HOFFMANN, 39-30 Manager.
