

THE PACIFIC Commercial Advertiser. W. N. ARMSTRONG - EDITOR. SATURDAY SEPTEMBER 3. PARTY ALLEGIANCE.

"If Uncle Sam does happen to give Hawaii a District of Columbia Government, the opportunities for work for a Republican organization are by no means lessened. They are increased. If the advocates of centralized government are victorious, fight it out until every last one of them is buried in a political grave. Never give up the liberal republican government ship."

If the Republican party, to which the Bulletin has unreservedly pledged its allegiance, fixes upon this territory, by its majorities in Congress, a centralized government, will it not be in the nature of treason to that party for the local Republicans here to fight the advocates of that form of government, "until every last one of them is buried in a political grave?"

REAL ESTATE VALUES.

The speculation in homestead lots in and near the city expands. We have said heretofore, that the local abundance of money has largely, though not altogether created it, and feeds it. But the foundations of an abundant market at home will not stand the pressure of a ten-story speculation.

Just what the immediate needs of residents and immigrants are, in the way of dwelling houses, it is not easy to determine. There appears to be a very large number of vacant lots in the city. We are informed that there are over 300 desirable building lots in and near the city now upon the market. If a residence were erected on each of these, and occupied by the average family of five persons, there would be accommodations for about 1,500 persons. We refer to lots beyond the reach of the poor man, the native, or the average Portuguese. There are in this city 2,885 Americans, English and Germans of both sexes. These would require, on the basis of five persons to the family, about 400 residences, as indicated in the census report. If building lots numbering over 300 are added to the 400 lots already occupied there should be an increase of fifty per cent in the total American, English and German population immediately in order to occupy them. These occupants must be people of "means," though the word is indefinite. As it is pretty well demonstrated that the trades and professions are full, they must be people of "independent means." How far experience will permit us to expect such people to immigrate we cannot say. The great health resorts of the United States, with few exceptions, have been extremely disappointing in this respect, because the average man grossly exaggerates the number of people who have independent means, and he invariably forgets that a family of independent means prefers, as a rule, to reside near to its relatives and old friends.

We do not present accurate statistics, but suggest some figures and comparisons. These may indicate that the local or even foreign absorption of homestead land has or soon will reach its limits.

If there should, however, be a large influx of the "one lunged" people, or those who prefer climate to all things, there will be a steady demand for the homestead lots. Of this class, where there is one rich family, there are a hundred poor ones. This, we believe, is the experience of Southern California, which undoubtedly has the most desirable climate in America.

If there had been such a disposition of our lands, that there were today large tracts of back country open to settlers who could at once supply the larger part of their own needs, this city, like every city with a rich and well populated back country behind it, would increase rapidly in population.

In flush or boom times there is invariably an exaggeration of facts which may justify a rise in real estate values. The "crowd" never keeps an even keel. It is a "bull" or a "bear." It declines a moderate course. Its capacity for inventing reasons in favor of the most absurd propositions is marvelous. And the more ignorant the crowd is of the economic laws which regulate the values of real estate, the more positive it is in its beliefs.

We do not here assert that the values of land are excessive. We simply suggest the consideration of a few facts on the subject.

THE CHINESE CASE

A large class of people in the United States regard the Chinese with the same feelings as the old orthodox divine regarded some of his unregenerate friends. "You are unrepentant," he said; "and collectively deserve and will get eternal damnation. But I have much respect for each of you, individually, and will dine with you even if I believe you ought to be damned."

This class of people denounce the Chinese in their national form, but gladly employ them, whenever they can make money out of them, or save money through them. As members of the Chinese nation they are regarded as heathen, who worship idols, and cheapen wages. But if money can be made out of them, their heathenism ceases to be offensive, and their acceptance of cheap wages becomes a flourishing virtue. The national game played with the Chinese is, "Head I win, tail you lose."

On these Islands, our local policy has been to permit them to largely outnumber ourselves (the Anglo-Saxon), so long as we could make money out of them, and they kept quiet. The majority of the Chinese resident here were cordially invited and financially assisted, we believe, to locate here by our great planting interest. They have been encouraged to improve our waste lands and make them very profitable in rice and bananas. Even Mr. Frank Damon has preached openly in this place, to the Chinese, the revolutionary doctrine of the "brotherhood of man," at the same moment that our dominant political party declared that "the Chinese must go."

So, on the whole, it is very difficult to work out the correct moral latitude and longitude on the Chinese question. The Chinese naturally enough ask that those invited to settle here, those who have become Christians, those who have married natives, should obtain political protection of some kind under the new organic act which shall govern the territory.

Upon the principles of the Declaration of Independence, they are entitled to have it. But their rights are no longer governed by those somewhat obsolete principles. Congress has adopted a policy regarding the Chinese. As a matter of simple justice, it should clearly protect our long resident Chinese. We believe that it is very doubtful whether Congress will give them any political rights. They have already treaty rights which protect persons and property. Congress will hardly understand the situation clearly enough to make any exceptions in their favor. The Commissioners may, and perhaps will recommend that special provisions be made for them in the organic law, but the labor party will become suspicious, and its powerful influence will oppose such provisions.

Uncle Sam will probably use this language to them: "You are much better off than you were in China. You have made, and are making a good thing out of your residence in Hawaii. I used to shout often about the dignity of labor, but since you have cheapened it, it ceases to be dignified unless it is purely American labor. Be contented as you are."

It is fortunate for the Chinese that their case was presented so judiciously and clearly by Mr. Hatch. They may be assured that their case is well understood by the Commissioners.

THE PASSING HOUR.

Schools on the American plan in Cuba sound all right. Henry M. Stanley seems to favor a sort of platonic friendship between the United States and Great Britain.

Some of the Japanese papers are after Premier Okuma with a sharp stick because he did not oppose the annexation of Hawaii. These papers seemingly have not Okuma's access to information from Washington.

There were a whole lot of steamers running to the Klondike once, but there is no business up that way for them now. Some of these tubs are to have a try at the Honolulu route out of Seattle, though not all the Seattle steamers are of the makeshift class. It will be fine to have mail more often.

but the boats will continue on the line only so long as there is business. Not a great deal of business can be created.

The pretty story comes from Sydney that the cargo of frozen mutton sent from New South Wales to Admiral Dewey's fleet at Manila was an aloha offering from the colonial people in sympathy with the United States.

Cecil Rhodes will now proceed to make it warm for his Uncle Oom Paul. The ancient Uncle has made the good fight pretty well according to his lights and has considerable battle left in him yet, but must yield to progress rather than to the superb individual representing the advance movement.

It has been extremely pleasant during the past few days to feel the absence of militarism from the principal public building, the old palace. The fact has made people feel that at last sign of force was absent from government here. It has seemed a realization of the hope of the moral influence of Old Glory.

It may be expected now that one mail will bring news of trouble with the Cuban patriots and the next information of trouble with the Philippine insurgents. The nation preaching persuasively in these days the doctrines of modern civilization will require all the time and fact that can be brought to the task.

By getting themselves whipped so quickly the Spaniards played it rather low down on thousands of the men who volunteered into the service of the United States as soldiers. It is true that some of these volunteers want to keep on soldiering. Many of them will go into the regular army. The citizen warriors who care more for the commercial life have had all their plans sadly deranged and at no small cost.

THE SPICE OF LIFE

May come from many a source. We all enjoy a good laugh and when one considers how easy it is to assume duties which tend to create ill health it is not remarkable to find so many who are suffering.

MALT

Close attention to one's duties, no matter the nature, sooner or later the labors will soon become a task in this climate. You feel tired, can't eat and relish your meal; imagine you are unfortunate and long for a change.

NUTRINE

Just think a moment and consider whether the cause of your ill feelings are not due to lack of tone to your stomach, thereby overtaxing your nerve force, which eventually wrecks the whole organism.

NEVER

Try a few bottles of a true and tried remedy which has no equal as a system toner and health producer. Your physician endorses it. It will build you up and make you feel well again.

TIRES

Your druggist carries it in stock. If not ask him to get it. It has no superior. Single bottle, 35 cents. Three bottles for \$1.00.

HOLLISTER DRUG CO. SOLE AGENTS.

TIMELY TOPICS September 1, 1898.

The Perfect Plows

In all agricultural countries it is on a good plow that the tiller of the soil relies for a good crop. We carry all kinds of plows from the large Sulky Plows to the smallest Rice Plows

Plantation Breaking and Double Mold Board Plows

that we chiefly pride ourselves. These are in use on nearly every plantation on the Islands. Only within the last three weeks we have sold a number of the large plows to take the place of plows from other firms which had been returned as unsatisfactory. The great advantage of the Perfect plow is that it requires less animals to draw it, and cuts an excellent furrow without digging down.

Remington Standard Typewriter!

WHAT IS IT? A simple, compact, and durable machine, which successfully performs the work of the pen, with a tremendous saving of time and exertion. WHAT WILL IT DO? It produces, with speed and certainty, in clearly legible printed characters, one or many copies of any kind of writing, excepting such as must be done in books. TO WHOM IS IT USEFUL? To every one who has writing to do. In business circles its desirability is assured. Lawyers and journalists cannot do without it. Professional and scientific men realize its worth to them. The author and thinker find it invaluable. It conserves the most potent kind of energy—that of the brain—by reducing to a minimum the mechanical labor of writing, and distributing it among all the fingers of both hands. Writer's cramp disappears where it is used. It presents the printed appearance of the work to the mind at once. WHO CAN OPERATE IT? Any one of ordinary intelligence. A very few trials enable any one to write upon it readily. Thereafter it is only a matter of practice.
