DREDGER MAN HERE TO BEGIN **WORK IN MONTH**

Capt, Connor Will Look After Harbor Federa' Contract--- Propeller Dredge Pacific on Way Here.

Captain W. A. H. Conner, the accredited representative of the San Francisco Dredging Company, which has the Federal contract for dredging out Honolulu harbor and the channel entrance, arrived yesterday on the S. S. Sierra, and is domiciled at the Hawaian hotel. Captain Connected with the North American Dredging Company of New York, San Francisco and Los Angeles, from which concern the San Francisco Dredging Company has leased the dredger "Pacific."

The "Pacific" is a sea-going dredge, which left San Francisco for Honolulu last Saturday. It is not of the scow or barge pattern, but is built like a long, low, wide, powerful steam barge with a pointed bow. The Pacific is equipped with a screw propeller and is coming here under her own steam. The contract company did not wish to be bothered with towing barge-dredges to Honolulu, as the risk is considerable.

The Pacific is one of the largest of her class owned by the North American Company. It is provided with a suction dredge, the debris being pumped back to fill-in lands through a long series of pipes laid on pontoons. The contract company will bring its own pontoons and piping here from Tacoma on one of the Dollar company freighters.

Captain Parker of the Hawaiian Dredging Company, which owns two or from Bright's disease, which became Arthur W. Pearson was born in Milthree dredgers here, returned yesterday from San Francisco, where it was acute within the last few weeks. He supposed he had gone in the hope of getting a sub-contract. Captain Connor stated last evening that in all probability the contract company would lease one of the Hawaiian Company's dredgers for the outside channel and bar work.

The dredge comes here as a steamer, and will therefore have a master and a first and second officer and crew. The engineers are those who will operate the dredge during the contract work. The master and two officers will be discharged on arrival here and sent back to San Francisco and the Pacific will become a mere dredger. About forty-five men will be employed on and about the dredger. The dredger is capable of dredging out 14,000 cubic feet per day under suitable conditions. Captain Connor feels that 10,000 cubic yards can be handled in Honolulu harbor work. The suction pipe is very large, those on the local dredgers being small in comparison.

The contract was approved at Washington on September 17 and the company received official notification about September 20. Within three months from that date the company must begin work, and twenty-seven months from the end of the ninety days the entire work must be completed.

This contract involves the dredging out of Honolulu harbor proper, or as it is now, to 35 feet depth, and the channel and entrance thereto, as well, the appropriation amounting to \$400,000. The development of the harbor also calls for widening the channel, cutting off the lighthouse point and cutting out the coral far back from Naval Row. This work will involve a million dollars. No contract for this has been let, as there is no appropriation.

The Pacific was used to dredge out Tacoma's harbor extension. "We will be actively at work on our contract within a month," said

Captain Connor last evening, "depending on where Lieut. Slattery wants us to begin,"

The Asiatic Fleet Cannot Come Here for Maneuvers---Comment on Seagirters---Territorial Rentals.

(Mail Special to the Advertiser.)

WASHINGTON, D. C., Sept. 15 .-Honolulu citizens may be forgiven for quarantine wharf. The matter is held up again. As a letter of a few weeks ago indicated, the contract was formally awarded to Cotton Brothers, of Oakland, Cal. That was brought about after excruciating delays, with which the readers of the Advertiser are fawas found to have been an oversight in the office of the Supervising Architect regarding the specifications for dredging. That was eventually cleared up. Another set of bids, from the four or five highest bidders in the first competition, was secured. At last, in the language of the course, "they were

More literally they were off. After everything had been arranged for a speedy construction of the wharf it was discovered that the itemized appropriation by Congress had not been considered. That body, in its wisdom, designated how much money should be used for each. The total of the award to Cotton Brothers was inside the total appropriated by Congress, but it happened that the total Congress appropriated for the gangwaywhich was \$10,000-was exceeded in the figures of Cotton Brothers. Their figure for that item was \$14,000, and also the lowest hid received on that item.

Therefore it has been decided to have a new competition for the construction of the gangway. "It happens," said Supervising Architect ticular thing about the new quarantine construction which the Honolulu people most want. The old gangway is in bad shape. It let a company of soldiers into the Pacific some months ago. But there's nothing else to do. We have had to direct that the plans and specifications for the gangway be redrawn so that the construction of the gangway will not cost more than \$10,-000. I have telegraphed to Mr. Rob-

hasten the drawing of those specifications. The contract for the rest of the wharf has been awarded to Cotton groaning inwardly over developments Brothers, as already told. The conwith reference to the oft discussed tract has not been signed, but it has been forwarded to them at Oakland and we have been informed that as soon as members of that firm, who are now absent, return to Oakland, it will be signed so as to reach us about September 20."

TEACHERS CAUTIONED TO PRACTICE STRICT ECONOMY

The following circular has been issued from the Department of Public Instruction:

Honolulu, September 25th, 1905.

To all School Agents, Principals of Schools, Teachers and Pupils:

The Department of Public Instruction finds itself in the position of having to equip and supply a larger number of schools than at any previous period, while at the same time the appropriations of money for these purposes are smaller than heretofore. Particularly the appropriation for Industrial and Manual Training for the current biennial period is exactly half the appropriation under that head for the biennial period ended June 30th, 1905, and the appropriation for Stationery and Incidentals is less than half that for the previous biennial period. The Department believes that a consideration of these facts should make it apparent to all persons having the furnishing, the care, or the use of school supplies that it is urgently necessary that the strictest economy be practiced in the distribution and use of supplies if the schools are not to suffer detriment from the necessary cutting off of some kind of supplies.

It is requested that principals of schools will avoid, as far as practicable, frequent requisitions, as shipping in small quantities entails increased cost for packing, cartage and freight. And they should see to it that no habits of waste are acquired either by teacher or pupils. In making requisition principals of schools are requested to estimate conservatively for a full year's supply of everything required by them. These requisitions should be addressed to the School Agents in the respective districts.

The Department relies on the hearty co-operation of all in this matter for the good of the schools. Yours sincerely,

JAMES C. DAVIS. Superintendent of Public Instruction.

The programme for the cruise of the Pacific squadron is arranged by the commander of the Pacific Station. It has already been arranged by him for the next few months and includes considerable target practice and therefore, as this programme is now being carried out, cannot be changed. It is clear that Navy officers in the

to be until about October 1.

The state elections this year are at-

tracting but little interest. That in Virginia, just across the Potomac, has passed the interesting stage, with the holding of the primary in August by which the Democratic candidates for Senator and state officers were put in comination. There is no doubt of the election of all these Democratic candilates by a good darge majority, although the Republicans, aided by President Roosevelt, and possibly by funds out of the million dollar surplus & of the Republican National Committee, will put up a more vigorous campaign than ever before. The negro has been emminated from the Republican party down there and the Republican party has been waxing in strength ever since that consummation.

In Maryland there is a vigorous state fight, over the election of minor officers. The great issue there is on the so-called Poe Amendment, providing for the elimination of ignorant negroes from the suffrage. Senator Gorman has just assumed personal command of the campaign, the outcome of which is doubtful. Probably a Democratic legislature will be elected, but the Poe Amendment that the Democrats are championing, may be lost. Secretary of the Navy, Bonaparte, is the Republican leader in Maryland and is stoutly opposed to the Poe Amendment.

Massachusetts was likely to have a stirring campaign for governor, but Gov. Douglas, the Democratic incumbent, has resisted all entreaties that he accept a renomination. With him at the head of their ticket the Demoerats might have a fair show of winning again. With some other nominee it is a foregone conclusion that the prospective Republican nominee, Lieut. Gov. Curtis Guild, will be elected gov-

Ohio has the most interesting of all the gubernatorial campaigns this fall. In spite of the enormous Republican majority in the state, the Democrats are conceded to have a fighting chance. The Republicans have been down here to Washington recently to arrange for a battery of big administration speak ers. The liquor issue is figuring in the Buckeye campaign and Gov. Herrick, nominated for another term, is unpopular. Gov. Herrick's election is looked for, although it would not greatly surprise close political observers were he

ARTHUR W. PEARSON.

The grief of all those who are connected with the Hawaiian Gazette Company over the death of Arthur W. Pearson, its manager, will be shared by those who knew Mr. Pearson as a member of the business community, as a man and as a neighbor. In his relations with the town, with his vocation and with his family and friends, he suffered no reproach. Mr. Pearson took a vivid personal interest in the up-building and the civic righteousness of Honolulu and Hawaii and no good public cause appealed to him in vain. Indeed he went out of his way to serve it. As manager of the Gazette Company, handling a 'arge payroll and an establishment which has some of its departments running for every hour of the twenty-four, he had engrossing duties, but he met them all with clearness of judgment and performed them with fidelity. Kindly and generous of nature he not only made friends easily but kept them.

During the later years of his most active life, Mr. Pearson knew that he was the victim of a fatal malady, but he held back his secret from those whom it would most distress and buried his own fears, if he had fears, in the absorbing work that fell to him. He was hardly ever heard to utter a word of complaint about his physical condition though often it seemed that he must be suffering keenly. When he left this office for the last time, he was exhausted and could do no more than keep up the battle for existence which he did with Nevada. courage if not with hope. His death was not a surrender; his physical defences had been carried by assault.

CANAL BENEFITS.

Every seaport city from Seattle and Tacoma to San Diego expects to become great because of the Panama canal; but few of them advance convincing reasons why this should be so. They talk much about selling coal, but the mere stopping of steamers for coal does not build up a country unless that country has mines of coal to exploit; but so far as good steam coal is concerned the American ports of the Pacific coast merely get it from foreign countries and sell it on commission or in a way equivalent to that.

This coal argument is used at length and with much display by the S. F. Merchants' Association Review under the headline "Panama Canal Will Make San Francisco the Key of the Pacific," the authority being William Barclay Parsons, consulting engineer of the Isthmian railway, etc. We quote:

I find few people even here who seem to appreciate the tremendous effect the Panama Canal will have upon San Francisco. This city will profit more by it than any other in the country. It will make San Francisco the key of the Pacific.

Every vessel from New York, New Orleans, Galveston, Baltimore, Boston, even from Hamburg or Liverpool, that uses the Panama Canal on a voyage to China or Japan, will pass almost within eyesight of the Golden Gate, and, because of a commercial necessity, well recognized by shipping men, will have to stop at San Francisco.

Tramp steamers want cargo space—and it is the tramp we are interested in for commercial facilities-and they always endeavor to carry as little fuel as poossible. Vessels from New York to the Far East today carry only enough coal to take them from port to port, and calculate upon stopping for more at Gibraltar, Algiers, Malta or

Vessels coming by way of Panama would coal at Cclon; and the next port, and the last one, where they could take on fuel, would be San Francisco.

Hence every tramp steamer will stop at San Francisco, will pay tolls and purchase supplies, and will here offer exceptional trade facilities between Continental America and the Far East. Yet singularly enough, the public has apparently failed to grasp the Canal's importance to this city.

Why is it necessary for any steamer, running from Colon to the Asiatic coast to pass almost within eyesight of the Golden Gate? If coal is wanted why not swing over to Honolulu and get it, keeping on to destination? Granting that the great eircle route would be a bit the shorter, yet the stormy seas in that region usually give the advantage to steamers traveling the calmer course in these waters. Mr. Parsons is wrong in saying that there is only one coaling port after Colon, that being San Francisco. If Honolulu is to be ruled out, what of San Diego where the Spreckels' long ago built gigantic coal bunkers? But why should Honolulu, with its direct coal connections with Australia, Japan and British Columbia, be ruled out at all? It is the natural stopping place, between Panama and Yokohama of trans-Pacific

The only real advantage to California from the Panama Canal, as we see it, is a decrease of freight rates due to steamers competing with the overland railroads. But even this may prove illusive if railway and shipping trusts work together.

As for Hawaii the peril of yellow fever will go a long way to mitigate our enthusiasm over the larger field opening for coal men and ship-repairers.

HAWAIIAN BAND'S FAREWELL CONCERT A HUGE SUCCESS

Royal Hawaiian Band, which has been a "light house" has been entirely forat the Lewis and Clark Exposition for the past month, played its farewell concert last night before the largest audience it has had any time since it has been in Portland. Fully 2000 persons attended the night concert, and nearly as many were present during the afternoon. Both concerts were rendered from the bandstand at the foot of the

The audience for the two concerts were particularly enthusiastic, and the band was obliged to render encore after encore. The glee club received a tremendous ovation at the two concerts, and was called back again and again by the heavy applause. Nane Alapai, the Hawaiian vocal soloist, who accompanies the band, was also given a hearty ovation. Ellery's Band, conceded by critics to be the finest musical organization of its kind in the United States, opens at the Exposition this afternoon, and will remain until the Fair comes to a close. The concerts will be given in the bandstand when the weather permits, and at other times they will be rendered in the Auditorium. As owners of boats of different sizes will comete, a system of handicapping will prevail, arranged doubtless by the Pacific Coast Yacht Club.

It is altogether too early to give an idea of the probable contestants, but the Hawaiian promoters expect the Lurline, Nixie, Lady Ada and Martha to enter. It is doubtful if Lady Ada will be a contestant. Gus Newell would like to participate, but he fears that he can not get away from business for the time the race would take.

H. H. Sinclair, the Pasadena yachting enthusiast, sailed around the South seas last year on the Lurline. He was much pleased with his trip and is almost sure to take part in the deepsea race between San Francisco and Honolulu.

It is also said that the Atlantic, winner of the deep-sea race on the other side of the water, may enter for the San Francisco-Honolulu race. In this event the race would create general interest in yachting circles all over the world. A number of small yachts, including the Casco, Josephine, Volante, Tolna and Rover, have sailed over the

There are twenty-seven yachts in the islands, many old-time San Francisco favorites being included in the list. The news that the Punahous would not enter a team in the senior football league occasioned widespread surprise and comment yesterday. In past years the Punahous have al-

ways been the first in the field and have been bad to beat, winning the championship in 1901, 1902, 1903. The Punahou Athletic Association

is a strong one, backed as it is by the college alumni, and there should be little or no difficulty in getting enough men to take the field.

There is a possibility that the absence of the Punahou representative from yesterday afternoon's meeting was not without reason and there is more than a chance that the Puns are talking over the situation among themselves and want to see just where they stand before committing themselves at a meeting.

Incidentally, at the gathering yesterday afternoon, Percy Benson suggested to Capt. Schofel, that, in the event of the Punahous not entering a team, the Mailes and Infantry play a championrence. La Paloma recently figured in ship game on Christmas Day. The officer took the matter under considera-

MISS LYDIA J. FARRELL.

A Case of Dyspepsia.

Dyspepsia is caused by acute inflammation of the nerves of the stomach.

It is by nervous energy that the muscles of the stomach contract and expand, and the digestive fluids are secreted. The muscular walls of the stomach must be kept in vigorous action until the process of digestion is made complete.

The nerve fibres, like other tissues of the body, may become inflamed and diseased by neglect or other causes; then they must be nourished and their strength restored. It is when the nerve fibres are overstrained by worry of mind, overtaxing or neglect that they become exhausted and weak.

Dyspepsia is but one instance where the vital nerve force is necessary.

Discontent, ill-temper, low spirits, despondency, dizziness, sick headache, heartburn, palpitation of the heart, distension of the stomach, are some of the many forms that dyspepsia

The true cure must be the restoration to strength of the nerves which govern the digestive

MISS FARRELL'S CASE AN EXAMPLE OF THOUSANDS.

"I have been greatly benefited by the use of Paine's Celery Compound. Until I tried it I was a great sufferer from dyspepsia and constipation. I spent considerable money trying various preparations without success, until I tried the Compound. Before I completed the first bottle I noticed a change for the better, but I continued until I had taken six bottles in all, which effected an entire cure. I feel better to-day than I have at any period of my life. It affords me great pleasure to indorse Paine's Celery Compound." Lydia J. Farrell, 129 DeKalb Avenue, Brooklyn, N. Y., August 12, 1904.

Paine's Celery Compound is curing thousands of dyspeptics every day, in just this way. By feeding and restoring the nerves to their full strength. It never fails to cure.

Sick headache, palpitation, dizziness, and heartburn are usually relieved by a single dose of Paine's Celery Compound.

Remember this,-Paine's Celery Compound is the prescription of one of the most famous physicians this country has ever known, and all reputable Druggists sell and recommend it.

A very small structure has been erected in the mauka end of the slip between Naval Docks Nos. 1 and 2, overhanging the water, by Lieut. Slattery, U. S. A., in which a tidewater gauge has been installed. It is a continuous water gauge and is to be used in connection with Mr. Slattery's work

with the harbor development. Lieut. Slattery says that plans are in contemplation for the erection of three more lights, one at the Leper Settlement, Molokai; another on the south point of Hawaii and a third on the west coast of Hawaii. They will be beacon lights. There is a lack of money in the department for such purposes, and Lieut. Slattery has been asked to submit estimates of the cost

before proceeding to build them. Hospital Steward Fred Bryant, U. S. N., has been detached from the naval station at Pago Pago, Samoa, to the U. S. S. RHEUMATISM AND STOMACH CATARRH CURED. DR. McLAUGHLIN-Dear Sir. One could not imagine the siege of

suffering I passed through from stomach trouble and rheumatism. I was subjected to severe drug treatment, stomach pump treatment and diet treatment, without the least relief. I grew disgusted with them all, and as a last resort tried your belt two years ago. In three days I could fling away my cane and in three months was a new man, entirely cured, and felt better than I had for years. Several of my friends have since purchased your belts. Canadian-Australian Royal Mail Line TROLLEY LINE AFFECTS Steamers running in connection with the Canadian Pacific Railway Co. THE NAVAL WIRELESS FOR VANCOUVER.

The dynamo at the naval wireless telegraph office is now operating, and at various times during the past few days it has been run to charge the storage batteries which supply the power for transmitting messages, as well as the current for the electric lights with which the dynamo house and office-residence of the operator are furnished. Washington has also been notified that the wireless plant is

in working order. But at the same time one difficulty has been experienced. Whenever message is being received and an elec MANCHURIAOCT. 4 COPTICOCT. 3 tric car passes by on Allen street, the OCT. 19 MONGOLIAOCT. 27 dots and dashes are somewhat discon certed. This is attributed to the sparks which fly from the trolley. These get mixed up with the telegraphic waves seeking the wire on the top of the 156-foot mast, and occasionally there is a jumble. This will be over come in time, when the instruments are more completely adjusted.

Probably the first opportunity to use the naval wireless plant will be with the Italian eruiser Calabria which has already sailed from San Francisco for Stores-Oregon block. Honolulu. The portable office-residence is a

model structure. The wireless apparatus and office fixtures are in one room. Near by is a good sized dining room, then two bedrooms, then a bathroom and a parlor. A corridor faces pared to issue, to intending passengers, Coupon Through Tickets by any rail- all the rooms. These are well furnishroad, from San Francisco to all points in the United States, and from New ed. Attached to the dining room is a kitchen, supplied with a large oil range and a pantry.
