Four Awards Given To School Graduates

The Hiho Japanese Independent School, a Japanese school held at the school hall last Tuesday, awarded the following students:

- Congratulations to John Ono for his academic achievements.
- Recognition for Lynn Tanaka for his extracurricular activities.
- Honors for Emily Nakamura for her leadership qualities.
- Prizes for Michael Tanaka for his sports achievements.

British ¶Panorameric Train From Crete Lesson

The British ¶Panorameric Train from Crete lesson was held yesterday afternoon. The train, which contains a variety of exhibits, was sponsored by the British government. The train has been traveling across the United States to educate Americans about the contributions of British soldiers during World War II.
"...her escort is that he has an..."

"...that his reason for not acting as..."

"...the latter was properly ins..."

"...the play." said Terry.

"...a spirit of recklessness swept..."

"...she's over there." said Valerie, but I'm catching a train, "...Don't wait for me.""
Air Corps Cadets Receive Pointers
From Woman, Veteran 'Chute Jumper

TULARE, Calif. — Mrs. Faye Louise Cox, who claims the title of world's champion parachute jumper, says she still enjoys jumping from high-flying planes even after 11 years and 494 jumps.

She is a member of the office staff of the Rankin Aeronautical Academy at Tulare and is known in the service as a 'chute rigger, her duties including the inspection and packing of parachute gear.

She has been assigned to instruct air corps cadets who will report for training under her supervision, in the care of parachutes.

Academy officials said they believed Mrs. Cox was the only woman 'chute rigger in the country training air cadets.

Marion Cox, her husband, air-shoe operating, said he let her make her first jump in hopes of curbing her of the urge.

"It didn't work," Cox said.

They live in a small Sebastian town while Mrs. Cox was on a barnstorming tour. She said she hadn't even had an air-plane ride until then. Two weeks later she joined the show.

Included in her record of 494 jumps are two balloon ascensions and the world's record for delayed opening parachute drops for women.

A list of instructions prepared by Mrs. Cox for beginners in parachute work emphasized the following points:

Clear the plane, stiffen the body, pull the cord and remain in contact with the ground. Touch the ground first with the toes, bend to the knees—never stand up—and above all never worry about the 'chute opening. If it was properly packed it will open.

Mrs. Cox said she weighs 115 pounds and absorbs a shock of 1,115 pounds when the parachute opens after a delay of 10 seconds of her delayed jumps.

CABBAGE IS GOOD FOR TEETH

CHICAGO—The cabbage head, long a subject of ridicule in the kitchen and song, may now be held in high regard. It has been crowned with laurels in the medical world.

Three Ohio State University scientists, R. C. Burrell, H. H. Brown, and Virginia P. Britton, reported in the magazine Food Research that fresh cabbage ranks high in the list of fruits and vegetables containing vitamin C, which helps prevent tooth decay, bone softening, and muscle weakening.

The Journal of the American Medical Association, commenting on the findings of the Ohio chemists, said, "The vitamin C requirements of the adult may be supplied by a small portion of coleslaw." Hot cabbage, however, is not as rich in vitamin C as raw cabbage, the scientists pointed out.

Any with a smaller gathers that can be disintegrated by high speed electrons. That generator developed 1,750,000 volts; this one is designed to develop 8,000,000 volts.

The apparatus which is nearing completion will operate under a gas pressure approximately 10 times as great as that of the atmosphere. It resembles a railroad "tank car." It has a steel container 40 feet long. One section is mounted on wheels, so that the generator proper will be accessible for inspection or repairs. Fresh gas, the same used in many electric refrigerators, will be forced into the tank to improve the operation.

The experiments, which were started by Dr. George B. Collins, will be directed at the beginning of the machine's operation by Dr. Bernard Wulff, of the physics staff at Notre Dame. Dr. Collins has been granted a leave of absence to work on a special government research project at the Massachusetts Institute of Technology.
Pirates Play All-Hawaiians. Crescents Take On JAC

Malnich Sporting

Louis Henry Gehrig, more commonly known as Lou Gehrig the Iron Man of baseball, has passed away but will live on in the memories of millions of fans of the national pastime for many, many years to come.

Private funeral services were held at 10:00 a.m. this morning at the home of Mr. and Mrs. H. J. Gehrig, Jr., 264 East 30th Street, New York City. The body was cremated.

Since breaking into the New York Yankees lineup in June 1, 1923, Gehrig was the most durable baseball player in the game’s history, never missing one game until April 30, 1939, when he played his last game before becoming ill.

He ran up the amazing record of playing 2,130 consecutive games.

In respect to his long and faithful services, the New York Yankees club released his “No. 4” and gave the ball players personal ownership of his locker in the Yanks’ dressing room.

A native of New York, Lou was born of German immigrants in 1903. Gehrig’s playing career was cut short during his Yankee career. His top salary was $36,000 in 1939, when he played his last game before becoming ill.

His lifetime batting average in 2,162 games was .340. He played in seven world series games and batted .361. He was .340.

In the Majors, his lifetime batting average in 2,162 games exceeded only by Babe Ruth and Jimmy Foxx.

Gehrig was first to break a record. The baseball experts predicted that this record would never be broken. It was.

If Gehrig, through his illness, was able to inspire the nation, he developed a deep, abiding and patriotic loyalty.
