and Japan at the present moment. The people who should be most thankful that in both Washington and London the two statesmen have been wise enough to prevent the possibility of spreading the conflagration into the Pacific. Again, despite the cries of the militaristic element in America to get into the European conflict at the present moment, Roosevelt, perhaps in retaliation, has ordered all Axis funds in America to be frozen. Germany just one more chance before it will start shooting.

In the south Atlantic the American freighter Robin Moor, which was torpedoed and sunk last week in the eastern Mediterranean, especially at Haifa, where it attacked two British destroyers berthed at Haifa with large quantities of shipping and cargoes to the United States. The Nazi airforce invaded this coast, causing considerable damage to both the British destroyers. This year the Kona Chikara, an American freighter, was also sunk in the western Mediterranean, with a corresponding amount of cargo lost.

TALK ON NATIONAL DEFENSE

EDITOR'S NOTE: The following is the talk given by LT. Col. M. W. Mounts at the patriotic rally of the Oahu Citizens Committee for Home Defense, held at the McKinley High School Auditorium, Honolulu, on June 13.

THE CITIZEN AND NATIONAL DEFENSE

Follow Americans, distinguished parade. In behalf of General Short and of the Army in Hawaii we want you to be the eyes, the ears and the mouth of America. Let us consider the form of attack we may be called upon to meet. The most dangerous attack is the propaganda attack and the so-

and greatly simplify the problems of our government and its authorities; and fifth, to weaken our sense of responsibility by all.

our senses of America must be defended these five enemy objectives by all working together with every means in our power. By so doing we will go a long way on the road to national security and greatly simplify the problems of our government and its authorities; and fifth, a patriotic sense of personal responsibility by all.

Our counter objectives to meet this propaganda attack are suggested by the attack itself. They are: first, an abiding faith in the American way of life and iron determination to defend it at all costs; second, national unity; third, the information of fear; fourth, confidence in our government and its authorities; and fifth, a patriotic sense of personal responsibility by all.

I shall begin with the American way of life, which is our answer to the challenges of all other ways of life which are being advocated so extensively throughout the world today. One of the greatest contributions that any individual can make to this country is to have and to defend an argument and a faith in their own way of life... a faith so strong as to believe that he will resist all attacks upon it from whomsoever source they may come and make any sacrifice... even of his very life if need be... to defend it.

We in America have come to accept the advantages of our way of life and to forget that our ancestors had to build these advantages by means of the hardest kind of work and personal sacrifice, that many brave men have fought and died to attain and maintain a way of life whose virtues have drawn the sons and daughters of all the world to our American shores.
