ASAMA MARU TO DOCK ON THUR. NOON

39 miles offshore, the 25,000-ton coal-burning vessel will anchor in Honolulu Harbor at Noon on Thursday, under the command of Captain Oida, to load and unload coal for the Matson Line. This vessel, which was built in 1913, is the longest vessel under steam and has a length of 600 feet. She is now utilized in the Pacific Coast trade and has made seven trips to Hawaii in the last season.

MATSON ANNOUNCES FREIGHT RATE INCREASE

SAN FRANCISCO, July 28— The Matson Navigation Co. has announced a general increase of approximately 10 per cent in freight rates between San Francisco and Hawaii on freight paid at the time of shipment, effective September 1. This is due to the rapid rise in the cost of operation since the war began. The previous rate was 30 cents per hundredweight.

Germans Say HAWAII Sailing Now

NEW YORK, July 28—A Hawaiian newspaper dispatch of July 26, attributed to the German Consul at Honolulu, states that the Hamburg-America Line is sailing for Hawaii. The government has not confirmed the report.

SOVIET-JAPANESE RELATION NOT CHANGED AT ALL

TOKYO, July 28—The Japan Times and Advertising specialty announced that the Soviet-Japanese trade relations have not been changed at all. The government stated that the new policy on Russian imports was not intended to affect trade with Japan.

ANNOUNCEMENT FOR FREEZING RESULTS MADE

TOKYO, July 28—A detailed report from the Foreign Ministry of Japan states that the freezing act, which was ordered by the government, is to be extended to a number of Russian imports. The Ministry also announced that it was considering the possibility of freezing the trade with Russia.

ANNOUNCEMENT OF RELATIONS IN ECONOMIC SECTORS

WASHINGTON, July 28—A new announcement was made today, stating that the American government is not changing its policy of economic disengagement from Japan. The announcement stated that the new policy is designed to ensure that Japan will not receive preferential treatment over other nations.

NOMURA NAME WAKASAKI FOR JAPAN SOJOURN

TOKYO, July 28—A special message from the Foreign Office states that the government is considering the possibility of sending a representative to Japan to discuss economic matters. The government also announced that it is considering the possibility of increasing trade with Japan.

MATSUZAKA IS MADE LIEUTENANT

HELFigER, July 28—Commodore Matsuzaka, Japanese admiral, is to be made a lieutenant in the U.S. Navy on September 1. The announcement was made by the Department of the Navy.

LATIN AMERICA TOWARD SOVIET IN PERSPECTIVE

By Lawrence S. Haas

The germ of the Latin American strategy, it is generally believed, is a reduction in government's role in certain economic areas, and certainly a more important role for the private sector in the economy. This is evident in the recent developments in Latin America, particularly in the area of economic planning.

In a few exceptions, Communism has been regarded as a menace in many countries, and certainly in some. The United States has been most active in its efforts to prevent the spread of Communism in Latin America. The United States has been particularly active in the area of economic planning, and has been successful in its efforts to prevent the spread of Communism in Latin America.
The wealthy Mrs. Nina Arkwright is found murdered in a dining room of her house. The police, who have been called to the scene, are working to determine the cause of death. Mrs. Arkwright was last seen alive by her maid, who entered the room at about 10:00 PM. A note was found on the floor of the room, which reads: "Help! Someone is in the house!"

The police have found a number of items in the room, including a wallet, a watch, and a ring. The wallet contains several hundred dollars in cash, as well as a few personal items. The watch is a diamond-studded Rolex, while the ring is a large emerald set in gold.

Experts are studying the cause of death and have ruled out suicide as a possibility. The police are looking into the possibility of a murder. The case remains unsolved at this time.

---

The police have arrested a suspect, who has been identified as John Smith. Smith, a recent transplant to the area, has a history of petty theft and has been known to frequent the area. He has been linked to the murder through DNA evidence found on the wallet and watch.

The trial is scheduled to begin next month, and the community is eagerly awaiting the outcome of the case. The family of Mrs. Arkwright has been devastated by the loss and is seeking justice for their loved one.

---

The suspect, John Smith, has been found guilty of murder and is currently serving a life sentence in prison. The case has been closed, and the community can breathe a sigh of relief.

FINGER PAINTING SOOTHERS TENSE SPASTIC CHILDREN

DURHAM, N. C., July 29 (UP) — The medium of finger painting is opening up a new world of action and color for physically handicapped children who are unable to control muscular control because of spastic paralysis.

Children in the spastic dormitory of Duke hospital for the first time in their lives are able to express themselves through muscular tension, tension which, sometimes, can bring on a charge of wuthering movements.

The finger painting technique was originated by Miss Ruth Rich, Paxton Shaw, famous teacher, painter and designer. The technique is simple — children dip their fingers into colored paint and "usher" the colors onto a board.

Remarkable pictures sometimes are created by the children, who are unable to hold drawing pencils or brushes in their hands. Occasionally and original designs are formed. The designs, adaptable to textile prints, may be a means of some of the "spastics" earning a living.

BRUSHES FAIL HANDS

Miss Isabel Moore, who supervised a project in rhythmic drawing in color for relaxation, ran into difficulties when she found the patients could not hold brushes or crayons very well, and Miss Shaw suggested finger painting.

There are no set rules in finger painting, and the child is left to create as he will. His senses are stimulated by the pleasant textures of the paint, and pupils who could not remain interested in one subject more than a few minutes were engrossed for hours in finger painting.

One child who has been unable to articulate an individual word, saw the other children working and pulled the hem of Miss Shaw's skirt to attract her attention. She turned and he asked: "Let me do it."

Other children, whose hands had been held rigid and tense, relaxed for the first time as their fingers discovered the pulsing paste-like paint.

"WHAT HAPPENED DURING ABROAD"

Miss Shaw developed the technique while abroad, opening her first school in 1925 in Rome. In 1928 she was called to Paris to give a public demonstration. She lectured at the Sorbonne, instructed in the人才队伍 School, and arranged for six exhibitions of the work of her pupils. Later she came to America and demonstrated finger painting at the Dalton School in New York.

Patients range in age from 4 to 14. Older girls, she said, practiced patterns while younger children suggested a youthful vocational aptitude in the field of textile design. She hopes stamping

Metals Problem Faces Toymakers, Play Soldiers' Ranks May Be Thin

CHICAGO (UP) — Whether that chunk of pig iron will end up as a toy solider in Johnny's sock or a helmet on his older brother's head in big talk among toy manufacturers.

Christmas is five months away, and the toy makers report they already are encountering difficulty finding sufficient raw materials and experienced labor.

Plastic, rubber, white metal — a combination of basic metals — are materials widely used in making toys, but they also figure largely in the nation's rearmament, the toy manufacturers have found, and they admit the children must be protected before they are entertained.

But if toy manufacturers can get materials, they will be able to operate at capacity to help Santa Claus deliver the largest sack of toys in years perhaps the largest in history next Christmas.

A survey of toy merchants revealed that buyers are starting early to get Christmas stock, entering the market 90 to 120 days ahead of the customary period because of rising prices caused by increased labor and materials cost, and uncertain delivery schedules.

While all toy manufacturers are concerned over obtaining materials and labor, the older ones are somewhat encouraged by the history of their industry during the World War. At that time, they remember, buyers were declared necessary to the morale of the younger generation, and they believe that of this policy is followed again, Santa Claus will get around just as usual.

Dealers say the 1941 Christmas will be nearer to an "All-American" event in the nation's history, as the war has stopped import of fancy toys and trinkets from Europe.

Although metal goods have gone up about 10 per cent and other line of toys increased prices from 5 to 10 cents, dealers in turned the increased price will be more than offset by the saving in American-made goods.

It will be hard to get some things, however, from the war atmosphere even when children are watching through toyland, manufacturers predicted.

THE GREAT AMERICAN BROADWAY

"The Great American Broadway" is a musical comedy opening for the first time at the HiLo Theatre today. Jack Oakie restores a present personal experience for the audience when he portrays a group of young people who started commercial radio broadcasting back in the days of crystal sets and hand crank.

Actually, Jack Oakie was one of the nation's first radio "stars" and he is billed with a present experience to radio. He is giving a personal account of the earliest days of radio.

In the picture, after Jack Oakie's "band" has been broken up, he is one of the principal in a team of young people who start radio broadcasting.

"The Man Who Lost Himself," the story of the last "Great American Broadway," are many of the biggest hits of the season, one of which is the Four Boy Spots and the Boys of the Coast Charley's." The various "Americans" in the cast and have passed away.

The four members of the cast of "The Great American Broadway" are Mary Persons, Dick Richards, Frank York, and Bob Nolan and his singing partner are also featured.

"The Pinto Kid" is the story of the first real radio broadcasting company, and Bob Nolan and his singing partner are also featured.

"The Pinto Kid" is the story of the first real radio broadcasting company. It is the story of the nation's first real radio broadcasting company. It is the story of the nation's first real radio broadcasting company. It is the story of the nation's first real radio broadcasting company.
