Prosperity ...

It looks as though we now have a profit motive at work. People are spending money freely because they feel that they will be making a profit from it. The old saying, "spend money if you can," seems to be the rule of the day.

I MAKE IT

SEEDLESS APPLE UNDER U. S. WING

HUNTINGTON PARK, Cal. (UP)—Mrs. Libbie Wilson and the Department of Agriculture have formed an unusual partnership in hopes of making “coreless and seedless” apples as common a table delicacy as the navajo stall.

Mrs. Wilson’s part of the bargain is to go on a hunting trip for a low tree in her backyard which bears the unusual fruit and to send samples to the government’s laboratory. The department’s job is to have the horticultural experts examine the specimens and decide their time and skill toward making the feaured “apple core” as usual as the table.

At present all hands are experimenting with the blossoms of the tree. This is the first time agricultural officers have seen them or have had the opportunity of investigating valuable clues which the blossoms contain. Mrs. Wilson has been gathering choice blossoms and pressing them carefully for shipment to Maryland, where the experiments are being carried on.

First notice of the new fruit came last year when Mr. Wilson sent a few handfuls of samples to the government. Department officials examined the seeds and decided that the apple is worthy of attention. It is said that the apple contains a number of valuable characteristics, such as a large fruit, a short growing season, and a hardiness which may make it an important variety to the apple growers of the United States.

No other small dogs have been found in New York State Indian burials, this is the first time remains of larger hound dogs have been unearthed by scientists.

“I better get out of here, after all, and it’s a waste of time. I had nothing to lose, but I couldn’t lose it.”
