TOKYO, Sept. 8 — The Nikko Ni­chiren sect, which has been one of the most active of the Buddhist sects in Japan, announced yesterday that it was about to close its headquarters in Tokyo.

The move, it was explained, is due to the recent development of the sect's activities, which have grown steadily since the late 19th century.

The announcement was made by the sect's president, who said that the move was being made in order to provide more space for the sect's activities.

The sect, which has a membership of over a million, has been one of the most active in Japan in recent years, and has been known for its strict adherence to the teachings of Nichiren, a 13th-century Japanese Buddhist monk.

It is expected that the sect's new headquarters, which will be located in a new building in Tokyo, will be completed within the next few months.

President's Speech

The president of the sect, speaking at the opening ceremony of the new headquarters, said that the move was a significant step forward for the sect.

"We are entering a new era," he said. "This is a time of great change, and we must be prepared to face the challenges that lie ahead.

"The new headquarters will be a symbol of our commitment to the teachings of Nichiren, and we hope that it will serve as a inspiration to all who seek truth and understanding in their lives."

Acknowledging the importance of the move, he added: "We are grateful to all who have supported us in this endeavor, and we look forward to working with you in the future."
THIRTEEN TIMES, 26. and "Then you don't understand me," he said contemptuously. "Call it a hold-up!"

"Well about Lanning?"

"Is that what you think? Yow aren't one to take chances."

"Why should he think I've got any eye on him?"

"He was pretty close to your dad—aren't you?"

"He was the cowboy with the ten-gallon heart—and his pony, the mustang Man O' War—"

Macau University Extension Foos

A demonstration of cooking green leafy vegetables was given by Mrs. T. M. Maeda, followed by a demonstration of making goya-kei by Mr. H. S. M. Maeda. The demonstration was held at the University of Macau on Thursday evening at the school of agriculture.

The method of boiling goya-kei was demonstrated, and the students were given the opportunity to taste the dish. The goya-kei was served with a side of white rice and was found to be delicious.

Officers for the year are Mrs. Eliza Ramos, president; Mrs. Susan Lam, secretary; and Mr. Peter Chan, treasurer. The club is planning to hold a meeting on the first Monday of each month at the school of agriculture.

New members who have enrolled this year were Misses Elizabeth Wong, Lillian Lee, and Rose Wong. The club is looking forward to an exciting year of activities.

THE WAVE

"The Nurse's Secret" is currently being shot at the Hollywood Studios, and will be released in January. The story is about a nurse who falls in love with a handsome surgeon.

At one time, she was a teacher, but she gave up her job to become a nurse. She is now a successful nurse and is loved by all who know her.

The film stars Myrna Loy and William Powell, and is directed by George Cukor.

THE HAWAII MAINICHI

Mainichi Sportorial

After a successful inaugural in which they swamped the 29th Infantry Volunteers 26-0 in an exhibition game, the 1941 squad of the University of Hawaii Rainbow football team departed for the mainland last week. Friday afternoon the Rainbowas will play two games while away, one against the Portland University on the night of Friday, September 19, and the second on Wednesday, September 24, against Amos Alonzo Stagg's College of Pacific gridiron team.

Handed by co-coaches Luke Gill and Tommy Kondokuboi, thirteen players have been selected to make the squad. Accompanying the team will be Dr. N. M. Benyas, team physician; Ralph Tampion, manager; and Ricetti Tod and F. Elia, student managers.

Players selected were:

Ends—Herold Kemani, Lloyd Cougden, Tom Pedro, Reddy Albergona.

Tackles—Axel Silen, Rene Watanuki, Lutah Tiki, Chesty Musomura.

Guard—Chin Do Kim (cocaptain), Emery Orellihs, Henry Hamasaki, Wallace Doo, Jerry Smith, Albert Choy.

Center—Kai Boong, Aroon Noff, Sam Harry.

The whole party of twenty nine will be back on the same boat on Wednesday, October 2.

According to an announcement made by T. T. Shields of the Associated Oil Co., thirteen amateur football games will be broadcast over the local territorial stations over the 1941 season. The broadcasts are being sponsored by the Associated Oil Company. The fifteen games will be broadcast and the stations through which they will be heard are as follows:

September 27—California vs. St. Mary's—KGU.
October 4—Stanford vs. UCLA—KGMB, KHBC.
October 11—USC vs. Oregon—KGMB, KHBC.
November 5—USC vs. Stanford—KGMB, KHBC.
November 12—California vs. Oregon State—KGMB.
November 22—UCLA vs. Santa Clara—KGMB, KHBC.
December 6—USC vs. UCLA—KGMB, KHBC.

Sapphire Mining

(Continued from Page One) Synthetic sapphire—stones in 1931. Synthetized sapphire is a substance that was not found in nature. It was created by a process known as the Caro Synthesis technique. In 1935, 3,000 sapphire crystals were synthesized. To this day, the process is still used to produce sapphire crystals.

In 1938, a group of miners and engineers began to focus on the potential of sapphire mining. They discovered that the material could be used in electronic components and was especially useful for medical applications. This led to a resurgence in interest in sapphire mining.

Sapphire mining is a complex and challenging process. It involves the extraction of raw materials from the earth and the purification of these materials into usable products. The process is labor-intensive and requires specialized machinery.

Sapphire mining is not without its challenges. The material is difficult to mine due to its hardness, and the process is expensive. However, the demand for sapphire continues to grow, and the technology is developing.

WAIKEA UOKA SCHOOL TO BUILD PRACTICE UNIT IN PIG RASING

(Continued From Page One) The school has been working on this project for a number of years. The unit will provide valuable experience for the students and help prepare them for future careers.

In pig raising, the school has been focusing on the use of modern technology and innovative farming techniques. This has included the use of automated feeding systems and the application of precision livestock management principles. The school has also been involved in research and development of improved pig breeds and improved production systems.

The project is supported by the Hawaii Department of Agriculture and the USDA. The school has received funding from both organizations to support the project.

Southwestern

The Southwestern region includes the states of Arizona, New Mexico, Utah, Colorado, and Wyoming. It is characterized by a dry climate and an arid landscape.

These states are known for their dry, arid climate, with temperatures ranging from hot to extreme in the summer months. The region is known for its agricultural and livestock industries, particularly in the states of Arizona and New Mexico. The area is also home to a number of national parks, including the Grand Canyon National Park in Arizona and the Mesa Verde National Park in Colorado.

The region has a long historical and cultural heritage, with Native American cultures playing a significant role in the area. It is also home to a number of modern communities, including the Hopi and Navajo tribes, which continue to preserve their traditional ways of life.

OFF TO BEATE THE WIND—Adolf single of dust and smoke, tanks, command cars, reconnaissance cars, and an armored train were rolling through Camp Park, Hawaii, Monday morning. A large number of soldiers were working in the area, setting up a base camp for a forthcoming military exercise. In war games, vehicles are part of a highly regimented army of standardized equipment designed to facilitate quick mobilization and efficient movement in combat situations.
