Central Control

Organ Decided

TOKYO, Oct. 10—(Newser)—The Japanese government said yesterday that they have held a conference in its third day of meeting at which the central points of its policy toward the United States have been decided. The meeting was held at the Foreign Ministry.

THE HAWAII COUNTY CLASSIFICATION- COMPENSATION BILL SHOULD BECOME A LAW

The senate bill 58, which has reference to the Hawaii county classification of certain persons, has been passed by the houses. Having passed the two houses, it is now up to the governor. We recall that a classification bill covering the entire territory was passed in the 1929 legislature, and it was vetoed by the governor upon the ground that the territory was receiving the benefits of federal citizenship. Under the law the territory itself could not pass such a bill failed.

If the pending classification bill for this county becomes a law, a large number of Japanese citizens, including farmers, hotel keepers, hospital workers, and other individuals, will be eligible to receive the benefits of the federal citizenship. The bill is not expected to win the approval of the governor, and it is probable that the bill will be vetoed.

Skin Tests Will Be Given School Students Soon

In furtherance of the tuberculosis campaign, the health department is scheduled to give skin tests to all school students in the county in the next few weeks.

Transportation Tax Effective Today

Effective today, persons paying transportation over 30 cents must file tax returns. The rate of 1 cent per trip will be 10 percent of the cost of each trip, if any. The law went into effect at the start of the school term.

Plans Are Made for the Christmas Seal Sale

The drive was started on Monday, and it is expected to be successful. The chairmen of the drive are Dr. Henry Warner and Dr. Henry Nitta, chairman of the Seattle Federation of Public Health.

President Roosevelt Following Middle Course

Giving China Minor Help and Flirting with Japan

WASHINGTON, Oct. 8—Drew Pearson and Robert Al- bert, although they acknowledged that China is having such a hard time in obtaining American war materials that Chiang Kaishek has retained Tommy Corcoran from the Brain Trust to carry on his lobbying efforts.

They added that Chiang especially wanted language barriers for launching air attacks on Japanese cities but Cor- coran has not succeeded in obtaining them chiefly because of his lack of knowledge of Japanese and his failure to be an effective lobbyist.

Committees Are Announced by President

The new committee, which will be known as the "Committee on the China Emergency," will consist of five members: Clayton J. Chamberlin, chairman of the 1931 Senate committee; Henry M. Carter, chairman of the 1938 Senate committee; and Charles G. Morrison, chairman of the 1936 Senate committee.

President Roosevelt follows a middle course and "flirts" with Japan. This is the best course, the most effective one, he says, to keep China in the war and prevent Japan from taking advantage of its success in the Pacific war.

Sales of Bonds and Stamps

Target of sales, which are expected to reach 22 million dollars, is $20 million. The bond and stamp sales were begun on Monday.

The Emergency Food Production Commission has been authorized to purchase from the farmers of the Eastern States and the Middle West a certain amount of milk and butter products.

Pursuit Ship Crashes

Killing Lone Pilot

Pursuit ship of Peter Nakano of the Pacific class will meet tonight at the Hilo airport and bring to an end the pursuit of the enemy ship, which was armed.

Carryon's hasn't succeeded in obtaining them chiefly because of his lack of knowledge of Japanese and his failure to be an effective lobbyist.

TRAVELER, HO!
JEANNE BOWMAN

On the day Anna McGillicutty is to marry Doctor Henry Adams, she is tossed about in a bumpy ride on a hay wagon, then breaks a hip. The marriage, presented as a result of love between the two, is soon after annulled. The story is about a woman who is caught in a web of lies and deception, eventually leading to her downfall. The novel is about the consequences of deceit and the power of love.

CUTTING DOWN ON ELECTRICITY

As government departments take steps to cut down on civilian consumption of unnecessary materials, the consumer is gradually being educated in economy. We have learned, for instance, as a result of the gasoline shortage, how we can drive a car or at least gasoline than we have used in the past.

Now, because of a shortage of electrical power, we are to be taught how to get along with less electricity. Some have always thought that electricity was limitless. But now with an impending shortage, due to the great amount of power needed for running defense plants, we are offered devices for cutting down electrical bulbs. Amongst these devices are:

1. Turn off lights when they are not needed.
2. Watch the fluorescent light which sometimes burns all night.
3. Recover on hot water if you have an electric water heater.
4. Keep the thermostat on your electric water heater between 110 and 120 degrees, no higher.
5. Keep the radio on only when you are listening to it.
6. Turn off the electric fan when it is not being used.
7. Use very small bulbs for any urgently needed night lights.
8. Use all other electric appliances sparingly and frugally.
9. Your electric meter, toaster, small heater, washing machine, vacuum cleaner and refrigerator are now under close inspection.
10. Feed for Farm Animals, page 11. This will be a big saving.

CUTTING DOWN ON ELECTRICITY

How to Save Money for Tough Times Ahead

It is an almost hopeless job to save money. It is often thought that all expenditures are to be avoided at any cost. But it is not always possible to cut down expenses. In fact, it is often desirable to have a certain amount of money set aside for emergencies. This is particularly true in times of war, when the cost of living is likely to increase.

There are several ways to save money. One way is to keep a record of all expenditures and to make a list of all income. This will help you to see where your money is going and to avoid unnecessary expenses. Another way is to buy only what you need and to avoid buying things that you do not need. This will help you to save money and to avoid overspending.

It is also important to keep a record of all incoming and outgoing money. This will help you to see where your money is going and to avoid unnecessary expenses. It is also important to keep a record of all income and expenses.

U. S. S. Massachusetts Ready for Sea

**Mainichi Sportorial**

A timely reminder to local hard-boiled football eleven is how the announcement by the BHS Enforcement League, in the British Empire, will produce a spectacular sportsmanship statute which will again be at stake during the coming season. It is hoped that the BHS No. 1 sportsman, who is absent from the field, will resume his career at the United Kingdom.

Speaking of sportsmanship, it was good to hear the announcement of the BHS Enforcement League, which is a splendid statute that will produce a spectacular sportsmanship. The league is expected to be at stake during the coming season. It is hoped that the BHS No. 1 sportsman, who is absent from the field, will resume his career at the United Kingdom.
