**Famed Jockey to be Inducted in Army**

Jockey of the year, Famed Jockey, was commissioned by his draft board officials yesterday, for the Army service in South Pacific in the interests of the country.
CHAPTER XX

Dolores, having driven all the way to the army camp to try to find Jerry gone, returned to Jerry's cabin by the next day in a somewhat disheveled mood.

If she had found the engagement canceled, she should, she said to herself, have been glad. But she was not. If she had not seen Jerry in the car, she would have known, and she didn't want to know. There were some things she just couldn't afford to know. She was afraid of the consequences.

But she had seen Jerry in the car, and she had seen him with Dolores Kesten.

Checking behind a tree, she saw Dolores nearest the road, with Jerry between her and the cabin. There was something in his face and manner that she couldn't quite explain, but it was a sort of temporary curiosity, or just an attraction.

She wondered if, when she opened the road to Jerry's cabin, she had had time to think what she was going to say or do. Or if she would say or do anything. She had been told that Jerry had been shot in the arm.

If Erik would only hurry!

If I'd married him when I left the army, she thought, he wouldn't have gone back to the States. Now he was back, and he was not alone. He and Dolores were seated before the fireplace, reading. Ann sat up and compressed her lips. She couldn't be blamed. Erik was due back to the inn. She didn't care. Erik was due back to the inn.

If I had meted out to him what he had done, she thought, he would have stayed away. But she couldn't do that. She didn't have the nerve to do that.

BRAZIL

TRAVEL THROUGH PICTORIAL SOUTH AMERICA

SAD PAULO, energetic, progressive center of Brazil's wealth, industry — and coffee.

From the standpoint of industrial and agricultural importance, Sao Paulo dominates the Twenty States that constitute the United States of Brazil. In this State, an amazing development of natural resources is combined with an industrial life that challenges any of the world's great areas. More than 50 per cent of the nation's industrial production is centered here; there are more railroads in any other State, a higher production of wheat and coffee.

Most of Brazil's railroads are on flatlands, are located near, and are in close proximity to, the city. The coffee belt is traversed by a generous proportion of the State's population of 8,000,000. It is a map of the ingenuity with which coffee has followed a tortuous path through mountains, rivers, lakes, and valleys to the San Paolo plains.

City, once known as São Paulo, has been on a city of 3,100,000 in 1889 when coffee milling machinery was developed to process 2,000,000.

Sao Paulo—Santo Antonio

Some day someone will come to know the story of the city lying on a plateau known as the Triangle. It is a story that predates the city's earliest settlements — the time of the great Asian herdsmen. The plateau was developed to its present form of a railway that rises 2,500 feet in a space of three hours. The story begins with the port of Santos and the satellite Santos serves her well. This is a thrilling ride that has added another picture of the world's great areas. Here is the story of Sao Paulo:

The influence of the great coffee belt, extending from the interior of Brazil to the north, has gradually extended to the city of Sao Paulo. The coffee belt is the life of Sao Paulo, and the coffee belt is the life of Brazil.

Butantan Institute

The Institute of the coffee belt is the life of Sao Paulo, and the coffee belt is the life of Brazil. The influence of the coffee belt, extending from the interior of Brazil to the north, has gradually extended to the city of Sao Paulo.
