**Tinian casino applicants under investigation**

by Ronel B. Concepcion

The seven Tinian casino applicants, which submitted their proposals before the November 15 deadline, are now being investigated regarding their personal background and financial capability.

Commissioner Joseph M. Mendiola of the Tinian Casino Gaming Control Commission said that the seven applicants are composed of the following:
- Universal Resort Development, Inc.;
- Taga Beach Resort; Tinian Marine Resort; NS Development and Investment Corp.; and the Tinian Casino Resort Company.
- The international firms engaged by the gaming commission are Kroll Association Limited, to investigate the personal background of the applicants; Arthur Anderson & Co., the financial investigator; and the KPMG Peat Marwick, as the financial consultant.
- Kroll Association Ltd., according to a correspondence from the commission, is known as the "worldwide investigative leader" in the areas of asset searches, investigations, financial fraud, white-collar crime and other business-related matters.
- The financial investigator, Arthur Anderson & Co., "has extensive experience in assisting Gaming Regulatory Agencies in their financial and business investigations of gaming investors," he said.
- KPMG Peat Marwick, as the financial consultant, has 650 offices in various location throughout the worldwide and "has served Micronesia, with a full time staff in Guam, for over 25 years."
- He said that the investigation of applicants is the first stage prior to issuance of the license permit and that the payment to these investigators will partly come from the non-refundable $200,000 fee paid by each applicant.
- The cost of the investigation will be based on the scope of work that will be conducted to an applicant, he said.
- Mendiola said that the investigating firms started last week; took a look at the scope of things that need to be investigated.
- The investigators will submit to the commission a plan of their activity, "then we will sign the contract with them upon approval," he said.
- He said that the firms target date, to complete the necessary plans for the casino building itself together with their projections.
- After reviewing the master plan for the casino, which is subject to approval, "we will ask to submit the plans of the proposed casino building itself together with their projections.
- The Governor has also directed Manglona to obtain the immediate closing of the Depression site.
- The government has finally decided Monday to relocate the Puerto Rico dump to the Marpi Quarry as the new landfill site.
- Governor Lorenzo I. Deleon has directed Manglona to work with Planing and Budget Administrative Officer David Sablan, chairman of the Infrastructure Task Force, to meet with a group of developers regarding the construction of a separate sewage treatment plant that will be located on the northeastern tip of the island.
- Sablan said that he plans to discuss with the developers their plans regarding the construction of the treatment plant and the costs that are entailed in the project.
- The Governor also directed Manglona to work with Planing and Budget Administrative Officer David Sablan to look into means by which existing resources from the Executive Branch offices can be combined.
- Based on the findings done by the Guam based firm Dames and Moore regarding the proposed Marpi landfill, the Marpi Depression offers the best alternative for long term solution to the island’s future refuse disposal needs.
- The Depression was one of the major impact of the "worldwide investigative leader in the world."
by Rabel B. Concepcion

Colonel of Police, Republic of the Marshall Islands and the Federated States of Micronesia's entry into the CNMI, which obviously is a positive development for the islands, the administration has been fully supportive of their programs.

The administration has been fully supportive of the power and water improvement projects of the Commonwealth Utilities Corporation. The government has also been pursuing the realization of the Puerto Rico Dump to the Marpi area which has been tacked as the site where the new landfill will be relocated.

A feasibility study from Dames and Moore revealed that the utilization of the dump to the waste disposal problem of Saipan. It is estimated that based upon the current growth of the island, the depression will be enough to store the needs of the island for the next 25 years.

The study also revealed that the area will not experience any water since it is situated in an isolated area on the island. Groundwater resources will also be preserved since studies reveal that the depression area does not have potable water.

This is why the government has decided to assure that the old 90’s dump will be finally closed. It is now the time for the public to also comply.

We can help the government by making sure that we observe the proposed rules. It isestimated that the call of the government to stop the burning at the Puerto Rico dump site. If the government has already participated in the recycling program cans for kids, similar programs should also be encouraged to increase our awareness on the benefits of recycling and other means by which we can dispose of trash.

We can also help alleviate the problem by making sure that no illegal trash can be placed in plastic to avoid spillage. Now is the time for us to be alert and cooperative. The government has already established a committee to monitor the condition of the depression site. They are also aware of our awareness on the benefits and other means by which we can dispose of trash.

The Commonwealth of the Northern Mariana Islands, a country in the Pacific, is a владе owned by the United States. It is a foreign country. We are only a small Commonwealth in Political Union with the United States. All of the provisions for the United States Constitution’s purpose and the protection of the rights of citizenship are applicable to the Commonwealth. The Commonwealth’s rights are respected, and they are vigorously enforced by the government. If we are not held in the same light, then the government is not doing its job.

I would like to see a Commonwealth with a government that will ensure the respect of our rights as Commonwealth citizens. The government is expected to ensure the safety and quality of the act in the Commonwealth. They have failed. Instead, they have encouraged the actions of Corrections, Mr. Oden will be eligible for parole within a very short period of time. He said that the association needs to “utilize ‘sports experts’ and coaches” to strengthen the basketball program.

First public library ground breaking ceremony Dec. 11

A ground breaking ceremony for the CNMI's first public library will be held Tuesday, Dec. 11, 1990. The site in Susupe, Civic Center across from the Library, will be officially opened on its future site in December. The new building will be attended by government officials and other members of the community.

The Public Library Task Force formed the decision to develop a public library to be a single story, 2,500 square foot facility that will eventually blend in with the Civic Center and the surrounding buildings. The Library will be located on the site of the present Library.

The Public Library will definitely be located in the Civic Center and the Library building. The library building has been given by MPLC, with the support of Governor Lorenzo T. G. Gutierrez.

Other members of the Task Force, established on May 29, 1990, by Governor Ignacio Dela Cruz, are: Department of Education Elizabeth D. de Leon, Helen M. Castro, and Nansan M. Janezic.

A medical examination performed for the facility at the Civic Center revealed that the library building will be located on the site of the present Library.

In the future, the library will be used by the community and governmental units.

The police officer was re-instated to his position.

The guard is under administrative detention.

LaFealty, Director of the Commonwealth Libraries, said he is pleased with the commitment and support given by the community for the library project.

The press release indicated a high-ranking police officer released a $130,000 property bond and will be re-instated to his position.

Casino developer brings best architect

by Ronel B. Concepcion

The Tinian Casino Resorts Company, one of the seven applicants vying for a casino license on Tinian, brought a casino architect to see the preliminary site plans for the casino projects. The company, which will include local partners in a Tinian casino venture, is in the process of selecting Tinian businesses for framing plans and 25 developer Frank Abramoff.

Abramoff hired David Jacobson, who is "considered by everyone as the premier expert, not just in hotel casino planning but in all kinds of architecture." He said that Jacobson's firm had worked on four projects with him back in Atlantic City, "selected the best architects with expertise but also from reputation."

He said the architect was so interested in the project that he rescheduled several long-standing appointments "just to come here directly, to walk and see the land and to have a good perspective."

David Jacobson, who was available to take a look at the shores of Tinian in 1994, said that nobody can see that there would be a major increase in the number of rooms within ten years time on the island.

He said that if the company can see the island would be compared to those of Bally's and Casino, which has tremendously progressed.

Jacobson said that they are considering a "destination resort and a casino-within-the-casino" with the project will offer something that could be offered in terms of recreation including all those active and passive spaces of 125 kinds, a variety of shopping areas, and a lot more.

The eight, landscaped beach and the bill to the east, would be composed of about 21 hectares of land. "But we are in the process of energizing to acquire another additional area of more than that," Jacobson said.

He said that the reason for acquiring as much property is to be able to create a fresh water lake approximately 35 hectares in capacity.

The man-made lake will be used for swimming, water sports, and for irrigation purposes on the sight..."creating a reservoir for the fire prevention system in the hotel."

He said that the sight is based upon the potential of water development such as a 36 hectares, "where 50 per cent of the water comes from." The total value of the entire project, which will be done in phases, will involve over 1000 guest rooms and all the rest of the facilities, based upon today's US dollar which is around $550 to $600 million.

Jacobson added that he can not really give any definite figure because so many plans have been prepared for the island's drinking water, sewage system or power facility demands.

James Fleming, on the other hand, said that they and the company, which has local participation, now has about 141 household members and "looking forward to expanding." Fleming said that one way of addressing the impact of establishing casinos on Tinian is to include local participation..."we need their voices."

Abramoff said that he rescheduled four long-standing appointments "just to see the land and to have a good perspective."

He said that the company is considering "who we are and what we have done..."Jacobson added that he can not really give any definite figure because so many plans have been prepared for the island's drinking water, sewage system or power facility demands.

House passes bill exempting mayoral staff from civil service

Members of the House passed the bill exempting mayoral staff from civil service Friday. The measure exempts the personnel and staff of the mayoral offices in Tinian, Saipan, Rota, and the Northern Islands from the Civil Service System.

The bill, introduced by Senator Presidential Assistant Peter Gordon De-Andres, will now go to the Governor for approval.

The bill, introduced by Senator Presidential Assistant Peter Gordon De-Andres, will now go to the Governor for approval.

According to a communication from House Speaker Pedro Gregorio, "as a part of the compensation for passage of HB 7-171, Section 310 of HB 7-171, now SB 7-60, was passed by the Senate on November 31. HB 171 on the other hand, is the partial appropriations for the Legislative, judiciary, and the Washington Representatives."

It already passed both houses in the House of Representatives and the Senate. The bill, passed out of the Senate, is expected to be signed into law by the Governor. It will take effect immediately upon the Governor's signature.

Two objectives are to reduce the number of employees and to better learning performance. "The bill provides a more efficient and effective way of managing the school districts," Ying pointed out.

The bill provides a more efficient and effective way of managing the school districts. The personnel office, on the other hand, will take care of the personnel matters.

Earlier, the Mayor of Rota had sent a request to the AG Office requesting the Attorney General to draft the bill. "The bill will make it easier for the Mayor to manage the personnel offices," Ying said.

The committee endorses the passage of the bill, adding that the CNMI "has developed sufficiently to justify the establishment of a public library independent of existing government agencies and create for the benefit of the general public." The FONNUM bill passed Senate bill 7-60 on May 25, 1989.

The personnel office of the Mayor's office will now take over the responsibility of the personnel office. The personnel office is expected to be an independent office.

The personnel office is expected to be an independent office. The personnel office is expected to be an independent office.

Palau Gov't. rebels against Interior order

By Howard Graves
AP Writer

HONOLULU (AP) - Palau's president, pressured by the island chain's Congress, signed Tuesday to appeal an Interior department order suspending major portions of the island chain's proposed budget. The government continued to operate under a three-month-old interim order, which the Congress agreed to set aside the Interior directive.

A week later, the Palau's president, manually signed for 60 days during the Interior's order, agreed with the Congress that the president's authority rested only with the Congress. Meanwhile, a lawsuit asking for a permanent restraining order to stop the suspension was filed. The Congress had agreed to have the Department of Interior's Secretary, Manuel Lujan Jr., act as the temporary order for 60 days during the Interior's order, agreed with the Congress that the president's authority rested only with the Congress.

S.N.E. donates to NMC sports program

Yuki Togawa, President of S.N.E. Corporation, donated $3,500 to the N.M.C. sports program Wednesday morning, December 5th. S.N.E. is a very diversified company but its main focus is in realestate development. Togawa said he made the donation because he appreciates the efforts of the athletes and coaches. He also said he appreciates the work of the N.M.C. in promoting physical fitness and sportsmanship.

He added that the atmosphere in Korea, the government and business community was calm. He said all governmental services continued to operate.

Etpison also wrote a separate letter to Gurr in late October, which was sent to Palau's Congress. He said that Palau's Congress had failed to identify from where the nearly $13 million would come.

Etpison said all essential government services would not go on strike for 60 days as long as Palau's Congress approved the U.S.-sanctioned $13 million budget bill. Palau's President's office. Some attorneys were drafting the appeal letter.

DPS increases patrols during the holidays

by Teri M. Flores

Beginning today, expect to see more cops on the streets. The Department of Public Safety is increasing the number of officers who will be on patrol to maintain peace and order in the community during the holidays.

DPS Director Gregorio Camacho said in a Tuesday press conference that the number of on-duty officers will be increased from the present nine to 23-24 officers per shift. The operation will continue after the New Year on January 7.

He said that officers, auxiliary officers, members of the drug task force, the Boating Safety and other personnel from the different divisions of the DPS will also be added to the regular patrol.

Camacho said that the schedule will mean a lot of sacrifice on the part of the officers but that the officers have agreed their support of the plan.

Chief of Police Tony Reyes said that the plan may mean longer hours for the officers but that they will have extra time off for days that are not scheduled for 12 hour shifts with 24 hours off before they resume another shift.

There will also be increased patrols in the villages and that officers will also be assigned on different substations, Reyes said.

He also said that police car lights will also be turned on throughout the holiday to increase visibility for assistance in the public and crime prevention.

The acting chief said that the dispatched officers will be tracking drunk drivers in an attempt to keep the roads safe for both the motorists and pedestrians.

Camacho said that the officers will either be using the patrol cars or will be in unmarked vehicles to monitor the situation.

He said there is no plan to assign officers on foot patrol.

The Governor thanked all officers but it also means that they will have extra time off for the holidays.

Thousands of dollars for Palau's typhoon victims

(1) — Thousands of dollars worth of food and clothing have been donated by individuals and private businesses on Saipan for the Typhoon Relief effort for the Republic of Palau.

Gloria W. Hauser, tapped by Gov. Lorenzo J. De Leon to head the typhoon relief drive on Saipan, said most of the donations were in the form of clothing, and that those who donated money agreed to have them used to purchase food.

Clothing, toys, and non-perishable food were collected and brought to the Governor's Office, where it was repacked and made ready for shipment to Palau.

The Governor thanked all those who donated, adding that he is sure the victims of Typhoon Mike will appreciate them.

Continenta Air Microsia General Manager Guam Dan Nurset said the airline will fly the goods to Palau at no cost to the government.

Typhoon Mike slammed into Palau earlier this month causing millions of dollars of damage to public and private properties. After the announcement went out, donations poured in to the tune of the Northern Mariana for food and clothing, businesses and private individuals started donating various items and money contributions.

Purchased with cash donations were canned goods, such as beans, macaroni, spam, canned beef and tarps. Zories, candles and other non-perishable food were collected and bought to the Governor's Office, where they were repacked and hauled them over to the cargo section of Air Micronesia for shipment to Palau.

Gov. Guerino De Leon said those who want to help can turn them in at the Governor's Office, where they will be repacked and hauled them over to the cargo section of Air Micronesia for shipment to Palau.

"...Christmas on Saipan is not the same as Christmas at home..."

There is nothing special for me because this is not my holiday but even Muslims can enjoy the spirit."
Tinian women actively lobbying for equal rights

The Tinian Women's Association is planning Christmas activities while continuing to press for a senate action regarding a bill which addresses the issue of equality regarding the marital property rights of married women.

Among the activities that the Association is planning is an appeal to include a guest speaker at Tinian School during the past week. The members of the Association has also been very busy writing to senators and other officials regarding the passage of the bill.

The group plans to place a petition signing booth at the Christmas festival, one of the many activities scheduled on Tinian during the holidays. Voters will also be invited to sign a petition advocating the passage of an equal rights marital law which is similar in nature to H.B. 7-118.

Numerous activities have also been lined up by the group, the Mayor's Office and other agencies including the Dept. of Natural Resources to celebrate the Christmas season. Art, P.E. and Music programs of the Tinian PSS will be the beneficiary of some fundraising games and food booths. The scheduled activities include a parade of the decorated boat flotilla and the lighting of the tree which presides the main square will be held on the 8th.

**Fuel prices jump by nearly half in the Philippines**

Manila, Philippines (AP)—President Corazon Aquino's government today raised fuel prices by more than 45 percent, and congressional and labor leaders warned that new strikes and unrest would result.

Mariana Airways, an additional plants should also be approved projects.

Lovelace said that an additional plants should also be approved projects.

Lovelace, who was on Saipan for a week said that the CUC has been making progress in stabilizing the intermediate sewer system recently.

He said that the new plants, which has the capacity to treat more than two million gallons of sewage daily, is adequate in treating the current flows. However, Lovelace said that an additional treatment capacity is needed since the plant is insufficient to handle future growth.

"The capacity of the Saipan plant is no small compared to the capacity of sewer which is expected over the next couple of years," Lovelace said.

Lovelace said that more than $50 million is necessary to upgrade the current sewer system on Saipan so as to meet the needs in the coming 10-15 years.

Lovelace said that plans are being made to rehabilitate the old system and that the new equipment must also be made available so as to make additional treatment possible.

The EPA official said that the CUC is also looking into going back to the two tank system which the CUC was used to.

Lovelace said that plans are being made to rehabilitate the old system and that the new equipment must also be made available so as to make additional treatment possible.

The sewer system was used by the CUC several years ago however, the plan was abandoned when the original design and specifications did not work as originally forecast, Lovelace said.

The EPA official said that the CUC should look into improvements in the Saipan Tunnel plant for a long-term solution to the sewer problem and that additional tanks should also be looked into to extend the capacity of new tanks that could be treated daily.

Lovelace said that about 92 million in EPA grant money is available for the CUC. The CUC has been making progress in solving the sewer problem and that additional plants should also be looked into to extend the capacity of new tanks that could be treated daily.

The sewer system was used by the CUC several years ago however, the plan was abandoned when the original design and specifications did not work as originally forecast, Lovelace said.

The EPA official said that the CUC should look into improvements in the Saipan Tunnel plant for a long-term solution to the sewer problem and that additional tanks should also be looked into to extend the capacity of new tanks that could be treated daily.

Lovelace said that about 92 million in EPA grant money is available for the CUC. The CUC has been making progress in solving the sewer problem and that additional plants should also be looked into to extend the capacity of new tanks that could be treated daily.

Lovelace, who was on Saipan for a week said that the CUC has been making progress in stabilizing the intermediate sewer system recently.

He said that the new plants, which has the capacity to treat more than two million gallons of sewage daily, is adequate in treating the current flows. However, Lovelace said that an additional treatment capacity is needed since the plant is insufficient to handle future growth.

"The capacity of the Saipan plant is no small compared to the capacity of sewer which is expected over the next couple of years," Lovelace said.

Lovelace said that more than $50 million is necessary to upgrade the current sewer system on Saipan so as to meet the needs in the coming 10-15 years.**
The Marpi depression has the largest capacity and has a much longer life than the Quarry which will only be useful for less than ten years. The Marpi depression is not only cheaper to construct and maintain than the Quarry but it has also been determined that it could meet the needs of Saipan for the next 25 years.

The original plans of installing a liner was found to be unfeasible, this could be easily avoided through the use of small treatment plants which are now available in the market at attractive costs. Not only will the installation of a liner be in compliance of Agency regulations but it will also protect a potential water supply for the island.
Grand opening ceremony held for Tinian's MVB office

Tinian's MVB Visitor Information Center was officially opened on Wednesday, November 28, 1990 with key government officials attending.

The completion of the Tinian Center completes the Visitor Information Center's goal of equipping the three main islands in the Commonwealth with visitor facilities that will not only provide better service to visitors, but to the entire community as well. In addition to providing general travel facts and information, the Center will also handle beautification projects, maintenance and the coordination of other activities in Tinian, the MVB release said.

Lieuutenant Governor Benjamin T. Mendiola expressed great concern to protect and preserve nature and the environment amidst ongoing and planned developments in the CNMI. "As we develop, we must take every precaution to protect our environment, our clear blue skies, our crystal clear oceans, our white sandy beaches, to guard our areas of conservation and scenic importance, and to preserve our areas of cultural and historic significance," Mendiola said.

Mayor James M. Mendiola of Tinian, according to the MVB press release, commented on the opportune opening of the Information Center and called for continued teamwork among all three islands. In the last general election, Tinian voted overwhelmingly to allow the establishment of casinos. Mayor Mendiola said: "As we develop, we must take every precaution to protect our environment, our clear blue skies, our crystal clear oceans, our white sandy beaches, to guard our areas of conservation and scenic importance, and to preserve our areas of cultural and historic significance." Mendiola said.

Mayor James M. Mendiola delivers an address during the opening ceremony of the MVB's Tinian branch.
Clubbhouse Blue Cabin to begin soon

by Ronel S. Camacho

A ground breaking ceremony held Thursday marked the beginning of the construction of the Oliwa Leisure Fishing Clubhouse which will be named the “Blue Cabin.”

The Oliwa Leisure Fishing of Saipan, Inc. is investing an amount of $1.3 million to construct in the Garapan area a 7,254 square meter clubhouse. The “Blue Cabin” will include various facilities such as a fishing tackle shop, rest rooms, employees lodging, large sized refrigeration facilities, and water making and ornamentation system.

According to a document from the Daicia group, three months going by fast. They will be provided to complete their fishing service to customers.

The first vessel will be a Cazamian type known as the “Angel’s Dream,” having a bedroom for 20 passengers and the latest nautical instruments, it said.

“The second one is a spiling boat named Ocean Star” with 6p passengers capacity, while the third one is a fishing boat known as “Ocean Honor”, which can contain a maximum of 20 passengers and 1 crew.

The Blue Cabin offers service for fishing, diving and optional and not taking passengers to “island-hopping” in the Northern Marianas Islands. Tourists will also participate in fishing.

He said that through this activity, the CNMI can use the water resources in a responsible and productive manner.

Governor also encouraged the Daicia group to join the present administration in its effort towards felt conservation and management, and also to promote boating safety in the harbor.

Present during the ground breaking ceremony was Gov. Larry I. Guerrero.

The Governor’s passion for us...many local people here would rather go fishing whilst the governors are busy, “uninhibited islands,” the Governor further added.

Léon Guerrero, who turned it over to the Old Age Program Center is leasing two buses. Currently, the Center is looking for funding to purchase one of the buses which would cost $35,000.

Flicom prepares for “Simbang Gabi”

By Vir Abue

It’s Christmas time once again! And for the Filipinos, what’s Christmas without Simbang Gabi? Coming on its twelfth year on Saipan, the Simbang Gabi, otherwise known as “Dawn Masses,” was initiated and up to this day is still being spearheaded by the Flicom leadership. Over the years it has become a cherished tradition of the Filipinos on the island.

The Flicom Board of Directors in its meeting last December 5th appointed Mr. & Mrs. Romeo Paganpagan to be the over-all coordinators of this year’s Simbang Gabi.

Their task includes gathering and re-confirming “Mass Sponsor” for the 9-day masses, assigning persons responsible for the choir, liturgy, officers, collectors, vendors, etc.

To assist the Pagapulars, the Flicom Board assigned the following to fulfill the duty of “Mass Sponsor”:

- Mrs. Paganpagan, Tel. No. 234-9125
- Mrs. Delossantos, Tel. No. 234-3261
- Mrs. Ingap, Tel. No. 234-3398
- Mrs. Liwanag, Tel. No. 234-9653
- Mrs. Tanu, Tel. No. 234-9589

The winner was an attempt made by the Old Age program of Marianas Visitors Bureau Deputy Managing Director, Faber Felix, to have the Pagapulars collect for this event.

Ohtomo and his staff arrived on Saipan last week Friday for a two-day visit the CNMI, which will encourage Japanese anglers to visit the C.N.M.I, which will encourage Japanese anglers to visit the CNMI. He said he can’t predict anything but will try and make the contributions an annual event in the CNMI. He said he can’t predict anything but will try and make the contributions an annual event in the CNMI. Historical tourist map of Tinian and Rota published

By Darenda Sharna

In November

On the 14th of May, 1987, military officers of the United States Army Pacific Military Forces overviewed a map depicting the current state of the Tinian and Rota Islands. The map details the area from which the B-29 Superfortress, Enola Gay was launched to Tinian and delivered the atomic bomb to Hiroshima in 1945. The map illustrates the historical significance of the islands in the context of the Pacific War.

Rugby club in need of players for games against Japanese team

The Saipan rugby players on February 8-10, 1990, will host a series of matches against an experienced and well-known Japanese rugby team from Seijo University. The Saipan club would like to recruit new rugby players, or athletes with no rugby experience but a willingness to learn the sport, and would like to play against the Japanese team in future matches, according to the press release from the Saipan Rugby Football Club.

The Saipan Rugby Football Club invites the public to attend an information and organization meeting to be held at Pacific Islands Club’s Charley’s Lounge on Wednesday, December 12, 1990, at 5:00 p.m. The purpose of the meeting is to stimulate interest and participation by CNMI residents in local rugby matches and related social activities.

Rugby is a popular, fast-moving, contact sport played internationally by teams from Australia, New Zealand, Japan, Europe, the U.S., and Polynesia. Many people compare rugby to American football, since ballcarriers are tackled in both sports. Rugby players, however, wear no helmets or shoulder pads, and blocking is not permitted, the release said.

The Saipan Rugby Club, in its last match, scored an impressive 18-4 victory over Guam. During the next 8 weeks, club members will train regularly to prepare for the visiting Seijo team. The CNMI and Seijo ruggers hope that the February 8-10 matches, scheduled to be televised in Japan, and enjoyed by everyone involved.

Rugby club needs players

San Antonio Sixers moving its way to win over the CHC, during the Islandwide basketball opening.

Geezers Basketball Meeting

As published in November local media reports the Geezers 4X4 half court basketball league will kick off with an informal practice gathering at the Gilber C. Ada Susupe gymnasium on Saturday, Dec. 8. All participants must be 30 years of age or older. As well as practice games, rules and team selection will be discussed. League games will be 4 vs. 4 half court beginning December 15 Saturdays only 10:00 a.m. - 12:00 a.m. Rosters will be limited to 7 players per squad. Questions can be answered by calling Joe Lizama or Tony Rogolifoi at 234-1001/2 or Dick Pierce at 322-3500

Organizational meeting for Hobie Sailing contestants on December 19 at the gym

There will be an organizational meeting for all sailing contestants for the South Pacific Games on Dec. 19th, 7:30 p.m. at the gym. All interested contestants must attend this meeting. To compete you must have been a resident of the Commonwealth for a minimum of 4 years as of Aug, 1991. The sailboats will be Hobie 16’s. For any further information, please call Rob Bollay, 322-9255.
