The University of Hawaii maintains close contact with public and private health and correctional agencies. The Art and Music departments provide well-rounded instructional programs which include community participation. The University's Theatre Guild presents regularly scheduled productions which are open to the public. The University Farm, a part of the Experiment Station, is devoted to solving problems of Hawaii's dairymen, poultrymen, and livestock raisers.

Buildings of particular interest on the campus:

The Administration building, functionally modern in architecture, is designed to take advantage of Hawaii's climate. It houses most of the administrative personnel.

A three-story, million-dollar chemistry building is now under construction. With a total floor area of 70,340 square feet, it will contain amphitheatre type lecture halls, as well as classrooms, library, and research laboratories.

The Library contains 205,226 bound volumes and 435,684 unbound parts and pamphlets and serves as a depository for government maps and publications.

Hemenway Hall is a social center for students and faculty, and houses student and alumni organizations, a bookstore, and a cafeteria.

A swimming pool, tennis courts, and locker buildings are located near Hemenway Hall. Cooke Field is used for sports practice.

A quarry area is being developed into a permanent athletic area for teaching, intra-mural and inter-collegiate activities.

The faculty of the University of Hawaii is made up of exceptionally young men and women who are particularly vigorous in their pursuit of information concerning the people and cultures of the Pacific area.

The School of Pacific and Asiatic Studies brings the East and West into closer intellectual relation through study of languages, literature, art, philosophies, and religions.

The University has acted as intermediary between East and West to promote an understanding of the cultures of the Occident and Oriental. A successful East-West Philosopher's Conference was held on campus in 1949. East-West conferences on public health problems and race relations are being contemplated.

Many of the faculty members have been widely acclaimed for work in race relations and in tropical agriculture.

Some of the faculty have been active on the national and international scenes, particularly in the Trust Territory. Thirteen of the twenty members of the Advisory Committee on Education on Guam and in the Trust Territory are on the University staff.

-Pacific Science-, a quarterly devoted to the biological and physical sciences, is published by the University.

The University of Hawaii Press, founded in 1947, has issued many important works, including Hawaiian Legend in English, The Hawaiian Kingdom, Pacific Era, Insects of Hawaii, and Hawaii's War Years, 1941-1945, the official history of Hawaii's part in World War II.

The University of Hawaii Bulletin is published quarterly by the University of Hawaii, Honolulu, Hawaii, U.S. Entered as second-class matter at the post office Honolulu, Hawaii, November 14, 1921, under act of Congress of August 24, 1912.
The University of Hawaii, Honolulu, Hawaii

The University of Hawaii, founded in 1907, is a coeducational school situated in Honolulu, Oahu.

Like many state universities, it is a Federal land-grant college and is governed by a Board of Regents appointed by the Governor of the Territory. University President Gregg M. Sinclair acts as executive officer of the board.

The University consists of the College of Applied Science, College of Arts and Sciences, Teachers College, College of Agriculture, College of Business Administration, Graduate Division, School of Pacific and Asiatic Studies, School of Social Work, and Extension Division.

Other units of the University are the Psychological and Psychopathic Clinic, Marine Biological Laboratory and Aquarium, Volcano Research Laboratory, Legislative Reference Bureau, and Library.

In addition, the University has an Agricultural Experiment Station and an Extension Service in Agriculture and Home Economics.

The University enjoys full recognition as an institution of higher learning. Credits are transferable to other institutions according to nationally accepted college practices.

There are at present 464 faculty members and 318 civil service workers.

The regular University year consists of two semesters plus a six-week summer session.

Students registered for 10 or more credit hours in any semester pay $50 for tuition and $10 for registration per semester. Students registered for fewer than 10 credit hours in any semester pay $5.00 per credit hour.

Honioula resembles any of the more exotic American cities.

Because the average temperature is 75 degrees at sea level, summer clothes may be worn through all seasons.

Travel to the islands is neither as expensive nor as time-consuming as it once was. It is less than 24 hours by air, from New York. Travel time from San Francisco is 4½ days via luxury liner, and 9½ hours by plane.

Assistance in locating suitable living accommodations is given to students by the Office of Student Personnel. Almost all of the students live off campus.

The University has one women's residence hall, Hale Lau-lima, housing 30 students. Veterans' barracks on the campus house 165 men. Adjacent to the campus is Atherton House, a residence hall operated by the YMCA. A new dormitory for women is now under construction. Additional residence halls are at the top of the University's list of needs.

Minimum expenses of the average student are estimated at $600 to $750 a year for board, room, tuition, registration, fees, and books. These estimates do not cover the cost of clothing, laundry, and other personal necessities.

A majority of the University students are American citizens. The racial pattern on the campus resembles that of the Territory, with Caucasian, Japanese, Chinese, Hawaiian, part-Hawaiian, Filipino, Korean, Chamorro, Puerto Rican, and Samoan ethnic strains represented.

Admission to first-year standing in the University, as in most colleges, depends on performance on college aptitude tests and quality of high school work.

Students are admitted to the University on a transfer basis providing the student attended an accredited institution and that grades received for credits meet University of Hawaii standards.

Veterans whose secondary school education was interrupted by the war may take entrance examinations covering preparatory school subjects. Successful performance on these and on the college aptitude test will admit veterans without reference to high school credits.

### Enrollment

### Community

Throughout the islands the University Extension Division provides non-credit and credit courses at times and places convenient for the persons served.

Non-credit courses are open to all adults who have had the equivalent of a high school education.

A program of correspondence courses carrying University credit is made available to those who cannot attend classes.

University Centers offering credit courses are maintained at Hilo, Hawaii, and downtown Honolulu and Wahiawa on Oahu.

Admission to the University Centers is governed by University admission requirements, and residence credit is granted for work completed.

Funds for the operation and maintenance of the University are received from the Federal Government, Territorial appropriations, tuition, and other University sources.

The College of Agriculture, whose work entails not only research but the dissemination of findings, deals directly with the Territory's farmers and homemakers. Currently controlled by the fruit fly, which is making costly depredations on Hawaii's agricultural produce, is a major project.

General University and agricultural radio programs are broadcast over Island stations.

Lecture series are presented by resident and visiting faculty members. They are open to the public without charge.

Conferences, festivals, institutes, and scientific and agricultural meetings are held on campus for community groups.

The University Library, the largest in the Territory, is open to visitors and residents.

The Marine Biological Laboratory at Coconut Island and Aquarium at Waikiki Beach are under the direction of the University. The Aquarium has a representative collection of Hawaiian reef and shore fish. Admission to it is free.
