BIBLIOGRAPHY ISSUE
LISTING FOR THE PERIOD FROM JULY 1, 1943 TO JUNE 30, 1944
UNIVERSITY PUBLICATIONS, PUBLICATIONS OF FACULTY AND STAFF MEMBERS, AND THESIS PRESENTED FOR ADVANCED DEGREES AT THE UNIVERSITY OF HAWAII
This issue of the University of Hawaii Bulletin is a general University bibliography for the period from July 1, 1943 to June 30, 1944. It continues the record of publications started with the Bulletin issue of September 1943, which covered the period from July 1, 1939 to June 30, 1943.

The bibliography consists of three parts. Part I lists publications of the University, including those of the Hawaii Agricultural Experiment Station and of the Cooperative Extension Service in Agriculture and Home Economics. Part II consists of titles of published works of faculty and staff members, listed alphabetically by authors. Included in this section are publications of staff members of two institutions situated on the campus and affiliated with the University but independently supported. These are the Pineapple Research Institute of Hawaii and the Honolulu Laboratory of the United States Department of Agriculture Bureau of Entomology and Plant Quarantine. Part III is a list of theses presented in partial fulfillment of the requirements for advanced degrees at the University of Hawaii.

The material for this bibliography was compiled by the University Publications Committee. The Committee obtained the information in Part II from faculty and staff members absent on leave because of work connected with the war as well as from those on the campus. Effort was made to achieve completeness and accuracy.
