Sub-Dispensaries, First Aid Stations, etc.
(a) Military Government Sub-dispensaries: USNMG Sub-dispensary Tol, Uman, Dublon, Fefen, Udot, Satawan, Ta, Etal, Oneap, Lukunor, Kutu, Mot, Nama, Namaluk, Losap, Pis and Nukuoro.
(b) On 30 June 1947 there were 23 trained health aides employed at the sub-dispensaries. Rates of pay and earnings were as follows:

APRIL, MAY, JUNE

TITLE	NUMBER	RATE OF PAY	EARNINGS (per mo)
Health Aides (trained)	10	1.00 per diem	260.00
Health Aides (trained)	10	15.00 per mo.	180.00
Health Aides (trained)	12	1.00 per diem	260.00
Health Aides (trained)	12	15.00 per mo.	180.00
Health Aides (trained)	23	25.00 per mo.	575.00

(c) Sub-dispensaries are manned by trained health aides. There are two in each of the sub-dispensaries on the main islands in the Truk Atoll and one in each of the sub-dispensaries on the out lying islands. The statistics reported below are compiled by these health aides and must be evaluated as such. It is felt, however, that they will improveas the diagnoses are checked when the islands are visited and they serve as a means of continuing the training of the he lth aides on independent duty.

Within the Truk Atoll, there is a constant liaison between the sub-dispensaries and the main dispensary. The health aides come in weekly with the patients from their islands that have to be seen by a

by a medical officer. They replenish their supplies and make their reports. They are inspected on their home islands by USN medical personnel whenever trips are made to the islands withing the atoll. The sub-dispensaries on the outlying islands are inspected on the field trips made to their islands at which time they make their reports and their work is checked.

(d) Treatments given at sub-dispensaries during the reporting period:

DIAGNOSIS	DUBLON	UMAN	FEFEN	UDOT	TOL
No disease, (headache) backache, etc.)	585	428	340	678	305
