ESTABLISHED 1904. VOL. 15. NO. 16.

LIHUE, KAUAI, TERRITORY OF HAWAII, TUESDAY, APRIL 22, 1919

SUBSCRIPTION RATES, \$2.50 PER YEAR 5 CENTS PER COPY

CHAMBER OF COMMERCE MEET

The regular bi-monthly meeting of the Kauai Chamber of Commerce was held in Waimea Courthouse last Thursday afternoon. The secretary being absent, Mr. Wishard was elected temporary secretary.

The minutes of the two previous meetings were read and approved.

A bill of \$53.85 from The Garden Island Publishing Company, Limited was presented for the consideration of the Chamber. It appeared that this bill was incurred by the 4th Liberty Loan Committee. Upon motion it was decided to bear one-half of the expense of this bill provided the Kauai Planters' Association would bear the other half.

The committee appointed to arrange a suitable compensation for Mr. McClellan reported progress through its chairman, Mr. Crawford, and asked leave to sit again. Report accepted and permission granted.

Mr. Crawford then asked that an authorization be given the committee that when the compensation for Mr. McClellan is collected that the committee report direct to the secretary of the Chamber and that the secretary forward the same to the Chamber of Commerce in Honolulu.

The matter of the coming Victory Loan drive was then considered and various communications on the subject read. The president was authorized to appoint a committee to handle the campaign on Kauai. The president named as this committee: Messrs Crawford, Alexander, Brandt, Wolters and Larsen. This committee was instructed to act with the standing committee of the Kauai Planters' Association.

The matter of War Savings Stamps, Series 1919, was brought to the attention of the Chamber by a letter from Mr. A. H. Tarleton. It was moved, seconded and carried that the secretary write to Mr. Tarleton and suggest that he take up the matter of the sales of these stamps with the organization handling the matter last year, that is, post office department, stores, teachers, etc.

A letter from Col. Newcomer asking for information in regard to probable railroad facilities to connect the south side of the island with Nawiliwili Harbor, was then read. The secretary was instructed to reply that while the Chamber had no definite information to impart they anticipated no difficulty whatever in the proper railway facilities being provided.

The committee on Kaana Park had no further report to make but the president reported that work was being done on the road to the Park and that great improvement had been made.

The following new members were proposed and elected: L. K. Kapunui and Wm. McCluskey.

The following resolution was moved by Mr. Hofgaard, seconded by Mr. Crawford and upon vote, duly carried: "That a list of members of this Chamber be printed and a copy furnished to each member."

A Promising New Industry

A Portuguese small farmer on Oahu, with commendable enterprise, has inaugurated a new industry which may be of considerable interest to the Islands, viz, the cultivation of the willow tree, and the manufacture of willow ware. The tree grows readily, and there would assuredly be a very considerable demand for willow ware products, such as baskets, crates, hamper, chairs, etc. The over seas freight on such bulky articles is necessarily very high these days; it will be to our advantage every way to produce it here.

Mr. Fernandez, of Kapaia Store, is planting some of the willow in his yard by way of experiment.

RUMMAGE SALE COMING

The Mokihana Club will hold a rummage sale, Saturday, May 3rd, from 8:30 a. m. to 11:30 a. m., to dispose of the articles left over from the Red Cross Shop.

Local News

Gathered from here and there

Mrs. D. E. Baldwin and child, of Makaweli, went to town by the Kinau last Saturday.

Rev. H. P. Judd, of the Hawaiian Board, is down to attend the church convention.

Rev. Frank Scudder, Hawaiian Board Secretary for the Japanese work, was on Kauai last week in the interest of that work.

Mr. H. P. Faye of Kekaha, left by the Kinau on Saturday for the Coast, whence he will return shortly, bringing his family.

Mrs. J. A. Hogg returned this morning from Honolulu where she has been for a week attending to some business matters.

Mr. and Mrs. Honan, of Kealia, and daughter, returned from Honolulu this morning after a couple of week's vacation.

A select choir of the Kamehameha Glee Club boys will assist in the Lihue Union Church service on Sunday. Come and hear them!

F. W. Vaillie, of the Railway Mail Service, was on Kauai for a few days last week in relation to postal affairs. He was the guest of Mr. and Mrs. Crawford while in Lihue.

U. S. Deputy Marshal Cathcart arrived from Honolulu this morning and will return this evening accompanied by the two amateur distillers who were taken up by the authorities the other day.

Mrs. Aukai Aniceto Ignacio and Alfonso Bernantino, charged with a statutory offense, were haled into court last week. Both pleaded guilty, and as they were old offenders, were given a stiffer fine than usual—Thirty and fifty dollars respectively.

An artistic and commodious new cottage is being built on Koloa's choice residence avenue, which will be occupied by Mr. and Mrs. A. C. Betts and family. Mr. Betts is the new assistant manager of the Koloa plantation, recently arrived from Maui.

The Lihue Ice Company has made arrangements with Mr. G. N. Wilcox, and henceforth will use water from Grove Farm's private, unexposed to air and weather, water system. This water is conceded to be the finest in the island for sodawater and ice making purposes.

Seven Filipinos were caught gambling in Lihue last Saturday night, the attraction being "Monte." Four men forfeited bail of a ten spot each and the remaining trio pleaded guilty to the charge and were fined ten dollars and cost each. One man paid his fine and the remaining two are in the Bastille working out their fines.

The Children Helping Out

Lihue Plantation has planted upwards of 250 acres of their crop already with school children labor. The intermission of the schools was a boon to the plantation in this respect, which was made the most of.

Even with the resumption of school they have not entirely lost the valuable services of the children. Every day after school a truck awaits them as they are dismissed, and conveys them to some near-by planting field, where they put in two or three hours of work. And they go joyfully, as unto a picnic, singing and shouting and swinging their hats.

A Word of Appreciation

The departure of Miss Carry Castleman recently because of physical breakdown consequent on the strain of the flu epidemic, takes from our midst a public servant and a public benefactor of exceptional character and ability. She was for five years managing head nurse of the Lihue hospital, and during this time she ministered personally, with the angel touch of healing, to hundreds of people of all classes and conditions in the community, and she has left behind her a host of friends who will cherish her memory with an enduring and very kindly regard. Quiet, gentle, unobtrusive, lady like, and faithful as the day is long, that is the kind of people that we want to keep; we are sorry to lose her; our very best wishes go with her.

ARMY SPECTACLES TO THRILL FAIR

Honolulu, April 20—No military demonstration has been witnessed in the Hawaiian Islands than that which will be staged in Kapiolani park at the Territorial Fair, during the week of June 9-14.

Col. R. McA. Schofield, who is in charge of this spectacular and educational feature of the Fair's entertainment, is lending every energy and all his enthusiasm to the success of the exhibition. At the first Fair, last year, Colonel Schofield was chairman of the general committee in charge of the entertainment program. This year declares the Colonel, the military and naval program will be bigger than ever. There will be twice the number of troops camped at Kapiolani park during Fair week this year as was the case last June.

The 17th Cavalry, recently arrived, will have a squadron encamped on the Kaimuki side of the polo grounds, where is to be established Camp Hodges, named in honor of the commander of the Department of Hawaii, and here also will be established a battalion of infantry, together with cavalry and infantry bands.

A hospital detachment, in charge of experts, is to be fully equipped and ready for duty, prepared to render first aid to the injured and to administer emergency treatment, if necessary. There will be a miniature camp hospital organization, including the service of motor ambulances, ready, in case of need, to deliver any case of illness or injury to any hospital in the city, civil or military.

The military exhibition will be on the order of that of last year, but more comprehensive, showing ordnance, equipment, and everything identified with the duty of a soldier.

Aero apparatus will be shown, too, and an aero squadron will be one of the many big attractions.

A special committee, says Colonel Schofield, will have charge of the various military displays, and another special committee will handle military athletics. These committees are to be named later, for, thus far, the plans are tentative.

General Hodges has signified his hearty cooperation in the plans, as has also Admiral Doyle. Naval plans are developing and will be determined with the general scheme of entertainment.

There will be something doing every day of the week of the Fair in the military line. Fireworks will supplement the night scenes of sham battles, and all the entertaining features which proved such a success last year will be repeated, with many additions.

MOVING PICTURES AGAIN

Moving Picture Fernandez has seen the light! He has not seen his way clear recently to secure the best high class films, and open up the circuit on Kauai, but now he has agreed to do so, and is negotiating for the "Hearts of the World" film, the best production which has ever come to the Islands.

Mrs. Bevin, a trained nurse, arrived last week from Honolulu to accept a position in Lihue Hospital.

THE WAY OF THE TRANSGRESSOR

"No more to-day. Come back Sunday," was the reply received by the "stool" sent out by Sheriff Rice and internal revenue officers Hana and MacComisky, when he knocked on the door of Otani Seizo's shack at the bottom of the gulch some distance makai of Lihue MHI.

Instead of waiting until Sunday he came back a short time afterwards with the sheriff and revenue men, who proceeded to investigate Otani's quarters. After searching the place for some time the raiding party almost went away disappointed, for nothing that looked like a still could be found in the house. It so happened, however, that while investigating a nearby chicken house the still and two hundred and fifty gallons of rice mash ready for distillation were revealed, and Otani was gently removed to the jail where he awaits further orders from Federal officials in Honolulu.

According to the raiders the shed in which the moonshiner concealed his outfit had all the appearances of a chicken coop, but had probably never been used as one, but had been put up with the purpose of deceiving those who might suspect Otani's occupation.

On the night of April 17th, Kong Pong Yee, Korean, was caught by Deputy Sheriff Lovell, making swipes at Puhl Camp. Konk Pong Yee is now keeping Otani company at the jail.

With these two arrests already made and several unsuccessful raids on suspected moonshiners, the local police are making a general clean up of the moonshiners on Kauai.

A TREAT COMING

Reader and Story Teller. Once in a long time there comes to our Island a real artist, with a charming gift along the line of this choicest of arts, and we remember them most pleasantly through the years.

And now again we have the promise of such a pleasure in the reading and impersonations of Charlotte A. Powers who will give such an entertainment at the Tip Top, Lihue, on Thursday evening, April 24th, at 7:30 p. m., and at Waimea Friday evening, April 25th.

The Glee Club Concert

Hawaiian music is famous the world over and people in any land will go far to hear it. Particularly fine is Hawaiian Glee Club music when rendered by a trained band of singers such as may be heard at the Tip Top next Saturday evening.

This band of boys has made the tour of the other islands with great success and from what we have heard of them we can assure our readers that they will make good to the satisfaction of everybody, and that it is a rare opportunity not to be missed. Keep your calendar clear for it. After the concert at the Tip Top everybody will will adjourn to the Armory where the Glee Club will furnish music for dancing.

A free exhibition drill will be given at the Lihue Park on Sunday afternoon at 3 o'clock, which will be well worth while, and the public is earnestly invited to be present. About one hundred boys are coming over.

TAKE NOTICE

Attention is called to the fact that the various dates of installment payments on the Fifth Liberty Loan are Honolulu dates. The local dates will be enough earlier to connect in Honolulu.

WAR SOUVENIRS FOR DRIVE MEN

Hawaii is going to have a share in the German helmets which were sent from the Rhineland for use in the Liberty Loan. When the Yankee boys entered Germany they came upon a factory full of brand new Prussian helmets. There was a rush for souvenirs and finally a guard was placed over the factory until a disposition could be made of the material. They were finally shipped to the United States as material to be used in the Victory Loan. A cable to the Victory Loan committee at Honolulu received Saturday morning announced that 200 of these helmets had just been shipped by express. This means that they will be on the next boat arriving early next week.

In the shipment also are 250 medals for the volunteer workers. These medals have been struck off from the German canon which were captured during the actual fighting at Chateau Thierry, the Argonne and St. Mihiel. The winner of one of these medals will have a souvenir of the Victory Loan worth while, and it is expected there will be much competition among the workers to obtain one.

Eleele Notes

Twenty-two new voters were registered at Eleele last Thursday by J. M. Kaneakua, County Clerk.

Mr. J. I. Silva has returned from Honolulu after spending several days in that city on business.

Mr. J. M. Souza, popular salesman of McBryde Store, has returned to duty after a two week's vacation.

Mr. Roendahl, manager of McBryde Store, is adding to his equipment a Ford truck for local delivery.

Miss Edith Brodie has been spending a couple of weeks vacation in town from which she returned on Friday last.

The current rumor is that Kauai people will have the opportunity of witnessing league ball such as we had in prewar times.

McBryde baseball enthusiasts are making the rounds getting subscriptions to defray the expenses of the coming season's sport.

By the consent of Mr. Alexander, the long awaited movies will again appear at Eleele Hall, beginning tomorrow night.

Mr. Robert Middleton, a nephew of J. H. Moragne, who was here some time ago, before entering military service, is back again and will assist Mr. Moragne in his work.

The Eleele public school opened yesterday after two months of enforced vacation owing to the flu. The children were eager to return to school, and to get at the back work which has to be made up.

Mrs. W. G. Pillar was hostess last week at a small, informal tea which just the ladies living around the mill attended. These informal teas have become a weekly affair among the mill ladies; each one taking a turn at being hostess. Mrs. Neil Robertson will be hostess next week.

Captain and Mrs. Leavett returned from Honolulu on Friday after a week spent in that city.

The worst of the flu is over at Eleele; there are only 32 cases left, and they will soon be disposed of. Much credit is due the hospital nurse, Mrs. Kamanoha, for her very efficient cooperation with Dr. Waterhouse in handling a difficult situation. She was faithful, intelligent, and sympathetic in her ministrations, always ready to do what she could.

Superintendent McCaaghey will arrive on Kauai next Tuesday and will spend a week visiting the schools and getting acquainted with his teachers on this island.

THE REVIVAL OF CASSAVA GROWING

Mr. F. G. Krauss, director of the Haiku Experiment Station at Haiku, Maui, has just left Kauai after a general survey of the island. While this was his regular annual trip to the island as head of the U. S. Agricultural Extension Service, he made it a point to get a line on the present and past status of Cassava cultivation and manufacture on this island. Cassava starch manufacture is an old industry on Kauai, and at one time was carried on quite extensively in the vicinity of Lihue. G. N. Wilcox was able to furnish Mr. Krauss with a good many valuable and interesting points on the industry as it was carried on here many years ago, and E. H. W. Broadbent, manager of Grove Farm plantation, explained and pointed out a good many things about the industry as it is carried on here today.

Mr. Krauss has just recently returned from a tour of the mainland on cassava investigations, and he has many interesting things to relate regarding the use of cassava starch in the arts and in the manufacture of well known food stuffs. He says that there is a good demand for the starch which we call pia and which the mainland buyers term cassava flour. He is trying to encourage the revival of the old industry on this island where the crop seems to do so well and where there is so much land suitable for its cultivation. He says that it is very probable that people on Maui will start a plant for starch manufacture on a commercial scale this year, and that it is hoped that a beginning may be made on this island in the near future. He says that the present supply of cassava starch for the mainland manufacturers comes chiefly from Java. He is preparing a government publication on his recent cassava investigations and the same will be published in the near future.

While on Kauai Mr. Krauss also visited a great many of the farmers on the island and spent considerable time with the pineapple planters with whom he has been conferring regarding recent investigations of pineapple wilt. He says the pineapple troubles that are prevailing on Kauai are similar to those on Oahu and Maui. The Haiku sub-station has an extended experiment under way, planned for the determination of the fundamental cause of the serious trouble known as pineapple wilt. He says it is a great satisfaction to see the very evident prosperous condition of the homesteaders on Kauai.

Strangers In Our Midst

Mr. G. P. McDill, Divisional Secretary for the Pacific Coast and Hawaii, for the Y. M. C. A., and Mr. L. A. Killam, Territorial Secretary, have been making a tour of the island during the last few days in the interest of the growing work here.

Two interesting and suggestive conferences have been held with the local friends and patrons of this work; the one at the home of Mr. and Mrs. S. W. Wilcox, in Lihue, and the other at Mr. Brandt's in Waimea. At these conferences Mr. McDill has explained in an informal and entertaining, and very winning way, the aims and purposes of the Y. M. C. A., and has told us that we belong to his great fold that extends from Alaska to Hawaii, and that he intends to look after us. And, seeing that he is the man that he is, we are very glad to be looked after by him.

Both he and Mr. Killam congratulate Kauai on being the first outside island to take up the work and make a success of it.

**BRING
THEM
BACK**

WE sent them over. They finished their job.
THEY didn't quit. They stuck—even unto death.
It's our job to stick it through—to pay for the job THEY did.
The Fifth—the Victory—Liberty Loan will settle the score.
Americans—real Americans don't "pike". They pay.

— SUBSCRIBE TO THE VICTORY LIBERTY LOAN. —

Hawaii's quota is \$4,788,000. This is less than our last quota, but the Government has requested that our subscriptions to previous loans be duplicated.

The Campaign opened yesterday. Do your patriotic duty by subscribing liberally and promptly.

THE LIBERTY LOAN COMMITTEE

Items of Interest to Our Homesteaders

By G. W. SAHR, County Agent.

Raw Rock Phosphate as Fertilizer

As a cheap and satisfactory source of phosphoric acid, raw rock phosphate merits extensive use, suggests the United States Dept. of Agriculture. Nowadays when all commercial fertilizers are abnormally expensive is the time to make liberal use of raw rock as a reinforcement of stable manure, as a material to be distributed and plowed under with green crops and as a profitable plant food for direct application soils that are rich in organic matter.

The relative unpopularity of raw-rock phosphate in the past has resulted from incomplete and unsatisfactory experimental work. Recently the farm use of raw rock has expanded to 91,000 tons.

Of course when immediate results are desired, the more costly acid phosphate is preferable as its plant food is readily soluble and suitable for rush order use. Raw-rock phosphate, although it contains twice as much as phosphoric acid as the average acid phosphate, slowly releases its stores of food for crop use. It costs about \$6.50 per ton in carload lots now at the mines. For practical results, it is essential that the raw rock be finely ground to the extent that 90 per cent of the material will pass through a sieve having 100 meshes to the liner.

Where raw-rock phosphate is used as a reinforcement for stable manure it may be spread at the rate of from 50 to 60 pounds over each ton of manure as it is hauled from the stable to the fields. A much better practice, however, is to compost the rock with the manure for a period of a month or more before spreading on the fields. On account of its admirable absorptive qualities the raw rock is used as an absorbent in the dairy stable. The common practice is to spread about 1 pint of the material daily behind each cow in the stable.

Where a green cover crop, such as cowpeas or velvet beans, is to be turned under, it is a valuable practice to spread about 1,000 pounds of raw-rock phosphate an acre over the green stuff before the plowing is begun. Products are developed during the decomposition of the organic matter which are efficient in liberating the plant food that is slowly available in the raw rock. Where the raw-rock phosphate is applied in 1-2 ton doses an acre to a soil that is very rich in organic matter the same beneficial results are slowly notable as obtained where the fertilizer is turned under with the green crop.

The recent shortage and high price of soluble phosphate was one of most serious problems which confronted agricultural interests. During the period when sulphuric acid was in keen demand for the manufacture of munitions, raw ground rock phosphate was the only material which could be produced in large quantities to make up the threatened serious phosphoric acid shortage occasioned by the curtailment in the supply of sulphuric acid available for the making of acid phosphates. During the agricultural readjustment period raw-rock phosphates is one of the best and least expensive fertilizers which the planter who is interested in the long-time and permanent improvement of his land can use. Conclusions reached by experts of the United States Department of Agriculture as a result of extensive laboratory, field, and greenhouse experiments with raw-rock phosphate are to the effect that for definite results it is essential to continue every investigation with this fertilizer for at least five years, due to the fact that the plant food which it contains is slowly available. Where liberal applications of even medium qualities of raw-rock phosphate were added to soils they produced an increased yield of many crops the first year of their application. The effectiveness of raw-rock phosphate depends largely on its thorough distribution in the soil, this distribution being brought about by liberal applications of very finely divided material as well as thorough cultivation.

The presence of decaying organic matter in the soil increases the effectiveness of raw, ground rock phosphates due probably both to greater bacterial activity and the higher content of carbon dioxide in such soils. From a similar standpoint, the effectiveness of raw-rock phosphate is usually increased after remaining in the soil for a year or more. Most crops respond more quickly to applications of acid phosphate than to bone, basic slag, or raw-rock phosphate. Accordingly, where the early stimulation and quick maturity of the crop are the main consideration, acid phosphate is

probably the best form of phosphoric acid to apply.

The question of whether increases in yield ordinarily can be produced more economically by applications of soluble or relatively insoluble phosphates must be considered in a measure an individual problem for each planter, since it depends on a number of factors of which the most important are the nature of the soil, the crop system employed, the price of various phosphates in each particular locality, and the length of the growing season.

NITRATE FOR THE CORN CROP.

Cooperative experiments made by the Bureau of Plant Research and the States Relation Service of the United States Dept. of Agriculture show that Nitrate of Soda when applied to growing corn at the rate of 100 lbs per acre will increase the yield on an average of more than 500 lbs to the acre. The experiments were conducted on 75 different farms in different parts of the southern section of the United States. The nitrate was applied in most cases after the corn had reached the height of 18 inches.

SELL FUEL WOOD BY WEIGHT

It is the custom to sell hardwoods and softwoods at slightly different prices because of differences in heating values. This is only a superficial classification, however, as two species of hardwoods may have heating values widely different. Where hardwoods and softwoods are mixed together without regard to the proportion of each, the values may be so different that one man may, for the same money, buy twice as much heating value as another. The shape and size of the sticks may also cause great variation in the actual amount of wood substance and therefore of fuel. If weight were the measure, the species, shape, and size of sticks would make little difference, provides the wood were thoroughly seasoned it would be necessary however, to fix certain standards as to time of seasoning of wood.

Wood for fuel should be sold by weight instead of by cord measure, for heating value depends not upon the bulk of the wood but upon its weight, say foresters of the United States Department of Agriculture in Bulletin 753, recently published. A pound of dry wood of one species has about as much heating as a pound of any other species, but two cords may vary 100 per cent in their value for heating.

Harry Lauder And the Loan

Speaking of the Liberty Loan at a luncheon given for him in Honolulu Monday, Sir Harry Lauder, who lost a boy in the war, yet did his bit by singing heart into boys in the trenches said: "The war loan is soon coming. But the war loan isn't giving any money away. In contributing to the Victory Loan you are not doing anything for anybody but yourself. You are investing your dollars in a security, and you are going to get it back."

How many people realize that fact? You do without a new pair of shoes and a new suit. Your wife, perhaps, makes over last summer's dress and turns her hat hindside to and retrims it. But you are going to get that money back with interest. You can get it back in one year, in five years, ten, or wait until the bond matures. But whichever way you work it, your money will come back to you the same as bread upon the waters.

Do you know of any other investment you can make in a bond where you are as sure of getting out of it what you put in, as you do a United States Government bond? Do you know of any bill you can pay that will give you back a four or 4½ per cent interest? You are going to pay bills with this loan and be paid good money for doing it. As a business proposition it can't be beaten.

Americans have the name of being the best business people in the world—the hardest headed, hardest hitting and shrewdest. And the Territory of Hawaii isn't behind hand in that respect. That is, they have not been heretofore, but they will be if they don't put over the Victory Loan.

Get behind the Fifth Liberty Loan. People of Hawaii, and boost it over the top so fast you will put the mainland cities to shame.

The School Play Ground

Written for the Garden Island by Vaughan MacCaughy

One of the most significant educational movements in recent years is that which has given adequate recognition to play and recreation. We are beginning to recognize the values of the school ground as a play center. A proper amount of play, under trained supervision, means sounder physique, happier children, better citizens, and improved homes.

It has given me great pleasure to learn of Kauai's interest in playgrounds and playground equipment. Henry S. Curtis, America's foremost playground expert, has made the following statement:

"In the past ten years the play movement has burst upon us and has brought with it an illumination as to the educational value of play. The old-time school yard, with its limited space and its restrictive traditions, is entirely unsuited to the new uses demanded by the new ideals, and there is going on everywhere a reconstruction of theory and practice to meet the new requirements. As in all reconstruction periods, however, the facilities and needs are out of harmony, though many cities, with an imperfect understanding of the problems involved, are attempting to improve conditions according to their lights."

"The new activities for the school require, in the first place, a larger yard; secondly, a yard which is in condition to be used—which is not often the case at present; and, thirdly, a yard with a certain amount of equipment for play and some one in charge. The yard is nearly as important as the classroom in the conduct of the modern school, for it must furnish a place for gardening, for open-air classes, for organized play and physical training both during the school day and after school, on Saturdays, and during the summer vacation. These new uses are creating a new condition, which warrants far greater expenditure and care than the old-time yard ever received."

"It is unfortunate that any school needs to be built in the city, because it is usually impossible to get enough land for baseball, football, and the other games that the children should play. The past ten years, however, have seen the invention or introduction of several new games, such as volley ball, basket ball, indoor baseball, and tether ball, which are more economical of space than any games that we have formerly had and which help to relieve the almost impossible condition of a few years ago. It is possible now on a block of ground, if the block is of fair size and the school is not too large, to have a good deal of play that is worth while."

The best book on school games that I know of is Jessie H. Bancroft's "Games for the Playground, Home, School and Gymnasium," published by McMillan, New York, 1918, 456 pages. It gives complete, accurate directions for hundreds of tried and tested school yard games. I wish that the Department of Public Instruction could afford to place a copy in every school in Hawaii. Every public school teacher should take an active interest in school yard games, and be able to supervise them intelligently and sympathetically. An excellent illustrated bulletin, obtainable free from the U. S. Bureau of Education at Washington, is entitled "The Reorganized School Playground."

Healthful socialized recreation will make better boys and girls, better workmen, more stabilized labor conditions, and a more prosperous Hawaii. It will enable the schools to yield higher dividends upon the taxpayers' investment.

SOME FEAT

On Sunday afternoon one of H. W. Laws' roofing men, a deepsea sailor, climbed the 85 foot flagpole in Kukulono Park and rove a new halyard. The pole is some 18 inches in diameter at the bottom, tapering towards the top. Electricians' climbing spurs were used and the work performed in an incredible short time, again permitting Mr. Walter McBryde to display the flag on festive occasions.

The Tax on Jewelry

Effective April 1, 1919, Section 905 of the new revenue act imposes a tax upon everything in the shape of jewelry, whether real or imitation, silverware, silverplated ware, and, in short, everything except surgical instru-

ments, that is made of, ornamented with, or fitted with gold, silver, platinum, or imitations of those metals, or ivory.

The tax applies also to watches, clocks, opera glasses and binoculars, and is fixed at 5 per centum of the price for which any such articles are sold by or for a dealer to a customer for consumption or use.

An important feature of this tax is that it is to be accounted for by the

dealer or vendor, regardless of who manufactured or finished the article, and in this respect, as well as in its extended scope, it differs materially from the tax on jewelry imposed by the act of 1917, which required the manufacturer or importer to report and pay the tax to the government.

Not only jewelers, therefore, but every other person selling any of the enumerated articles will be required to render returns and pay the tax of

5 per centum on sales occurring after April 1, 1919. In order that such persons may be placed on the mailing list for blank reports and further information, they should immediately communicate their names and addresses and the nature of the tax in which they are interested to the collector of internal revenue. Jewelers who are at present rendering returns under the 1917 law will receive blanks without special request.

Willard STORAGE BATTERY
SERVICE STATION

(Copyright registered, 1917)

Put Your Battery in the Hands of its Friends

It is too vital a part of your car to be handled by anybody. It gives you power to crank your engine, the spark that keeps it going, and light at night.

Upon it depends the successful operation of your car.

Bring it in twice a month, and we'll test it—for expert testing is the first rule in battery care.

If you haven't distilled water at hand, we'll fill it.

If it needs repairs or recharging we'll do the work as you'd expect factory-trained experts to do it. And you won't lose the use of your machine the while, for we have a rental battery for your use while we're working on yours.

We're your battery's friend. Our job is to keep it on the job to your satisfaction.

For we're the Willard Service Station.

What Will You Do?

Now the Victory Loan campaign is in full swing. After giving you three weeks to think the matter over, the Government is now coming to you for your loan. Are you going to add your bit to the boost that Uncle Sam is asking for? Or are you going to sit back and let the other fellow do it?

"I'm carrying all I can now." "I subscribed to the other four loans but darned if I'll subscribe to another. I'm pau." These and similar expressions you will tell the team members who come to see you about buying a bond.

But before you definitely make up your mind, take an hour off and figure. Do a little common sense thinking.

If this Victory Loan does not go over the top, then it means heavier taxation for the country for sometime to come. We are paying pretty high prices for things now, but if we don't put over the Loan we'll pay still higher.

As a business proposition which is the better—to buy a Victory Loan 48¢ short term gold note, and get something for your money, or to not buy one, be taxed heavily on all your living commodities—and get nothing for your money?

There it is. You subscribe and get your money back WITH INTEREST, or you don't subscribe and your money is taken by taxation and you get nothing.

Uncle Sam has got to have this money. There's no two ways about it. And if he can't get it one way he'll get it another. The way he gets it is now up to you. Buy a Victory Bond!

THE RIGHT ATTITUDE

We beg to commend the quality of an open mind which the new superintendent of public instruction seems to have in a large measure; it will assuredly win favor for him in all directions.

Doubtless he is being deluged with suggestions, good, bad and indifferent,—most of which will have to go into the waste paper basket. But we have reason to know that some of it is good and deserves serious consideration. Some of the suggestions coming from teachers of experience and ability are particularly worthy of attention, and the sympathetic consideration of them cannot fail to be of benefit to the cause of education in the Territory.

We would also commend the evident disposition of the new superintendent to take the public into his confidence, and give a sympathetic hearing to the intelligent people of the local community, who have the interest of the schools and the children very much at heart.

We note with interest and approval the section in the Kapaa Homesteaders' by-laws which provides that any complaint against the water tender must be accompanied by a cash deposit of five dollars, which shall be forfeited if the complainant doesn't make good his charge. This is practical wisdom of a very unusual quality. Would that this rule could be generally adopted in the various interests and relations of every day life. If a man had to put up a five dollar piece every time he brought an irresponsible charge

against a neighbor and was called to a "show-down" and the proof of it before he got it back this would be a much more peaceful and harmonious world to live in. We heartily commend this bit of Homestead wisdom.

GIVE US A BLUE SKY LAW

We are glad to notice that the Senate is stirring in the matter of a Blue Sky Law for the Territory. It appears that a proper Blue Sky Law, that will hold water, is a very difficult thing to prepare, and that it cannot be done off hand by a lawyer's clerk.

May be; but even so, the demonstrated need of the Islands for such a law is so pressing that the necessary time and care should be given to it, at any cost, to the end that such a law may be assuredly passed before the end of the session.

We are glad to see that Senator Rice is pushing it; that means we will get it!

A Christening Service

Little Helen Elizabeth Cropp, infant daughter of Mr. and Mrs. E. G. Cropp of Koloa was baptized on Sunday afternoon at their home by Rev. J. M. Lydgate. A dozen or so guests, special friends of the family, were present for the occasion, rather to the surprise of the dainty little lady herself, who looked on with a sort of amused wonder, as much as to say "what is all this about?" Mr. F. Weber was Godfather; the Godmother was Mr. Cropp's sister, absent in Germany.

A delicious pot luncheon followed the ceremony. The guests were: Mr. and Mrs. F. Weber, Mr. and Mrs. F. Crawford, Mr. and Mrs. J. M. Lydgate, Mr. and Mrs. W. N. Stewart, Mr. Haneberg and Dr. Waterhouse.

All graduates and former students of either the Boys' and Girls' School cordially invited.

General Admission - 50c

Admits to both Concert and Dance.

Proceeds for the benefit of

Kamehameha Boys Athletic Association.

Terms of the Victory Loan

Official figures have been given out by the Twelfth Federal District for the Victory Loan, that the quota for the Territory of Hawaii will be \$4,788,000, divided as follows:

Oahu, \$3,590,000; Hawaii, \$530,000; Maui, \$380,000; Kauai, \$288,000.

Cables were received in Honolulu Wednesday morning giving the following information regarding the rates of interest and kind of bonds which would be issued for the Fifth Loan. The entire loan amounts to \$4,500,000,000 consisting of 380,000 gold notes. These will be dated May 20, 1919 and will mature May 20, 1923. They will be redeemable on June 15 or December 15, 1922 and will bear interest of 4% per cent, the coupons payable December 15, 1919 and semi-annually thereafter and at maturity.

The notes will be exempt from normal Federal income tax and from state and local taxation ex-

cept estate and inheritance taxes. They will be convertible at the holder's option at any time into like notes bearing 3% per cent interest. These also will be exempt from all Federal, state and local taxation except estate and inheritance taxes. The latter series are convertible into the former at any time at the holder's option.

If the entire national loan is oversubscribed allotments will be made as in the First Loan except that subscriptions of \$1000 or under will be allotted in full.

Payment in Hawaii will be made on the Victory notes as follows: 10 per cent on application on or before May 3; 10 per cent on or before July 8; 20 per cent each on or before August 5; September 2, September 30 and November 4, with accrued interest on deferred instalments. Full payment can be made in Honolulu and the islands by May 30 if 10 per cent has been paid with application on or before May 3. Payment can be completed on any instalment day with accrued interest.

Don't forget, Mr. and Mrs.

American Citizen that if you subscribe to this Victory Liberty Loan, future generations will be cognizant of the fact that you stood by your country in its last call. Every subscriber to a loan will have his or her name placed on a roll of honor which will be placed in the Archives of the Territory of Hawaii, along with the baseball which will be thrown by Governor McCarthy in the parade and baseball game at Honolulu April 19.

So here's your chance to have your name go down in history. You can tell your grandchildren and your great grandchildren that you subscribed to the loan, and that if they don't believe you to go to the archives and see your name. When your children grow up they will be able to point out with pride the fact that their ancestor did his duty willingly and self-sacrificingly.

It makes no difference whether you buy a \$50 note or a \$1000 note. Your name will be on the list just the same. So get busy and see that you are not left behind when the band wagon starts.

Get on even if you have to run for it.

The Victory Loan Committee is asking this question of every American citizen in the Territory of Hawaii. The country is in debt. It has a lot of bills to pay. They are not Mr. Wilson's bills. They are not the bills of the Congress of the United States. They are not the bills of a select few officials. They are the bills of the nation. You are the nation, therefore, they are your bills.

Mr. American Citizen, are you going to pay your bills? There are still 1,300,000 American soldiers in foreign territory.

Are you going to feed them? Are you going to clothe them? If you don't do so, who will? How are you going to pay the bills you ask? Through the Fifth Victory Liberty Loan. Hawaii has a quota of \$4,788,000 to meet. Will she go over the top and meet the quota? She will. You will stand behind this particular section of the American Nation and see that it does its duty. For you depend on the Nation, and the Nation depends on you.

Things of Interest In the Churches

The Church Convention

The regular semi-annual association of the churches of Kauai was held at the Hawaiian Church, Lihue, on Friday and Saturday last with pretty full representation from the various churches of the various races and was a cosmopolitan affair of many tongues and many hues, but one spirit in harmony.

One of the significant features of these church meetings is the interest and activity of the Laity. Every church sends a lay delegate with an independent report which puts things as he sees it, sometimes very unique and often very different from the pastor's.

The second day of the convention was largely given to the consideration of a general plan of systematic church benevolence on what is known as the envelope system, as set forth by Rev. A. N. Schenck of the Hawaiian Board. According to this plan three quarters of the church income would go to current church uses and the remaining one quarter will be set aside for home and foreign missions to be divided equally between the Hawaiian and American Boards. It was voted to recommend the plan to the individual churches for adoption.

The commissions of the lay preachers and workers of the Association were renewed for the coming year and a license was granted to D. K. Kapahae as a lay preacher and worker at Hanalei.

Easter Sunday

Lihue Union Church celebrated Easter tide after its usual custom with a special service which was largely attended and greatly enjoyed. The floral decorations were more than usually rich and effective; great masses of Easter and Calla lilies interspersed with palms.

The sermon emphasized the text, "The things that are seen are temporal, but the things that are not seen are eternal," and made a strong appeal for the eternal life, that is grounded in a spiritual life begun here.

A generous collection was taken up for the Hawaiian Board.

In the evening there was a union service at the Tip Top, which was well attended in spite of the inclement weather. Y. M. C. A. General Secretary McDill, now visiting the Islands from the coast, made a brief but luminous statement of the aims and purposes of the Y. M. C. A. organization.

Rev. H. P. Judd gave the address of the evening on "The Easter Hope." An attractive feature of the occasion was the fine show of Easter and Calla lilies brought in from the morning service.

An occasional evening service of this kind, popular, varied and live, would find favor, and might reach a class not much given to going to church.

Long Years of Service

The officers of the Kauai Association of Churches, Rev. I. K. Kaaui, Moderator; J. H. K. Kaiwi, Secretary, and J. M. Lydgate, Treasurer, have been in continuous service for fifteen years, which is a testimony to the satisfaction they have given. The Moderator, in particular, deserves special recognition for the dignified, impartial, courteous and efficient way in which he has discharged the duties of his office. It has gone a long way toward securing harmony and efficiency in the work of the churches.

A Resignation

At the close of the church service at Lihue Union on Sunday, Rev. J. M. Lydgate tendered his resignation as pastor of that church to take effect six months from the first of May. He said that they had been in the continuous service of the church for twenty three years and felt that a change was desirable.

The same action was taken at Koloa.

Easter Week Services

Lihue Union Church, after its usual custom observed Passion week with special vesper services of a devotional and spiritual character every afternoon. Each one brought a message of inspiration or comfort much needed in these days of strenuous race and endeavor when people very much need an accession of spiritual strength to transform and transmute the material issues of life.

The War and Your Gasoline

The first of a series of three statements

For obvious reasons the following facts of interest to the public could not be published during the war. They affected a vital war necessity regarding which the Government required secrecy. But now that the war is won, we are at liberty to make the following statement of facts:

Highly volatile gasoline for fighting aeroplanes was one of the war needs. The output of this special gasoline by all the refineries east of the Rocky Mountains was not enough, so California was called upon to furnish a large part of the supply. At the request of the United States Government the Pacific Coast Petroleum War Service Committee apportioned California's quota among such of the large refiners as were able to make this special gasoline.

The Standard Oil Company, being the largest of these, had the greatest quota to fill. We were glad to do our part. We supplied more than our quota of aviation gasoline.

Aeroplane engines, operating high in the air under conditions of extreme cold and rarefied atmosphere, require a different gasoline from engines operating on the ground. In fact, the needs are so special that the gasoline manufactured for aeroplane use (often used at altitudes of from 20,000 to 25,000 feet) would be utterly indifferent for use in automobile or other internal-combustion engines operated on land or sea.

Aviation gasoline has to be highly volatile. It must vaporize rapidly even in the extreme cold of very high alti-

tudes. On its rapid vaporization alone must often depend the lives of the men in the aeroplane. This gasoline would not be good for general use. It would lack power on the ground, its loss in storage by evaporation would be great, and it would be expensive.

Making aviation gasoline for the Government took a very considerable part of the low boiling point or highly volatile constituents of the crude oil, and, as a result, the gasoline left available for regular use lacked those qualities which assure easy starting of the automobile engine.

The Government's demand for aviation gasoline reached its maximum in the late fall of 1918, and then for a period of about six weeks the deficiency of Red Crown gasoline in low boiling-point constituents or easy-starting qualities was most apparent.

Now that the war is won and the great demand for aviation gasoline has ceased, we are again able to offer the same grade of Red Crown gasoline as formerly, with the same full and continuous chain of boiling points—from the low to the high—which is necessary for easy starting, quick and smooth acceleration, high power and long mileage.

Mustard Gas and Cooties

There has recently come to Kauai, to the employ of the Lihue Plantation in the person of John Linden, a war veteran such as one seldom sees as far away from the scene of war.

Though a comparatively young man he was through the Boer war in South Africa, and in the recent great war he was through the thick of the trench fighting in France and then was transferred to the Salonika front and saw much very brisk warfare there.

Mustard Gas

In the early stages of his service he was wounded by the loss of a portion of one foot, and then later he fell a victim to mustard gas, which laid him up in the hospital, first in France and then in England for months. Mustard gas he considers the most penetrating and disastrous of all gases. It is particularly corrosive to any part of the body where there is the least moisture, and it bites through clothing or other covering as though it was not there. It particularly attacks the mucous passages, the mouth, nose, throat, etc., and develops in them a livid inflammation, that settles down later into a raw sore which every touch and every movement irritates. Every breath brings its punishment and the least unconscious movement causes suffering. Recovery is a long slow process.

Rats and Cooties—Rats

The rats and the cooties were the most ubiquitous and ever present factors of the war, even more so than the booming of the guns, for they, the latter at least, followed you back to the rear no matter how far you got, and I sometimes wonder if I am rid of them yet. The rats were your closest boon companions in the trenches, and were right on hand for a share of any good thing you got night or day. I have seen a man tie up his night lunch in a compact package, and put it in his hip pocket, and lie down for a few minutes nap, and the rats would make a broadside attack on it, and eat up the pocket wholesale and carry off the lunch, leaving not a vestige of it to explain what had happened. The only way to circumvent the rat was to put your chow in the tin "dixie" that every trench man had, and close the cover down tight, and then hang it up on a peg driven into the trench wall.

The Cooties

The rats you could get away from, but the cooties, never! When you went back from the trenches or went into the hospital, you were disinfected at the station, stripped to the skin, given a hot steam bath for half an hour, and a complete fresh and clean outfit was issued to you. And before night you would have the cooties again! When you stared back to England, before you got onto the boat at Le Havre you went through the same process again, they steamed and disinfected you, and took your outfit away from you and gave you a new lot. But good Lord—before you got half way across there were the cooties right with you very much the same as ever. And when you landed in England, the same process was renewed again,—with the same result—the cooties was with you when you got home.

Some Facts About the Quality of Gasoline

Elsewhere in this issue will be found an announcement by the Standard Oil Company explaining why the necessary production of gasoline for our fighting-aeroplanes was responsible during the latter part of the war for the lack of easy starting qualities in ordinary motor gasoline.

Every oil company had more or less difficulty with gasoline during the last few months of 1918 and some complaint was heard among motorists. It was impossible until now, however, to offer any explanation, because it was a military fact which could not be made public.

Aviation gasoline must be highly volatile, or in other words, it must vaporize rapidly and this special fuel was furnished only at the sacrifice of the gasoline left for regular use. Gasoline is made up of constituents having boiling points ranging from low to high. That needed for aeroplanes took a large part of the low boiling point constituents from the crude oil and left the ordinary motor gasoline somewhat lacking in these low boiling points which are necessary for easy starting of the engine.

While aviation gasoline is exactly suited for engines operating in the extreme cold and rarefied atmosphere of high altitudes it would be unsuited for automobiles. It would lack the necessary power, would evaporate too quickly and would be expensive.

Immediately after the signing of the Armistice the need for this special aviation gasoline became less urgent and Red Crown gasoline regained its old high quality, due to a full, uniform chain of boiling points from the low to the high.

While it was an unfortunate fact that the ordinary motorist had to put up with a fuel which was not quite what he had been used to, yet he played an important part in winning the war by getting along with such gasoline as could be manufactured without interfering with the output of aviation gasoline. The Pacific Coast had a much easier time than the Eastern States. In the East a general shortage of gasoline forced the Fuel Administration to issue orders prohibiting the use of pleasure automobiles on Sunday.

The output of aviation gasoline by all the refineries east of the Rockies was not enough, so California was called upon to furnish a large part of the supply. At the request of the United States Government the Pacific Coast Petroleum War Service Committee apportioned California's quota among such of the large refiners as were able to make this special gasoline. The Standard Oil Company being the largest of these, naturally had the greatest quota to fill. They more than did their part in meeting this war need and exceeded their quota to a considerable extent.

It was only during a period of about six weeks in the late fall of 1918 that the lack of easy starting was evident. As soon as possible Red Crown gasoline was put back on its old high quality basis and it now has the full and continuous chain of boiling points from low to high which is necessary for easy starting, quick and smooth acceleration, high power and long mileage.

Stop-Look-Listen!

Experience is a good teacher, so if you have an automobile that requires some fixing, it will by all means require experience to overcome your troubles at the lowest cost.

A FORD CAR in particular, requires experience other than the average mechanic obtains.

MR. A. K. DECKER

who was recently appointed manager of the Kapaa Auto Service Company, and who has had 15 years experience in various makes of cars, and made the FORD CAR his specialty while with the Schuman Carriage Company, of Honolulu, along with 5 other mechanics, will assist you as never before. Mr. Decker also wishes to state that he has had as much experience as to obtain the honor that he assembled the large Curtis Flying Boat while at Ford Island, which made the first successful air voyage to Hilo and return.

(Kaulukou Opio.)

For Treasurer

To the Voters of the County of Kauai.
I hereby announced myself to be a candidate on the Republican Ticket for the office of Treasurer of this County and respectfully solicit your support at the coming election to be held May 17th, 1919.

K. C. AHANA.

For Auditor

To the Voters of the County of Kauai.
I hereby announce myself a candidate to succeed myself as Auditor of the County of Kauai and respectfully solicit your support in the coming primary election to be held on May 17th, 1919.

C. MASER.

For Auditor

To the Voters of Kauai County
I desire to announce myself a candidate for the office of County Auditor on the Republican Ticket at the forth coming Primary Election and respectfully solicit the support of the voters of this County.

HENRY BLAKE.

IN THE CIRCUIT COURT OF THE FIFTH CIRCUIT, TERRITORY OF HAWAII—AT CHAMBERS—IN PROBATE.

No. 771.

In the Matter of the Estate of Bunichi Maruyama, deceased.

NOTICE TO CREDITORS

Notice is hereby given that Letters of Administration have been issued to Bishop Trust Company, Limited, an Hawaiian corporation having its principal office in the City and County of Honolulu, Territory of Hawaii, as Administrator of the estate of Bunichi Maruyama, late of Waimea, Kauai, deceased.

All creditors of the estate are hereby notified to present their claims with proper vouchers or duly authenticated copies thereof, even if the claim is secured by mortgage upon real estate, to the said Bishop Trust Company, Limited, at its office, No. 924 Bethel Street, Honolulu aforesaid, within six months from the date hereof (which is the date of the first publication of this notice); otherwise such claims, if any, will be forever barred.

And all persons indebted to the said estate are hereby notified to make payment to the said Bishop Trust Company, Limited, at the above address. Dated, Honolulu, T. H., April 1st, 1919. BISHOP TRUST COMPANY, LTD., Administrator of the Estate of Bunichi Maruyama, deceased.

BY-AUTHORITY

NOTICE OF PRIMARY ELECTION

By virtue of the authority in me vested by law, I, H. D. WISHARD, Chairman of the Board of Supervisors of the County of Kauai, Territory of Hawaii, do hereby give notice and proclaim that a Primary Election for the nomination and election of candidates for County Offices in the County of Kauai, Territory of Hawaii, as follows:

ONE COUNTY SHERIFF
ONE COUNTY CLERK
ONE AUDITOR
ONE TREASURER
ONE COUNTY ATTORNEY
ONE SUPERVISOR for Waimea
ONE SUPERVISOR for Lihue
ONE SUPERVISOR for Koloa
ONE SUPERVISOR for Kawaihau
ONE SUPERVISOR for Hanalei

will be held on Saturday, May 17th, 1919, throughout the County of Kauai, during the hours provided by law.

Notice is further given that in the event that House Bill No. 234 pending before the Legislature of Hawaii, now in session, which provided for a Plebiscite for submitting to the qualified voters of the Territory of Hawaii the question as to whether or not the female citizens of the Territory of Hawaii, possessing the same qualifications as male citizens, shall be empowered to vote at all elections held in the Territory of Hawaii, and empowering such female citizens to vote at such elections in case the Plebiscite shall so decide, etc. etc. will become law before the date of the Primary Election herein, the qualified voters are to vote either in the affirmative or in the negative upon the following question:

"Shall the female citizens of the Territory of Hawaii, possessing the qualifications as male citizens, be empowered to vote at all elections held in the Territory of Hawaii?"

The precincts, polling places, and the hours of voting established or as may be established by the laws of the Territory for the election of Representatives in the 6th Representative District, being the County of Kauai, shall constitute the precincts, polling places, and the hours of voting, for the nomination and election of County Officers.

At such time and places aforesaid, I hereby call upon all duly qualified electors of the County of Kauai, who have registered their names as voters, according to law, to meet for the purposes aforesaid.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused the Seal of the County of Kauai to be affixed hereto.
DONE at the County Seat at LIHUE this 8th day of April A. D. 1919.

Attest:
JOSEPH ANDRE SOUSA,
Clerk, Circuit Court of the Fifth Circuit, Territory of Hawaii.
April 15, 22.

The Meaning of the V

Have you noticed the posters with the big blue "V" on a red background which are plastered on every available post and window. Speculation has been rife as to the meaning of this V. Is it a new patent medicine, a different breakfast food, or some ad writer's stunt to introduce a chocolate candy? The poster is a two-fold message to the people of the Territory of Hawaii to wake up from their peaceful dreams and realize that there is yet work for them to do. The "V" represents the Roman numeral standing for the figure 5. The "V" also stands for Victory, and the two-fold message concealed within that big blue letter is the fact that Uncle Sam is now asking you to subscribe to a Fifth Liberty Loan, and make our victory over the Hun a certainty. By putting over the loan the public will also have a chance to gain a victory over a large debt which the United States now is carrying and which it is expected will be wiped out with the successful consummation of the loan.

Word has been received from the Twelfth District Liberty Loan headquarters at San Francisco, that Sunday, May 4, has been chosen for Victory Sunday, at which time services appropriate to the victory of war and loan will be held. All the churches in the islands are expected to observe this day, in conjunction with the churches on the main land.
