THEO. P. SEVERIN Photographer. Has taken the Studio formerly occupied by A. A. Montano, corner of KING and FORT STS., and is prepared to take Pictures in any Style.

LEAD PENCIL MAKING. TRIP THROUGH THE FABER FACTORY, NEAR NUREMBURG. Treatment of the Graphite and Clay—Subjected to Intense Heat—The Workmen in Cedar—Final Stages of Development.

After the lead and clay have been dried and mixed in suitable proportions, water is added, and the mass is put into a mill consisting of rows of separate stones, occupying the whole length of a large apartment, and connected with a steam engine by bands running along the upper wall. Under each mill stone is a tub to collect the mass which slowly escapes from the treatment of pressure, and falls in thick gray drops from the wooden trough beneath the stone.

After a day or two the leads are placed in other hands to be cut to the length required for pencils, and carefully sorted; the perfect specimens are then laid in boxes and sent to another room, where they are enclosed in larger boxes of iron hermetically sealed, and subjected to the intense heat of a furnace fire for five hours, when the lead is sufficiently tempered for writing purposes, and passes into the care of the workmen who furnish the wooden enclosure, though it must first bear the scrutiny of the faithful proprietor, who personally makes trial of a specimen of the pencils, as they are changed for a sharp buzz, as though gigantic bees and flies were endeavoring to escape from spider-webs as strong as a ship's cable.

THEO. P. SEVERIN Photographer. I was told the richest thing about a Minneapolis girl. A certain Swedish baron of fine family and education came to this country, and—the old story—found himself obliged to obtain any situation to keep himself from absolute want, so he entered the clothing store of M— as clerk. Well, this young lady, hearing he was a noble, must have his autograph, so she came into the store one day and requested it, leaving her album. It puzzled him greatly. Why should she want his autograph, a complete stranger? Suddenly the truth struck him, and he wrote his name, and beneath, "Clerk in M—'s store." "Oh," said he to me, "you should have seen her face lengthen, and she said: 'I didn't want that. I wanted your name and your title.' " "Clerk in M—'s store." "There's the name, and clerk at M—'s is the only title I wear in this country." —Pioneer Press.

The Fitcher's Sore Arm. In the more severe forms of the base-bow pitcher's troubles of the arm, "mild galvanism," making use of large flat electrodes, applied over the most sensitive points, in front of and behind the affected joint, is recommended; the latter part of the day being the preferable time.—New York Star.
