for his of 100,000 Arcticied dollars in Hawaii.

Can one see the sarcoidal smile on the benevolent face of Mr. Huntington

while he stands, Benjam in Morgan, and the yellow dusters of his peace shoe and tell and talk and write to carry out his policy of more Chinese for California.

To be let it be said for him that he has taken an interest in the subject with commendable frankness. The people know just where he stands but whatever respect they feel toward him for warning them that he will make no more of his visit than will fall, they must withdraw from Huntington's policy and carry out his wishes by opening up 50,000 crooks.

The Call has explained the physical fact that white men cannot work where a tropical sun warms the growth of the sugar cane.

White labor is now extensively producing beet sugar in California. It is the only kind of sugar except maple's, that white labor can grow. Luckily it was installed here at a time when our various de
crees of abhorrence acted on the

democratic Chinese labor to a minimum. It was not founded on that labor, but some of it, and a great point of its per
tective magnitude and value to this State. But with 50,000 crooks as

used in Hawaii, by the less trying climate and more agreeable environment of California, how long will white labor control the produc

tion of beet sugar ever?

We have felt the result of Chinese craft, ingenuity and industry is in the guise of illadvised and unlaborous labor in this State. Were the results not satisfactory as to the

sugar ease to extend and prolong the experiment. If so, then it is open by the annunciation of Hawaii—S. J.

SUGAR AND RICE

t and all that's nice require cultivation. This being the season to prepare to cultivate, we are prepared to cultivate closer relations with our cul

trating friends. To this end we introduce to them last season's favorite, the most beautiful and perfect plow ever brought here, the Avery

ADVANCE

double furrow, roller Couter plow. It has been tried, tested and approved. Then there is the PERFEKT
double mould board plows in three sizes, 12, 14 and 16 inches the Perfect will be sold in the same sizes.

We have also a large in

sorment of Rice plows, in sizes ranging from a 16 inch to a 15-inch cut, also Cultiva
tors, Harrows, and a full line of Avery's SUGAR LAND IMPLEMENTS, including stubble diggers, cultivators, fertilizer distributors, etc., etc.

Now they are all practical workers and never fail to give satisfaction.

EVERY AFTERNOON

IN TUESDAY, OCT. 26, 1897.

Will it not be to the interest of the Cyclomobile management to offer a special price for a 2 mile course between Lula and Gillis? It will be gained, and disadvantage to future judges, to have decided reversed when some of honest integrity and impartiality is the only way one can get a just result. Why not settle, at Saturday's bicycle comic, so many open questions, and authorize

them that they cannot be closed among the people and not justly partial.

being being illegal, of course there are no bets on the event, but could the result vary so they are naturally all of

When annexation comes.

Whatever happens the sugar

industry of Hawaii will not fall. Indi

viduals are left with a

thing to go of shares for which they have paid, and the one article in their list to be delivered at the door of the con

sumer upon the arrival of every

steamer, at prices that will make local grocers weary.

The gentlemen with a talk about his neck and a book of samples of tejca, or his pocket book to take your measure for a suit of elegant and deliver them C. D. for prices that will make their wrappers sag.

The sho man and the hat man will take your order and deliver goods at prices that will make deal

ers of the handiest red and cork hire a burden.

Ladies customers will have dresses and rags just right for their wives and daughters, and everything needed in the

ner at price that will put up the shop owner at bay.

The commercial traveler takes no

stores and hires no clerks. An em

brass to keep of the sun's rays and the clothes to keep it out of the rain she needs. Real estate rents must fall.

The people must think of

themselves and to the community.

The native Hawaiian has been living on trusts for months because of the infamous action of the heroes.

jovial of January 17, 1900. He is on his back already and any change can only benefit him. Whatever hap

happens he must look up—because of his position.

The man who works for annexation will be host to his own pet, too late to remedy matters. The man who shuns for annexation is either a knave or a fool.

AUTOMATIC COMMISSIONERS

The Board of Education possesses none very remarkable items of the power vested in its members. In no other department under the administration of the public be damned," is so plainly illustrated than in that provided by the commissioners at this time. It is about that time that parents and teachers have charge of the school and when the children assert their

bank the commission, the matters, of the taxpayers. If they don't like the fact they can step out.

the education of the country could certainly not suffer through a change in the present personal. Young boys are arrested by a truant officer, forced to spend a night sitting in a wining a hoaring before a magistrate. When there is a reason to arrest a boy, who did not attend school, or will not stay away with the permission of his parents or guardian. The Board of Education trusts employed by the Board of Educators

of their duties. If a taxpayer shows to a child or anyone a reasonable length of time he is

sufficiently entitled to do so, the truant officers, and the Board of Education will

the contrary notwithstanding. There are certain rights of constitution which a citizen can ret hold, and there are sufficient precautions which enable par

ents to be the judges of when and if their children shall go to school. To look up boys of truant officers at the instance of

truant officers, where want of de

criterion is often illustrated in the courts, is an outrage, and the commissioners of education should not be able to realize the inevitable

resulting from familiarizing chil

dren with prison life. The Board

must hereafter, in a certain public school the children are

to have to wear their medals and

for an inspection of their cleanliness. Their heads are washed carefully, and the boys and girls are bathe

in such an inspection in the presence of the whole school. We press the princ

iple of the school is acting under the au

ority of the commissioners, if it is needed, that this shall be abolished

for such an unwarrantable action, which has caused some par

ents to withdraw their children from the school, an example which will be followed by others who can

only consider it as insult to have their children publicly stripped and ex

pected in regard to the unsightly

flowers of soap, water and clean

toilet.

The commissioners are welcome to meet every week, look important and discuss methods of teaching—of which they know very little. But

they should be made to understand that they cannot interfere with the parents as to the care and

autocratic action on the part of the

teachers or agents will be resented by all citizens.

The Oitation of Hawaii.

A Grey Fox.

En The Insurance.

I notice in this morning's Advertiser a note to the effect that the people who are fond of going a-gunning should not shoot plovers now because they are thin, that their flying travelling through thousands of miles is not likely to make a sport of them. I am evidently a shy fox, for I want to be first "shouted" for myself. If I am a sportman, he must know that the plovers are fat then when they arrive here, and generally go down in November and December and January and February to escape the severity of the north. I am sure the "local sportman" wants the other fellows to leave the plovers alone and for the guns to simply say whether the birds are "in or out."

Another Sportsman.

In answer to your request of the 26th instant, we can supply you with all the information you require as to the quality of Australian and American timber. However, we are constrained to point out that the number of American hardwoods would be too large to enumerate here, and that, were it not for the fact that you have already informed us of your intended purpose, we might have suggested that you confine your investigations to the output of the principal States of the Union, and to the names of the largest firms in those States. We shall be happy to supply you with the names of a few of these firms, and we shall also be able to furnish you with a list of the principal American hardwoods which are most suitable for your purpose.

Yours truly,

W. W. Dimon & Co.
