

COMMERCIAL.

FRIDAY, DECEMBER 14, 1876.
ARRIVALS from abroad during the week have been:—
British bark Albert William, from Newcastle, N. S. W., with cargo to W. & Co. 12th, American barkentine Discovery, from San Francisco, 14th, M. S. Australia, from San Francisco.

The departure have been—14th, W. H. Meyer, from San Francisco, 14th, Australia, for Sydney.
The schooner Ocean, from San Francisco, by H. H. H. & Co., will sail on Tuesday next.

We note a credit sale at auction of desirable China Goods advertised by Mr. P. P. Adams, for Thursday next.
Our plates are to the 7th inst. from San Francisco. We quote from the Journal of Commerce.

RECAP.—Imports during the month were less than half the quantity needed for consumption, and consisted chiefly of Italian, grocery and sundries, including nearly 50,000 lbs. of the former. Some of this was very white and fine, and there is a doubt yet as to whether it will justify the price paid for it. Some of it brought 12¢ 1/2 lb. Sales of Hawaiian sugar amounted to \$100,000. Sales for the week of 1000 tons or more than 1000 tons.

THE PACIFIC
Commercial Advertiser.

SATURDAY, DECEMBER 16.

THE NEWS by the mail steamer which arrived on Thursday night, though voluminous, is not decisive. In the United States, the question of "who is President" had not been settled, both parties continuing to claim Louisiana and Florida. Tilden is reported as having expressed the opinion that the election should go to the people for another vote. A citizen of San Francisco thus writes to his correspondent in Honolulu.

"Public affairs are assuming a very serious aspect, on account of the two great parties struggling for supremacy. Congress has just assembled and everything points to the most turbulent session ever held. Hayes has been undoubtedly elected by a majority of one electoral vote. But the opposition seem determined to count Tilden in, by fair means or foul. In fact political strife practice and trickery rule the hour, and it will require very cool heads and steady nerves to pull us safely through. It is becoming apparent among thoughtful men, that important changes must soon be made in our Constitution, if we expect to continue our present form of government."

In Europe, Turkey and Russia are putting forth their energies in preparation for war, while public opinion in England is manifestly against her taking an active part in the coming struggle. The telegraphic report of Count Bismarck's utterances in regard to the situation will be read with interest.

RECENT ADVICES from Europe disclose the fact of an enormous deficit in the world's production of sugar, amounting to over 400,000 tons, and creating a gap which must by some means or other be filled. This deficiency is caused partly by a great falling off in the produce of some of the tropical sugar countries, especially Cuba, which has been scourged for some time by a desperate civil war. The produce of Louisiana has also fallen off, but the great decrease is in the beet-root sugar. This industry had been forced by protective duties into enormous proportions in Europe. It has never been able to successfully compete with tropical grown sugar at the low rates that have ruled for the latter during the last few years. The lands so largely used for beet-root are found to pay better in production for which the soil and climate are more fitted by nature, and are being used accordingly, despite the very heavy protective duties imposed.

This fact of the decrease in the world's production of sugar should furnish grounds for encouragement to our Hawaiian planters, and ought, in connection with the extraordinary advantages afforded by reciprocity, within the next few years to greatly increase our production of the staple. No known crop capable of being cultivated on the large scale yields anything like the same money return as sugar. The small island of Barbadoes, in the West Indies, measuring only twenty-one miles by fifteen, (while Oahu alone measures forty-six by twenty-five) supports 470 sugar mills, and a few years since exported about fifty million pounds. Nor is the comparison an unfair one, for Barbadoes, like Oahu, abounds in mountains and precipitous ridges, divided by deep ravines and gullies. By the last census which we have been able to find, Barbadoes had a population of 122,198 souls, and in proportion to the area of land, at that ratio, these islands ought to be able to support a population of about four and a half million of souls.

From the French West Indies we may learn a lesson on the practical value of small farms for the cultivation of sugar. We have always urged the importance to the islands of encouraging this system. The planters of the French West Indies, we learn, have managed to preserve their prosperous condition during the long continuance in the depression of sugar, and the secret of this is found in the fact that the cultivators are small landed proprietors and lessees. They hold from five to two hundred acres each, but chiefly about twenty acres. They cultivate other crops as well as cane, and grow food for the laborers. The grinding of the cane and manufacture of sugar is done at central mills encouraged by bonuses from the government, in the first instance, but now running entirely on their own resources. The first mill owners held guarantees from the planters, secured by mortgage on their properties, but such guarantees are now found unnecessary, and mutual benefit is a sufficient bond between them.

The hopes of the wealth, progress and development of Hawaii lie depend exclusively upon our agriculture. A wide and almost virgin field is here afforded for the employment of capital and labor, with a sure promise of rich returns. The government will be but doing its duty and consulting the best interests of the Hawaiian people, by granting every possible encouragement to those who need help in procuring land for cultivation, in small parcels.

IN LOOKING over the Essay on New South Wales by Reid, to which we referred in our last—a very valuable book for the emigrant who looks for a home in Australia, and just such a compilation of information regarding these islands as is needed by our government—we met with several pages upon the timber and forests of that country, in which the author expatiates upon the value and durability of several kinds of eucalyptus, as ascertained by an investigating committee. The value of this wood for shipbuilding would appear to be superior to any other, and its durability and capability of resisting the effects of sea water to be its most prominent characteristics.

In taking up once more the subject of forest planting, we do so without reference to the question of water supply or the influence of forests upon the meteorology of a country, but from the stand points of profit and enterprise. With a new Ministry at the head of affairs, and one whose accession to power has given such general satisfaction and awakens such lively hopes that this country is at length about to enter upon an era of enterprise, aided and sustained by a liberal and enlightened administration, we once more revert to the subject of planting forests of valuable timber.

It is conceded by all, even by those who have had but a few years experience in the country, that our native forests are disappearing rapidly, and that their disappearance is followed by a long train of evils. It is usual to attribute the destruction of our forests to the presence of cattle; but we are of opinion that however injurious they may have been and still are to the growth of the forests in many localities, the general and gradual disappearance of these in a great measure owing to the fact that the native woods are, in common parlance, "run out," or in other words that some of the inorganic substances that are necessary for the production and growth of this or that species of tree have been exhausted from the soil during many centuries of constant reproduction. Such is the result in other countries; and in Australia, the native forest of the eucalyptus, that tree is reported as beginning to die out and disappear, while it flourishes so well in California and at these islands. Constant reproduction affects not only

Queen's Hospital.
SURGEON'S REPORT.

HONOLULU, 1st Sept. 1876.
TO THE TRUSTEES OF THE QUEEN'S HOSPITAL:—
GENTLEMEN.—I have the honor to submit the following report for the quarter ending the 31st of August, 1876.

The total number of patients at present in the Queen's Hospital is 89; viz: 70 Hawaiians, 38 males and 32 females; and 10 foreigners (7 paying). The number of admissions during this period was 89; viz:—61 Hawaiians, 55 males and 26 females, and 10 foreigners. Discharged, 74; viz:—34 males and 28 females (Hawaiians), and 12 foreigners.

Deaths, 7; viz:—3 Hawaiians, 1 male and 2 females, and 4 foreigners. 1 typhoid fever, 1 erysipelas, 3 phthisis pulmonalis, 1 malignant sore throat, and 1 general debility.

Besides the above, 94 new names have been entered in the dispensary books. The greatest number of indoor patients was 90, the smallest 67; daily average during the quarter 80; dispensary 7; prescriptions 5,090. The number of patients treated in the hospital during the quarter was as follows: June, 102; July, 101; August, 108; at the dispensary 611.

Respectfully submitted,
ROBERT MCKINNEY, M. D.
Surgeon to the Queen's Hospital.

TREASURER'S REPORT.

TO HIS EXCELLENCY J. MOTT SMITH,
Minister of the Interior, &c. &c.
SIR:—I have the honor to furnish this, the thirty-fifth semi-annual report of the Treasurer of the Queen's Hospital, showing the receipts and disbursements during the half year ending November 30th, 1876; and an estimate of the financial condition of the corporation.

Since May 31st, 1876, I have received as follows: From patients, \$1,125.12; For salary of Physician to November 30th, 750.00; For salary of Purveyor and servants' wages, to November 30th, 1,440.00; For carpenter's work by J. R. Smith, to November 30th, 7.00; For furniture certificate on apportion, 2,807.65; For provisions, medicines, fuel, bedding, coffee, lights and fuel, 2,840.42; Balance cash in Bank, 2,840.42.

The disbursements during the same time have been: Balance due Bishop & Co., May 31st, 1876, \$107.42; For salary of Physician to November 30th, 750.00; For salary of Purveyor and servants' wages, to November 30th, 1,440.00; For carpenter's work by J. R. Smith, to November 30th, 7.00; For furniture certificate on apportion, 2,807.65; For provisions, medicines, fuel, bedding, coffee, lights and fuel, 2,840.42; Balance cash in Bank, 2,840.42.

The estimated liabilities on the 1st of January 1877 will be as follows: For expenses during this month, \$1,100.00; And the assets will be from, Passenger's and Hawaiian Seamen's taxes for current quarter (estimated), \$ 570.00; Pay patients (estimated), 175.00; Interior Department for Hospital, 175.00; On hand Jan. 1st, 3 months, 2,825.00; Cash on hand, 2,840.42; \$5,610.42.

Respectfully Submitted,
JOHN H. PATY,
Treasurer Queen's Hospital.

SHORT COMMONS.—A complaint comes that a coaster on a recent trip had only provisions enough at the beginning of her voyage to last one day; and we hear of other similar cases. Is the law in respect to provisions and water on coasters entirely a dead letter?

WILLIAM R. CASTLE,
ATTORNEY AND COUNSELOR AT LAW,
Office, corner of Merchant and Kaimanua Streets, Honolulu.

THE PACIFIC
Commercial Advertiser.
SATURDAY, DECEMBER 16.
[Communicated.]
A Liquor Dealer's Journal.
There are lessons to be learned everywhere, even
from a liquor dealer's day-book. These entries
were made less than half a score of years ago; yet
he who made them and quite a number of those
whose names appear in the book have passed
away. The dealer furnished his customers with
ale, beer, brandy, various kinds of wine, whis-
ky, gin, gin, &c. Some of the individuals
whose names appear, were in good circumstances;
others could ill afford the sums they were paying
out for the gratification of an unnatural thirst.
Some names are of frequent recurrence; others
seldom appear. One is charged \$10.75 for whis-
ky and brandy, and in less than a week, another
charge of \$3 is found against his name. A fort-
night later he procures two dollars worth of
ale. He could ill afford this drain on his resour-
ces; nor could his constitution long sustain the
working of the insidious poison. He is no longer
a customer of the liquor dealer.
Another name often occurs. He had a family
and a good situation.--was kind hearted and re-
spected. But that cursed thirst for strong drink
prompted him to patronize the liquor dealer, and
he died suddenly in delirium tremens. His wife
and children needed his loving care. He loved
his wife and children, but his longing for stimulants
was a stronger passion, and it conquered the holiest
affection of his heart.
Until I had a look at this journal, I had no idea of
the tax paid by those who patronize grog-shops.
Brandy, \$7.50 a gallon; 6 bottles gin, \$10; 6 bottles
whisky, \$10; and thus in proportion for other
liquors. Surely "wine is a mocker; strong drink is
raging, and whoever is deceived thereby is not
wise." Young men are deceived when forming the
habit of drinking; for they over-estimate their own
power of resistance, and under-estimate the growing
power of habit--the power of thirst for stimulants.
Suggest to them the danger of their becoming drunk-
ards, and they are indignant. But they are deceived.
By little and little the enemy gains the advantage.
The process is almost imperceptible. Ale or wine at
first, and then something stronger, and still stronger,
until the power of resistance is gone, and the tem-
perate drinker becomes a toper. Thus are temperate
drinkers gradually selling their liberty, their dearest
birthright, and becoming the slaves of an imperious
and fatal thirst, which hurries them to perdition.
And liquor dealers who tempt their fellowmen,
and furnish the maddening, destroying draught can
be regarded in no other light than as enemies of their
kind. Their traffic may be tolerated for a time, as
was slave trading; but a change in regard to the
business is going on; and the time is coming when it
will be considered as utterly irreparable. Ale or wine at
first, and then something stronger, and still stronger,
until the power of resistance is gone, and the tem-
perate drinker becomes a toper. Thus are temperate
drinkers gradually selling their liberty, their dearest
birthright, and becoming the slaves of an imperious
and fatal thirst, which hurries them to perdition.
And liquor dealers who tempt their fellowmen,
and furnish the maddening, destroying draught can
be regarded in no other light than as enemies of their
kind. Their traffic may be tolerated for a time, as
was slave trading; but a change in regard to the
business is going on; and the time is coming when it
will be considered as utterly irreparable.

MOON and Sankey are to open a new tabernacle
on Tremont street, Boston, on the 1st of January.
The platform will be five feet above the floor of the
audience-room; the singers' seats will be at the rear;
chairs will be screwed to the floor; the seating cap-
acity will be six thousand; and a series of reception,
inquiry, and chorus-rooms will extend along the side
of the building in rear of the platform. These taber-
nacles of the revivalists spring up almost as quickly
as Jonah's gourd.

audience-room; the singers' seats will be at the rear;
chairs will be screwed to the floor; the seating cap-
acity will be six thousand; and a series of reception,
inquiry, and chorus-rooms will extend along the side
of the building in rear of the platform. These taber-
nacles of the revivalists spring up almost as quickly
as Jonah's gourd.

MOON and Sankey are to open a new tabernacle
on Tremont street, Boston, on the 1st of January.
The platform will be five feet above the floor of the
audience-room; the singers' seats will be at the rear;
chairs will be screwed to the floor; the seating cap-
acity will be six thousand; and a series of reception,
inquiry, and chorus-rooms will extend along the side
of the building in rear of the platform. These taber-
nacles of the revivalists spring up almost as quickly
as Jonah's gourd.
