FRIDAY, OCTOBER 15, 1905.

The discussion of the recent sick-
ness should be made a misdeem-
or.

The public works department is
now making a show of effective
daily progress.

No petition in which the name
of Consul-General Mills is men-
tioned has been presented to the
Government here.

The Chicago capitalists who ex-
pressed doubts as to the stability of
the Republic of Hawaii have only
to read the record of 1895.

Several corporations are pre-
paring to take the field at Wash-
ington in opposition to Col. Spald-
ing's cable project.

All the island steamers leaving
Honolulu last week had full car-
goes of merchandise and the indi-
cations are for heavy shipments
next week again.

The records of Gen. Grant's
dealings with Cuban patriots many
years ago, are to be presented to the
United States Congress in behalf of
the present insurgents.

FOOD, FISH AND SEWAGE.

There is a rich and extensive
mine of information in a technical
publication soon to be placed at the
disposal of the Board of Health by
a gentleman of the city. The work
is called "Sewerage and Land
Drainage." It is replete with ac-
curate data, citations from immi-
nent authorities, clear illustrations,
careful compilations and logical
and practical comment. The au-
thor is Gen. Geo. E. Waring, at
present Superintendent of streets
of New York City. This
gentleman will be interviewed
by Mr. F. S. Dodge the special
Hawaiian commissioner recently
dispatched abroad to investigate
and report on methods of city san-
itation and on electric transit.
Gen. Waring's personal experience
has naturally been wide, he being
a practical engineer. His drainage
model is Holland, where the econ-
omic art of reclaiming flooded lands
has reached its highest develop-
ment. With him in sewerage mat-
ters, Great Britain takes precedence.
That country has always been in
the lead in this field. Its latest
production is the air power or force
system to which Mr. F. M. Swanzy
has called the attention of the Gov-
ernment. And, by the way, if the
island agent is unable to satisfac-
torily inform himself on this
particular plan in the United States,
he is authorized to cross the Atlan-
tic and study it.

There are numberless ideas and
many chapters in Gen. Waring's
work, which from the similarity of
city situation are applicable to
Honolulu. Scores of facts having
a direct bearing on local problems
are stated. The conclusion is clear
and positive that there can be no
absolutely certain disinfection of
any considerable amounts of sewage
by chemical processes. The
task is simply to great. Exposure
to sunlight on land and the same at
sea, are, then, the favored and least
expensive methods of both disinfection
and disposition. All the
authorities agree that on land the
cholera germ is the most easily
handled of any of the bacilli, while
having apparently the greatest
vitality. It does not ascend to the
air. The contagion that does leave
the earth is crippled in its action in
this country by the wind movement.
The latter protects us from miasma.
Sir J. B. Lawes, quoting the late
Prof. Huxley, declares that "the
delivery of sewage into the sea is by
no means so waste-
ful a process as has been
supposed." There is then proceed-
ed to be shown that the contribu-
tion to waters is a fertilizer to the
fish crop. Comparisons on catch
and quality of the important food
are made and the soundness of the
proposition fully established. As
might easily be expected, discussion
of the subject followed, several
signed articles appearing in the
Times and in the technical journals.
It will strike all the people here as
peculiar and strange that in all
consideration of the subject of fat-
tening and increasing food-fish
with sewage, there is not a hint,
mention or suggestion that disease
could thus be communicated.

What Famed Man.
The Abbe d'Arbigny, who wrote ad-
mirably on dramatic composition and
had instanced many living examples of
failure in that direction, was so im-
pressed, after 30 years' study, as to write
a tragedy himself. In the preface he
said that he, of all dramatists, had
"most scrupulously observed the rules
of Aristotle, whose inspiration he had
followed!" To this he replied by one
who had suffered from his criticism, "I
cannot quarrel with the Abbe d'Arbigny
for having followed the precepts of
Aristotle, but I cannot pardon the pre-
cepts of Aristotle that caused the Abbe
to write such a tragedy."—Argument

MR. A. S. HIND,
Dear Sir:—Three weeks ago I came home

while in bathing. A week ago I began to use
your "Hind's Honey and Almond Cream"

Smith to be Quartermaster Sergeant; F. I. Cutter to be Superintendent of the Insane Asylum; J. W. Jones to be Major and others. In each case, they say, very valuable men were taken away. TAKE A MEN.

A Company That is Kept Back on Account of Good Men.

Old members of Company D express a peculiar grudge against someone. They say that the company is frequently crippled and set back by promotions from its membership. Instances recited are these: F. B. McStocker to the head of the Citizens' Guard; Charles Wilder to be consul at San Francisco; F. W. Pratt to the office of Post Adjutant; W. G. Ashley to be Quartermaster; Fred C. Smith to be Quartermaster Sergeant; F. I. Cutter to be Superintendent of the Insane Asylum; J. W. Jones to be Major and others. In each case, they say, very valuable men were taken away. Lieutenant Jones' promotion was a great surprise to the company, and while they, to a man, heartily congratulate him, they sincerely regret their loss.
