(a) It is believed that the construction of permanent structures on Ujelang will be completed within the next ninety days. At that time the commitments made to them will have been fulfilled and the natives should be able to take up from there and develop Ujelang into very productive and prosperous atoll.

(b) The plight of the Rongerik people has been at least partially relieved in their move to Kwajalein. Administration of these people is more simple with the continuous contact. Every effort will be put forth to teach them the full meaning of all current directives. It is hoped that they may become more familiar with the rights and responsibilities of a municipality and the individual as result of their stay on Kwajalein.
