A QUESTION OF HEALTH

By last straw one of Dr. Jaeger's "deus ex machina" has been replenished. We are now prepared to fit any one be a little or a heavy-weight.

You've been offering long enough from that herd of you've spent a small fortune for patent medicines and doctors' advice for the chronic rheumatics, as we prescribe for you, we know what allows you. You're wearing underwear of good vegetable and may wonder you're right.

Let us advise you out of your suffering. You should wear under garments of practical use. Nature so intended it, but you've been running con to nature until last, she has broken down. Do you wonder at it? Let us tell you something. Animal wool is the material devised by nature for animal covering and possessions, as the simplest expression will pronounce the valuable quality of which the animal body exudes. Moreover, a being slow a climber of heat animal wool does not overheat, and never gets damp. Some friend will perhaps tell you that woolen under clothes are turgid for this nature, don't be misled. The woolen clothes protect the body from chill is infallible in every condition. No matter how much easier it is to suppose that such clothing is hot in summer. It is flimsy to be operative when the natural action of the wool is harnessed and the exhaustion cannot escape.

The evening is important here a strong desire to throw everything off from the stifled skin, but the wearer of proper wool clothing over the whole skin can breathe more airly in the cloths. It is not more approachable by it a climber by his filaments, which every animal knows to be the closest, safest, most comfortable seat for violent exercise in the world.

If you value your health, don't delay, but cease your body is gnawed to pares animal wool made as by Dr. Jaeger, and for sale by M. McNeely.
