ARGENTINA'S GROWTH BALANCED DUE TO DECLINING BIRTH RATE

BUENOS AIRES, Aug. 28 (UP) — The problem of a steadily declining birth rate in Argentina is causing great concern.

During the period of 1910-1914 the national birth rate dropped by 4.2 per thousand, from 28.6 to 24.4 per thousand. This decline was accompanied by a decreased death rate, from 14.3 to 12.7 per thousand. The net reproduction rate, which measures the ability of a population to replace itself, decreased from 1.41 to 1.23.

The falling birth rate, combined with a rise in the death rate, resulted in a decline of the population growth rate from 2.4 per thousand in 1910 to 1.4 per thousand in 1914. This decline was believed to be due to the development of the country, including the growth of urbanization and industrialization.

A number of factors have contributed to this trend, including improved sanitation and medical care, as well as economic factors such as increased employment opportunities for women.

TOURIST CALLS IT ANOTHER TWO-PLUS-YEAR DELAY IN REOPENING JAPAN

TOKYO, Aug. 28 — The United States government has decided to send a special envoy to Japan to discuss the delay in reopening Japan.

According to sources, the envoy was to be a high-ranking official from the State Department, and the purpose of the visit was to press for the speedy reopening of the Japanese market.

The source added that the American delegation would make a strong case for the resumption of trade relations between the two countries, and that the timing of the trip would be determined by Japan.

HULL BELIEVES UNITED STATES DETERMINATION TO SEND GROUP TO MOSCOW IS NOT SO CONCRETE

Secretary of State Cordell Hull believes that the United States' determination to send a group of envoys to Moscow is not so concrete.

In a recent interview, Hull stated that the American government was still considering the matter, and that there was no guarantee that a delegation would be sent.

Many experts agree that the decision to send envoys to Moscow is not so concrete, and that there are many factors that could influence the outcome.

U.S. Inaugurates Panama Canal

President Franklin D. Roosevelt has inaugurated the Panama Canal.

The $375 million canal has been under construction for 10 years, and its completion is seen as a major step forward in the development of international trade.

The canal will allow ships to pass between the Atlantic and Pacific Oceans, and will greatly reduce the time and cost of transporting goods.

Kenko Sakura Fubuki

At the Palace Theater

KENKO SAKURA FUBIKI, the famous sumo wrestler, will be starring in an upcoming movie at the Palace Theater.

This is the first time that Kenko Sakura Fubuki has appeared in a movie, and he is expected to draw large crowds.

The movie, titled "The Sumo Champion," is based on the life of Kenko Sakura Fubuki, and will be released in the fall.
Rhea Charters and her grand father, Major Stephen Charters, were in a small town, as in many other places she had visited as a child, where the people were friendly and she felt at home. The town was a mixture of old and new, with a beautiful park and a river that flowed through it. Rhea was always in awe of the beauty of the natural world, and the people who lived in it. She had a special bond with her grandfather, who had always been her role model. He was a great historian and had written many books on the history of the area.

When Rhea was a child, she and her grandfather would often go on nature walks, and she would always be fascinated by the different plants and animals they would see. One day, they were walking through a forest when they came across a large bear. Rhea was terrified, but her grandfather remained calm and assured her that the bear would not hurt them. He explained that the bear was simply trying to protect its territory, and that it was a natural part of the forest ecosystem.

Rhea was always learning from her grandfather, and he would often take her to see the different trees and plants in the forest. He would explain the importance of each one and how they contributed to the health of the ecosystem. Rhea was always amazed by the complexity of the natural world, and she knew that she would always be learning new things from it.

As she grew older, Rhea began to understand the importance of preserving the natural world. She knew that it was up to all of them to protect it for future generations, and she was determined to do her part. She became an active member of her local environmental group, and she participated in many conservation efforts.

One of the most important things Rhea learned from her grandfather was the importance of living in harmony with nature. She knew that it was not just about protecting the natural world, but also about respecting it. She learned to be grateful for the beauty of the world around her, and to always be mindful of its importance.

Rhea was always grateful for the lessons her grandfather had taught her, and she knew that she would always carry them with her. She knew that she would always be inspired by the natural world, and that it would always be a source of comfort and peace.

HAPPINESS IN SIMPLE THINGS

Henry Thoreau of New England was considered a queer man. Why? Because he believed that happiness came from simple and natural things. He spent much of his life in solitude, writing and observing the world around him. Thoreau was one of the most famous and influential American writers of the 19th century, known for his simple and natural approach to life.

Thoreau believed that happiness came from living in harmony with nature and following one's own desires. He believed that people should not be burdened by material possessions and that they should focus on the simple things in life.

Thoreau's most famous work, "Walden," is a meditation on the essence of nature and the simplicity of life. He lived in a small cabin in the woods, and he spent much of his time observing the natural world and writing about it. Thoreau was a keen observer of nature, and he was constantly amazed by the beauty of the world around him.

Thoreau's ideas continue to inspire people today. His simple and natural approach to life is still relevant, and his ideas continue to be studied and admired. Thoreau's legacy is a testament to the power of simplicity and the importance of living in harmony with nature.
unteer. Joe will be out for the leadership in the HRC boys' department, and these two teams got into a tie to win the Hilo Center at 7:00 p.m. All I  and T. K. Pang Ching accounted for the BIAU softball tournament by playing like the champions that they drew the bye as BIAU defend the Commercial and Business jobs for unskilled or non- professional labor must be filled and a benefit payment of 10 pesos (about $2.50) monthly, of 10 pesos (about $2.50) monthly for each child under 15, and a benefit payment of 15 pesos (about $3.75) monthly for each child over 15. Special aid will be granted for both the red and yellow varieties with most sales around 40 to 50c per lb. The market was steady at $2.00 to $2.25 per lug for the red and yellow varieties, and quality with most sales around $45 monthly. Special aid will be granted for both the red and yellow varieties with most sales around 40 to 50c per lb. The market was steady at $2.00 to $2.25 per lug for the red and yellow varieties, and quality with most sales around 40 to 50c per lb.
