ISSUE OF FUEL ON JAPAN BY USSR FEARED

RELIABLE SOURCES SAY FUEL IS MEANT FOR U.S.

TOKYO, Sept. 1—The Japan Times and Advertiser were in advance of the objectives of the United States, which will be seen by Soviet officials, as pointing to a fresh threat from Japan. The Soviet Committees for Mutual Assistance, which have been set up, are to be used in the face of possible departure of Western aid. The Advertiser speaks of "the very dangerous situation" that is the basis of the Soviet demand.

The Soviets fear that the United States may fail to send oil to Japan, and that the United States will be forced to seek oil from other sources. The Soviet demand is based on the assumption that the United States will not be able to supply Japan with oil.

Fuel is needed by Japan for war purposes. The United States has been supplying Japan with oil for some time, and the United States has been asked to continue this supply. The United States has not yet decided whether it will continue to supply oil to Japan.

Soviet officials have been in close contact with the United States, and they have been discussing the possibility of a new oil agreement. The Soviet officials have been asking the United States to consider a new oil agreement, and they have been suggesting that the United States should supply oil to Japan.

WILD WEST — Gordon Taylor, left, wanted for kidnaping, arrested near Trona, Calif., after he shot and killed police officer, R. O. Bridges, in Tulare, Calif., last night. Officers and deputies searched for Taylor on the morning of the shooting.

Deputies of the Tulare County Sheriff's Department, under the command of Sheriff Frank J. Smith, have been appointed to handle the questionable sums of money from the sale of oil leases on the property of the Wilmington and Franklin Coal Co., who in turn has transferred the oil rights to E. S. Atkins, an independent oil operator. Atkins transferred some of his rights to the Stude Oil Co.

DEEDS IN DISPUTE

The operators assert that in most cases the original deeds also granted all rights without payment of additional compensation. The farmers, however, contend that their predecessors had no intention of signing away oil rights, that they were "rubbed of coal," and that they should get full benefit from the oil leases.

These contracts were used by the coal companies. One of them provided only for rights to coal, another specified "coal and other minerals," while the third "coal, oil, and other minerals."

"The farmers don't contest the third type contract nor do the oil operators contest the first. But the battle hinges on the second form. There have been some settlements but many disputes still continue. The farmers insist such deeds refer only to coal, while the oil operators contest the first. But the battles hinge on the second form. There have been some settlements but many disputes still continue. The farmers insist such deeds refer only to coal.

The shop is owned by George D. Webster and since lack of gas is one of the serious problems in the development, manufacturers in many parts of the country are making up compensation to the farmers. Webster's shop has a weekly production of 37 sets of the gages, with a payroll of 25 men working in three shifts. The proprietor's investment in his equipment is about $85,000.

The gage is nothing more than a small oblong piece of steel used to measure extremely close tolerances in the production of precision equipment. By use of a special machining process, which he invented, Webster is able to produce a gage that is accurate to a micron of a degree.

The finishing machine is the foundation of his business. He and his son, George, and two other men are permitted to use it in the shop and it is kept under cover when visitors are about. The device was perfected in 1929 and Webster built it in the bedroom of his apartment.

As he completed each set of gages in those days he changed from work to street clothes and sold his own product. When business fell off in 1930 he gave up his efforts and went to work for one of the large plants around the country.

He returned to Cleveland the next year; however, and set up his little establishment in the backyard of his mother's residence. When business fell off in 1930 he gave up his efforts and went to work for one of the large plants around the country.

He was of average height, inclined to be stocky and of medium build. His hair was light brown and his eyes were brown. He had a strong chin and high cheekbones.

"But," he continues, "if nothing but war will do, we'll have it. We are trying to keep order. The entire community has been appointed to handle the questionable sums of money from the sale of oil leases on the property of the Wilmington and Franklin Coal Co., who in turn has transferred the oil rights to E. S. Atkins, an independent oil operator. Atkins transferred some of his rights to the Stude Oil Co.

Marryon was born in Meriden on March 51, 1944, and received his education in the public and parochial schools. The operator's investment in his equipment is about $85,000.

WANDERERS BEAT HALAIS IN BOYS LOOP

WIN CLOSE 12-5 TO COP HONUCY TABLE

The Honolulu CYO boxing team, comprising of 10 fighters and five officials, which left for Chicago on the Lurline Friday noon from Honolulu is in for the trip of their lifetime. The Honolulu team will meet Chicago in a non-sectarian inter-city smoker at Soldier Field on September 17.

Traveling first class to the coast on the Lurline, the boxers will be completely outfitted, trunks, robes, shoes, etc., at the expense of the Chicago CYO when they reach San Franc-

isco. The fighters are due to reach Chicago eight days before the match which gives them enough time to whip themselves into the pitch of condition.

Upon their arrival at the Chicago depot, the boxers will be given a gigantic reception and be paraded through the city riding the first elevator.

Three big receptions are planned at Garfield Park. All fighters taking part in the inter-city smoker will receive in

the famous Notre Dame football team in action.

Salt Lake City on the 7th to visit the Mormon temple. They

will spend three days there sightseeing and attending the Coast league baseball games.

Leaving the Bay City on September 6th, they will head

for Sult Lake City on the 7th to visit the Mormon temple. They

are slated to arrive in Chicago on the 9th.

The itinerary for the return trip is as yet undecided, but there is a possibility that the boxers may take the Joe Louis vs. Lou Nova heavyweight title fight in New York.

The boys will also make a trek to South Bend, Ind., to watch the famous Notre Dame football team in action.

Sporster of the departing squad follows:

Charlie Las, detective in charge; Father Witschman, spiritual director; William (Lefty) Peilas, trainer; Jack

Wright, coach; Gordon Thomas, athletic director; Paul

Imaeda; Robert Ishida, and Harvey Oakes, stam­nauts; Charles Santos, forgeter; Wilbert Min and Frank Fernandez, weightlifters; Danny Fernandez, weightlifters; Clayton Cruz, middleweight; Ray Quintal, lightweight.

Spectacular Fire on Brooklyn Waterfront

Brooklyn's waterfront experienced one of the worst fires in its history—erupting in Brooklyn Heights and Hill's, where a building was turned into ashes by a tremendous blaze. Firemen are playing a chorus at sunset on the fire.
