Place-based education is a way for students to make these essential connections with their history, their place, their culture and their future

(Kemp, A. T. (2006). Engaging the environment. *Curriculum & Teaching Dialogue*, 8(1/2),125-142)

Indigenous

HĀ: Nā Hopena A'o Pilot Program

The Hawai'i State Department of Education's system-wide framework is grounded in culture and place: HĀ Nā Hopena A'o to develop skills, behaviors and dispositions that are reminiscent of Hawai'i's unique context, and to honor the qualities and values of the indigenous language and culture of Hawai'i.

HĀ Nā Hopena A'o is a pilot program that works in concert with community-based organization for a holistic approach to education for learners.

Figure 1 illustrates the six learner outcomes of Nā Hopena A'o.

About Land Grants

[? \(1846-1922 and beyond\)](#)

[? Historical Background](#)

At the time of the Mahele, some of the land was the King's own land which later became known as Ceded Lands. Other lands in the possession of ali'i were returned to the King in exchange for Commutation of property the ali'i kept. Some of these returned lands became Government lands and were sold by the government to generate income for the Kingdom, since the King gave up his traditional right to collect taxes and goods following the Mahele. (For more detail refer to Curtis J. Lyons, A History of Hawaiian Government Survey with notes on Land Matters in Hawaii, Honolulu, Hawaiian Gazette Co., 1903; p. 4-5).

The earliest LG records (1846) are in both English and Hawaiian. If the Government land was sold to a foreigner the text is in English. If the purchaser were Hawaiian the documents is in Hawaiian. By 1915 the documents became written entirely in English, regardless of the purchaser's ethnicity.

Land Grants are issued in the following various forms: On cash Freehold Agreement, Cash purchase, On Cash purchase under Preference Right, On Compromise and Equitable Settlement, On Land Exchange, Issued on Right of Purchase Lease, On Sale at Public Auction for Cash, and Issued on Special Homestead Agreement.

No. 31, Napahi & Kualaula, Claimants
F.R. 43v1

[Margin note: Presented 3 o'clock P.M. 27th April]

1 document entered in Native Register, Page 47

N.R. 47-48v1

No. 31, Napahi and Kekualaula, Pelekane, April 10, 1846

I petition to you, Kaauiwai, for my place above Pelekane. I request the Land Commissioners to investigate the claim for my house lot. My sister gave me Kuhela's lot, this was how I got my kuleana. Two houses of Kuhela's were given to me and all the furnishings. In the old days it was from Boki that Kuhela ma had this place. Kamehameha III gave it us up to this time, when the upland pipe /mauka paipu/ which belongs to Keohokalole /exists;/ That is her right over Napahi, so that our place has been taken away at various times. We wish to have this place returned to us. Furthermore, we explain that this document has been delayed because of my sickness.

F.T. 39-40v1

Claim No. 31, Napahi & Kualaula, June 23 1846

Kaiahua, witness sworn deposed, she is the widow of Aikanaka, but disclaims any right to the land in question of any name or nature. Witness is not the mother of Aikanaka Keolu Kaolohi. In 1831 when Liilia was turned out of office, my husband was appointed steward of the King & he begged of Liilia a place to build houses for his servants. She gave him the land in question. That place properly belonged to Liilia. We first built a little flat house upon it to put our calabashes in and other little things, but it would not hold them all; then sent to Manoa, and got some timber which we had there; and built a larger house, afterwards we built another house; and the people of our lands together with our servants thatched them. No other person had any connection with us. This man Kualaula and other servants of ours occupied the ho

Creator (HPS)

James B. "Jim" Lipinski was a U.S. Army officer stationed at Fort Shafter (O'ahu) from 1953-1956. He and his wife, Ronny (Maria), were avid photographers, and they visually and skillfully documented their time in Hawai'i, shooting over 3,500 photos. Son Victor was a young child at the time, but he holds fond memories and recalls enjoying local hula and cultural festivals, trips to scenic venues and landmarks, family beach days, and island life. His mother Ronny returned to O'ahu twice in the 1980s and continued to photograph people, events, and the island's beauty, as well as collect her favorite island memorabilia. After the passing of his mom and dad (2001 and 2003, respectively), Victor spent over two years scanning their photographs, 35mm slides, and paper materials to honor their memories and love of Hawai'i. Waiākea, Hilo, Hawai'i

"Ka 'anae momona o Waiākea."

"The fat mullet of Waiākea."

- He Mo'olelo Ka'ao no Kekūhaupī'o

Waiākea is an ahupua'a, located in the moku of Hilo, on the island of Hawai'i. It is one of the largest ahupua'a in Hilo, and was well known in times past for being a land of great abundance. In particular, Waiākea was famous for its "fat, sweet" mullet, which were raised in its many loko i'a, or fish ponds. These fish were favored by Kamehameha I, and many Hawai'i island chiefs of old. To date, we have researched over a dozen fishponds in Waiākea, but the largest, and perhaps most famous of them are Waiākea, Mohouli, and Loko Waka.

Hawai'i

We aspire to provide comprehensive coverage of Hawai'i. In addition to contemporary maps, we have a large collection of historical maps. Nevertheless, it is impossible for one organization to have all the maps, therefore, it is customary to rely on many agencies and collections in Hawai'i and beyond. If you do not find what you need in our digital and map collections, consult the links we provide to other collections throughout the state. If you have questions about our holdings, please contact MAGIS staff.

Historical Maps

Hawai'i Government and Territory Survey, and Other Historical Maps, 1885-1904

The maps below are some of the most frequently requested historical maps of the principal islands of Hawai'i. Click on the View column to view the maps with our large image viewer. You will also have the option to download the maps. Georeferenced TIFF versions of several maps for use in GIS are available to download by clicking on the Zipped TIFF file. Hawai'i

We aspire to provide comprehensive coverage of Hawai'i, in addition to contemporary maps, we have a large collection of historical maps. Nevertheless, it is impossible for one organization to have all the maps, therefore, it is customary to rely on many agencies and collections in Hawai'i and beyond. If you do not find what you need in our digital and map collections, consult the links we provide to other collections throughout the state. If you have questions about our holdings, please contact MAGIS staff.

Historical Maps

Hawai'i Government and Territory Survey, and Other Historical Maps, 1885-1904

The maps below are some of the most frequently requested historical maps of the principal islands of Hawai'i. Click on the View column to view the maps with our large image viewer. You will also have the option to download the maps. Georeferenced TIFF versions of several maps for use in GIS are available to download by clicking on the Zipped TIFF file. To view basic metadata for these georeferenced maps, download the

No residence property being similar advantages and attractions as the beautifulness of location, having an elevation of from 175 to 200 feet, and affording the grandest views and prospects; as also its proximity to the business part of the city, being less than a mile from the Business Block, has never before been presented to the people of Honolulu. One of the main features of this property, and procured at great expense, is the abundant supply of pure spring water, procured by C. B. Wood as being the purest and best drinking water obtainable in the island, which is now conducted into storage reservoirs upon the property

3.3.2 Groundwater

The State Department of Land and Natural Resources (DLNR), Commission on Water Resource Management (CWRM) has established a groundwater hydrologic unit and coding system for groundwater resource management. The proposed project site is located within the Lihue Sector Area which is comprised of five Aquifer System Areas identified as Kīlauea, Anahola, Wailua, Hanamā'ulu, Koloa. The project site is located within the Hanamā'ulu Aquifer System (20102) area which has an estimated yield of 36 million gallons per day (mgd).

Impacts and Mitigation

No short- or long-term anticipated during construction served by the County anticipated to result for water.

Applicable erosion control implemented in order to be applicable for each project sediment basins, temporary fences, dust fences, silt inlet protection, truck wheel washing, landscaping also will be completed. Permanent erosion control completed.

Coordination will be required for construction in order to address impacts with regard to the National Pollutant Discharge System (NPDES) permit required for instances

Hawai'i State historic preservation legislation governing archaeological monitoring programs requires that each monitoring plan discuss eight specific items (HAR 13-13-279-4). The monitoring provisions below address these eight requirements in terms of archaeological monitoring for the excavations within the current project area.

1) **Anticipated Historic Properties:**

Both pre-Contact and post-Contact traditional Hawaiian historic properties and/or human skeletal remains may be encountered within the central and southwestern portions of the KHS campus.

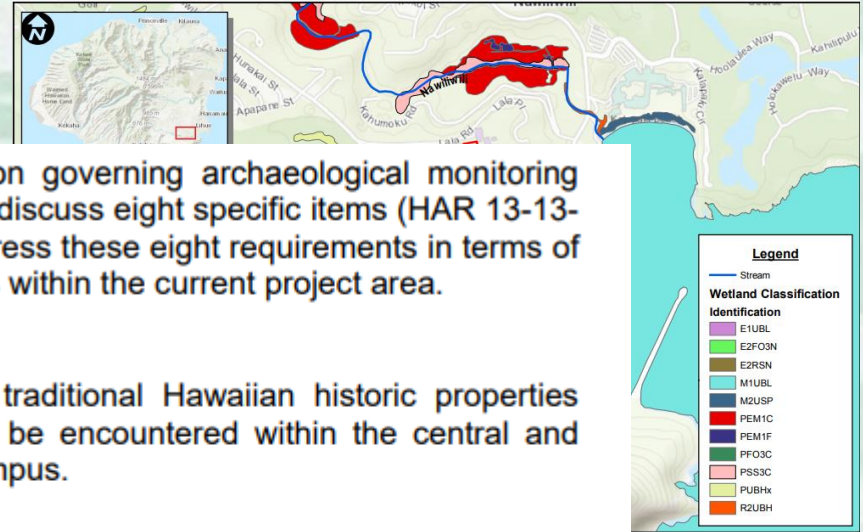

2) **Locations of Historic Properties:**

Archival research has indicated the relative proximity of Kuhiau Heiau, the Paulo Kanoa Home/former Court House, and the Judge Hardy home increases the prospect of significant archaeological finds in the central and southeastern portions of the KHS campus.

3) **Fieldwork**

On-site archaeological monitoring is recommended for excavations for the portables relocation and the gymnasium projects. Work within the northeastern parking area will be addressed with on-call archaeological monitoring based on the lack of finds during the intensive subsurface testing in that area. Any departure from this will occur only following consultation with and written concurrence from the SHPD.

The monitoring fieldwork will likely encompass the documentation of subsurface archaeological deposits (e.g., trash pits, structural remnants) and

O'AHU COUNCIL ON BURIALS
MEETING MINUTES
for January 9, 1990

PRESENT: Don, Edith, Ian, Marlene, Davi, Terrilee, Kunani, Ipolani, Coochie, Kaohu, Lei,
Lei's sister, Joyce, ^{Carol} Carol.

This meeting was held at the DLNR board conference room in Kalanimoku Building, Honolulu.

Discussion on the redraft of the bill was discussed as follows:

page 10 sec.7 "...obtain permit from department..."

per AG can't regulate bones between counties...lineal descendants may want to move
and take bones with them...discussion resulted in spelling out process for permit
to move any bones...(Don will ask AG on extradition, sale here & transport elsewhere)
Joyce commented on black market on bones once existed.

Lei asked how can protect things like Bishop Museum artifacts,etc. on display or under
curatotships,etc...any law for lineal descendants permission to display it? in existence?
Joyce replied these things were not really sold, but exchanged for display & then returned
...an individual would have a hard time getting these things back.

Edith commented many things were insured and an inventory kept of these items...people
would ask the Bishop Museum to store these artifacts...this bill will protect our things
from now, not retroactive to prior things...
