MORPHOMANIA.

When physicians discovered that pain could be subdued by inserting under the skin a small pointed instrument provided with a tube containing morphia, they little thought that they were paving the way for a new vice. Yet so it was. There are in our merry England beings who are as wholly under the domination of morphia as ever was Chinese under that of opium. Women have yielded by degrees to its fatal fascination, until at last they prick the skin a dozen times a day with the tiny syringe that has such terrible results. The operation is almost painless, the immediate effects pleasant. A delicious languor supervenes. Happy thoughts and bright imaginations fill the mind. Some see beautiful visions, others feel only a pervading sensation of comfort and well-being. On a few the effect of morphia is to excite to some intellectual effort, if effort that can be called which is pure delight, a glorious feeling of untrammelled power or uncrippled exercise of the highest faculties. It is as though the mind had suddenly developed wings. But at the very height of the enchantment the influence of morphia begins to subside. The glory fades. The wings trail, and the feet that are their sorry substitutes become weighted as with lead. As with the workers, so with the dreamers. The visions are obscured. The sensation of comfort gives place to one of discomfort, irritation, even pain. The mental vision that had just now looked through a rosy mist sees all things as through a crape veil or a November fog. Can it be wondered at that the dose is renewed, that the poison is absorbed again and again, that the intervals become shorter and shorter between the reign of the potent drug?

And the end? The punishment is terrible indeed. By degrees the mind becomes darkened. Hideous hallucinations seize upon it. Self-control is lost. Imbecility overtakes the weak. Madness threatens the strong.

These are the personal consequences. There are others to be bequeathed to sons and daughters, and later generations. These can be guessed at. The new vice has not reigned sufficiently long for the world to have seen them exemplified, but a dark array of possibilities suggests itself only too readily. The heritage of insanity, of inebriety, of infecility, with its future to be traced back to those tiny tubes which hold only a drop or two, and to which men once looked as the blessed means of relieving pain, forgetting that blessings and curses go hand in hand in a crooked world. Dipsomania has now a powerful rival, speedier in its result than its own revolting process, and eventually as degrading. The name of the latter born sister fiend is Morphomania.—London Truth.
