

(a) Discarded oil drums were distributed only to those villages having need for them on field trips this quarter. Screen wire, lumber and nails were distributed in quantities corresponding with the need of each village for manufacture of fly traps and repair to heads and native dispensaries. An effort to standardize the fly trap size and type is being made by the distribution of prefabricated fly traps from Kwajalein.

(b) Schools. There are satisfactory school buildings of native type construction throughout the area.

(c) Churches. No change since last report.

(d) Community Buildings. No change since last report.

(e) Others. No change since last report.
