

A (Rehabilitation)
3 (Land Titles)

1 July 1947

Majuro Dist.

The field work in connection with Land Titles as mentioned in previous Military Government reports is continuing. Recent field trips have picked up material on several of the islands of all atolls but Mille. In most cases it was found that some details were missing and the need for further checking was evident. The procurement of information on Land Titles is an extensive project. The services of the officials on each atoll has been requisitioned but with only one day for Military Government field officers to spend at each village every two months the speed at which the information is produced is negligible. The first report on Land Titles was submitted this month on an island of Majuro Atoll. The material is now on hand for submission on other islands of Majuro, Aur, and Arno Atolls, and will be submitted shortly.
