Majuro  
(Marsh)

All villages thruout the Marshalls continue to show improvement. Some, it is true, to a greater degree then others, but the general over-all picture is certainly far superior to the picture presented on 31 December 1947, one year ago.

For these people who have worked with the Marshallese people directly, whether in the field or at the base, the general characteristics of the people become more outstanding daily. The spirit they have shown of willing, and eager, cooperation, is most gratifying and something of which to be most proud.
