

3 (Sub-dispensaries, etc.)

Sub-dispensaries are located in the Kitti and the Metalanim districts and on the islands of Mikil, Pingelap, Kusaie, and Ngatik. A first aid station has been located in the district house at U in charge of the sanitary inspector who was given training at the main dispensary for this purpose. The islands of Kapingamarangi and Nukuoro recently returned to Ponape District have no been visited. One of the two native health aides on Pingelap is now on Ponape for further training, as is the Ngatik health aide. A relief has been provided for the latter. The Kusaie NMP is taking a refresher course at Guam. The sub-dispensaries are all adequate for the local needs except for the desirability of moving the in-patient dispensary on Kusaie from the present location to a location adjacent to the out-patient dispensary. This move will be deferred until the N.M.P. on Kusaie has completed his refresher course at Guam. The sub-dispensary at Pingelap (see photograph enclosure E) was built with out material aid from Civil Administration. As the photograph indicates, it is a native style, thatched-roofed building; and is admirably suited to the purpose for which intended. The inhabitants of Pingelap have displayed excellent workmanship and splendid cooperation in the construction of their sub-dispensary. It is felt that this is an indication of the appreciation of these people for the medical care received from the Native Health Aide and from CAU medical personnel.
