Russian Protest

Seizes Wiju

Associated Press Cable in the Star.

St. Petersburg, February 18.—Russia has made a protest against the British expedition to Tibet, which under the command of Colonel Youmiss-Handsborough is advancing into the latter country.

MOURNING FOR HANNA.

Washington, D. C., February 18.—The news that Mark Hanna is lying in state here. Public mourning is very general, and the services will be still an immense crowd.

ITALY IN LINE.

Associated Press, Rome, February 18.—Italy has accepted the principle laid down by Secretary of State Hay regarding the neutrality of China being observed during the present struggle between Russia and Japan.

American Marines at Newchang.

Associated Press Cable in the Star.

Washington, D. C., February 18.—A force of American marines has landed in Newchang for the purpose of protecting American interests.

Russia Fired on a British Ship.

Associated Press Cable in the Star.

Washington, D. C., February 18.—The British steamer Helsing arrived here today. She reports that the Russians fired on her and detained her for four days yesterday. It is likely that the occurrence will be reported to the British Government and an explanation will be given to us from that side of the question.

Shanghai Atrocities.

The British...
Why The U. S. Machine Is The Best—BECAUSE

It is the only Rotary Washer that has reversing steel ball gearing, reducing the friction and thus making machine so light running and almost noiseless.

The gear wheel turns right or left, the pin wheel or dialer revolves automatically, unloading the clothes back to normal. Exhausted water is drained and cleaned out WITHOUT RUBBING THEM TO PIECES.

Over One Hundred Thousands in Use.

The U. S. Machine has no equal because they wash clean.

Dr. Cooper's Trip on Big Island

President of the Board of Health Reports on His Visits to Hawaii

Dr. C. B. Cooper, assistant surgeon of the Board of Health, recently made a tour of the Islands in the interest of health and hygiene. His report on the condition of the public health is expected to appear in the next issue of this paper.

"As I have never been to such a delightful climate," said Dr. Cooper. "The sun on the winter's face, and the snow in the mountains of the mainland, have left me with a desire to return to the Islands as soon as possible."

**BY AUTHORITY**

PUBLIC LANDS NOTICE

On Friday, February 5th, 1901, at 10 a.m., in the front room of the Courthouse Building, Honolulu, T. J. Weeks, the Collector of Public Lands, will offer for sale at public auction certain lands on the Island of Kauai, for the sum of $50 per acre.

The lands are situated in the vicinity of Waimea, and are described as follows:

- The northeast quarter of the southwest quarter of the southeast quarter of Section 1, Township 4, Range 3, Kauai County.

- The southeast quarter of the northeast quarter of the southwest quarter of Section 1, Township 4, Range 3, Kauai County.

- The southwest quarter of the northwest quarter of the southeast quarter of Section 1, Township 4, Range 3, Kauai County.

- The northwest quarter of the southeast quarter of Section 2, Township 4, Range 3, Kauai County.

- The southeast quarter of the northeast quarter of the southeast quarter of Section 2, Township 4, Range 3, Kauai County.

- The southeast quarter of the northeast quarter of the southwest quarter of Section 3, Township 4, Range 3, Kauai County.

- The northwest quarter of the southeast quarter of Section 3, Township 4, Range 3, Kauai County.

The lands are subject to a mortgage in the amount of $50 per acre.

The Balkan Again.

The setting of the Balkan Peninsula is a terrible hard problem. By pressure from the European powers the Sultan was forced to grant reforms in the Ottoman Empire, and the Sultan had no choice but to do something about them. Macedonia was practically conquered by Russia and by remaining in Macedonia Russia is actually doing the job that was done by Russia and Japan today. This is the occupation of Macedonia and the refusal, on the other hand, of Russia to maintain its Treaty of Berlin, a treaty which was signed by the Powers, is to put Macedonia in a position that its all-out interest is to settle the question of a Russian diplomat. On the other hand is the matter of a diplomatic mission to be sent to a country whose two opposite parts of the world may be divided.

But the matter is important for Russia to do anything else than respect the neutrality of China. In point of fact China is looking after her own policies and something more. She has just moved a large force of regular troops—men in foreign uniforms, with foreign officers upon foreign methods, to the best advantage of the country. It is the history of Russian diplomacy to use the Chinese as a cannon, but she will put the power of the world to the world.

The Big Baltimore Fire

The big Baltimore fire of the beginnings of which the cable gave information, started at 10:45 o'clock in the morning of Sunday, Feb. 28, with the conflagration of the warehouse of the Baltimore & Ohio Railroad Company, in the city. It has swept down both sides of Baltimore street, the Businesses of Baltimore are in the whirl of destruction. Where water, iron, glass, furniture and office buildings of the city, as well as the great stamping mills, factories, newspapers, telegraph offices, wholesale houses, and the central business district, have been destroyed. Public and private buildings of the old church and railroad district have been completely burned.

Twenty-five hundred automobile buildings were destroyed before the fire had burned itself out on the western edge and along the side of Jones Falls, a sluggish stream that runs through the city.

Twenty-five thousand men and women are out of employment. The city companies are trying to meet the greatest blaze they have ever seen, since the Great Chicago fire. It is expected that eleven local fire engines will be needed. Many of the New York, New England and foreign companies will be extremely hard hit. There are an estimated man-made fires.

The great wholesale and financial center of the city will be reorganized, including banks, department stores, banks, and factories. Many houses, factories, the great office buildings, were wiped out in the fire. The Baltimore and Ohio railroad offices, were also destroyed, as well as a number of other buildings.

Rue-streets from the corner of Liberty to Liberty to Baltimore are in a similar condition. Soldiers with fixed bayonets at the corners of streets leading to the burned districts. The city is under martial law. All streets are closed. No business is done.

The Governor was in attendance at the conference Feb. 28, at which it was decided that Baltimore, for the present at least, would need no outside help. An emergency organization for the commercial and an advisory legislative committee to act in conjunction with the Legislature.

The Stock Exchange chamber was shut and reduced to an assemblage of people. The same day saw every possible commerce come to a standstill. At one time, in the face of evidence of a fire, the city was made the object of the firm that was burned. Trusts were made.

One of the firemen was killed this afternoon when it was discovered that the fire had completely destroyed all of the machinery and offices of the company, whose buildings were destroyed, were unoccupied. A tremendous loss was also sustained by the railroad and wholesale buildings, and by offices of the various companies. One man was lost in the building of the wholesale goods and another in the offices of the Baltimore and Ohio.

Another illusion of the city was the view of the firm of the firm of the firm that was burned. It was the Mercantile Trust Company and the Baltimore Trust Co. The view of the firm of the firm that was burned.

A great cloud was filled this afternoon when it was discovered that the fire had completely destroyed all of the machinery and offices of the companies, whose buildings were destroyed, were unoccupied. A tremendous loss was also sustained by the railroad and wholesale buildings, and by offices of the various companies. One man was lost in the building of the wholesale goods and another in the offices of the Baltimore and Ohio.

There were no losses in the Wholesale warehouses and the city was burned.

All of the great city space by the fire was destroyed.

In the wholesale district, the area of the fire was in the heart of the firm that was burned. Adjacents to the fire were a high class retail district, with most of the principal stores concentrated in the business section. Additionally, the boundaries of the fire were a few blocks, and those, with all the various steam engines, were concentrated in the heart of the city.

Another difficulty was the fact that grocers and produce, the historic "Maryland" going down in ruins. This block on the north side was a wholesale and retail power plant of the Baltimore and Electric Company, in full operation at the time of the fire. There were also cases of inaccessibility of power houses, warehouses, and office buildings. The fire was located on the wholesale goods and another in the offices of the Baltimore and Ohio.

Another difficulty was the fact that grocers and produce, the historic "Maryland" going down in ruins. This block on the north side was a wholesale and retail power plant of the Baltimore and Electric Company, in full operation at the time of the fire. There were also cases of inaccessibility of power houses, warehouses, and office buildings. The fire was located on the wholesale goods and another in the offices of the Baltimore and Ohio.

Today there is a remarkable thing for ordinary office rooms on the part of business of business firms whose loss now emerge

Three of the remarkable breaks of the fire was the saving of the United States warehouse, only three stories high, and built in 1853 according to the old-time methods of construction. It stood about 800 feet, while the area was surrounded by water. It burned at a rate of 60 feet per second. In the middle of the fire, the water was 130 feet high, and it was entirely surrounded by water. It burned at a rate of 60 feet per second. In the middle of the fire, the water was 130 feet high, and it was entirely surrounded by water. It burned at a rate of 60 feet per second. In the middle of the fire, the water was 130 feet high, and it was entirely surrounded by water. It burned at a rate of 60 feet per second. In the middle of the fire, the water was 130 feet high, and it was entirely surrounded by water.

After the Storm an Epidemic of Coughs

If you want a Quick, Safe Cure this will Interest You!

We like to recommend a remedy we know gives satisfaction. We are conservative druggists and will not guarantee and recommend medicines unless we know they are meritorious. If you have a cough you will find that nothing will cure it quicker and more pleasantly than the well-known Putnam's Cherry Cough Comfort

This remedy takes immediate effect—stops the cough. It relieves the irritation that causes you to cough. It heals the inflamed throat membranes. This valuable family cough remedy surpasses all that we have ever sold and our customers come back and tell us what good it has done them. Therefore we wish all those who have coughs to try it. Two sizes 25 and 50 cents.
It Knocks All Filters
Are Germ Proof

To be in good health you must drink pure water. You need one and a half to two gallons of water a day. But how do you know if your water is pure? A water filter cannot guarantee you pure water. The water filter removes only the impurities and allows the harmful bacteria and germs to pass through. The water filter is like a sieve that can filter out the dirt and sand but cannot filter out the germ.

To prevent disease, you must drink pure water. The water filter is not the solution. The solution is to drink water that is treated with a water sanitizer. The water sanitizer will kill the bacteria and germs that are present in the water.

There are several types of water sanitizers available in the market. Some are chlorine-based, some are ozone-based, and some are ultraviolet-based. Each type has its own advantages and disadvantages.

Chlorine-based water sanitizers are effective in killing bacteria and viruses. However, they can also react with the minerals in the water to form chloroform, which is a carcinogen.

Ozone-based water sanitizers are more effective in killing viruses than chlorine. However, they are more expensive and require more energy to produce.

Ultraviolet-based water sanitizers are effective in killing bacteria and viruses. However, they are not effective in removing minerals from the water.

In conclusion, to be in good health, you must drink pure water. A water filter is not the solution. You must use a water sanitizer to ensure that the water you drink is pure.
