Yachtsmen should remember that there will be a meeting in the basement of the Hawaiian hotel at 7:30 o'clock this evening for the purpose of organizing.

Honolulu Photo Supply Co. has two grades of Platinotype photographic paper, one grade being not much more costly than velox and giving effects like old etchings.

The Christmas Gift class of the Y. M. C. A. opened last night at 7:30 o'clock. The rooms were crowded with ladies anxious to secure suggestions for Christmas presents.

The "Al-Vista" is the name of the new panoramic camera. Before buying have us show it to you. Far ahead of anything yet made in the camera line Honolulu Photo Supply Co.

There will be a meeting of the football enthusiasts on Monday evening next at the headquarters of the Mallelima Club for the purpose of making arrangements for the coming season.

The Fire Commissioners could not award the contract to furnish a team to the department simply because no bids were received. They may become suited by attending the next horse ranch clearing sale.

Those wishing reliable horses, experienced drivers, new rigs, fair prices and courteous treatment should call at the Territory Stables. Their telephone number is Main 35. They deliver and call for rigs free of charge.

Fred Young, the physical director of the Y. M. C. A., will speak in the Y. M. C. A. hall at the regular men's meeting Sunday afternoon. Subject: "An Upright Man." Music will be furnished by the Kamehameha Alumni.

The first collision between electric cars took place at the curve on Printers' lane just beyond Punchbowl street yesterday afternoon. The cars were only about fifty feet apart when the danger was discovered. The motormen acted promptly, thus preventing serious injury. Just as the cars came together, Mrs. George Markham jumped from one of them and was badly shaken up. The back of one of the seats flew back on Edgar Cayless, bruising his knees. Other passengers were shaken up.

The accident was caused by a car jumping the track near the home of E. D. Tenney, thus throwing out the schedule.

MANUFACTURER DIRECTORY.
The Bulletin has received "The Manufacturers' Directory" being an attractive booklet giving a list of manufacturers in Seattle and its immediate vicinity. The information it contains is concise and attractively arranged and furnishes one of the best ideas for attracting trade that has been seen in this part of the country. The directory is published by the Manufacturers' Association of Seattle, hence being a guarantee of the good business character of firms mentioned. It is invaluable to any and all purchasers seeking good figures on good products. Copies may be obtained by addressing the Secretary of the Manufacturers' Association, 218 Second Avenue, South, Seattle, Wash.

HARVEST FESTIVAL.
The big hallelujah meeting of the Salvation Army, announced in yesterday's Bulletin, took place last evening at the Army headquarters on Bethel street. The brass band of fourteen pieces furnished creditable music during the evening. The platform, which was decorated with bunting and flags, was occupied by Captain Jensen. Experience talks were given by a number of the officers and all joined in the Te Deum for the harvest returns to the treasury of the Army. After the regular program, there was a social meeting and at 10:30 o'clock, the workers returned to their homes.

Among the many charming little stories told of the late princess royal when a child, the following is one of the prettiest, evincing as it does, in difference to childish punishments and pure love of a bit of fun. The princess, like so many children, cherished a wholesome dislike to the then physician in ordinary, not remotely unconnected with delicate denied and rhubarb prescribed. Therefore the princess invariably and with firmness alluded to him as "Brown." This vexed the queen, who insisted on respect being paid to all members of the household. Her majesty, indeed, punished her small daughter more than once for such a breach of etiquette. Nevertheless, one day, when the child happened to meet Dr. Brown in one of the corridors, she said mischievously, "Good morning, Brown." And then, turning to where the queen stood with eyes of grave disapproval and meditation, she said: "And good-night, too. I'm going to bed." Then slowly, and with all the sweet dignity of three summers and golden curls, she walked to the nursery and bade the surprised attendant to put her to bed.

"Cos I've been dis-peaceful to Brown."—Vanity Fair.

The Honolulu Photo Supply Co. has all modern facilities for picture framing and the finest assortment of mouldings in town.

TENNIS FINALS TODAY

The outcome of the matches on the courts of the Beretania Tennis Club yesterday afternoon was as follows:

W. Roth defeated W. H. Babbitt, 6-3, 6-4.

C. A. Elston defeated A. M. Nowell, 6-2, 6-4.

A. M. Nowell defeated M. A. Cheek in the unfinished set of their Wednesday's match, 6-1.

The finals between Elston and Roth will be played this afternoon at 3:30 p. m. and all who wish to see a very warm and exciting game should be present on the B. T. C. courts at the time mentioned. Elston and Roth are undoubtedly the best two players in the islands and they won their way to the head of the list of players in the present tournament by their superior playing. Who will be the winner of the finals this afternoon cannot be said. The two players are very evenly matched.

BALDWIN TO MURPHY UNION.
The Francis Murphy Gospel Temperance Union is in need of money to carry on the work it has mapped out. The following letter from H. P. Baldwin, will show the attitude which he takes in the matter:

Honolulu, H. I., Oct. 7, 1901.
Edw. J. Wilson, Esq., President Pro Tem., Francis Murphy Club, City.

My Dear Sir:—Your favors of the 30th ult. and of the 1st inst. duly to hand, in which you ask for aid in conducting the Francis Murphy Club.

When Franklin Austin proposed to start this club and others, I told him that I considered that practical temperance and subscribed one thousand dollars toward the project. A good many others in Honolulu also subscribed. The recent events connected with the club show what a disappointment it has been. It has been difficult for me on Maui to analyze the whole affair and determine where the fault lies. After thinking over carefully the matter of aiding you further in a financial way, I have concluded that if the Honolulu people who are aiding the cause of temperance will subscribe largely and freely toward your club and give their moral as well as financial support to the same, I am willing to do my share. But I would like to have you first secure the support of the people here on the ground before I make any promise. I am at all times ready to aid the cause of temperance, and will aid any good and substantial move in that line.

Yours sincerely,
H. P. BALDWIN.

ELECTRIC CARS COLLIDE.
The first collision between electric cars took place at the curve on Printers' lane just beyond Punchbowl street yesterday afternoon. The cars were only about fifty feet apart when the danger was discovered. The motormen acted promptly, thus preventing serious injury. Powdered sugar without grinding is produced by the new process of Vallez and Geraud, two French inventors. The sugar solution is heated in an open vessel to about 120 degrees C. and is then poured into a stirring vat with shafts revolving thirty or forty times per minute. The water begins at once to evaporate and the strongly agitated mass finally becomes pulverulent. In about fifteen minutes the process is complete, and the vessel is tipped and emptied, a special contrivance keeping up the agitation during the time.

BOARD OF HEALTH MOBILIZES FORCES TO STOP CRUSHER

Dr. H. C. Sloggett, president; Dr. W. M. Moore, E. A. Mott-Smith and Dr. C. B. Cooper constituted the special meeting of the Board of Health yesterday afternoon. Dr. Malster, superintendent of the Insane Asylum; Dr. J. S. B. Pratt, the executive officer; Miss Mae Weir, acting secretary; Dr. R. P. Myers and Dr. Mays were in attendance.

The president opened the proceedings with these remarks:

Gentlemen:—The papers reported this morning pretty fully the Board's proceedings at yesterday's session, at which session a committee was appointed, who I shall ask to report presently on the subject under discussion. I have invited you gentlemen to meet us at this special session that you may give us your countenance and support in our action and attempt to put an end to what is an intolerable nuisance, acting harmfully on the health and welfare of those helpless wards of the Board, the patients in the Insane Asylum. I allude, of course, to the running of the rock crusher and blasting of rock close to the asylum, and thank you in the name of the Board for your attendance and presence here today.

Mr. Mott-Smith read the following report of the committee on the government quarry plant adjacent to the Insane Asylum:

Honolulu, Oct. 10, 1901
J. H. Boyd, Esq., Superintendent Public Works.

Sir:—The Board of Health desires to again call your attention to the serious condition of affairs at the Insane Asylum due to the noise from blasting and the operation of the rock crusher of your department at that place.

In bringing this matter again to your attention the Board does not desire to discuss nor in any manner bring into issue the removal of the rock crusher or of the Insane Asylum. The absence of an appropriation to remove either is a plain fact.

The sole question in issue is raised by the resumption of operations at the crusher by your department. Are the operations of the crusher and quarry of such a nature as to be deleterious to the health and welfare of the patients at the Insane Asylum?

As long as the crusher and quarry are in operation this question is in serious issue. The Board feel that the care of the inmates of the Asylum is a public trust of a delicate nature, requiring constant vigilance and unusual care, and one in which the public and the government are deeply interested and concerned through natural feelings of sympathy and charity toward the unfortunate condition of the inmates of this institution.

The Board therefore are convinced that anything which is deleterious to their welfare should receive immediate attention.

The crusher, as you are aware, is situated but about 50 yards from the wards on the mauka side of the Asylum grounds.

The noise from it in operation is therefore constant and loud. The same is true only more so of the blasts which in this kind of work are usually very heavy. Flying stones occasionally of large size fall in considerable numbers within the asylum walls. The concussion from the blasts has broken the windows in ward No. 3 and so shaken the foundation of the same building that constant care has to be exercised to keep the building, doors, and apparatus in condition and repair. The roofs of the buildings have suffered and in February last a large stone went through the roof of Ward 6.

When a blast is about to be fired a whistle is blown at the quarry and the inmates of the Asylum are immediately hurried away to another part of the grounds to a place of less danger.

The Board are of the unanimous opinion that the noise of the crusher is plainly detrimental to the health and welfare of the inmates of the Asylum in some cases making cure impossible. To the average citizen continuous and uninterrupted noise of this sort is in itself a source of annoyance and irritation; to the inmates of the Asylum it is apparently much more so.

It is undoubtedly a cause of exaggeration of symptoms already existing in many, if not all of the cases.

The Board are also of the unanimous opinion that the noise and concussion of the blasts are even more harmful than the noise of the crusher for the reason just stated. Also that the hurried moving of the patients about the ground to diminish danger from falling stones excites and irritates them.

From a medical standpoint and as plainly appears from medical opinion herewith enclosed the continuation of operations at the rock crusher and of blasting should not continue.

The Board feels that such a discontinuance is absolutely necessary, and therefore again so requests.

Very respectfully,
(Signed by President and members of Board of Health.)

Dr. Pratt read the following symposium of medical opinion on the subject:

Dr. Mays' Opinion.

Speaking from a large experience with the Insane, I am convinced that nothing has a more injurious effect upon acute cases of insanity than re-

peated or continued noise. In the State Asylum at Stockton this fact was so universally recognized that no repair work or carpenter's hammering was allowed in or about the wards until all the excitable cases had been removed to a distant building, where the sound would not reach them.

The jarring noise of a rock-crusher and the explosion of blasts of dynamite outside the walls of an asylum cannot but have a most baneful influence upon a large proportion of the inmates. Nothing could be devised that would more certainly tend to counteract the whole aim of a modern asylum, and defeat the chief purpose of its existence.

For the asylum of today is a place for the cure as well as the care of persons afflicted with brain disorders. Whatever it may have been in years gone by, it is not now simply a place for the herding together of lunatics to keep them out of harm's way.

It is, first and foremost, a curative institution.

It is a hospital, where patients with mental diseases can be studied and treated in accordance with the latest advances in medical science. The neglect and ill-usage which characterized the old-time "bedlam" have long since given way to enlightened and humane methods of treatment.

No factor is of more importance in the modern treatment of the insane than quiet and stillness. True, there are in all asylums many whom no noise can disturb. Disease has done its work in their brains, and left to them a mere vegetative existence. But the majority of the inmates are not of this class. They are suffering with the large class that come under the head of curable cases, require, above all things, peaceful and soothing surroundings. All distracting noises, all exciting influences, must be sedulously shut out, if their welfare is to be considered. To inflict upon patients already in a state of intense brain excitation, the tireless rattle of a rock-crusher, interspersed with the bursting of bombs, seems the very refinement of cruelty. Its effect must be to add to their sufferings and aggravate every symptom of their disease.

The care of the sick, poor is one of the chief civic duties of every enlightened community. In a still deeper sense the care and custody of the Insane should touch the public conscience, the helplessness of these "wards of the state" appealing to our high sympathies. An inspection of our Insane Asylum shows that the governments of these islands have dealt with this subject in a liberal manner. The grounds are cheerful, bright with flowers and well supplied with shade trees. The buildings, while unpretentious, are adapted to the conditions here, and at any rate, are not suggestive of a prison, as many are. Both the equipment and the management are brought thoroughly up to date, and the patients are skillfully and humanely treated. It is to be hoped that no serious drawback as the rock quarry close to the institution will receive the consideration its importance demands.

W. H. MAYS.

From Herbert and Walters.

Dear Sir: At your request, we venture to make the following remarks in regard to the presence of the "stone crushing plant" on the asylum property.

The first principle in the treatment of the insane is to place them in some quiet location, where they can rest undisturbed and unmolested.

The exciting effect of the rock blasting is distinctly noticeable in the more agitated cases of acute mania, though we believe it would be hard to prove its deleterious influence on individual cases of other forms of insanity.

The fact remains, plainly evident to anyone of ordinary intelligence, that any recent case of insanity, taken to the asylum and placed alongside of the rock-crusher, there subjected to the

disturbing noises, would suffer a serious detriment in its progress to recovery; and, on the other hand, might have its little remaining reason hopelessly dissipated.

We believe the presence of the rock-crusher alongside the asylum wards to be an injustice, as well as a menace, to the inmates of that institution.
GEORGE HERBERT,
S. D. G. WALTERS.

Honolulu, Oct. 10, 1901.

Dr. H. C. Sloggett, President Board of Health.

Dear Sir: In response to your request for an opinion regarding the advisability from a medical standpoint of continuing the operation of the stone quarry and crusher adjoining the Insane Asylum, I would state that in my opinion the inadvisability of it is so evident as to leave no room for argument.

There can be but one opinion about the effect of continuous noise, alarm and excitement upon patients suffering from nervous and mental diseases.

The question of whether or not the Asylum and quarry should both continue to do business at the old stand is hardly debatable. The only room for difference of opinion is as to which should move. Very respectfully,
C. B. WOOD.

Superintendent, Malster.

I would call the Board's attention to a serious condition which exists here as the result of the blasting and mining of the stone-crusher which is located on the mauka side of the Insane Asylum grounds. Patients with exhausted and diseased condition of nervous system requiring that they be kept quiet and peaceful, are daily exposed to the shock of blasting and mining. They are very much excited, get nervous and unmanageable, when they would not be molested.

Not only that, but the danger from flying rocks, which are at times thrown to all parts of the grounds, some weighing several hundred pounds, or buried on the roofs of the nearest buildings, crushing through, would kill anyone if underneath, injuring the buildings, breaking windows, and fence destroyed and not properly repaired, causing escape of the patients.

Hoping some action will be taken to suppress the evil, I am, your truly,
R. M. MALSTER.

Superintendent Oahu Insane Asylum.
Mr. Mott-Smith told of his having driven Governor Dole to the place that morning. The Governor asked him if the Board had any statistics to show the effect of noise on lunatics, but said nothing and had done nothing since to procure a suspension of operations until the matter was settled.

On motion the letter to Superintendent Boyd was approved and ordered sent.

A vote of thanks was passed to the physicians who had written letters to the committee.

Dr. Mays, being asked for remarks, said he could not express himself any further than he had done in his letter, which had been read. The practice was very reprehensible and he hoped it would be stopped at once.

Dr. Sloggett conveyed the message from Mr. Auld, who was detained by illness, to the effect that he was thoroughly with the Board in taking action against the nuisance. Mr. Auld, it may be said, was formerly many years the resident manager of the asylum.

An Alexandria-Shanghai railway, about 6400 miles long, is proposed by an English engineer, says U. S. Consul General R. G. Penner of Frankfurt, Germany. Of this line the middle or Indian division, of 2125 miles, is already built. From Alexandria he proposed to build a line over the Isthmus of Suez to Akaba and thence to Kurveil and Barsoorah, through South Persia and across Baluchistan to the existing Indian railway net. From Shanghai to Chungking the road would follow the Yangtze River, then, by way of Shantung, Yunnan and Taifu to Kunming, the eastern terminus of the Indian railway. No estimates of cost and time accompany this project.—Engineering News.

FRIDAY, OCTOBER 11, 1901.

Kamala is again to the front to remind the people that it is one thing to start a sugar plantation and quite another to keep it going.

The Chamber of Commerce ought to have referred Mr. Weedon's letter to the Advertiser for publication. The morning organ is sadly in need of space fillers in lieu of news.

Organization is the secret of every success in amateur sports, and the yachtsmen bid fair to put new life into their specialty that will have a good effect on all aquatic sports.

The association of a young woman of good reputation with a very serious charge should lead people not to gossip and snobs but rather to suspend judgment till the facts in the case are established.

The San Francisco strike is ended and the people are happy. Like the Sampson-Schley contest, however, a lengthy period will likely be devoted to a discussion of who was responsible for the settlement.

Members of the citizens' committee called this evening should remember that the session is not a prediction caucus but a gathering of citizens all working to the same end and with a purity of purpose that cannot be doubted.

The Washington Star says Governor Dole has steered Hawaii "through the tortuous channels of revolution, intrigue and annexation" and it should add that he has brought the Territory of Hawaii smack up against a stone wall.

Apropos of the accident on the Rapid Transit line, it is worthy of note that the new transit company has not furnished as many serious accidents as the people predicted. The management is particularly careful to frame and carrying out strict rules.

The United States will never be properly conducted until President Roosevelt or Attorney General Knox make an office in Washington for Thurston, his duties being to furnish information on how the affairs of the Nation should be conducted.

Another session of the Chamber of Commerce has passed without reference being made to the St. Louis Exposition. It seems reasonable that at least a committee might be appointed to map out a general plan of action, that the Territory may be certain of proper representation.

When the Chinese of the city are ready to put up \$10,000 to secure four actors for their theater, the patrons of the opera house ought to feel like thirty cents. For lavish expenditure of money for amusement the Chinese can furnish examples not equaled by any "civilized" nationality.

Should it be found impossible to grant Mackay the right to land a cable in the Philippines it is to be hoped the proposal for a cable to Hawaii will not go overboard. Notwithstanding our Territorial land difficulties here there is no barrier to cable landings of any description.

The Chamber of Commerce makes no mistake in delaying action on resolutions dealing with anarchy. Calm deliberation is mandatory when dealing with this low phase of humanity. Mistakes of hurried action in heated moments are more to be feared than the public enemy whom we seek to destroy.

The array of expert opinion offered Dr. Siggott in his effort to secure proper surroundings for the patients of the Insane Asylum leaves no question in the public mind as to the necessity for a change in the relations of the rock crusher and the asylum. It remains to the good sense of officials having these institutions in charge to reach the solution and that without unnecessary bickering or delay.

Every American coming to Hawaii possessed of an opinion at variance with the Powers that Rule is immediately dubbed by the Dole-Thurston aggregation as a job chaser and corrupt politician. It is remarkable indeed and the fact carries its own conclusion, that respectable citizens of the Mainland are immediately charged with being corrupt schemers the moment they take up the duties of honest American citizenship in the Territory of Hawaii.

No President of the United States has furnished so much food for anecdotes as Theodore Roosevelt. He has been in the public eye in one capacity or another since completing his college course. The best of it is that every incident of his private and public career points to strength and nobility of character proving him to be a man who can be trusted to properly guide the ship of state. Roosevelt is picturesque, but his peculiarities all serve to make his true manhood more brilliant.

THE MALICE CAMPAIGN.

Neither its own vicious comment nor its quotations from Marshall Hendry or Clerk Mailing confirm the imputation of the Advertiser or in any way justify its charge that Humphreys acts the part of an imposter in using the title United States Circuit Judge. The literature added to the subject serves only to bring out more clearly the malicious intent of the defamers.

Judge Humphreys specifically states that his court is a Territorial court and exercises jurisdiction under Territorial statutes. By the same token the justices of the local Supreme Court are indeed United States Judges, being appointed by the President and paid by the Federal Government.

The Bulletin desires to congratulate the Thurston aggregation on the manner in which they have handled this subject. It is added proof of weak mental operations that would disgrace a flat-headed Indian.

PROTECTING THE PRESIDENT.

"Indeed, what is this element, before which free Americans must bow and fling and hide? Upon what meat hath it fed that it shall be permitted to usurp the right to compel them to abolish the happy customs of more than a century in order to secure themselves from harm?"

Thus the Dea Moines Capital deals with the suggestions to do away with the public receptions of the President and upset generally the laws and customs of the country because a cowardly anarchist murderer has struck a blow at these customs in taking the life of a President. In the moments of horror-stricken rage the people naturally turn to any and every means that may serve to protect the life of our Chief Magistrate. They demand that no man shall be required to take his life in his hand when accepting the duties of the Presidency. The first thought that comes to every man's mind is a desire to tear the murderer limb from limb and subject him to every torture of mind and body. But sober sense rules in the end, and the fact that even the murderer of the President is given a fair trial regularly receiving the proper penalty of the law carries its lesson on the strength of our established institutions.

In the same manner second thought on the problem of anarchy leads the people to more conservative action, consequently more effective action which arouses each individual citizen to his duty as a personal agent in protecting the life of our President.

Shall we, a strong, loyal, intelligent people allow the vile minded cohorts of anarchy to force our President away from the people, and wipe out those customs which are pleasant reminders that our Chief Magistrate is of and from the people? Shall we allow anarchy to put our President on the same footing with the people as the crowned heads of Europe, constantly surrounded by strong military guards and held aloof from close contact with the citizen? If such a course is followed the anarchist becomes more victor than vanquished, by demonstrating his ability to shake the foundations of the greatest democracy the world has ever known.

Shall the anarchist upset the United States. The response is unanimous.

Our Nation will not swerve one iota from its course for all the anarchy the world can muster. The individual responsibility of the citizen is, however, more seriously impressed upon us. Each citizen will become a public guardian and a private detective to protect the President from murderous assault wherever he may be, in public assemblies or walking the streets. Law cannot depose the anarchist but a watchful people can and they will.

ANECDOTES OF ROOSEVELT

Much has been published about President Roosevelt's personality, but, perhaps, only those who have seen him from day to day in his family life can realize his extreme simplicity of manner and conduct. On the last election day, a campaign of activity that culminated in the memorable speechmaking period of Bryan, Roosevelt retired to his comfortable home at Oyster Bay and awaited the result of the voters' battle. Awaited and yet not awaited, for not a single telegraphic wire was put in, and the candidate had to depend on his neighbors or the newspaper men for the news. One of the latter—a Sun reporter—was the first to serve him, arriving overheated and breathless with the report that there was undoubtedly another Republican victory, and that he had been elected. President Roosevelt himself responded to the bell ring and came out on the piazza. "I have great news for you, Mr. Roosevelt," said the reporter, "you are elected Vice President of the United States." "I hope the country has endorsed the Republican party and its principles as it should," replied Roosevelt. "It has," continued the reporter, "and Bryan has lost his own stronghold." "That's very interesting," said Roosevelt, "but tell me all about the football game. Who won?" And despite the reporter's eagerness to go into the election returns Roosevelt continued to discuss the enthusiastically the college contest of that day, until, owing to the lateness of the hour and the pressure of other duties, the reporter retired. Not another word was spoken about the election, and Roosevelt went to bed with nothing more than some brief telegraphic and telegraphic reports sent to his home contrary to his instructions.

Roosevelt's democracy never failed him, whether he was a student at Harvard, or in the saddle in the West, or a legislator in Albany, and his cordiality to the masses was shown to particular advantage in the campaign which made him Governor of New York. One evening, after speaking twice in New York, he was rushed by a special train to Yonkers, N. Y., and carried in over the heads of the invited guests, on the shoulders of Frederick W. Hollis, Chauncey M. Depew and others. There was tremendous enthusiasm bottled up in the crowd.

and it repeatedly overflowed to the interruption of the speaker. A red-faced Irishman in the gallery, who looked like a typical hooligan of the kind that voted for the thousands for Roosevelt, after the Santiago campaign, suddenly called out: "Teddy," "sh-sh," said a big policeman with a big club, Roosevelt continued, but the exploding exclamation, "Teddy," rang out a second time. "I'll put you out," said the big policeman to the offender. But the warning of "one of the finest" failed to suppress the interrogator. Just as Roosevelt was dilating on the virtues of the German, wasser gemutlichkeit, he said, could not be translated or understood by the other members of our complex population, the red-faced Irishman arose and yelled at full voice: "Teddy, what do you feed that taste of a mustard to make it throat so in Cuba?" The house collapsed, but Teddy rejoined, "The Republican platform," turned the laugh on the Irishman and continued his speech.

President Roosevelt's home life has always been delightful. In his leisure moments at Oyster Bay he has enjoyed the companionship of his family and taken a rare delight in directing the affairs of his small estate. Soon after his return from Cuba his aged garden came up the walk, hoe in hand, and, tipping his cap, said: "Mr. Roosevelt, when I come to finish that talk we had the other day about those onion beds." "What talk, James?" asked Roosevelt, with a smile. "Oh," said the gardener, "you know that the afternoon you received that telegram to go to Cuba, you and I were standing here and laying out an onion patch. If it suits you, let us plant those onions now, and the onions were planted."

The President has a quiver full of olive branches, and likes children other than his own. Except that he became busier and more inaccessible, Roosevelt carried the same domestic habits and preferences with him from his Oyster Bay home to the Governor's residence at Albany. One day a clique of New York city politicians, who had come up on a special train to see Governor Roosevelt, rushed into the corridor of the capitol and upset two office boys and secretaries. Governor Roosevelt was absent from his room and no one knew just where he could be found. A dozen messengers were sent out in search of him, and after ten or fifteen minutes he was found curled up in a corner with one or two neighbors' horses and a street Arab, drawing pictures of ponies and guns on a writing table. The children had waylaid him and begged him to show them pictures of two guns and the mustangs he had in the war. At another time a New York artist found him in the executive chamber, hunched under children clamoring over his chair, while he strove to show them photographs of the scenes of the campaign.

President Roosevelt has a mind of his own, and does not hesitate to make it known. A bunch of prominent politicians, together with a college president and a personal friend, called up on him in Washington to urge the appointment of a certain well-known naval officer to the eastern naval station. "We are very glad to see you, Mr. Secretary," they voiced together; but, quick as a flash, Roosevelt, swinging in his chair, said: "Well, I am not so glad to see you, least of all today. You've called at a very busy time, for I've some business to attend to that calls me away at once. I must bid you good-day." In a few minutes Secretary Roosevelt was with the late President, and Dewey and he practically decided upon as the officer to be sent to Hongkong.

President Roosevelt was once traveling in Idaho, and passed a bookstore, in the window of which was a copy of his "Winning of the West." Going into the book store, he inquired: "Who is this author, Roosevelt?" "Oh," replied the bookseller, "he's a ranch driver." "And what do you think of his book?" asked the President. "Well," said the dealer slowly and deliberately, "I've always thought it'd life to meet the author and tell him that if he had stuck to running a ranch, and give up writing books, he'd have made a powerful more of a success at his trade."

President Roosevelt is a religious man, and wherever he goes stands well in the estimation of his neighbors for his active participation in works of religion and mercy. He carries a portly pocket of loose coin, and equally well proportioned purse and a checkbook that rapidly becomes a package of stubs. Yet his habits are so regular that the least irregularity in a business transaction attracts his attention. For this reason department employees have always felt the pressure of his watchful oversight, and household servants—always long in his employ—while realizing the freedom they enjoy, give their closer attention to all details of their stewardship. One day New York saw a \$100 bill disappear in the portmanteau of a solicitor for a well-known charity in the same five minutes that the President called attention to an overcharge of 5 cents. A bootblack, taking advantage of the President's haste, tried to satisfy him with a nickel less of change, but the eagle eye of the public administrator detected the petty swindle.—St. Louis Globe-Democrat.

The Emperor William is quietly, very quietly, importing negroes under contract to raise cotton in West Africa. A good many attempts of this kind have been made before. England, weary of waiting for our civil war to come to an end and release the raw material for her Lancashire mills, undertook to supply her by encouraging cotton growing in West Africa, but the attempt was not successful, and died in the presence of revived competition from America. Two German emperor's scheme never trouble the cotton bulls nor hearten the cotton bears. The worst enemy in sight of our cotton growers is their own incapacity to comprehend the worth of economy and variety of crops—an enemy that they are gradually overcoming.

Words of Wisdom From the Talmud

Mr. Peters, hopeful of gaining a knowledge of the Jewish religion and believing that extracts from the Talmud would lead Christian scholars to study the subject further, has compiled the volume, entitled "Wisdom of the Talmud." Here are some quotations from the "Wisdom of the Talmud."

"The forest trees once asked the fruit trees: 'Why is the rustling of your leaves not heard in the distance?' The fruit trees replied: 'We can dispense with the rustling to manifest our presence; our fruits testify for us.' The fruit trees then inquired of the forest trees: 'Why do your leaves rustle continually?' 'We are forced to call the attention of man to our existence.'"

"Too many captains sink the ship."

"An old man is a trouble in the house; an old woman is a treasure in the house."

"Two pieces of coin in one bag make more noise than a hundred."

"Poverty cometh from God, but not dirt."

"Our kindly deeds and our generous gifts go to heaven as messengers and plead for us before our Heavenly Father."

"The noblest of all charities is in enabling the poor to earn a livelihood."

"The camel wanted to have horns and they took away his ears."

"The egg of today is better than the hen of tomorrow."

"Cold water morning and evening is better than all the cosmetics."

"The question is asked, 'Why is man born with hands clenched, but his hands wide open in death?' And the answer is: 'On entering the world man desires to grasp everything; but when leaving it he takes nothing away.'"

"Two dry logs and one wet; the dry ones kindle the wet."

"He who seeks for a faultless brother will have to remain brotherless."

"If thy friends agree in calling thee

WHY WOMEN HATE
Why do women dislike women?
"It isn't jealousy," said one of the sex, who is a newspaper reporter, "because the dislike is not confined to homely and unsuccessful women, and the objects are not always pretty and successful ones. It may be because women are not so easily 'done.' From a reporter's point of view, it is distinctly humiliating to feel that you are tolerated in your professional capacity just because you are a woman, that you are given time and attention that would not be shown a man simply because it is not customary to show a woman out the door."

"And yet all women in business do lack advantage of these little courtesies, shameful as the admission may seem. But it is really not indefensible. A woman works under so many handicaps that do not touch a man that an occasional advantage must be eagerly seized to make chances anything like even. She is denied the inestimable help of bullying, and her smiles and bluffs are just another form of 'done,' but then, it is the only form left her and makes just so much for success."

"It is not because women are women that they are disliked by their own sex in business. It is because the average 'home woman' doesn't understand. Usually she is monarch in her home, absolutely the most important person in it, and she loses the true appreciation of the importance of other people outside it. A man in business is constantly brought in contact with men who are his equals or superiors, who have equal rights with him, whereas a woman may spend two hours a day visiting with callers of her own grade of intelligence, as against sixteen spent with the children and the servants. When she does meet men it is either in the capacity of grocery dealer or clerks whose business it is to defer to her opinions, however illogical, or in a social way when it isn't worth while to combat her ideas if they happen to be erratic."

"So that unless she makes a very great effort she becomes positive and dogmatic, and when she meets other women there is a clash of interests she expects the same deference from them that she receives in her daily surroundings from men, and this is in a great measure the reason why women's discussion, when it strays outside the realms of dress and babies, is not always peaceful as is desirable."

"Their daily habit of acting as sole dictators sometimes discounts the opinions of others, and leads each woman to expect of every other woman the deference to her little peculiarities she is in the habit of receiving, and gives occasion for the anthropomorphic advice in 'Peg Woffington': 'Do let the dear ladies be natural; let them hate each other.'"

The Great Family Medicine of the Age!—For sore throat, croup, cough, cold, and all the ailments of the throat, chest, and lungs, the relief is immediate, and cure positive. It should not be forgotten that the Pain-Killer is equally as good to take internally as to use externally. Avoid substitutes, there is but one Pain-Killer, Perry Davis'. Price 25c and 50c.

Municipal ownership of water works at Los Angeles, Cal., seems assured after a long agitation in favor of that step and much litigation. By a vote of 284 to 1267 the people, a few days ago, authorized the issue of \$2,000,000 in bonds for the purchase of the existing private works. This practically ratifies a compromise agreement made in July between the city council and the water company. It is expected that the bonds will be put on the market at once and that the transfer of the works to the city will be made before the close of the year.—Engineering News.

"The world is only saved by the breath of schoolchildren."

"Jerusalem was destroyed because the instruction of the young was neglected."

"He who instructs a child is as if he had created it."

"The teachers are the guardians of the state."

"Learn first and philosophize afterward."

"To what may he be compared who teaches a child? To one who writes on clean paper. And to what may he be compared who teaches an old man? To one who writes on blotting paper."

"Be eager to acquire knowledge; it does not come to thee by inheritance."

SIGSBEE PROVES POOR WITNESS FOR SAMPSON

New York, Oct. 1.—Rear Admiral Schley fared better than the naval court of inquiry today than at any of the previous sessions, his counsel turning several important incidents in his favor during the hearing of the witnesses. He succeeded in discrediting at least two items of the prosecution's case.

Efforts were made to bring out discrepancies between the charts and reports and testimony with indiscreet results. In addition to the criticisms of the campaign which he made yesterday, Admiral Evans explicitly denied several statements ascribed to him as having been made to Commodore Schley in the Brooklyn's cabin after the destruction of the Spanish fleet. He admitted that he was anxious about coming to the aid of Santiago and that the blockade was farther off shore by night than by day. Hanna, acting as judge advocate for the day on account of Captain Lemley's bereavement, produced the first civilian witness who has taken the stand during the hearing, actually began. The court was visibly displeased with this action, and, as it turned out, the evidence adduced was not of great moment. From notes made at the time on the lower bridge of the Texas, near the conning tower, the great battle, when all the batteries of the ships were firing their hardest, up to the alleged disappearance of the Brooklyn to seaward after the loop that had given the Texas such a close shave, Admiral Dewey, with a show of much indignation, instead of addressing his question, in writing through the judge advocate as customary, finally turned upon the witness and asked sharply: "Did you hear Captain Philip give any orders to the engines?"

Answer—I did not. I turned away then. Admiral Dewey—You would have heard it if he had, would you not? Answer—I might not. Admiral Dewey, with emphasis—You seem to have heard everything else. The greater part of the day was devoted to the examination of Captain Sigbee of the St. Paul, upon whose contradictory statement by Schley in a letter to the Senate Naval Committee much stress had been laid. He proved very cautious in all his recollections of facts, and was distinctly disapproving to those who expected him to offer anything damaging to the defense.

A dramatic incident occurred during Captain Sigbee's cross-examination. Schley's counsel read the following extract from the hitherto unpublished report of the examination of Captain Sigbee of the St. Paul, upon whose contradictory statement by Schley in a letter to the Senate Naval Committee much stress had been laid. He proved very cautious in all his recollections of facts, and was distinctly disapproving to those who expected him to offer anything damaging to the defense.

A dramatic incident occurred during Captain Sigbee's cross-examination. Schley's counsel read the following extract from the hitherto unpublished report of the examination of Captain Sigbee of the St. Paul, upon whose contradictory statement by Schley in a letter to the Senate Naval Committee much stress had been laid. He proved very cautious in all his recollections of facts, and was distinctly disapproving to those who expected him to offer anything damaging to the defense.

The acting judge advocate objected to further reading, but in reply to a question from Schley's counsel as to whether he had ever told any one anything of the kind, Sigbee declared positively that he never had.

John Alexander Dowle doesn't propose to let his followers forget him. In the most recent issue of one of his pamphlets, which, by the way, is derided with a full page engraving of Eljah in a silk-lined full-dress suit, he announces he is arranging to have a biograph make moving pictures of his lectures and tirades, but in his home life as well.

SIO RUPTURE CURED
for TEN DOLLARS
Thousands have been cured of this terrible disease by the use of the SIO Rupture Cure. It is a simple, safe, and effective remedy, and is guaranteed to cure all cases of rupture, whether old or new. It is sold by all druggists and is also sold by mail for \$10.00 per bottle. Send for a free trial bottle and full particulars.

HARD CITIZEN OF CHINA

One of these incidents which are never long absent from the lives of those whose business brings them in continuous contact with Chinese—incidents that carry with them just that amount of danger which makes them enjoyable to those whom they affect—is reported in the Hongkong Press by Mr. W. Harris of Woodchow, a passenger on the Saiman (Captain Dickson), a steamer which runs between Woodchow and Canton.

The Saiman, as usual, numbered on her last run a great many Chinese amongst her passengers, but nothing out of the usual happened till Kung-chuk, situated between Woodchow and Canton, was reached. Here one of the Chinese wanted to disembark, but refused absolutely to allow the ship's commander to go through the formality of searching his box. However, he at last yielded and handed over a key, which, on being applied to the lock of the box, failed not to fit. The man had no other key, or, professed not to have, and as the affair looked suspicious a search was instituted amongst the other passengers, and the discovery was made that the Chinaman in question had substituted another box, similar in every detail, for that of one of the other passengers, also a Chinaman. The substituted box contained a worthless assortment of odds and ends, whilst the one stolen had rather valuable contents. The would-be thief had two accomplices, but these mixed with the crowd of Chinese on board and could not be picked out. Captain Dickson turned his attention to the prisoner, and ordered him to put his hands behind his back, in order to have them pinioned. This he declined to do, and instead, only yielded his arms across his chest. A planter below brought him to his senses—and the deck—and he was secured. He was fastened by the queue to a post, and his hands were tied behind his back. Deeming him quite secure, and the incident having apparently ended, no more attention was paid to the Chinaman, who was tugging at his cords. Presently he wriggled free, and made a dash past a man on guard, one of the crew, who was armed with a revolver. This man always stands at the head of the stairs leading from the Chinese quarter, and carries a loaded revolver to keep any chance desperadoes from rushing the deck. The escaping prisoner ran down the companionway leading to the lower deck, and, jumping onto the ship's rail, threw himself into the sea. The steamer was then about two miles from Canton. The guard fired his revolver, but aimed wide, and did no harm. The vessel was stopped, Captain Dickson ordered a boat to be lowered, and ran below for his revolver. A sampan was hailed, and one or two of the crew turned into it, whilst the guard got into the ship's boat. In the meantime a dug-out containing two men, probably confederates, was making rapidly for the swimmer, and seeing that he was likely to lose his prisoner, Captain Dickson fired. The range was a long one, but the shot was good, the ball striking the water a few yards from the dug-out, and right between the two of the oars. This stopped the dug-out's progress, and seeing capture imminent the two men sprang into the water and swam down stream, being picked up by another dug-out hovering near. The escaping Chinaman was certainly not a very brave fellow, but carried back to the ship, where he was fastened beyond all possibility of escape. At Canton, Captain Dickson handed him over to the British Consul, who preferred a charge against the man and turned him over to the Chinese authorities.

The fair points conclusively to the existence of an elaborate confederacy of law-breakers who are a constant menace to the public safety.

ABDOMINAL SURGERY.
Dr. Frank P. Foster, editor of the New York Medical Journal, said: A great advancement in abdominal surgery has been made in recent years. This advancement was made possible by Lord Lister's campaign of antiseptics. In regard to gunshot wounds in the abdomen, the first man to propose operative intervention was Dr. James Marion Sims of this city, who died in 1852. Before the days of such intervention a person with a penetrating wound of the abdomen died occasionally recover. He was more likely to recover from a gunshot wound than from a stab wound. It was generally inferred then that when a man with a gunshot wound recovered, no internal organs had been penetrated. This inference, however, was not always justified. Lord Lister, who was years ago simply Mr. Joseph Lister, a surgeon to the Glasgow Royal Infirmary, took up the study of antiseptics about 1860. As a result of his studies the whole of the operative surgery has been much safer. About forty years ago a person suffering with a gunshot wound of the abdomen was seldom operated upon. The wound was usually drained, and the patient received stimulants and anodynes according to the symptoms. At that time the number of people with gunshot wounds who recovered was exceedingly small. Later the surgeon began to play a bolder part in the treatment of such cases. He was not only called upon to drain the wound, but to remove the bullet, to clean the abdominal cavity and to close up the apertures in hollow organs by means of sutures. Opium was most always given, not only for the purpose of allaying pain, but also to prevent the natural vermicular movements of the intestines. Under the improved methods of treating such cases, the number of persons who died grew decidedly smaller.

At the time President Garfield was shot surgery was on a high plane, but few surgeons had opened the abdomen for the relief of gunshot wounds. President Garfield was shot in the spinal column. He was not subjected to a radical operation. It can hardly be said positively that Mr. Garfield's case would have ended in recovery, even if his injury had been received in the present days of advanced surgery. In the last ten or fifteen years surgeons have accomplished results in abdominal surgery that their predecessors never dreamed of. They are now able to open the abdomen with almost absolute safety for diseases and injuries of any organ within the abdominal cavity. Even wounds of the heart have been successfully treated in a few cases. A post mortem examination of a person who died some years after a gunshot wound of the chest, revealed the presence of a bullet in one of the chambers of the heart.

STRAINED RELATIONS BETWEEN TWO FRIENDS

A case of strained relations between
two friends—Dingstrom and Fair-
banks—was aired in the Police Court
this forenoon. Both men are employed
in the Iron Works. The charge against
the latter was assault and battery on
Dingstrom, who claimed that he had
been struck without provocation.

Fairbanks said he had come to Ho-
lulu a short time ago. He and Ding-
strom had been friends. A short time
ago, he borrowed some house furnish-
ings from the latter because his had
not arrived yet from the Coast. He had
used a portiere out on the lanai to shut
off the view from Dingstrom's house
which was right next to his. Ding-
strom objected and he returned to the
furnishings, not forgetting to thank his
friend.

Later on, Dingstrom appeared in
front of his house and dared him to
come out and fight, at the same time
calling him names which made his
blood boil. There were women near
and he did not care to settle the matter
there.

When he met his man at the Iron
works, he demanded a retraction of the
epithet which he considered a re-
flection on himself and his mother. The
retraction did not come and he struck
Dingstrom in the face. He considered
that his action was perfectly justifi-
able. He felt that he should protect his
name as well as that of his mother.

Judge Wilcox said that the time to
resent the usage of the epithet refer-
red to was at the time it was applied.
Instead of that, there had been a wait
of two or three days before the as-
sault. A fine of \$5 and costs was im-
posed.

ESPINDA BEAT HIS WIFE.

Esplinda, the young man who takes
care of Secretary Cooper's horses, was
arrested yesterday on the charge of
beating his wife. The woman appeared
before Judge Wilcox this forenoon with
her anger very much abated, and asked
that her husband be released. She
stated that she had been living with
him for some time, and that she had
been treated very badly. She had been
beaten several times, and she had been
kept in a dark room for several days.
She had been very much distressed,
and she had been very much afraid of
him. She had been very much distressed,
and she had been very much afraid of
him.

DANGEROUS HOLE FILLED.

A dangerous sewer opening in the
alleyway near Gonzales' photograph
gallery on Beretania street, just a lit-
tle beyond Punchbowl, was filled in
yesterday, much to the satisfaction of
the people living in the neighborhood.

Not many days ago, a Portuguese
girl while walking along in the alley-
way, fell into the opening and had one
of her legs badly cut. She is still in
bed. Two or three days ago a Portu-
guese woman fell in but, fortunately,
did not hurt herself.

On account of the narrowness of the
alleyway, the dirt taken from the open-
ing was piled laterally so that the
opening itself could not be seen and it
was on account of this fact that the
victims fell into the place.

There may be a damage suit arising
out of the first case mentioned.

It seems from a story going the
rounds that the young King of Italy
has not the calm indifference to public
opinion of his ally, the German Emper-
or. A courtier suggested to him that
he should disguise himself as a student
and go into the cafes, just as Peter the
Great did. "Yes," said the King.
"Peter the Great had the right to hang
those who said anything disagreeable,
and I have not."

BY AUTHORITY

NOTICE TO TAXPAYERS.

The taxpayers are hereby notified
that the Income Tax for 1931 is now
due and payable to the Deputy Asses-
sors of the several districts.

Section 9, Act 29, Session Laws of
1931: The Taxes on Income impos-
ed shall be due and payable on or be-
fore the fifteenth day of November of each
year; and any sum or sums annually
due and unpaid after the said fif-
teenth day of November shall have
added thereto ten per cent on the
amount which shall be due and become a
part of such Tax. Interest at the rate
of nine per cent per annum shall be
added to the amount of such Tax and
penalty from the time same shall be-
come due.

All Income Tax not paid by Novem-
ber 15th will be delinquent.

The delinquent list will be published
after December 1st, 1931.

JAMES W. PRATT,
Assessor First Division Island of
Oahu.

October 8th, 1931.

No More Dread OF THE Dental Chair

TEETH EXTRACTED AND FILLED
ABSOLUTELY WITHOUT PAIN by
our late scientific method applied to the
gums. No sleep-producing agents or
cocaine.

These are the only dental parlors in
Honolulu having PATENTED APPLI-
ANCES and ingredients to extract, fill
and apply gold crowns and porcelain
crowns undetectable from natural teeth
and warranted for ten years, WITH-
OUT THE LEAST PAIN. All work
done by GRADUATED DENTISTS of
from 12 to 20 years' experience, and
each department in charge of a Special-
ist. Give us a call, and you will find
us to do exactly as we advertise. We
will tell you in advance exactly what
your work will cost by a FREE EX-
AMINATION.

Get Teeth.....\$5.00
Gold Crowns.....\$5.00
Gold Fillings.....\$1.00
Silver Fillings......60c

Our name alone will be a guarantee
that your work will be of the best.

Mr. Hugo, A. Bomes, R. I. Lee, M.
Wood, E. Blackstadt and 10 deck.

BASE INGRATITUDE AND RETALIATION

There is a coolness at present exist-
ing between the Board of Public
Works and Captain Merry of the Na-
val Station. It is all on account of the
Territory insisting on a charge of \$55
for connecting the buildings at the
station with the sewerage system.

Captain Merry, about two years ago
gave the Territory permission to use a
Government lot on Richards street as a
storage place for material, and
charged no rent, although the ground
was worth money. Now the charge for
making the sewer connection is
looked upon as rank ingratitude, and
the Board of Public Works will be
made to get out of the lot it has used
so long through the kindness of the
commandant.

The jury in the Hagey Cure Com-
pany case retired late last night and
returned a sealed verdict at 7 this
morning. It will remain sealed un-
til tomorrow morning to await a ruling
by Judge Gear on the qualification of a
juror who took the Hagey cure.

Captain Wallace of the bark, Sea
King was surrendered by his bondsmen,
Harvey and McLean, before
Judge Estee this morning. He was
then released on new bail of \$500 with
C. J. McCarthy and T. A. Simpson as
sureties.

NEW TO-DAY

NOTICE.

The Citizens' Committee is request-
ing to meet at the drill shed this even-
ing (Friday) at 7:30.

OFFER

FOR THIS WEEK ONLY

A special lot of Knit Wool

LIGHT EVENING
SHAWLS

MADE BY F. H. BACHMANN &
CO., BREMEN, GERMANY.

and brought to the islands before
the United States tariff on wool
was applicable.

We do not suppose that articles
of this quality could be obtained
in the United States today, even
at wholesale, for anything like the
price at which we will close them
out this week.

Six colors—White, Ecru, Cardi-
nal, Maroon, Light Blue and Dark
Blue.

The price, just half of what they
must needs hereafter be—

\$1.25 each.

LAST CHANCE AT THE REM-
NANTS.

There are still a few remnants
left on our counters. One week is
a short time to sell the accumu-
lated odds and ends of six months,
so you will yet find some rich
pickings.

WANTS.

TO LET.
