CALIFORNIA IS AGAIN SCARED BY AN EARTHQUAKE

Sharp Shock Felt Last Night in Large Portion of the State—Theater Panics Start and Are Checked.

SAN FRANCISCO, March 10. A sharp earthquake shock was felt tonight from San Luis Obispo, in Southern California, to Santa Rosa. The shock caused a scare and started numerous theater panics, but no damage was done. In the San Francisco and Oakland theaters many people jumped from their seats when the shock came and started for the exits. They were promptly stopped.

All over both cities thousands of people rushed from buildings of all sorts into the streets.

At San Jose there was a slight theater panic. The shock was especially severe at Modesto and Watsonville. In both of these cities the Western Union telegraph operators left their keys and fled from their offices.

The seismograph at the Lick Observatory, Mount Hamilton, showed the duration of the shock to have been eight seconds.

FRIDAY

MARCH 11

DRIVING US FROM THE OCEAN.

We do not know exactly what the sentiment of the American people as a whole is in the matter, but for ourselves we had a feeling of shame when we read in the report of a hearing before the house committee on merchant marine and fisheries that we have to send our guns and ammunition to the Philippines in Japanese vessels, says the Army and Navy Journal. It was only half a century ago that our own ships, with some show of force, opened the ports of Japan to the commerce of the world, and now, with all that start, we have fallen so far behind in the race for ocean supremacy that our flag has virtually disappeared from the Pacific ocean, and we are compelled to have recourse to the transportation facilities of a nation we resented from quasi-barbarian relation in the middle of the last century. Congressman Humphrey, of the State of Washington, could be pardoned for expressing himself with some feeling before the committee on January 20 in discussing H.R. 16,562, providing for a postal subvention for American ships. Dealing with the want of transports by this country in the Spanish war, Mr. Humphrey said the scene presented by our troops as they marched down to the gangplank to "Rally round the flag" and then sailed away under a foreign flag was ridiculous. He asserted that to get our troops to Cuba the government paid \$12,000,000 for ships, and after the war some of them were sold at a reduced price and some abandoned.

Germany especially provides that any vessel receiving government assistance must be built in a German yard, out of German material. Mr. Humphrey said he did not know of a single country that pays an ocean mail subvention or subsidy on any vessel that is not constructed in its own yards. So far as the Pacific Coast is concerned, he regarded the American navy as absolutely worthless. The Coast is not receiving any protection whatever from the navy. The Pacific fleet of cruisers would be practically worthless, he held, in war against the Japanese battleships. Mr. Humphrey defied any man to explain what good the fleet in the Atlantic would do the Pacific in case of war with Japan. The latter could seize the Philippines and Hawaii, because it can transport 200,000 troops now at one time, he said, and if they desired the Japanese could cross the ocean and seize the Pacific Coast. He believed no man could study the situation without realizing that the Pacific Coast is absolutely at the mercy of Japan. Mr. Humphrey thought it would be more desirable to put the whole Atlantic fleet in the Pacific, but the reason it is not done is that there are no docking facilities there, but the dock at Bremerton is being pushed and will cost two and a half millions. With that finished, he thought the Coast could take care of the whole fleet.

THE LIBRARY SITE.

The bungalow site seems to find favor with the greatest number of members of the Honolulu Library and Reading Room Association, and it seems altogether likely that the new Carnegie library will be located there. The site is admirably suited to the purpose, and it could be had at once. The present structure on the property is one that can well be dispensed with.

A handsome library building would do much to improve the appearance of the Capitol grounds, and the excuse that the park would be too crowded hardly holds water. There is ample room for a library structure, and there would seem to be no valid reason why one should not be erected there. It would be a simple matter to provide an entrance from both Hotel and Richards streets, and the building would be readily accessible to all of the principal car lines of the city.

The Capitol grounds are quiet and well kept, and the surroundings are ideal for a library. There is ample room and there is ample shade. This is something which should be taken into consideration, for on a treeless lot the library would look barren and unattractive until shrubbery could be grown.

The bare site, which has been strongly urged, is rather small, is dusty, and is noisy. The bungalow site is only a block away, and it is just that much nearer the chief residence section of the city.

The bungalow site offers many distinct advantages over any other.

BETTER PHONES SOON.

The announcement that Honolulu is to have a thoroughly up-to-date telephone service within the next few weeks is certainly welcome. The present system is far behind the times and entirely unsuited to the requirements of the city. The new system will place Honolulu in the class with the large cities of the mainland.

The supervisors acted with praiseworthy promptness regarding the extension of the fire limits. It is to be hoped that they will adopt the new building ordinance with equal dispatch.

HAWAIIAN AFFAIRS AS DISCUSSED IN WASHINGTON

Senator Depew the Originator of the Plebiscite Idea--Coastwise Suspension Campaign Delayed.

By Ernest G. Walker.

(Mail Special to the Advertiser.)

WASHINGTON, February 18.—There have been two Hawaiian developments of no small importance since the last mail left Washington for Honolulu. These are the approval by the house of several good bills for Hawaiian harbor improvements and the decision of the senate committee on Pacific Islands and Porto Rico regarding prohibition in Hawaii.

The harbor bills can be described in few words, the substance of the situation having already been transmitted to Honolulu by cable. The bill as reported to the house and as subsequently passed by the house carries \$15,000,000 toward the harbor dredging of Honolulu harbor, \$10,000,000 for modernizing the project at Kahului harbor, and \$20,000,000 for continuing the construction of Haleiwa harbor. There is also provision in the bill for a survey of Kona Island ports with a view to developing a good safe harbor on that island. Major Winslow, the army engineer on duty in Hawaii, has reported unfavorably on the proposed harbor at Kona port and has requested for a general survey of the island. The bill has reached Washington too late to be presented to the engineer board in time for consideration by the house. The provision is now in the bill and there is practically no danger of the senate changing the Hawaiian provisions.

A resolution was attached by the house committee to the Kahului bill, requiring certain amounts to be expended by the local interests. This would have covered the local improve-

ments, made already at local expense, but it was feared this would lead to complications and on motion of Delegate Kahanamoku in the house it was finally eliminated.

Beyond question the house has treated Hawaii very generously in the bill. The sums voted are larger than one might conclude by comparing appropriations of former years, because the current appropriations are made with a view to meeting river and harbor appropriation bills annually. Heretofore the appropriations have been made on a two-year basis, as congress has enacted a river and harbor bill only once in two years. The amount given for the Haleiwa project is one of the largest in the bill and is one of two items in the bill where the house has voted more than the engineers estimated could be expended during the next twelve months. The other case was an appropriation for the Mississippi River. It is worth bearing in mind that the house voted for Haleiwa harbor improvement during the next year \$20,000,000, while the great and important harbor of Oakland, California, voted only \$250,000. The objection of the committee to the Kahului project was also generous in view of the fact that there are eleven large projects in the current bill where such amounts are attached and the expenditure of local funds in aid of the project is required. Among those projects are Seattle, Washington; Houston, Texas; Port Jervis, Rhode Island; Jamaica Bay, New York, and the Sierra Nevada River.

The decision of the senate commit-

tee, of which Senator Depew is chairman, to authorize a special election in Hawaii to determine whether the people want prohibition, was cable to Honolulu late last week. The arrangement, arrived at after an all day hearing, seems very satisfactory to all concerned. It was Chairman Depew's own idea and was advanced by him at the eleventh hour as a solution of an embarrassing problem. The committee has received many representations by cable and otherwise from Hawaii about the matter but it seemed to Senator Depew, as it was cable to The Advertiser the day previous to the hearing, that the cable bill would likely be favorably reported unless some other method of meeting the situation could be devised. Mr. Depew was adverse to depriving the islands of the right to pass upon this important question for themselves and he did not like the idea of depriving the legislature of the opportunity to enact the laws for the Territory.

Those present at the hearing included Senator Curtis, of Kansas; John G. Woolley, A. J. Dinwiddie, who represents several temperance associations in Washington; Judge F. M. Hatch, Delegate Kahanamoku and George B. McCallum. Mr. Woolley and Mr. Dinwiddie spoke for the Curtis bill, the Delegate and Mr. McCallum against it. Their opposition, however, was based upon the fact that it deprived the territorial legislature of its proper functions and was an encroachment upon the principle of home rule. Mr. Curtis, in the Orogenic Act. From that point of view the Delegate and Mr. McCallum argued that the approval of the bill by the senate and the house would be regarded as constituting a distinctive legislative precedent. They claimed there was no good reason why congress at this time should step in and take away the functions of the legislature. In enforcing this argument they cited the fact that congress had felt compelled to affirmatively veto amendments by the territorial legislatures of Arizona and New Mexico, but the Hawaiian legislature had always proceeded so well that no such action by congress had ever been thought necessary.

They also enlarged upon the action of the territorial legislature in 1907 in placing the whole matter of liquor licenses in the hands of commissioners, who were given large authority. These commissioners were appointed by the Governor of Hawaii, who was directly responsible to the President. These commissioners could withhold licenses; in fact, had almost absolute power over the traffic. They read telegrams from the Governor, advising against the proposed legislation till after the legislature had had another opportunity to meet the situation. Similar telegrams were also read from the bar association, chamber of commerce and the merchants' association.

The contentions of Mr. Woolley and Mr. Dinwiddie were that conditions in regard to the liquor traffic in Hawaii were particularly bad. An idea prevailed with the senate committee that the liquor interests in Hawaii had overstepped the proper bounds and that something should be done either by congress or by the territorial legislature to restrain those interests. This idea was urged both by Mr. Woolley and Mr. Dinwiddie, and made an impression upon the senators.

Immediately on Senator Depew's return he expects to have the resolution for a plebiscite drawn up and presented in the senate. As outlined, it meets with the full approval of all concerned, including Mr. Woolley. But an opinion prevails here that if Hawaii votes for prohibition at the special election and the legislature should attempt to defeat the enactment of a prohibition law congress would then feel justified in enacting a prohibition law for the Territory on its own initiative.

The cablogram of women's associations, headed by Mrs. Frear, wife of the governor, petitioning that women be allowed the right to vote upon the prohibition question, was considered, but does not meet with approval. Delegate Kahanamoku and Mr. Woolley are both agreed that it would be unwise to attach any such a provision to the resolution. The success of the resolution in the senate might be endangered thereby, Congress has never passed upon the question of woman suffrage, in any form, it is said, and the linking of that question with the Hawaiian resolution would probably lead to much agitation and discussion.

Mr. McCallum today alluded to the contentions of himself and the Delegate for not "striking at once" for the suspension of the coastwise shipping laws. "It is only fair to remember," said Mr. McCallum, "that the merchants' association, the chamber of commerce and the legislature, at one time, went on record against such an enactment. The fact embarrasses us in our efforts now. The Delegate and myself have been in frequent consultation with our friends in the house over this matter. They have advised us to wait a little till the time is more opportune. We are willing that opportunity and time will be afforded something before the session is over."

"President Taft has several more times before congress," added Mr. McCallum, "that he has been unable thus far, although he has pressed those bills earnestly, to get any of them enacted into law."

HARBOR FISHING

HUI MUST WAIT

(Continued from Page One.)
It was decided that as long as there was any chance of rain being shown on the Tahoma, the fishing party had better not start. Campbell was asked by Stephens to use a line in the Tahoma, but he said it was dangerous. J. P. Morgan objected to a ground order providing for a long and fast line in view of the great number of there being any children. Doctor Hobbs explained how the possible success of the fishing party had been under way in the Tahoma. There had been some ground order against it. The parents on Quantine Island, from the Tahoma, had many symptoms of children, it was stated, but the bacteriological investigations, which will not be completed until today, had so far failed to establish the presence of the disease, but rather indicated its absence.

HAWAIIAN FIBRE MEETING.

The annual meeting of the Hawaiian Fibre Company was held yesterday and officers for the coming year were elected. The reports of the officers show the company's finances to be in excellent condition and the outlook is very bright.

Last year 133½ tons of sisal fibre were marketed in nine different shipments. In each case the top price was realized against the best white Yucatan fibre. The company now has 1500 acres under cultivation, the plants on 850 acres of which are fully matured. In addition another 800 acres has been cleared ready for planting.

The company lately installed a new power engine and is now installing another decorticating machine. In the course of the year another mill will be erected on the upper lands.

The assets of the company now show an investment of \$125,000, and the treasurer was yesterday instructed to dispose of an additional block of stock to supply funds for further improvements.

The officers elected follows:
Cecil Brown, president; M. P. Robinson, vice president; Walter C. Weedon, secretary and treasurer; L. Tenney Peck, auditor.

STOCK EXCHANGE.

The following sales were reported on the stock exchange yesterday:

Pasadena—10 @ 20.
Evan—200 @ 25; 5 @ 25.125.
Washita—60, 62, 30 @ 125.
McBryde—150, 350 @ 7.25.
Oahu—100, 60 @ 28.75; 50, 30, 20 @ 28.50; 5, 5 @ 28.50.
Hawaiian Commercial—20 @ 41.25; 5 @ 41.
Hutchinson—20 @ 18.025; 5 @ 18.50.
Pioneer—10 @ 237.
Omaha—20 @ 54.
Brewery—15 @ 18.75.

Bonds.
Rapid Transit 6s—\$3000 @ 107.50; \$2000 @ 107.50.

DIVIDENDS.

The following dividends were paid yesterday:
Pasadena, 20 cents a share; Wailuku, \$3 a share; Hutchinson, 15 cents a share.

PHONES IN SIX WEEKS.

Unless unexpected delays occur Honolulu will be supplied with the new phone system within six weeks' time. The conduits have all been laid, the cables have been drawn and everything now awaits the arrival of the phones and switchboards. The instruments were shipped from Chicago some time ago and unless the workmen lay freight up for a long time they should be here in short order.

As soon as the new phones and switchboards arrive they will be installed, and then it will only remain for the company to cut over from the old system to the new. This is but a small undertaking. With the cutover made the company will be ready to take down the old poles and wires. All of the phones under the new system will be on direct lines and all with in the city district will be automatic. There will be absolutely no difference between the downtown service and that of Wailuku and the old annoyances which have made people more or less disgusted with the telephone system will be something of the past.

The installation of the new system will probably result in some changes

CARTER IS NOW ON THE GENERAL STAFF

Major Gen. William H. Carter, U. S. Army, will leave Manila on the next transport (March 15), and will resign his duties in the war department, probably some time in April, as a member of the general staff corps. The detail has been made by the President, upon the recommendation of the secretary of war, who contemplated with favor the selection of General Crozier as chief of staff, the position to which Major Gen. Leonard Wood will succeed upon the detachment from that duty of Major Gen. J. E. Bell on the first of April. General Carter takes the place on the general staff vacant by the detachment of Brig. Gen. W. W. Wotherspoon, and it is expected that in the course of the next few months Brig. Gen. T. H. Bliss, now on duty as assistant to the chief of staff, will be relieved from duty in Washington and assigned to the command of one of the military departments. For the present Brig. Gen. Walter Hoge will command the department of the East, from which duty he will probably be relieved in a few months by Major Gen. J. D. Grant.

SYSTEM WORTH

TWO MILLIONS

(Continued from Page One.)
The electrically driven machine pump was proposed to raise the water into the city mains," said Campbell yesterday. "I had all been hoping to waste herefore. Tests have been made, and it is found that the water is of fine quality. The Rapid Transit pump will allow us to take it."
"A similar arrangement may be made with the Honolulu Iron Works and with the Hawaiian Electric Company, both of which are using great quantities of water which goes to waste after passing through their condensers."
Campbell has been giving a great deal of attention to the Honolulu water system and with the completion and apparent success of the Nuanuan dam he is convinced that the city is soon to have a system of which it will have reason to be very proud.
"I could give two million dollars for the Honolulu water system today," he

in the tariff. Out-of-town phones will probably be on a toll basis, the monthly rental being reduced and long distance charges substituted to bring up the revenue. This will make it possible for the man living in the country districts to have a telephone at a reasonable rate through which he can talk with his neighbors without extra charge, but he will be forced to pay a small long distance toll when talking with Honolulu.

As soon as the new instruments arrive the company will be in a position to care for all orders and will be able to install fifty phones a day should they be called for.

OUTLOOK PROMISING.

Trade reports to Bradstreet's are rather more cheerful. Visible evidence of expansion in jobbing trade, in consequence with the advance of the season, are found in the reports that the large numbers of buyers in leading markets, especially in the west, southwest and parts of the south, have taken hold more freely, although even in the markets of the southwest, whence best reports come, there are evidences of conservatism, based largely on the high prices asked for goods. Jobbing trade at the east is slower to open up, but there is certainly more doing in jobbing at New York, while primary dealings are still classed as quiet. Inquiry by Bradstreet's at leading markets fails to substantiate the exaggerated reports of cancellations noted for some time past, and there are few signs of the widely-heralded reaction in distributive trade. Many points report no cancellations to speak of, several cities report countermands no greater than normal, and only a very few report that in a few lines, notably clothing, has there been any special effect exercised. Nor does inquiry into the widespread reports of damage to winter wheat, which have induced advances of two to three cents per bushel in speculative circles, reveal much that is definitely unfavorable. In the southwest, particularly Kansas and Missouri, there are reports that wheat on low-lying ground has been killed; but on the other hand, reports from Texas are that the wheat crop is the best in years, with good snow covering and soil in fine shape. The fact needs to be borne in mind that winter wheat is not a hot-house plant; that some deterioration always occurs over winter, but that the crop entered the winter in fine shape on a nearly record area and that snow covering has been better than for years. It may be said also that while the stock market decline and the fear of adverse legislation or of unfavorable decisions have had possibly some effect on trade commitments, the quieting down shown in trade in January and early February from the immense activity of last November and December was not much more than was to be expected. Now that the spring season is close at hand, a clearer view will shortly be had of the outlook. On the one hand, large, if not indeed record, planning of leading crops is to be looked for, while on the other, the effect of high prices upon distribution of manufactured goods is to be tested. The least favorable feature in the country's trade at present is the continued sagging in export trade in farm products, an effect easily traceable to the high prices ruling for breadstuffs, meats, animals and cotton.

Manufacturers are well supplied with orders. Western shoe men are running to capacity. There is rather less pessimism in the iron and steel trade. Reports from the Pacific Coast lumber trade are good. Railroad earnings for January (gross) show a gain of fifteen per cent over the year before.

said and make money on the investment."

Yesterday a contract was awarded to the Honolulu Iron Works, as the lowest bidder, for 2500 feet of pipe for Alewa Heights. Tests made by Superintendent J. M. Little showed a fine pressure in the supply for Alewa, and within a very short time now that suburb will have a sufficient supply.

"The next will be pipes up Kalihi," said Campbell. "We promised the legislature to accomplish three things in connection with this water supply business. They were to install the high lift pump, construct the Kaimuki reservoir, and give Alewa Heights a water supply. All three are now safely assured."

The success of the big Nuanuan dam is now certain, according to the superintendent of public works. It has already demonstrated that fears that it was so located that it would not catch water were not justified. Campbell further says that the big dam is about the cheapest dam of its size ever constructed.

SHAW EXPLAINS
WAR PREDICTIONFormer Secretary of the United
States Treasury Discusses
What Japan Might Do.

PHILADELPHIA, February 25.—Leslie M. Shaw, former secretary of the treasury, today denied that he had predicted war with Japan in his recent speech at Morristown, New Jersey, which is said to have occasioned comment in Tokyo.

"I did cite certain well-known facts, the logic of which spells war," said Shaw. "I cited the fact that we sent sixteen war ships to the Pacific Ocean to demonstrate our power, and hired twenty-seven ships built of foreign material in foreign yards, and floating foreign flags, to carry the necessary supplies, and stated what all men know, that one hostile shot from the nearest country that owns a gun would have sent every one of those home, for no country would consent to have its flag mixed up in our contentions. We are at peace with the world, and yet, in 1903, the war department hired more than forty foreign ships to do its work. We send food to the soldiers in the Philippines in Japanese bottoms."

"I called attention to the fact that Japan can't do it, but she will, but that she can't put 200,000 soldiers in Hawaii in thirty days without firing a shot, and being then at war, we could not put 100,000 over there to contest the territory in two years. We have no ships with which to do it, and, in the event of war, we could neither hire nor buy."

"Japan can land a fleet at Seattle any foggy day without so much as asking the backing of a dog, and she can march her troops down the Coast and take every exercise for fortifications which we have on the Coast without serious opposition. Not one of the forts is protected from the rear, and cannon that are mounted to defend against an attack by sea can not be turned around in fifteen minutes to resist an attack from the land."

"I also cited the fact that if every powder mill in the United States were to make powder twenty-four hours per day for more than thirty days, the product would last our present Navy two hours, so that, in case of war, if every powder mill were to quit making sporting powder and blasting powder and work twenty-four hours per day for the government, we could fight two hours every month."

"These are not State secrets. Everybody knows them except ourselves. And still we go on building battleships. In this we do well, but battleships without colliers and transports are absolutely worthless. In case of war we could not get our Atlantic fleet to San Francisco. No vessel in the fleet can carry enough coal to take it there, and we have no colliers and could then hire none. I did not predict war, but I did predict what we would wake up to in case of war."

OAHU RAILWAY TIME TABLE.

SEWALL'S DAMAGES DE-TERMINED.

The board of survey consisting of Captain Charles Robert Cotton and James Lyle has completed its survey of the damage sustained by the American ship Edward Sewall by fire in the fore hold. The board found the bottom of the steel foremast badly damaged and the mast sunk and gave recommendation that repairs be made here and the mast elevated to its proper position. The damage in the vicinity of the base of the mast where the fire in the coal barge burned fiercest is very great. The keelson was bent to the starboard and also the angle iron and plate supports which help the keelson support the mast. A new ceiling will have to be fitted in.

The survey board has notified the Sewall interests that they recommend repairs including the raising of the foremast to its original position; after sheet of iron taken off from heel of mast to butt; forward side sheet to be cut between four and six feet up; angle irons to be cut off and renewed or strengthened as deemed best when the mast is cut off; the keelson under the mast to be straightened and strengthened; angle iron plates and supports to be straightened; new mast wedges for upper and lower decks and a new ceiling on both sides from bulkhead forward for a distance of seventy feet aft.

SUBMERGED MASTS.

SEATTLE, March 1.—The three steel masts that were seen sticking up out of the sea about three-quarters of a mile north of the Quillayate River, south of Cape Flattery, last Christmas Day are now believed to have belonged to the German ship, *Patmos*, which was sighted derelict on December 16 by the American schooner *Palmas*.

The *Palmas*, which left Tacoma December 4 with lumber, arrived at Port Pirie, Australia, yesterday and reported sighting a German ship off the Washington coast, drifting on her beam ends and the lifeboats missing.

A storm was raging and the schooner dared not venture close to the bulk. The masts of *Quillayate* were visible several days and then disappeared. The weather off Cape Flattery was very stormy during December, and it is not likely that the *Patmos* crew was picked up after taking to the small boats.

Several sailing vessels which passed the Straits of Fuca in December have not yet reached their destinations. The *Patmos* was a steel ship of 1850 tons and was built in Glasgow in 1894. She sailed from Portland on December 7 with wheat for Queen's own and was commanded by Captain Bell.

The *Matson Navigation Company's* bark *Annie Johnson*, Captain Nelson, which arrived Thursday night, twenty days from Hilo, is credited with the smart voyage from the Islands to this port made in the last few years. The *Annie Johnson* holds the record for the run to and from the Islands. A number of years ago she went down in eight days and four hours, and her record time coming this way is nine days and sixteen hours. Captain Nelson reported that he had fine airs all the way up, and he took every opportunity to keep the wind in his sails. The *Annie Johnson* brought 27,000 bags of sugar.—Oahu, Feb. 26.

WORD TO THE FOOLISH.

See a job back of you and you are liable to get downed for being late at the office. Instead of blaming the clock, the wife and with the germ of some idea, and instead of being stupid, you are a fool.

IN THE FUTURE.

"What are you doing with that fool?" asked the mother.
"I'm waiting for the daughter," said the father.
"What?" asked the mother.
"I'm waiting for the daughter," said the father.
"What?" asked the mother.
"I'm waiting for the daughter," said the father.

HAWAII WILL HAVE FINE SHOW

Promotion Committee Plans for
Exhibition to Be Given at
Atlantic City.

WOOD LEAVES ON LURLINE

A Scheme to Show Hawaiian
Surfriding on Waves of
Atlantic Ocean.

Hawaii's booth along the famous board walk at Atlantic City will be in readiness to enter to public taste, whether for the luscious pineapples of Hawaii, not or the attractive literature issued by the Hawaii Promotion Committee; for H. P. Wood, secretary of the promotion committee leaves on the Lurline next Tuesday evening for the mainland and will immediately go to Atlantic City to prepare the booth. He will be accompanied by Loyd Childs, who was in charge of the Hawaiian exhibit at the Seattle fair last year.

Mr. Wood received permission from the chamber of commerce, at its meeting on Wednesday, to go to Atlantic City, the chamber believing that Mr. Wood will be able to advance the best interest of the Islands by being on the ground to start the booth.

The matter was brought before the chamber of commerce by W. H. Hoogs, chairman of the special Atlantic City committee of the promotion committee, who presented the request for Mr. Wood's leave of absence in a letter. The chamber left the matter in the hands of the president, who endorsed the request.

Confer With Mrs. Headlee.

Meanwhile Mr. Wood has made ample preparations for the shipment of necessary furnishings, some of which will go forward on the Lurline and other

TOM SHARP, The Painter

Signs of all kinds.
Scenic Work, Decorating,
Graining, Paper Hanging, Etc.

local boats to San Francisco to be forwarded across the continent by rail, while heavy materials, including iron tables and stands and chairs, will be shipped by the Tehuantepec route.

Mr. Wood will go to New York via Los Angeles in order that he may look over the promotion work being conducted there by Mrs. Headlee, and will confer with her regarding her proposed transfer to Seattle to work during the coming summer for tourists in the northwest country.

A Darkened Stage.

He expects to be at Atlantic City by April 1 to secure the best available space for a booth. The booth will be handsomely decorated with photographs and transparencies. A feature of the exhibit will be Howard Harebeek's famous volcano painting, which will be hung at the rear in a darkened space. Electric lights will be used to bring out the word lava-flowing effects of the picture. Directly under the picture the orchestra of Hawaiian musicians under the direction of Professor Vierra will play. Palms, ferns and other tropical foliage will be arranged about the platform. The assistance of a scenic artist will be secured to give the best possible stage effect for the picture.

Play Only Hawaiian Music.

The Hawaiian musicians will play only Hawaiian music and will be restricted entirely to songs of the Islands. The ones to be selected will be tried out by Professor Vierra and the stock of oldtime Hawaiian songs will be added to as much as possible during the short time the musicians have to prepare for their journey. They will leave Honolulu in the Lurline in April and be on hand to begin their work on May 1.

The music will be one of the leading attractions for Mr. Wood plans to make the exhibit proper so attractive that visitors along the boardwalk will be glad to look on, even if music is not being played.

Some of the pineapple stock for the sales department will be forwarded at

once by steamer and rail, while a very large assignment goes via the Tehuantepec route. When the booth is in readiness for opening a plentiful supply of pineapples will be on hand.

Freeth May Go.

Secretary Wood will make an effort while in California to induce George Freeth, the famous Hawaiian swimmer and lifesaver who is now at Venice, California, to go to Atlantic City and assist in the promotion work. Mr. Wood expects to get Freeth on the life saving crew at Atlantic City where he will have exceptional opportunities to display his expert surfriding.

Mr. Wood is shipping two surfboards to San Francisco to be sent by rail to Atlantic City and two Hawaiian outrigger canoes will be sent via Tehuantepec. The use of big surfboards and canoes in the Atlantic City surf, used by such a daring swimmer as Freeth, will be an advertisement for the Hawaiian Islands.

Moving Picture Films.

A collection of Bonini's best films of Hawaiian scenes, and particularly his surfriding scenes, will be taken along. While these will not be exhibited in the booth, they will be displayed where films are presented along the boardwalk.

Cooperate with Colonies.

As much as a large number of tourists who visit Australia pass through Honolulu Mr. Wood will devise some plan whereby the Australian states are given an opportunity to cooperate in the work at Atlantic City.

Getting Stuff Ready.

In addition to a large supply of food and other literature issued by the promotion committee, a large amount of Hawaiian manufactured goods is being prepared for shipment. The things, including hats, souvenir goods, etc., are now being packed.

W. H. Hoogs will have charge of the packing and shipment of a number of things are necessary at Atlantic City and will keep Secretary Wood supplied throughout the summer.

UNCLE SAM WILL KEEP SECRETS OF CORPORATIONS

An Internal Revenue Departmental Ruling That
Their Exhibits Are Practically
Private Records.

Representatives of a number of local corporations have been making inquiries of Collector of Internal Revenue W. F. Drake, as to how much publicity was to be given to the corporation returns which are to be filed under the new federal law. The law provides that the returns shall contain much detail of the business of the corporations, and further that when filed they shall be "public records and open to inspection as such."

As a result of the inquiries made Drake sent an inquiry to Washington, as to whether he should leave the corporation returns open to inspection or not. A ruling has come to hand, however, which settles the matter. It appears that the internal revenue department has held that the documents are to be kept secret. The departmental ruling, which looks to many very much like a scheme to "get around" the publicity matter, is as follows:

"Many communications have been received at this office making inquiry as to how the returns of corporations, joint-stock companies, associations, and insurance companies, made as required under the provisions of the corporation excise tax law (see, 38 of the tariff act of August 5, 1909), were to be handled in the office of the commissioner of internal revenue, and whether or not they were to be open to general inspection."

"The law, paragraph 6, on this subject is as follows: 'When the assessment shall be made, as provided in this section, the returns, together with any corrections thereof which may have been made by the taxpayer, shall be filed in the office of the commissioner of internal revenue and shall constitute public records and be open to inspection as such.'"

"Congress appropriated \$100,000 to carry into effect the provisions of the law. Under general statutes no portion of this appropriation is available for use in the District of Columbia. The returns can not be open to general inspection in the District of Columbia without the expenditure of a substantial sum of money. It, therefore, it was the intent of congress to make these returns open to general inspection, it will be necessary for it to appropriate a sum sufficient to cover the necessary expenses. Until this is done this bureau rules that the returns made under this law are to be handled just as returns made under other internal revenue statutes."

"Any person, therefore, other than the taxpayer making the return, or his duly appointed agent or attorney, who desires to see such return shall make written application to the secretary of the treasury, who in his discretion will, upon a proper showing of cause, approve such request. A request thus approved should then be presented to the commissioner of internal revenue, who will thereupon permit the return in question to be seen by the applicant."

cent upon such condition as the secretary of the treasury shall have imposed."

TRANSITIVE VERB LOSES HIS CASE

Sheriff Finds Webster's Dictionary
Against His Contention
for More Pay.

BURLINGTON, Kansas. — Judge Meekel, of the Coffey county district court, has decided a case which is of interest to every county in Kansas. It was a friendly test suit brought by Sheriff C. J. Garrett to recover from the county \$754.50 fees claimed for attendance upon the probate court every day that court was in session. The custom has been for the sheriff to draw pay only for the days he actually attended that court, but he and his attorney interpreted the statute to say that he was to receive \$1.50 a day for each day the court was in session.

Webster's Dictionary was an important factor in the case, the county attorney using it to show the difference in the meaning of "attending court" and "attending upon court." According to Webster, attending upon is an intransitive verb and is used in the sense of being in waiting, in readiness, &c., while "attending court" is a transitive verb and is used to mean being actually present. The statute provides that the sheriff shall be in attendance upon probate court whenever it is in session, and that he shall receive \$1.50 per day for attending court.

The court held that the sheriff was entitled to fees for services in attending court, but not for the days he was

WHEN STOMACH BLOOD AND NERVES GO ON A STRIKE

Do you know what "atonic dyspepsia" means? It is, perhaps, the commonest form of stomach trouble. Most people have had it, have it now or will have it some day.

It is caused by a lack of tone of the system, debilitated stomach, blood or nerves, for these three are intimately dependent on one another. Stomach trouble robs the blood of nourishment; thin blood means starved nerves; nervousness and neuralgia.

And it is precisely this interdependence of the stomach, blood and nerves that makes Dr. Williams' Pink Pills such a valuable home remedy. A blood builder and nerve tonic, they keep the stomach in perfect condition, provided it is not abused by improper diets.

Mrs. E. J. Burdick, a farmer's wife, of Campbell, Cal., was cured of stomach trouble by Dr. Williams' Pink Pills and recommends them to other sufferers. She says:

"Three years ago I had stomach trouble and nervousness and think it was due to overwork. My stomach did not seem to digest the food and I got so that I could not eat much of anything. This seemed to take my strength away and, while I was not confined to bed, I had to give up my work. I was very nervous and easily excited. I could not seem to get any strength and was very pale."

"I was treated by two doctors who said that my blood was impoverished. I grew worse, if anything, under their treatment. My daughter read about Dr. Williams' Pink Pills and brought home a box for me to try. Although I had been sick for several weeks, I was soon helped by the pills. My appetite picked up and the food was digested. I began to get stronger and in a short time I was cured. I am glad to tell of my experience which I hope will be of help to other sufferers."

The remedy that cured Mrs. Burdick is guaranteed free from opiates or harmful drugs.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box; six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y. A copy of our diet book will be mailed free to anyone who wants to be cured.

not called upon. Mr. Garrett moved for a new trial, but it was overruled.

WORLD'S NEWS DAILY

"BOB" BURDETTE TO DELIVER HIS FAMOUS LECTURE HERE

From the present outlook it seems probable that the gallery at the opera-house will be filled with students on next Monday night when Dr. Robert J. Burdette delivers his famous lecture entitled "The Rise and Fall of the Mustache." The students of Oahu College, High School and the Kanechamela Schools were given the first call on the gallery tickets and they have been taking advantage of the opportunity at a rate which promises to see the seats all taken before Monday night.

The announcement that Doctor Burdette had consented to deliver his greatest lecture here was received with acclamation and it was necessary to change the place of the lecture from Bishop Hall to the opera-house in order to accommodate the large number who called for tickets. It now looks as though even the opera-house will prove too small to accommodate all who apply for seats.

"The Rise and Fall of the Mustache" probably did more than any other lecture to make Doctor Burdette famous over two continents. The lecture is full of real heart interest and tells a story such as every father and mother knows.

DR. ROBERT J. BURDETTE.

Who will deliver his famous lecture "The Rise and Fall of the Mustache" at the opera-house Monday evening.

Incidentally it drives home a few truths which can do but be of benefit to parents.

The proceeds of the lecture will be donated toward the work of the anti-tuberculosis campaign committee.

SCHEME TO DO UP SHERIFF LAUKEA

The Old Iwilei Scandal and the
\$100 Note Brought Up in
Federal Court.

The calling of former Sheriff Laukea
to the witness stand in the Totara Ha-
garaha trial yesterday afternoon in the
federal court brought forth a series of
sharp examinations and cross-examina-
tions as to conditions in Iwilei and as
to the famous \$100 note, and for a
time it seemed as if the former po-
lice administration was on trial rather
than the real defendant.

Laukea was called by E. A. Douthett,
for the defense, to deny the statement
made yesterday by one of his former
officers, that Laukea had given instruc-
tions, at the time when he was an-
nounced to have "closed" Iwilei, in
April, 1898, to make no arrests of
women in that district. He stated that
the instructions he gave were merely
that the officers should not use violence
to break into any of the places. On
cross-examination, Assistant District
Attorney Rawlins attempted to show
that under the circumstances this
amounted to an instruction not to make
arrests.

Former Officer Townsend was respon-
sible for the bringing up of the Iwilei
episode. Laukea was questioned as to
why he had discharged Townsend, and
gave the Iwilei incident as a reason. He
admitted having borrowed \$100 from
Iwilei, who was running an Iwilei estab-
lishment, but said he didn't know it
was the Iwilei Iwilei. "I asked Town-
send for a loan of \$100," said the
former sheriff, in answer to questions
by Rawlins, "and he said he couldn't
get it. He got it for me, and I asked
him in whose name to make the note.
He gave me the name of Iwilei. It
never occurred to me that it was the
Iwilei of Iwilei fame. There are other
Iwileis in town, and I made the note."
"Some days later, it occurred to me
that this was the Iwilei Iwilei, and I
asked Townsend, and he said that the
noteholder was the Iwilei man."

Laukea said he lost confidence in
Townsend after that. Rawlins wanted
to know why he had kept Townsend on
the force for several months after, and
Laukea said the matter was a personal
one. "If there was any fault, it was
mine for going to him, so I did not dis-
charge him," he said.
Laukea was asked some red-hot
questions and Laukea explained why he
had fired Townsend. "I became con-
vinced that he and Iwilei and Breckons
were in a scheme to undo me," he said.
"This was when the Iwilei investiga-
tion was on, and I came to the conclu-
sion that the note was a part of the
scheme. I then decided to call for
Townsend's resignation."
Laukea said he had the note. He had
paid it when it became due, not before
then, for he did not have the money.
Rawlins took another hand at cross-
examination, and the witness admitted
that he knew nothing of a scheme of
Breckons, Townsend and Iwilei to do
him up, but said it was his belief that
there had been such a scheme.

THE FUNERAL BAKED MEATS.

The Customer—Hi, waiter! What do
you mean on the menu by "Browned
Soup," "Jonesed Eggs" and "Har-
ried Mutton?"
The Waiter—Well, sir, you see, sir,
we often give dishes names of our
clients who the after being reg'lar cus-
tomers here.—The Sketch.

CONFIDENCE

said Lord Chatham, "is a plant
of slow growth." People believe
in things that they see, and in a
broad sense they are right. What
is sometimes called blind faith is
not faith at all. There must be
reason and fact to form a founda-
tion for trust. In regard to a
medicine or remedy, for example,
people ask, "Has it cured of-
f-e-2? Have cases like mine been
relieved by it? Is it in harmony
with the truths of modern science,
and has it a record above suspi-
cion? If so, it is worthy of confi-
dence; and if I am ever attacked
by any of the maladies for which
it is commended, I shall resort
to it in full belief in its power
to help me." On these lines
WAMPOL'S PREPARATION
has won its high reputation among
medical men, and the
people of all civilized countries.
They trust it for the same reason
that they trust in the familiar
laws of nature or in the action
of common things. This effective
remedy is palatable as honey and
contains all the curative prop-
erties of pure Cod Liver Oil,
extracted by us from fresh
cod livers, combined with the
Compound Syrup of Hypophos-
phites and the Extracts of Malt
and Wild Cherry. It quickly e-
radiates the poisons, discom-
breeds acids and other toxic
matters from the system; gives
vigorous appetite and digestion,
and is infallible in Prostration,
following Fevers, Scrophulous In-
fluenza, Asthma, Wasting Diseases,
and Throat and Lung Troubles.
Dr. W. A. Young, of Canada, says:
"Your tasteless preparation of
cod liver oil has given me uni-
formly satisfactory results. My
patients having been of all ages."
It is a product of the skill and
science of to-day and is success-
ful after the old style modes of
treatment have been applied to
in vain. Sold by all druggists.

UNCLE SAM WANTS SOME CARPENTERS

Engineers' Office Is Employing a
Large Force of Mechanics,
but Needs More.

The United States engineers' office
wants carpenters, and though it has
been wanting some for a number of
days, has not received sufficient applica-
tions to meet the demand. There is
a list of applicants who asked for places
some time ago, but none have showed
up lately for work, all being apparently
employed elsewhere.

The Army is employing a large force
of civilians these days. There are 31
on the civil service list, nearly all of
them mechanics. In addition to these,
400 ordinary laborers are kept busy all
the time. There has been little diffi-
culty in filling the skilled labor posi-
tions so far, excepting for the present
shortage in carpenters. "I think there
are enough of them in town," said
Chief Clerk Samuel A. Anthony, "and
do not anticipate that we shall have
difficulty in getting the work done with-
out sending away for help."

MOLASSES TREATED ORGAN IS REPLACED

Church Instrument Badly Used by
Sherman's Yankees 'Way
Back in War Days.

MILLEDGEVILLE, Georgia—George
W. Perkins, one of J. P. Morgan's part-
ners, has just repaired a bit of damage
to the Episcopal church here, done by
Sherman's soldiers more than forty five
years ago during the march from At-
lanta to the sea.

One of Sherman's regiments took the
Episcopal church as its home. Sherman
had many humorists in his army, who
did strange things in Milledgeville, but
the men of his regiment housed in the
Episcopal church outside their rivals
when they poured many gallons of
molasses down the pipes of the church
organ.

That organ still does service in the
Episcopal church, and the molasses had
given it in war time has stuck to it
ever since, notwithstanding years of
pious efforts by generations of good
Episcopalians to rid it of the Sherman
contribution.

The present organist is Mrs. Ruby
Bland. Her husband, Marshall Bland,
is the local representative of a New
York life insurance company. Twelve
years ago, when George W. Perkins was
a conspicuous figure in the New York
company, a daughter was born to Mr.
and Mrs. Bland and was christened
Nylie.

About a year ago a new rector came
to the Episcopal church, the Rev. Mr.
Searrett, of Boston. He and his daugh-
ters are all music lovers, and the poor
old molasses-treated organ in the Epis-
copal church upset their nerves. The
Searretts delicately inquired as to the
cause of the organ's queer disability,
and the vestrymen laid the truth of
the matter, not wishing to seemingly
slandering anything Northern, but find-
ing a boy blurted out the truth, saying:
"The Yankees poured molasses down
the pipes when that doggone old Sher-
man was here."

Steps to get a new organ were im-
mediately taken. Innumerable schemes
were hatched to raise money—societies
and committees were organized, and
the dollars began to dribble in slowly,
when the brain of Nylie Bland worked
out the solution of the problem, to her
own great surprise. She had heard her
father speak of the wealth of George
W. Perkins, so she sat down and in
schoolgirl fashion wrote to him an ar-
tless letter, asking him to give some-
thing toward the purchase of the new
organ. The little girl received this
telegram:

"Buy the organ and send the bill to
me."
GEO. W. PERKINS.
A committee was at once appointed
to buy the organ and the momentous
purchase has just been made. The or-
gan selected cost \$2100, and Mr. Per-
kins has paid the bill.

LEFT TO HER JUDGMENT.

"Am I the first girl you ever
kissed?" asked the fair young thing
from the refuge of his shoulder.

"Well," he replied, "after the way
my arm just naturally slipped around
your waist as you unconsciously leaned
toward me, and my fingers fitted your
hair as you unconsciously tilted your
head, and I bent forward where your
lips were waiting, and didn't get the
kiss either on your nose or your chin,
but where it belonged—after all that,
and with the knowledge of the subject
which you have displayed, I shall see
nothing, except that I leave the ques-
tion to your own judgment."—Life.

NEEDED A VACATION.

"Ma, what are the folks in our
church getting up a subscription for?"
"To send our minister on a vacation
to Europe this summer."

"Was there no church services
while he's gone?"
"No, dear."

"Ma, I got \$3.00 in my bank. Can
I give that?"—Cleveland Leader.

SHELLED OUT.

The Stranger—Was the new family
date much put off when they threw
the state eggs at him?
Native—He was, sure. He was awful
decomposed.—The Sketch.
