The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 per centum in order to permit contract award within

the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

SEC. 802. (a) The Secretary of Defense (hereinafter in this section referred to as the "Secretary") is authorized to assist communities located near MX Weapon System sites, communities located near the East Coast Trident Base, and the States in which such communities are located in meeting the costs of providing increased municipal services and facilities to the residents of such communities, if the Secretary determines that there is an immediate and substantial increase in the need for such services and facilities in such communities as a direct result of work being carried out in connection with the construction, installation, testing, and operation of the MX Weapon System or the East Coast Trident Base, as the case may be, and that an unfair and excessive financial burden will be incurred by such communities, or the States in which such communities are located, as a result of the increased need for such services and facilities.

(d) Funds appropriated to the Department of Defense for carrying out the MX Weapon System and the East Coast Trident Base may, to the extent specifically authorized in Military Construction Authorization Acts, be utilized by the Secretary in carrying out the provisions of this section.
