HONOLULU, WEDNESDAY, JULY 12, 1876.

The Hawaiian Trenty Opposed.

The Shipping List opposes the passage by the Senate of the Hawaiiau Trenty bill, and says : "We think that Hamilton Fish, who is the father and guardies Importers & Commission Merchants of the treaty between this country and the Hawaiish Islands, is entitled to receive severe condomnation from the fact that, instead of the proposed treaty being reciproca', all its benefits redound to the islands, and will work immediate and lasting injury to the sugur us well as rice interests of this country. It is said Mr. Fish dutes on this treaty, it being the only State bantling he will ever have to hatch, and we look to the Segute with extreme solicitude, on whom the decision now rests, and hope they will give the subject careful consideration. It seems to us that our statesmee had better punder well before triffing with and striking a blow at any growing interests of our country. Reconstruction propositions of all sorts have Machinist, Lock and Cun Smith been instituted but, according to our practical way of was served by first of vigorous; effort alone, while a "thinking, the best made is that which comes through ment away was made through a line of banana | the channels of agriculture and trade. The enlargement of came 1909 Queen St., next to the Office of J. L. howest, Esq. (19 culture in Louisiana since the war has been marvellous. Now it is proposed to admit a new competitive element. It is claimed that the coupe ition is small and insignificant. Yet when we recall the fact that the Hawaiian exports of sugar to the United States in 1875-2,508,812 pounds-were about 40 per cent. more than our product in 1865, to what an extent may it not be enlarged within a few years, with their climate and cheap treole labor airantage. Nor do we have to confine ourselves to the emperium field in calculating that the same will prove a most formitable and dangerous competitor. Even now, with the present duties, large quantities of syrup made from Hawaian case, are being transported from San Francisco by rail to St. Laurs, and theore distributed through the Migniture Caller. Nationally 1. the Mirrissippi Valley. Nor is this all. A considerable number of shipments have been made to this port win Cape Horn, and one parcel, of which we are cognizant, was reshipped to New Orleans, selling in that city at a price over and above the original cost and transportation. Facts are stubbern things, and we ear only ask, if this be done with duties on, what may not be done with duties off?

Congratulating Hayes,

Converse, June 17th.—Shortly after the result of the serenth ballot was announced, the following telegram was received :

Washington, June 16th .- To Governor Hayes. Colambos: I offer you my sincerest congratulations on your numination. It will be alike my private pleasure as, well as political, to do the atmost in my power to promote your election. The earliest insments of my returning health be will devoted to securing you as large a vote in Maine as she would have given for IMPORTERS AND V/HOLESALE DEALERS JAMES G. BLAINE.

Continues, Ohio, June 18th — Han, J. G. Blaine, Washington: Your kind despatch has touched me most deeply, and I hardly know how to respond in fitting terms. The assurance of your help and sup hiting terms. The assurance of your halp and sup-port nerves me for the contest on which we are about to enter. With your returning health and strength I see an owner of Republican success. I trust that all trace of your recent illness will speedily disappear, that you may speedily be restored to your family and country. I send you my first despatch since the nomination.

B. B. Hayes. Governor Hayes last night received the following telegram from President Grant: "I congratulate you and feel the greatest assurance that you will occupy my present position from the 4th of March E. R. FEIRL

It will be useless to inform the average appeal of the law, both on the part of the Assessor and the assessed.

Judge Bellows, in the charge referred to commences with the proposition that the assessment of public taxes is one of the most important functions of a government. The purpose of the law, he says, is to impose upon all citizens a common share of the public burdens, and as far as may be practicable to require of the express trains it reagains general distances. The average speed of English railroads, however, including stoppages is but 25 miles and on the Catral Pacific the average speed of a little over 21 miles per hour. The authorities gire that the highest rate of speed attained for some days in succession, and 75 miles an hour. On Friday the Hon, Mr. Preston presented the following resolution: "Resolved, That the Committee on Finance be requested to ascertain of what kind of coin the money now in the Treasury consists, and for what purposes and under what circumstances the same was received by the government, and to report them forthwith." This action was called forth by the depreciation by Bishop & Co's bank of the coin known as the Peruvian Sol, Chilean Pesos and new Mexican dollar and half-dollar. The Committee has had a session and will doubtless report at an early date.

The Bill to make the governors the Inspectors of Schools, in place of an Inspector General for the group, passed by a strong majority, in spite of well considered speeches against such action of the Representatives in this matter has been provoked by the Board of Education. S. S. ROBERTSON, Guardina of Florence Robertson, and Alexander G. M. Robertson, minors, i small offer for sale in front of the Government 121h Day of Al GUST, A. B. 1876, at the hour of 12 o'clock at noon, the Ahuphan of Houskahau, under a licetes from the Hou. Charles O. Harris, Associate Judge of the Supreme Court, sitting as Probate Judge. The said Ahuphan is a part of the estate of the late Houseable George M. Robertson, and is situated to Korna. Hawaii, actending from sea to mountain, and will be said by its sucteor boundaries. The title is perfect, and all the laterest in the said estate, not only of the aforesaid minors, but of all other persons will be said.

The Ahuphan of Housekahau is most favorably situated, contains a large strue of wood land and an excellent Fish Poul and dishing right; is situated in the delightful region of North Koura, tient to Hallina, and contains a large quantity of the best possible hand for the cultivation of coffee, oranges and other fraits, and is admirably fitted for other agricultural products. The land has never been surveyed, but is said to contain about 3000 acres or more.

It will be offered at an upset price of \$2000, and the terms will be most liberal \$800 of the purchase money to be paid on delivery of the desds, and the bulance in 4 equal notes payable in 1, 2, 3, and 4 years respectively with lawful interest payable annually secured mortgage on the promises. But the purchase money or the whole of it on delivery of the deeds.

the deeds.

As this is a function's sale, and all the proceeds of the
sale must be invested as a trust fond, under the direction
of the Court, it is not doubted, that if it becomes desirable
for the purchaser the fad, brd, and 4th notes may be alawed to remain on the property for a longer period if the interest is paid regularly.
This furnishes an extraordinary opportunity for persons with small mesus to secure for themselves an eligible location of a profitable description. CHAS. M. COOKE. Auctioneer.

THE TRADE WINDS .- The earth turns on its axis from west to east, and with it rotates daily the enormous envelope of the atmosphere. The velocity of retation at the equatoris something over 1,000 miles an hour: at thirty degrees distance it is about 150 anes, uses, miles less. In higher latitudes it as still less, and at the poles nothing. Therefore, whenever the air mores north or south on the surface of the earth it will carry with it less or greater velocity of the rotation than the place it passes over, and will turn into an easterly or westerly wind, according as it aypreaches or recedes from the equator. In the region of the sun's greatest heat the air, rarified region of the sun's greatest heat the air, rathen and lightened, is continually rising, and coolercurvests come in on both sides to take the place of the ascending volume. As these side currents come from a distance of about thirty degrees from the equator they have, at starting, an eastward relocity many miles an hour less than the localities they will eventually reach. Consequently they will appear to sag behind in all the course of their progress to the equator—that is, they will have a westerly motion united with their north and south movements. These are the great trade winds, blowing constantly from the northeast on this side, and the southeast on the other side of the equator - Fogular Science Monthly.

But it must be borne in mind that all this money was borrowed at an enormous discount, and that it is doubtful if, after all, leaders will really lose much by the scaling. The process of loaning money in this way is a vicious one, and can lead only to such results. Public debts are becoming everywhere regarded as the greatest corses upon the masses of the people developed.

The Being .- She quits her home, her parents; her companions, her amusements, everything on which she has hitherto depended for comfort, for affection, for kindness, for pleasure. The parents by whose advice she had been guided, the sister to whom she had dured impart every embryo feeling and thought, the brother who has played with her, by turns the counsellor and counselled, and the younger children to whom she has hitherto been the mother and the playmate, all are to be forsaken at one fell stroke; every former tie is to be broken, the spring of every hope and action is changed, and yet she flies with joy into the un-trodden path before her. Buoyed up by the con-fidence of requited love, she bids a food and grate-ful adies to the life that is past, and turns with excited hopes and joyous anticipations of the hap-piness to come. Then woe to the man who can blight such fair hopes, who can, coward-like, break the allosions that have won her, and de-stroy the soufidence which love had inspired.

The New York Hereid will be carried on the train and will be delivered at Pittaburg, Chicago, Omaha, can Francisco and all intermediate stations on the roads. Mr. Jarrett, moved with the spirit of American enterprise, and desiring to do the fastest thing ever done on arailway in the United States, has made arrangements with the different relived companies between New York and San Francisco to have at night at every half-mile a torch-beaver, and during the day men bearing signal face. The Fryer Process.

During the last year or two the public bave had many hints concerning a new process for reducing rebellious ores, invented by a Mr. Fryer, which, it is claimed, would work a revolution in the mining industry of this coast. The Fryer works at Grass Valley are now in operation, and the publie are admitted to a full and free inspection of the same. A tall description of the process which we find in the Record-Union of May 9th, would take up more space than would be profitable to our readers. We can only give the cen-tral idea of the process, which is to volatilize and expel the base metals by heat. The trouble heretolore has been to procure and apply a sufficient degree of heat that could be made at all practi-Fryer has overcome this obstacle by constructing a furnsce in the shape of an apright cylinder, consisting of double walls of botler iron. between which is formed a water jacket, upon the principle that a kettle kept full of water is not nurt by fire. A Serious Menuce.

The calmer judgment outside San Francisco. confirmed by the reports of the city papers, con- Lanterns, Kerosene-Wicks, &c. demns the position taken by the anti-coolie clubs | A few dozen of the best Fatent Glass Preserving Jars, there. They appear like a most serious menace ing clash of arms, which it will be beyond the power of the police department to control, when ence started, till the State has read deep lessons of its diagrace, written in the blood of innocence. If the schoes from the secret club rooms are faithfully caught by the local reporters, the mana-gers of the press seem fairly open to grave charges. They appear either cowardly in the face of an unreasoning clamor, or criminally indiscreet. White hoodiumism has long been a terror in San Francisco. The duity journals have had many severe things to say of the inefficiency of

the police to cope with it, then how will it justify for not raising the cry of warning and denouncin the secret tuctics which seem to be barnessing i 263 000 die before reaching the age of 5.34 000 | these mad elements—giving an apparent appro val and support to urge these dogs of wer, when It seems inevitable that there soon will be wild Out of the whole million only 2 153 reach the age of 90, 223 live to be centenarians, and only one attains the 108th year. The latest statistics confirm the statement that females live longer than prevent the State's honor receiving a terrible and work in San Francisco. The naturally excitable stinging blow in that "rotten borough by the males, and married people longer than single stinging blow in that "rotten borough by the ones, and it also appears that Jews live longer sea," unless all the better elements rise at once in reproof of the preparations for violence now going on. And the press should lead in the protest That it does not do so, that it does not ring with denunciations of the mod resolves of its ward bum-mers; for which it furnishes trumpets, is to the decent press outside, a deeply bumiliating fact.

HUNT'S REMEDY.

THIS RENEDY WAS ORIGINALLY PRE-

istructed to the family of Mr. Riunt to procure and compound it.

The remedy was administered, and almost from the moment of its reception a decided improvement become manifest. The kidneys were immediately affected and roured to action; the swelling of the legs rapidly subsided, the lings were freed and round left healthy and agreeable action; the flesh of limbs resumed their healthy and agreeable action; the flesh of limbs resumed the elasticity, eaking remaining, and he was rapidly convalued on the process when unfortunately, prompted by the rapidly convalued in the gave up the reflectly for a short time.

It was unfortunate, for the curative process was arrested, the kidneys flagged is their action again becoming torpid, the water becreased with frightful rapidly and he seem again found himself in a very alarming same. The remedy was again had recourse to and by its persevering use the disease was a second time subdeed. But his wax a most aggreeated and severe case, and it rook all the strings of the flemedy, countsiend with care and time, to eradicate the effects of the disease. But through a persevering use of its a permanent cure was effected, and he resumed his active out of door occupation, within a short time, a well man.

This was the manner in which the Remedy was brought into notice, and shore then for a periad of twenty five (13) years the medicine has been prepared after the same approved formula by Mrs. Hour, and used by our first playsicians in their private practice, for this and similar compiants.

It has been well and favorably known and axianitycly

plaints.

It has been well and favorably known and extensive use sheed that time by all classes, both with and with the advice of physicians, and has been the means of say from a lingering and rightful disease, and notinely demany of our most estimable and well-known clubsons.
