has time on his hands to consider the deceitfulness of man in general and of his friend the surgeon of the Belgic in particular.

The cowardly perpetrators of the outrage on Mr. Godfrey have said by their action that justice is not blindfolded in our courts; that the jury briber finds employment here, that the laws delays are not to be borne any longer. The perpetrators are supposed to be amongst the men from whom the President once dramatically said he derived his title to office, and to whom he looked to sustain the "best government this country ever had."

One thing should be borne in mind by gentlemen of the Board of Health, the Sanitary Committee, and the Inspectors and their subs. The information gained in the house to house inspection, is available only for sanitary purposes. It is private, and not for public use or dissemination. Neither the police department nor any other government department outside of the Board of Health, have any right to be made acquainted with any facts learned. The agents of the Board of Health are freely admitted to each house without a

TOPICS OF THE DAY.

Apparently the Advertiser does not know that its article was also discussed at the Sanitary Committee meeting. At least it suppresses that fact if it does.

The action of the Alameda's captain, however, hurtful and objectionable, it may be to us, seems to justily the action of the residents of the other islands to some extent. It takes more than five days to go to San Francisco. Let us hope that the fact will not give the country "a black eye" as the common expression has it.

As far as relief should be distributed it seems to us that wherever distress exists it should be relieved. Never mind whether improvidence or excess has caused it, let the wives and children be relieved. Then let the law be put in operation to prevent the cause. Where the husband is an employee detained away from home by quarantine regulations, first relieve the hunger, then put the applicant in the way of getting some portion of the wages due the head of the house. Too great strictness is the pendulum extreme from previous too great laxity.

What difference is there between the police officials and those locked up in the coolers of the Station House? By mandate of the immaculate Board of Health, all water for drinking is to be bolled. We have been informed by late inmates of the coolers that such is not the case at that Governmental institution. The unfortunate ones are compelled, by force of circumstances and necessity, to drink water from the hydrants, but the officials upstairs are provided with boiled water. It looks as if the Government wishes to make flesh of one and bone of another. Or does it want cholera to break out in that establishment? The Bulletin in its account of the meeting of the Citizens' Sanitary Committee yesterday deliberately misrepresents. It heads it "G. Carson Kenyon summoned to appear before it." This is deliberately false, and was so known to the Bulletin representative present, as the matter came up in meeting. Kenyon simply attended the meeting as reporter, having been invited with other representatives from each paper in Honolulu to be present, and having not the slightest previous idea of the object of the meeting. Further on it puts words in to G.W. Smith's mouth, which were uttered by McStocker, and makes J. W. Jones make a speech, when he wasn't even present at the meeting. Its accounts of Thurston's remarks are also garbled. It then pretends to quote from THE INDEPENDENT as the

bone of contention, the following Moanalus for \$5 per coffic. No ex-"Outrage committed under the eyes of Government officials and the was ever used by THE INDEPENDENT. The Bulletin has shown throughout its account of the matter a spirit of petty spite and deliberate falsifica tion and perversion.

Says an Advertiser correspondent from Lihue, Kauai, who signs him self Aloha Aina:

"Self preservation is the first law of nature and we intend to help the Board of Health keep the cholera away from us. If the people of Honolulu have such an immense interest in our welfare, we can as-ure them that we have a still greater interest in it. You got the se surge in spite of your wisdom and your precautions; now, dou't blame us if we try to avoid the same fate.

Of course, a strict quarantine is a hardship, but we are the suff rers; and, if we can stand it, we think the Honolulu people can. And when we of the other islands cau't stand it any longer, and want to ease up on it a little, we will let you know. In conclusion, I would say that K uni people have sympathy and admira-tion for the Board of H-alth in this their time of pilikia, and hope they will be able to speedily stamp out the dread disease."

Aloha Aina is quite correct. But somehow or another, the Honolulu people and Board of Health dou't think so.

The Bulletin has taken upon itself the position of "rumor-monger" to the 1 adies' Relief Committee. It published a list of the rumors is jur ously affecting the management of that organization. And then successfully disproved them. Wouldn't it have been better not to have given them further publicity?

There is considerable anxiety on the part of parents in regard to the spread of whooping cough. This disease is more dangerous and fatal at times among children than even the cholera is. Saultary inspectors visiting houses where the whoop ng cough is to be found ought to be very careful when thereafter inspecting houses which the disease has not reached, and especially where there are children.

We thought that all branches of the Government would do their utmost to cut down expenses and obtain goods and services at the very cheapest rate. The Board of Health seems not to follow that principle. We are informed that Mr. C. E. Williams, the well-known undertaker, who already otherwise has proven his willingness to help along during our present pilckiv, off red the Board of Health to furnish coffins to the cholera hospital or elsewhere, attend to the undertaking work in regard to the corpse, and transport it to the comstery at

tra charges to be made for the trausportation, cartage, etc. This very Committee" No such expression favorable offer has not been accepted, we are told.

> The Advertiser scolds Capt. Morse of the S. S. Alameda, this morning for refusing to take our mail. In such a matter it was mandatory that the Captain consult the medical officer of his ship, and when the doctor told him that fumigation would not disinfect letters nor the bags that held them the Captain was bound to refuse the mails, or assume a responsibility that he did not think was warranted, particularly against the protest of passengers sailing from and terminal ports. The doctor of the steamer was no wise than some of the medical officers of the Board of Health; but he was very much more carrious than our Port Physician. We venture the opinion that if the Advertiser's We venture the writer had been passenger on the Alameda he would have been among the first to protest against taking any risk of infection. In all such cases the benefit of any doubt should be given to those who are not infected. Captain Morse is not the man to give Honolulu people

Timely Topics.

Honolulu, Sept. 20, 1895.

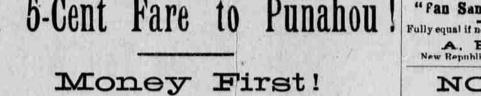

All over the world at present questions of hygiene are the main issues of the day. While the learned scientists of Europe are devoting their time and skill to find remedies which can destroy the disease breeding germs, the diseases go on and cholera, diptheria and typhoid ravage cities and countries.

Whenever a disease becomes epidemic it is because the germ found conditions which suited it and in which it felt at home and ready for business. The sanitary conditions of the town and of the home becomes of vital importance. Honolulu is having a taste of a cholera epidemic and it behooves everybody to do his best in placing every home in the best sanitary condition possible.

When the general house-cleaning which will take place next Monday is over, many housekeepers will find some household furniture which needs renewal and others missing both as to utility and convenience.

We call attention to-day to our Oil Stoves. The "Dietz" Stove which we carry in stock has gained a great reputation everywhere. The one we especially recommend is the most complete oil stove ever offered in the market. It is perfectly safe for the user of it, and it will answer all purposes in a well regulated household. Five quarts of oil is sufficient to burn ten to twelve hours. In ten minutes a half gallon water can be boiled. It will fry and boil, bake or broil at the same time. You can boil potatoes and bake biscuit at the same time. In ten minutes you can broil a steak to perfection, and in an hour and a half you can roast an eight-pound turkey. Once tried the "Dietz" Oil Stove will be found the very thing for the housekeeper, and the price brings it within the reach of everybody.

The monthly instalments to be paid are arranged to suit you. In the end your rent will have paid for your House and Lot and you will own it instead of the landlord owing you.

Goods Next!!

Lots are 75x125. They are easily accessible from the Beretania street car line. They are high and dry, and the air is bracing. No germs can exist nor can you suffer from want of drainage. Nor will you at any time be put to inconvenience by bad drainage or unpleasant odors from other lands. Health is the first characteristic; second, the panoramic view of the city, the harbor and the sea; third, the unequalled cooling breeze; fourth, the splendid foliage and the scent of the night-blooming cereus.

Location Third!!!

The Lots are opposite Punahou College facing Punahou and Makiki streets and Wilder avenue. Where you make your arrangements is at our Office, 503 Fort street near King street.
