## AMERICAN WINS BALLOON RACE

### CITY PROBABLY TO WAIVE INSPECTION FEES TO PHONE CO.

BUT MUNICIPALITY, SAYS ATTORNEY MILVERTON, IS ENTITLED TO SPACE FOR ITS WIRES IN MUTUAL TELEPHONE COMPANY'S DUCTS WITHOUT CHARGE, AS PER ORIGINAL AGREEMENT—SUPERVISORS' HAVE PROBLEM OF POLICY RATHER THAN LAW.

The supervisory committee and the Mayor this afternoon met representatives of the Mutual Telephone Co. in regard to the matter of proposed fees for inspecting street openings to be made by the company and in regard to the transfer of city wires to the telephone conduit, over which there has been dispute.

The discussion boiled down to the fact that the telephone people do not object to being required to get permits for opening streets, but do strenuously object to having inspection fees imposed, particularly in view of what fees might be charged in future.

Neither side gave into the claims of the other as to respective rights, but finally it was appreciated that compromise should prevail, and, inasmuch as the city and community is to be benefited by a good telephone system, Supervisor Quinn suggested waiving the inspection fee and accepting the company's offer of putting the city wires in its conduits at 15 cents a foot to cover cost, upon which basis, according to present indications, a compromise will be effected.

While leaving the determination of what is to be done between the City and County and the Mutual Telephone Co., to the Supervisors, First Deputy City and County Attorney Milverton last evening rendered the following opinion to the Board on the proposal made by the telephone company which suggests that the City pay for space for its wires in the telephone conduits and grant the company exemption from inspection and inspection fees in the matter of digging up the streets, the Attorney intimating that the City, having control of the streets, may insist on the inspection fees.

Relative to communication of October 1, from G. R. Carter, Treasurer Mutual Telephone Company, in which he states that he is willing to recommend to the Board of Directors of the Telephone Company that the company furnish the City and County with facilities for placing its police and fire alarm wires underground in the conduits of the Telephone Company for the period of twenty-seven years, for fifteen cent per duct foot, and exemption from inspection fees for openings in the roads, which the company may hereafter desire to make throughout the City and County, I would advise the Board as follows:

#### ORIGINAL AGREEMENT.

On the 1st day of August, 1901, the Mutual Telephone Company and the Territory of Hawaii, James H. Boyd, entered into an agreement whereby the Telephone Company granted to the Territory of Hawaii the right and

privilege of attaching to its poles and other structures all wires and other apparatus that might be deemed necessary by the Territory to maintain a fire alarm telegraph system, together with all the right and power of extending and maintaining on public streets in Honolulu and elsewhere on Oahu, where the Telephone Company was maintaining poles, or where it might have other structures and place for the attaching and maintaining of wires. It was further covenanted that the fire alarm wires might be attached to and suspended from the poles and other structures of the Telephone Company at any time, and might be maintained there for the whole of the period that the Telephone Company might be entitled to maintain the same by virtue of the laws of the Territory and otherwise.

#### EXPENSE OF ALTERATION.

The agreement reserved the right and privilege in the Telephone Company to alter or replace its wires or poles or other structures, or to change their location, and further provided that any expense or charge for the removal of the wires, boxes and other apparatus of the fire alarm system should be borne by the Territory. The right to use the poles or other structures or places of the Telephone Company for the wires of the fire alarm system was, under this agreement, to be without charge to the Territory, and the only expense that the Territory was to bear, in case of the altering or replacing of the wires, poles or other structures of the Telephone Company, was the cost of the removal, shifting or alteration of the wires, etc., of the fire alarm system.

#### TERRITORY RELIED ON CONTRACT.

Subsequent to the execution of this agreement and evidently relying upon the rights and privileges of the Territory under it, large sums of money were expended by the Territory for the installation of what is known as the Gamewell Fire Alarm and Police Telegraph System, a large number of the wires constituting such system being strung upon the poles of the Telephone Company, under the agreement referred to.

#### NO PROVISION FOR WIRES.

The recent plans of the Telephone Company for the placing of a part of its system underground provide, as I understand it, for the abandonment and tearing down of between 350 and 400 of its poles within the District of Honolulu. On a large number of these poles, the wires of the police and fire alarm system are strung under the agreement of August 1, 1901. In providing for the installation of its underground system the Telephone Company made absolutely no provision for the wires of the police and fire alarm system now upon its poles.

#### TELEPHONE OFFER.

The changed plan of the Telephone Company involved approximately 12,000 lineal feet of the police and fire alarm system. The proposition of the Telephone Company now, is to furnish facilities for the police and fire alarm system for the number of feet required, to wit, approximately 12,000 feet at fifteen cents per duct foot, a total of \$1800. The cost of three-inch fibre duct, such as would be required for the police and fire alarm wires delivered in Honolulu, is approximately seven cents

(Continued on Page Five.)

#### NEW FALL SUITS.

Correct styles in ladies suits for Fall and Winter are now ready at N. S. Sachs Dry Goods Co. The second showing of Fall millinery is also in progress. Don't miss a visit to the Sachs' store.

Have your typewriters, cash registers and adding machines repaired by the Office Supply Co. They have a complete repair department for this work.

### SCIENTISTS COMING HERE TO SEE COMET

COMMITTEE ON COMETS OF AMERICAN ASTRONOMICAL ASSOCIATION WILL STOP AT HONOLULU ON WAY ROUND THE WORLD FOLLOWING THE VIEW OF HALLEY'S COMET—EXPECTED THAT LOCAL PEOPLE WILL SHARE EXPENSE.

Dr. W. D. Alexander, the Nestor of local scientists, has received advices that the Committee on Comets of the American Astronomical Association will send an expedition around the world next summer, following the wake of Halley's comet to take observations of it at its successive points of visibility.

Honolulu has been selected as the observatory for the Mid-Pacific. This is a sort of Hobson's choice, for there is no other place in the middle of the Pacific where a telescope could be set up. It will be remembered that the Government of Germany some years ago sent an astronomer, Dr. Marcene, to Honolulu to make longitude observations for determining the amount of wobbling the earth made on its axis, or something like that. Dr. Marcene had a small observatory built for his work on J. F. Brown's place at Wai-kiki, where he favored many residents with telescopic peeps at the wonders of the heavens.

Dr. Alexander is advised that the people of Honolulu are expected to co-operate with the scientific visitors, at least to the extent of bearing part of their expenses. No doubt the hospitality of this semi-tropic burg will be equal to the occasion. Honolulu will be proud to entertain such men. On the other hand their presence will advertise Hawaii around the globe, as no doubt everything they discover in the comet, head or tail, will be promptly cabled to the outside world.

A cablegram of some weeks ago stating that the comet had been seen with the naked eye at Chicago was misleading. Newspapers received since showed that the nude optic was at the small end of a powerful telescope. On the same occasion a telescopic photograph of the comet was taken, which was regarded as a great triumph of science.

After visiting a region that is 50,000 miles more distant than the outermost planet of the solar system, Halley's comet is again approaching the earth and is nearer to us now than it has appeared.

Its motion is retrograde, or in a direction opposite to that of the planet. All the planets move eastward, while Halley's comet moves westward. It must not be assumed that its orbit is so large that it extends into the region of the fixed stars.

This comet is the most famous in history on account of being the first known to move in a closed orbit. It is an object of extraordinary attention from its brilliancy, its sensational size, the record of its returns, extending back nearly 2000 years, and the consternation once spread throughout the world by the belief that it would destroy the earth.

In 1682, during the reign of Charles II, a very large comet appeared, which was observed by Newton, Halley, and other astronomers of the time. Halley followed its course among the stars, and comparing his observations with the records of previous comets came to the conclusion that the comets of 1456, 1531 and 1697 were but different appearances of the same object. He staked his reputation on the prediction that it would return in about 75 years. True to this prediction, it appeared in 1759. It is said that Halley traced the returns of his comet back for 17 centuries from the records of early writers. In the year 45 B. C. a comet appeared that was so bright it could be seen in the daytime.

Halley's comet of 1682 was larger and more brilliant than that of 1456, and its tail was more than 96,000,000 miles in length. However, Newton had just discovered the laws of universal gravitation, which explained the motion of planets and comets around the sun and placed the solar system on a scientific basis, so this appearance was robbed of its terrors. From what has been said it will be observed that the period of Halley's comet is about 75 1-2 years. It last appeared in 1835 and its coming was expected in the latter part of 1909. True to its past record for regularity, it has appeared.

### FERN TO FIGHT FOR PURE POI

MAYOR ENTHUSIASTICALLY ADOPTS PLANS OF CITY PHYSICIAN BRUCE McV. MACKALL TO PURIFY PRODUCT OF HAWAIIAN STAPLE FOOD—OUT FOR AN HONEST POUND AND FOR UNADULTERATED FOOD—YEAST AND TRICKERY.

"Poi must be pure and honest," declared His Honor, Mayor J. J. Fern, this morning, bringing his heavy clenched hand with a terrific thwack down on the oak top of Secretary Rivenburgh's desk, so that the wise law panes rattled.

"Poi is the chief food of the Hawaiians and I, for one, will do my part in seeing that it is sold to them by the honest pound and without adulteration."

#### NEW RICE MILL.

The K. Yamamoto Rice Mill is the largest as well as the finest in the islands. All the machinery is of the very latest pattern. The famous Tengu Rice is cleaned at this mill. With the large cleaning capacity they are able to handle considerable outside particular work which they guarantee.

(Continued on Page Five.)

#### A SAFE MEDICINE.

Don't be afraid to give Chamberlain's Cough Remedy to your children. It is intended especially for coughs, colds, croup and whooping cough, and diseases. It contains no opium or other is the best medicine made for these or narcotic. For sale by all dealers, Benson, Smith & Co., agents for Hawaii.

### CHAMPION FLIER LANDS IN POLAND

(Associated Press Cable to The Star.)

ZURICH, October 6.—Mix, American, won the international balloon race and gets the Gordon Bennett cup. He has landed in Poland.

### ZEPPELIN SHIP FOR NORTH POLE

FRIEDRICHSHAFEN, October 6.—A Zeppelin airship arctic expedition promoted by Prince Henry will start for the North Pole in 1910.

### STEAMER LOST IN SOUTH SEA

SAN FRANCISCO, October 6.—A wireless from the steamer Mariposa states that the Norwegian steamer Ocean Queen, en route from Tahiti to Makatoa was wrecked on a reef on September 10 and is a total loss. The engines were disabled. No lives were lost.

CAMBRIDGE, October 6.—Lowell was today inaugurated as President of Harvard.

SAN FRANCISCO, October 6.—President Taft has started for the Yosemite. He made a number of brief addresses at towns en route.

### Revenue Cutter Badly Needed

TRANSPORT BUFORD REPORTS KOE MARU AT BIRD ISLAND—NO ONE ABOARD AND LIGHT ON SHORE—WHOLESALE DEPREDA-TION OF BIRD COLONIES OF LEEWARD ISLANDS PROBABLY BEING COMMITTED—BIRD ISLAND AND ITS INHABITANTS.

There appears to be urgent need for the presence of a revenue cutter in these waters which could check the depredations which there is every reason to believe are being committed by Japanese on the bird colonies of the leeward islands of the Hawaiian group. Every now and again word is brought by some steamship of the presence of Japanese sampans and other craft near the outlying islands of the group, and occasionally a story of shipwreck or of the rescue of castaways throws unexpected light on poaching expeditions organized by the feather-hunters of Japan.

Now and again there is talk of government action tending toward the protection of the sea-birds which breed on the rocks and islands of this group, but so far nothing has been done be-

Times of the tide are taken from the U. S. Coast and Geodetic Survey tables. The tides at Kahului and Hilo occur about one hour earlier than at Honolulu. Honolulu standard time is 10 hours 30 minutes slower than Greenwich time, being that of the meridian of 157 degrees 30 minutes. The time whistle blows at 1:30 p. m. which is the same as Greenwich, 0 hours, 0 minutes. The Sun and Moon are for local time for the whole group.

Wilson, Miss Katherine Knight, Dr. W. G. Rogers and wife, Mrs. A. Mills, Mr. E. S. Gorchue, Mrs. Goodhue and daughter, Mrs. W. J. Gardner and daughter.

## THE LOG-BOOK

The S. S. Hilonian sailed for San Francisco at 10 a. m. today, taking a number of passengers and a big miscellaneous cargo.

The schooner Aloha may sail for the Sound some time today.

The S. S. Alameda arrived at San Francisco yesterday morning.

The British ship Kirkcudbrightshire is 136 days out from Leigh for Honolulu today. No wonder, with such a name.

The S. S. Hyades got away last night for San Francisco via Port Allen and Kahului.

The S. S. Enterprise is due from San Francisco tomorrow morning. She will bring 270 bags of mail.

The German cruiser Arcona will leave for San Francisco tomorrow and H. M. S. Bedford will get away for the same place on Sunday morning.

The steamer Claudine arrived from Hilo and Maui ports this morning, a day ahead of time. She has gone on the marine railway to be scraped. The Claudine's freight included 213 sacks corn, 50 cases honey, 38 hogs, 20 packages empty bottles, 11 packages hides, 131 packages sundries.

Purser Kibling of the steamer Claudine reports the schooner Borealis at Hilo and the French bark Neriel at Kahului.

The Str. W. G. Hall arriving from Kaula ports this morning brought 80 sacks taro, 10 sacks cocconuts, 27 bundles bags, 20 empty wine barrels, 2 horses.

The S. S. Nippon Maru will take the next mail to the Coast from here on the 16th inst.

## THE HUMAN ROULETTE.

The sailors are gone, but the Human Roulette remains. There was a steady stream of patrons at the Highland Park last night and the same is promised for this evening. This laughable novelty seems to have caught on in great shape.

dividual connected with the office, but simply to THE HAWAIIAN STAR,  
or to the Editorial or Business Departments, according to tenor or purpose.

GEORGE F. HENSHALL.....MANAGER

WEDNESDAY.....OCTOBER 6, 1909

Of course if efforts to reorganize the local Republican party simply  
mean a renewal of old scraps, they are not likely to help much.

We understand that most Republicans were prepared to go into  
the next campaign in the same position as to the liquor question as  
the party took in the last, holding that the present liquor law should  
be retained without amendment. However, the contention that the  
brewery is independent of many of the provisions of that law, if sus-  
tained, will mean a call for amendments to bring that institution with-  
in the law.

"Within three years after public lands are given over to homestead-  
ers under present conditions," said one of Hawaii's leading plantation  
men recently, "the lands will all be in the hands of a few big concerns."  
Present conditions means the transportation situation.

## AMENDING THE ORGANIC ACT.

Governor Frear of course has a natural right to meet with such  
friends, advisors and counsellors as he chooses, to discuss such mat-  
ters as amendments to the Organic Act, in discussing which he will  
naturally be given special attention in Washington. But it is to be  
hoped that he will not repeat the mistake of carefully guarding his  
ideas from the people here and then springing them in Washington.  
If there are to be any amendments to the Organic Act they will have  
to be discussed here before Congress will act upon them. Unless  
they should go through Congress as a hidden joker, as did the amend-  
ment allowing appeals from our Supreme Court, one of the first  
questions members of Congress would ask would be as to what the  
people of Hawaii wanted. If the answer to this question disclosed the  
fact that the people of Hawaii didn't even know about the amend-  
ments, the amendments would have no chance at all.

More and more every year the people of these islands are recognized  
as fit for self-government. The dean of the Congressional party re-  
cently here expressed himself on leaving as humiliated with a feeling  
that, while considering himself broadly educated, he had been so utterly  
unprepared on coming here to meet such culture, education and gen-  
eral high standard of citizenship. As far as we know, without excep-  
tion every other Congressional expression was in favor of leaving local  
problems to local people. From all this, as well as from the whole  
attitude of successive administrations towards Hawaii, it is apparent  
that any proposed legislation for us in Washington should be thorough-  
ly discussed here.

At the same time the Governor certainly has a right to have private  
discussions of policies with chosen advisers. It may, we suppose, be  
assumed that when he has developed any propositions to a sufficient  
degree, he will submit them for public discussion.

Justice Gaynor announced himself some time ago as an independent  
candidate for mayor of New York and willing to receive nominations  
or endorsements of any of the organized parties. Yesterday Hearst  
endorsed him. Others are yet to be heard from. Gaynor has to resign  
an important justiceship to run, but he is independently wealthy and  
New York municipal voting in recent years has been such as to en-  
courage independent candidacies.

## THE PURE MILK VETOES.

It is to be regretted that Mayor Fern should have been induced to  
veto the milk and dairy ordinances. No doubt they were imperfect in  
some points. What piece of legislation is not? Yet the only two ob-  
jections on which the dairymen were agreed were met by a sup-  
plementary ordinance already submitted in a report of the health com-  
mittee, which was to be regularly introduced on first reading when-  
ever the Mayor approved the principal measures—the reason given for  
not having the latter amended before final passage being the saving  
of the large expense of republication. Then, as was pointed out by the  
advocates of the bills, the ordinances could be amended at any time,  
in a few weeks of procedure, to correct anything in them which might  
prove to cause undue friction or hardship.

One of the things urged by the Mayor, arguing in the manner of a  
legal brief, was that the ordinances were unnecessary, their objects  
being covered by Territorial law. In this position he differs from the  
Board of Health, the Federal and Territorial officials having to do  
with pure food laws here, and with the legal advisers of the City and  
County Government. Federal interest in the matter has been shown  
by the offer of free tuberculin for testing dairy cattle, conditioned on  
the local prohibition of the sale of milk from cows reacting to the test.

One of the Mayor's vetoing remarks is to the effect that adulteration  
of milk could be prevented by taking samples to the food commis-  
sioner for analysis. As a matter of fact that prevention of adulteration is  
comparatively simple, and the officials state that milk adulteration in  
Honolulu has been practically stopped. But the mere stopping of adul-  
teration is an item of public protection which has long since been re-  
cognized in all intelligent communities as inadequate in itself. There  
is more danger in genuine milk from diseased cows and dirty dairies  
than from milk diluted with water, at least if the water is pure. Tuber-  
culosis is disseminated in milk from diseased cows, and typhoid in  
milk from filthy dairies. Milk and dairy ordinances adopted by ad-  
vanced cities on the mainland contain minute provisions to ensure  
cleanly milking and milk-handling processes. Such provisions in the  
ordinances vetoed by the Mayor of Honolulu are mild in comparison  
with some of those. Dr. Baldwin a member of the Board of Health,  
in a public address here before the local measures were drafted, show-  
ed how far sanitary science was going in enlightened cities in the mat-  
ter of securing a pure milk supply.

What makes the action of the Mayor most unaccountable is the fact  
that the ordinances had absolutely no opposition from either the public  
or the respectable dairy interests. There were no petitions from milk  
consumers against the ordinances, with perhaps a single exception  
where the origin was obviously interested. After an exhaustive dis-  
cussion of the measures with the health committee, the dairymen held  
a meeting by themselves and appointed a committee to draft amend-  
ments to the ordinances. But neither the mass meeting nor its com-  
mittee could find a solitary objection to the provisions on which to

agree. The leading dairymen in private declared the measures to be  
excellent. In anticipation of their passage the Honolulu Dairymen's  
Association, the largest distributor of milk in this city, made all the  
alterations in its premises and conveniences needed for thorough com-  
pliance with the ordinances. A visit was made a few weeks ago to  
some of the smaller dairies by City and County officials, who found  
most of them in such condition that they would conflict with none of  
the provisions which it had been said would put small dairymen out of  
business. A few were however found in such a villainously dirty  
state that it would be a public benefit to wipe them out. Most inter-  
esting of all that the visitors ascertained, however, was that the own-  
ers of the cleanly dairies admitted that they had no objections to the  
ordinances. They had been told, however, that the measures would  
destroy the small dairies and in consequence they had each paid five  
dollars to a runner as a contribution to the fee of a lawyer to fight the  
ordinances.

If the Mayor had personally investigated the facts and conditions,  
and informed himself on the milk question as it is being dealt with  
elsewhere, it is hard to believe that his intelligence and his regard for  
the public welfare would have permitted him to sign the vetoes written  
by the hired attorney of a few misguided and misinformed dairymen,  
not to mention some of the clients who, as one of them unblushingly  
admitted before the health committee, did not want any regulation  
of their business whatsoever.

## Commercial News

BY L. D. TIMMONS

The feature in stocks since yester-  
day has been the trading in Olan and  
McBryde stocks, with a show of ad-  
ditional strength on the part of the  
former. When the session of the  
Stock Exchange opened this morning  
sales of 45, 200, 50 and 300 shares were  
reported at \$5.50. A sale of 100 shares  
was then made at \$5.625. Following  
this three blocks of 100 shares each  
went at \$5.75. At the close of the  
session \$5.625 was offered and \$5.75  
bid.

McBryde's boost seems to have come  
suddenly on the board, as nothing  
had been done on the street. Buying  
started at \$3.875, the figure asked yester-  
day, and everything in sight was  
scooped up. Eight blocks—25, 100, 50,  
100, 75, 50, 38 and 7 shares—went at  
that figure.

There was evidently a preconcerted  
move to bull McBryde, but the offer-  
ings of stock proved too heavy for the  
present. That the effort will be fol-  
lowed up (probably more persistently  
and more systematically) seems like-  
ly. The movement is largely specu-  
lative in character.

Between boards \$500 Hilo R. R.  
sixes sold at par, \$100. These bonds  
are redeemable in less than two years.  
Pioneer again appeared on the street,  
10 shares selling at \$185. On 'Change  
this morning \$184.50 was bid, holders  
still demanding \$188.

A side sale this morning was 50  
shares Hutchinson at \$16.50.

Waialua again appeared on the board  
10, 10 and 5 shares selling at \$118. Bid  
was \$117.50 while \$118.50 was asked.  
Waialua seems to be firm with no spe-  
cial desire to either sell or buy.

Ewa remained about the same. On  
'Change 8 and 17 shares sold at \$21.  
For the stock \$30.75 was offered and  
\$31 asked.

## THE DAVIES CONTRACT.

It is understood that the contract for  
alterations to the business premises of  
Theo. H. Davies & Company will be  
let to Lucas Bros. In place of John  
Onderkirk, the former agreeing to  
complete the job in thirty days against  
sixty days from the latter. The bids  
as submitted were: Onderkirk, \$7,700;  
Lucas, \$4,418; Walker, \$5,337. As  
there is a penalty of \$15 a day on the  
job, or \$450 difference, it is figured that  
Lucas' bid would work out \$422 to the  
good.

## STEAMERS REPORT.

Castle & Cooke this morning receiv-  
ed wireless messages concerning the  
movements of the Lurline and Enter-  
prise, sent in at 8 o'clock last night.  
The Lurline was 118 miles out and re-  
ported all well on board. The Enter-  
prise was 418 miles away, has 268 bags  
of mail and stated that she would ar-  
rive here about 3 o'clock tomorrow  
afternoon.

## NEW LUMBER FIRM.

A hul of Japanese of the city have  
approached the Oahu Railway people  
in regard to a lot near the old line.

claim to have a capital of \$100,000. The  
lot referred to is near the waterfront  
and is also near the railroad, being two  
points in its favor. The owners of  
the land have taken the matter under  
advisement.

## PAPERS FILED.

ties of taro. The Mayor gracefully accepts that situation, for it seems that the contention was that his taro patches were too near a sanitary spillway, or something of the kind, and the Mayor is not weeping over spoiled taro, even if said taro was of blooded stock. Rather is he indignant over a flood of authoritative reports which have just been brought to his notice in regard to the shame-

# SPORTS

## Five Cornered Race The Next Attraction

The latest suggestion is for a five man race at the Athletic Park and it is to be the distance and the competitors who are to be invited are all champions of their various nationalities.

Nigel Jackson will represent Britain and the United States, Tsukamoto will run for Japan, C. K. Charlie for China, Antone Kaoo for Hawaii and Herbert Cordeiro for Portugal.

Such an event should prove mighty interesting to all the local sportsman, for many reasons. In the first place a fifteen mile race is much less irksome to watch than one covering the whole Marathon distance. Then again all of the runners suggested can do better over the shorter distance than they can when running that awful twenty-six miles. This climate is not adapted to such strenuous distances and the professional runners can certainly do more for themselves and the public over fifteen miles.

There is no doubt that Tsukamoto had his feet in a very bad shape in the last race. These will heal with-

in the week, according to the doctor, however, and then the game little Jap will be ready for another hard tussle.

The date selected for the meeting is the anniversary of the birthday of the Emperor of Japan, November 3. The Japs are the principal patrons of such events and this date was named in deference to them.

Both Cordeiro and Charlie ran gallant races in the ten-mile event. Nobody ever seems to have been able to rightly decide which of the two came in third, on account of the crowd that was surging around the two winners.

Around town much satisfaction has been expressed that this race has been arranged. Nigel Jackson has constantly fooled people who thought that he had no chance. It must be said that he was in grand condition last Saturday and would doubtless have beaten Tsukamoto had the latter kept on.

The five-cornered idea is good, it should be followed up and made another successful go of, like the Marathon race of last Saturday, which was excellently managed in every way.

## OAHU LEAGUE OPEN SECOND

There will be two hot games of ball at the Athletic Park next Sunday. The Oahu League will open its second series and both games are sure to be very close.

The Japs and Dragonets will hook up in the first game and the Boers and Halfwits in the second.

All the fans know about the great succession of victories by which the Japs won the first series. Oom Paul's Boers were so far ahead that all the papers slated his bunch for a cinch. But the cinch came undone for the Boers were whitewashed three times in succession and the Japs came out on the top of the standing list.

The Marines are expected to make a better average in the second series than they did in their first attempt. They have a new catcher who can hold Gibson to perfection and their outfield has been rearranged to great betterment.

The second series of the Oahu League bids fair to be more interesting and more closely contested than the first—if possible.

## BUFORD SAW BIRD HUNTERS

The U. S. A. transport Buford arrived from Manila at 7 a. m. and tied up at the Alakea-street wharf. She left Manila September 14 and had a good trip here, with fine weather.

Aboard the transport is the Fifty-seventh Company of Coast Artillery and about a hundred casuals.

While the Buford was passing Bird Island yesterday morning she saw a large Japanese sampan anchored there and turned her searchlight on it. It was the opinion aboard the Buford that the sampan belonged to a party of feather-hunters who had gone ashore on the island.

The transport will leave for San Francisco at 5 p. m. today.

A through passenger is F. H. Loucks, well known here, who will stay over for a while. Loucks is at present an employee of the insular government.

## KAALAS WON FROM EWA

The Ewa second nine traveled to Waianae last Sunday to play a game of baseball with the Kaalas. The Kaalas won by the score of 17 to 2. Kaleiwahea, the Kaalas' pitcher, was in great form and twirled a beautiful game, keeping the Ewas guessing from start to finish.

The teams were as follows:

Kaalas: A. Anderson, c. W. Kaleiwahea, p; H. Kanoho, 1b; G. Kall, 2b; G. Poe, D. Kekahuna, 3b; K. Kanoho, ss; E. Nunes, rf; J. Kaihi, lf; A. Maria, cf.

Ewa: W. Silva, c; H. Cordeiro, p; T. Sato, 1b; P. Christiansen, 2b; D. Souza, 3b; P. Souza, ss; J. Cordeiro, rf; M. Elias, lf; M. Souza, cf.

John Lopez umpired the game.

The regular monthly meeting of the Chinese Athletic Club will be held in the Chinese Y. M. C. A. on Friday at 7:30 p. m.

## WILL SERVE TEA ON LAWN

The local cricketers will play a return match with H. M. S. Bedford tomorrow afternoon at Makiki, commencing at noon. The H. C. C. eleven has been considerably strengthened since last Saturday and should make a better fight of it with the man-of-war-men, though they can hardly hope to win, as the visitors know altogether too much about the game for them.

The local team will be as follows: R. J. Buchly (Capt.), R. Anderson, C. P. Morse, J. R. M. Maclean, A. R. Hatfield, S. Beardmore, Noel Deerr, W. Brown, R. A. Jordan, J. L. Cockburn, T. W. P. Gray.

The reserves will be C. F. Maxwell, H. Bailey, J. H. Fiddes. Lunch will be served at one-thirty o'clock and there will be tea on the lawn at three.

Team together and will be glad to hear from anyone wishing to play. His telephone number is 740.

The Bedford has a crack soccer team and a year ago won the Hongkong shield, defeating teams from other ships on the China station and some of the crack garrison elevens at Hongkong.

The local soccerites should be able to learn something of the great English game from the visitors, provided they keep their eyes open.

## HEARTS CURED.

## BEDFORD TO PLAY SOCCER

A game of soccer has been arranged to be played tomorrow afternoon between a team from H. M. S. Bedford and a local eleven. The game will probably be played at the league grounds.

Harry Bailey is getting the local

## Make Denatured Alcohol for 8c. a Gallon

The navies of the world have adopted tax-free commercial alcohol for smokeless motive power for ships. It saves boiler room, coal room, handling of fuel and is a little cheaper than steam power. Just think! 80 per cent. of water is the principal part converted into alcohol by chemical action in contact with fermented vegetable waste matter and oxidized saw-dust, wood syrup and lime or any carbohydrate. Combining with 94 per cent. oxygen or atmospheric air when used for motive power, heat or other light purposes. The real denatured alcohol opens an absolutely new market for the use of saw mill waste, pulp, paper and chemical fibre mill waste product, and for millions of tons of farm products that even the world's greatest monopoly cannot touch. Our denaturizing distilling apparatus is constructed of steel plate galvanized and the highest grade seamless copper tubing, tested to 300 pounds pressure. Its conductivity makes possible the instantaneous hot steam alcohol distilling. A very simple but serviceable still and doubler, that will produce tax-free denatured alcohol daily for 8 cents a gallon. That what is the most difficult to secure is that which we prize the most. No government supervision, no speculative futures, the market demands the product. The motor boats, the automobiles and the navies of the world use it. Unquestionable references. We are ready to negotiate with responsible individuals on very liberal terms.

This wood waste alcohol distilling apparatus is of untold benefit to farmers, lumbermen, varnish makers, paint manufacturers, soap makers, paper pulp and chemical fibre mills, etc., for the utilization of wood waste by distillation, which puts real denatured alcohol beyond competition with gasoline or kerosene.

Address today: The Wood Waste Distilleries Co., Inc., Cleveland, Ohio, U. S. A., desires to establish western and far eastern agencies, they have a very flattering proposition to offer.

## MAY TRANSFER FORESTY BUREAU

(Special Correspondence.)

WASHINGTON, September 22.—As a result of the Pinchot-Ballinger row, the administration may later determine to recommend the transfer of the Forest Service from the Department of Agriculture to the Department of the Interior. Such a change can only be made by act of Congress, and it probably would call for considerable pressure from the President in order to get the necessary authority, especially if Gifford Pinchot is permitted to remain as Chief Forester.

The Forest Service, in the opinion of most western men in Congress, is misplaced in the Department of Agriculture. It has nothing in common with the other bureaus of that Department, but has much in common with the General Land Office and Geological Survey both of which are bureaus of the Department of the Interior. In its present situation, the Forest Service is, or until recently was in effect an independent bureau, subject to only nominal supervision by a cabinet officer. That is why the Forest Service was allowed to grow up in the Agricultural Department, and that is why Mr. Pinchot has always opposed transfer to the Interior Department.

On several occasions the suggestion has been made that the Forest Service should be transferred to that Department with which its work is most intimately associated, but during the last administration Mr. Pinchot had sufficient influence with the President to get the support of the administration in his objection to the change, and nothing ever came of the suggestion. Now, however, especially in the light of recent developments, Mr. Pinchot may not receive the same hearty support from the President, but may find the President himself leading in the demand for the transfer.

As a matter of fact there is division of authority over forest reserves as matters now stand. The Interior Department, through the General Land Office, has control over all questions of title to lands in the reserves, and also has sole control over the enlargement or diminution of reserve areas. The management of reserves, on the other hand, is solely vested in the Forest Service, under the Secretary of Agriculture. Naturally, there is much correspondence between the Forest Service and the Land Office, and under prevailing systems, this correspondence must pass through the hands of both the Secretary of Agriculture and Secretary of Interior before reaching the office where action is to be taken, or reply made. This is cumbersome, as well as dilatory.

If the Forest Service was made a bureau of the Interior Department, it would be on equal footing with the Land Office, and under the control of the same cabinet officer. The Secretary of the Interior then would have a say not only as to questions of title to forest reserve lands, but as to all questions of forestry administration. The two lines of work are naturally closely allied; the Land Office and Forest Service naturally belong under a single jurisdiction, and common sense demands that they be in the same department of the government.

But the minute a move is made to transfer the Forest Service, Gifford Pinchot will let out a howl—provided he is still at the head of the Forest Service. He will set up the cry that he is to be handicapped; that the hands of the Forest Service are to be tied, and that the real work of managing the government forests is to be placed in the hands of men who do not understand forestry.

The views of Secretary Ballinger on this question of transfer are likely to carry much weight with the President. If he recommends consolidation, it will be because he believes the change would be in the interest of better administration, and he will be prepared to give his reasons. Whether or not it is the intention of Secretary Ballinger to make such a recommendation can not now be learned. He may make no such move unless his opinion is solicited by the President. But it he believes in the transfer, and says so, it is a reasonably safe guess that the President will urge Congress to authorize the change.

With legislation of this sort pending before Congress, the little army of "conservationists" may be looked to him from his purpose. The outcry "The conservationists have no use for Ballinger; they regard him as the devil incarnate, so far as their fads and fancies are concerned, and could foresee the abolition of the Forest Service, and the dismembering of the forest reserves if he should be given control. But President Taft has so far shown that he is not to be fooled by the hue and cry of a lot of theorists, and any such clamor against legislation which he might urge would not sway him from his purpose. The outcry

## MILK BILLS GET THE AXE

BOTH THE ORDINANCES ARE VETOED BY MAYOR FERN—OTHER CITY BUSINESS.

Mayor Fern vetoed the milk and dairy ordinances in two lengthy messages read at the meeting of the Board of Supervisors last night. Both the messages were surely summaries of the address delivered before the health committee by E. M. Watson, an attorney retained by some of the smaller dairymen to oppose the measures. In fact it was Watson's veto in each case, the very language used being identical to a large extent with his speech.

Another important matter was the proposal of the Mutual Telephone Co. with regard to the street digging ordinance and the disposition of the city police and fire alarm wires now carried on the company's poles. This came back to the Board in a written opinion by Deputy City and County Attorney Milverton, which was referred to the road committee with instructions to give a hearing to the directors of the company, the municipal attorney, engineer and electrician to be present in advisory capacity. Chairman Quinn announced that the hearing would be held at 1 p. m. today.

Another opinion of the deputy attorney was to the effect that Charles Clark had been regularly appointed inspector on the Kaimanui beach road contract.

Power was given the police committee to act on a request from Sheriff Jarrett that the jail be connected with the Hawaiian Electric Co.'s light service. Chairman Cox explained that the lanterns gave out unwholesome smoke, particularly objectionable in the present overcrowded condition of the jail. When the city light service again became adequate, the private source of lighting would be given up.

An influentially signed petition of adjacent property holders against the proposed automobile stand on Bethel street was referred to the road committee, it already having in hand the petition of the auto owners desiring a stand there. An ordinance establishing auto and hack stands is promised at an early date.

Mayor Fern appointed Bill Lau and W. A. Kalai janitors of Mollili and and Pauoa schools respectively. The Board promptly approving the appointments. Bids were presented for school supplies and Engineer Gere was instructed to make purchases from the lowest bidders by articles.

The Board adjourned until 7:30 tomorrow evening, when a report from the road committee on the Mutual Telephone Co. matter is expected.

might fool some of the well-intentioned eastern men in Congress, and might make some votes against the legislation asked for by the President, but a direct appeal from the President of the United States probably would have more weight in Congress than the protests of the mob, and the transfer would, in all probability, be authorized after a spirited fight between the administration and the anti-administration forces.

## SALOONKEEPERS ARE REPRIMANDED

Accepting a severe reprimand with feelings that need not be proved, the four saloon-keepers who sold orders to fleet sailors for Sunday delivery of beer went forth, unscathed of legal penalty, from their examination by the Board of License Commissioners. "Go and sin no more" was substantially the sentence delivered by Chairman C. H. Cooke.

Each of them admitted having sold orders on Saturday for Sunday delivery of beer, but none of them thought he was violating the law in so doing. One of them denied having done it on the occasion in question, although he had been the agent in supplying beer to Sunday ball games.

Honolulu Brewing & Malting Co., Ltd., did not obey the citation to appear before the Board. A letter was received from its attorneys, Kinney, Ballou, Frosser & Anderson and E. C. Peters, however, stating that its non-appearance was not from lack of courtesy toward the Board but to protect its legal rights. Its contention is that the brewery is operated under a Territorial license issued in 1903 for fifteen years, and that it is therefore not under the jurisdiction of the Board of License Commissioners for the Island of Oahu, a body created under the liquor law of 1907.

In a statement made by the brewery practice of delivery of beer on Sunday

in accordance with orders received on Saturday is one which has been followed by the brewery for a number of years without raising objection from any quarters. Nevertheless the results on the Sunday in question were unexpected, and when the management realized that the traffic was being abused the delivery was stopped.

An opinion from the Attorney General's department on the legal status of the brewery in the matter is awaited by the Board before taking further action.

## NEWS IN A NUTSHELL

Paragraphs That Give Condensed News of the Day.

Noite's is the place for a good, quick meal at a low price.

The place to get your rubber stamps made is at Wall, Nichols Co., Ltd.

Dividend No. 18 (3-4 per cent) of Wailua Agricultural Co. is due and payable on October 15th.

Rev. John P. Erdman will speak on Korea at the midweek meeting of Central Union church this evening.

W. L. Howard will escort a party to the Palolo cotton trees tomorrow morning, leaving the Wailua car terminus at 8:30.

No new stand but new cars. The old reliable Auto Livery Co., phone No. 6.

Seventy new ambler four-minute records issued for October for the Edison Phonograph. Also 20 new two-minute records. Hawaiian News Co., Alexander Young Bldg.

The funeral of Mrs. Helen W. Kelsey will be held at the home of Mr. and Mrs. W. A. Bowen, 1701 Kewalo street, at 4 p. m. tomorrow.

For the lawn's sake use "Force-growth." It will do wonders in promoting a luxuriant growth to sluggish lawns. Sold in 60¢ and \$1.25 bags by E. O. Hall & Son.

For decades Noite's has been the noonday rendezvous of the busy business man. Everything cooked right and served quickly.

When you want anything in the hardware or crockery line go to C. M. Tal King Street near Nuanu. They also carry a full line of sporting goods.

Schuman Carriage Company shipped by the Kilauea yesterday afternoon to the Wailua stables, Kailua, a fine E. M. F. Studebaker "30" automobile.

Panoramic friezes are among the new ideas in wall paper at Lewers & Cooke. These are decorative novelties of highest merit, both as to design and coloring, and the effect produced is equal to the highest class of fresco.

The annual harvest festival sale of the Salvation Army will be held at 8 o'clock Monday evening, October 11 at the hall on the corner of King and Nuanu streets. Everybody is cordially invited.

Noite's is open from early morning until 7:30 p. m. Standard meals are served at all intervening hours. Dining hall is large and cool.

Consul General Uyeno of Japan will not prosecute the driver of the automobile that ran his buggy down and injured him the night of Delegate Kuroki's reception to the Congressional party. He is satisfied that the mishap was accidental.

Territorial treasury receipts for September were \$90,301.10 against \$40,414.18. Current expenditures were \$179,811.33 against \$183,253.51 for September 1908. Loan indebtedness September 30 was \$3,959,000, a reduction of \$20,000 from the same date last year.

All who have traveled in foreign countries appreciate the annoyance in cashing letters of credit arising from the difficulties of identification. This is avoided if you provide yourself with the Travelers' Cheques issued by the American Bankers' Association and for sale in Hawaii by the Bank of Hawaii.

Officers of the German cruiser Arcona were given an excursion to Haleiwa on Monday, with an inspection of the sugar mill at Alea on the way home. Last night they were entertained at dinner at the Alexander Young hotel by George Rodiek, acting German consul.

Messdames James Holt, Wong Leong and J. Lucas are a committee to raise funds for the memorial to the late Father Clement to be erected in St. John the Baptist chapel, Kailua. They have adopted the mode of selling home cooked viands, and the first sale will be one of hot luau chicken at the Baltimore Dairy, Fort street, on Saturday of next week.

Governor Frear, Delegate Kubio, Senator W. O. Smith, Representative A. D. Castro, A. G. M. Robertson, Representative E. A. C. Long, C. E. King, J. P. Cooke and Harry Von Holt were in conference in the Governor's office yesterday afternoon considering Ter-

## REINFORCEMENTS TO TAKE DRUNK

There was excitement in front of the police station on Merchant street this morning for a few moments when a corporal from Fort Shafter was in the act of arresting a fellow soldier who had overstayed liberty.

There were two men wanted by the Fort authorities, one of whom was sober and occasioned no trouble. Marsh, the warrior under the influence of booze, put up a fight against the unarmed corporal sent to arrest him and it was with difficulty that the plucky corporal finally landed him at the police station, whence he telephoned the Fort for reinforcements to help take the obstreperous prisoner to headquarters.

Two men were sent to town from the Fort and the fighter was taken into camp.

## REVENUE CUTTER BADLY NEEDED

(Continued from Page One.)

yond the issuance of desultory warnings and the nefarious trade is undoubtedly being conducted as briskly today as it has ever been.

There is more than a suspicion that the large power sampans which have been launched here of late were not intended solely for fishing purposes, but were built to be used in the more lucrative business of feather collecting. The recent landing of bags of valuable skins and plumes in Honolulu reduces this suspicion to a certainty.

The latest report along this line was brought by the transport Buford, arriving this morning from Manila. Her officers stated that at 1 a. m. yesterday they saw the Koe Maru, a big Japanese sampan anchored near Bird Island. The transport's searchlight was played on the mysterious craft, but no soul could be seen aboard, the presumption being that all hands had gone ashore for the purpose of "fishing." A light was also seen on the island.

The leeward islands of Hawaii, where the bird hosts congregate, comprise the westward chain or extension of the group, and are sometimes known as the "Bird Islands." Beginning at the east they include Bird Island proper, Necker, French Frigate (or Brooks) Shoals, Gardner, Laysan, Lisiansky, Midway, Cure, and Morel, together with numerous shrunk reefs.

Some of these islands are considered by scientists to be among the most remarkable bird islands of the world.

The number of species breeding in the region mentioned is not great, there being among the sea-fowl only eighteen, and of the land birds five, including a rail and a duck. Their number is, however, practically countless.

The birds on Bird Island give evidence of their presence by their cries, which can be heard almost as soon as the island is sighted. The glare of the decklights of a steamer nearly always brings certain species clamoring about the vessel in numbers.

Bird Island is a very steep, half-funnel-shaped hillside, with several bold rocks and cliffs rising from the general slope. Two sulcuses, on the east and west halves, divide the slope into three ridges, and in each little valley there is a group of palm trees. The peak to the west rises 903 feet. The whole of the south side is covered with a growth of bushes and rank grass. This portion of the island suggests

ritual matters with reference to the Governor's approaching visit to Washington. Governor Frear's proposed amendments to the Organic Act were not reached and the conference adjourned until tomorrow afternoon.

gests half of an old crater. The west, north and east sides rise as a wall of naked rocks, straight and sheer to an imposing height. The west face is black and menacing and perfectly perpendicular.

A landing can only be effected in very quiet weather. The shore on the south side is so rocky that even a small swell causes considerable commotion.

Birds nest all over the island. Those species which love the cliffs find a congenial home on the precipices and in the escarpments of the south side, while the bobolinks and man-o-war birds live among the bushes on the grassy slopes.

## DEFENSE NOW ON

In the trial before Judge De Bolt of the Waimanalo strike case, in which Yamamoto and seven others are charged with assaulting Sheriff Jarrett, the prosecution rested this morning. Defendants Yamamoto and Hiyashi were called for the defense, the latter being on the stand up to noon.

In the damage suit of Lau Tong vs. E. O. White, before Judge Whitney, the plaintiff was still putting on evidence this morning.

Judge Robinson granted a divorce to Carmen C. Sintrom against Pedro Sintrom for non-support.

Judge Whitney has rendered judgment for plaintiff for \$235 in the suit of H. T. Mills vs. H. Chang Man.

## LOCAL ELKS WILL ENTERTAIN

The Honolulu Elks are planning for a little celebration on next Friday evening after the regular lodge meeting. The affair will be in the nature of a smoker for the members and visiting Elks in the city, and the entertainment committee is already busy with the details of the arrangements, and a very pleasant evening is in prospect. The lodge will probably give a number of similar entertainments during the next few months.

**ANOTHER BIG NEW  
DEVELOPMENT IN THE WIRELESS**Remarkable strides have been made  
recently in connection with "wireless"  
experiments, as the result of which it  
is now claimed by two Italian inven-  
tors that it is possible both to send  
messages in any given direction and to  
detect the exact direction of mes-  
sages received, says the London "Stan-  
dard."This "directive" system of wireless  
telegraphy is the invention of two re-  
tired officers of the Italian army—  
Messrs. Bellini and Tosi—and has al-  
ready attracted the attention of the  
French government, under whose sanc-  
tion the first station for its installa-  
tion is now being erected near Bou-  
logne. One of the new French airships  
also is about to be equipped with the  
system.Representatives of the British ad-  
miralty war office and postoffice, it is  
understood, have been present at ex-  
hibitions of the invention in Dieppe  
and Havre, and a recent visit by Mr.  
Bellini to Aldershot has been followed  
by the erection of an experimental  
station for the military authorities.The advantages of the Bellini-Tosi  
system are explained by L. H. Wal-  
ters, a friend of the inventors, who is  
introducing it into England. He points  
out that the usual method, common to  
all the ordinary systems of wirelesstelegraphy, is to send signals, which  
spread themselves out circularly in all  
directions, receivable by any ship fitted  
with "wireless" apparatus within  
range of the transmitting ship or sta-  
tion."The great drawback," he says, "is  
that there is no possibility of deter-  
mining the direction from which the  
signals are coming and the Italian in-  
ventors claim that they are to perfect  
this.""For the new system the only addi-  
tional apparatus required consists of  
two instruments, which are termed  
wireless 'universal compasses.' The  
whole process merely consists in turn-  
ing a small pointer at the top of the  
receiving instrument while the mes-  
sage is being read; when the sounds are  
heard at their loudest the direction  
has been detected.""There is no need to turn the ship  
or even to make exact and lengthy  
measurements—just a few letters of  
message will afford all the information  
needed.""The value of the invention in naval  
warfare would be emphasized by the  
fact that a message could not be inter-  
cepted by any ship not actually in the  
direction of transmission."**ADOLF IS A POET NOW**(Adolph inserts himself into der  
presence of Osgar, who iss a publican—  
dot iss, von who publicates.)OSGAR: Come in, und shut der door  
as you go out.

**Be Not Deceived**There is only one cleanable Refrigerator and therefore GERM PROOF,  
and that is the Gurney Refrigerator handled by us.No other make has ever stood the test and by means of the removable  
ice chamber as well as removable shelves, drain pipes, traps, etc., we have  
solved the problem.Assail us where you will you cannot help but admit our claim. All other  
makes fail when it comes to keeping the ice chamber pure, sweet, clean and  
germ proof, but**THE GURNEY**Listen to idle talk and arguments put forth in favor of cleanable pro-  
vision compartment. All refrigerators have this feature. You cannot deny  
that unless ALL COMPARTMENTS can be kept absolutely pure and whole-  
some that a refrigerator is germ-proof. Go from the provision chamber to the  
receptacle for the ice and it is here where all other makes fail. There's the  
weakness that cannot be overcome by them.The Gurney with its removal Ice Chamber feature has supplied the great  
want and therefore.**Is the Only Cleanable**Come in and bring forth your arguments and if we fail to convince you  
we are ready to take your decision. A full line always on hand. They are  
used in almost every household. Do you possess one? If not why not, it  
costs no more than other makes.

## TWO NOTED MEN COMING HERE ON THE MONGOLIA

Brigadier General JACK PERSHING

THOS. J. O'BRIEN

SAN FRANCISCO, October 5.—General Jack Pershing, U. S. Army, sailed today for his new post in the Philippines. The Hon. T. J. O'Brien, American Ambassador to Japan, has also departed for his post.

## U. S. MAY NOT LONG FEED THE WORLD

**JAMES J. HILL WARNS BANKERS'  
CONVENTION OF WANING FOOD  
SUPPLY.**

CHICAGO, Sept. 14.—Warning that the United States may soon cease to be an exporter of foodstuffs was given to the American Bankers' Association today by James J. Hill, chairman of the board of the Great Northern Railway. At the close of the first day's session of the thirty-fifth annual convention here, Mr. Hill made an address in which he said:

"The idea that we feed the world is being corrected, and unless we can increase the agricultural population and their product the question of a source of food supply at home will soon supersede the question of a market abroad."

This possible condition, the speaker said, is due to the increased tendency of the rural population to leave the fields and agricultural pursuits and to seek city life. In corroboration of this he cited the decrease in the value of farm lands in the Eastern States, and contrasted the conditions in European countries with those of the United States.

All through the address Mr. Hill sought to impress on the banker delegates that future prosperity is to come in the development of agriculture rather than in an extension of foreign markets for manufactured goods.

The speech of Mr. Hill was received with deep attention by the delegates. It followed an address by Lawrence O. Murray, Comptroller of the Currency.

ed the necessity of co-operation between the Comptroller and the national bank examiners, and pointed out that the bank examinations have been raised from a perfunctory review to a systematic investigation by trained officers. Referring to the guaranty of bank deposits, Mr. Murray said:

"I believe in just one kind of guaranty of deposits. I believe in the guaranty which comes from the Comptroller of the Currency doing his duty under the law; from the bank examiners doing their duty; from the executive officers and directors of the bank doing their full duty, in accordance with the oaths of office which they take. That kind of guaranty is practicable and does not cost the banks an extra dollar or permit depositors to lose a dollar."

Earlier in the day in his annual address, President George M. Reynolds declared in favor of a central bank with a capitalization of not less than \$100,000,000 as a means of avoiding financial disturbances similar to the panic of 1907.

The schooner Espada which arrived from the Sound on Sunday brought 918,000 feet of lumber for Lewers & Cooke. It is the vessel's first visit here.

**A REMEDY THAT CURES COLIC.**  
"Some time back I had a very bad attack of colic," said Mrs. C. Pienaar of Middleburg, Cape Colony. "I saw an advertisement in the paper of Chamberlain's Colic, Cholera and Diarrhoea Remedy which I at once got. After I had used the first dose I got better, and when the bottle was finished I was well. I can safely recommend it to any one who suffers from colic. It is the best I ever used." For sale by all dealers, Benson Smith & Co., agents for Hawaii.

## TAFT IS FOR A A CENTRAL BANK

TARIFF LAW, HE DECLARES, HAS  
REMOVED DISTURBING ELE-  
MENT—

BOSTON, Sept. 14.—President Taft began his 13,000 mile tour of the country tonight by coming to Boston as the guest of the Chamber of Commerce and delivering a notable speech at the banquet given by that body, the President's first public utterance since the adjournment of Congress.

Need of currency reform and the new era of prosperity were the keynotes of his address. He declared the present financial system to be "patched up," commented on the plan for a central bank of issue and lauded Senator Aldrich's purpose to frame any law embodying that idea so that the financial system could not be dominated by Wall street or subjected to political manipulation.

The passage of the new tariff law, Mr. Taft asserted, had removed a disturbing element, and the renewal of business, he said, already had begun. He reiterated that any amendment of the anti-trust or interstate commerce laws must not be revolutionary, but designed to insure that the law can be enforced against weak and powerful interests alike.

He declared what he termed the plea of Governor Johnson, of Minnesota, to the West to range itself against the East, and asserted that the interests of the nation were interwoven too closely ever to permit of such a sectional cleavage. Conservation of natural resources, protection of the public lands and enforcement of the pure food laws were other matters for consideration of Congress in the next three years. The attitude of the people of all parts of the country on these matters he hoped to learn on his long trip.

### SILENCE GREETED

**CENTRAL BANK PLAN**  
Among the points which awakened the most enthusiasm was Mr. Taft's statement that there was need of reform in banking. This statement was heartily applauded, but there was not a ripple when he mentioned the central bank plan.

It was noticeable that the diners maintained a grim silence when the President said he would not discuss the tariff in his Boston address, but when he declared with great emphasis in connection with the control of corporations that it must be understood that the law is to be enforced on the most powerful there was tremendous applause.

The climax was reached when Mr. Taft touched upon sectional differences. Practically the entire assembly cheered the speaker and many leaped to their feet in their indorsement of the President's remarks.

Nearly 2000 representative men of Boston heard his address in Mechanics' Hall, and as invited guests there were present distinguished men from national and State political life, from the judiciary of the nation and State, from army and navy and Congress and from local church and civic circles.

The banquet also marked the celebration of a project of great moment to Boston and New England, namely, the merging of Boston's three leading commercial bodies, the Merchants' Association, the Associated Board of Trade and the Chamber of Commerce, into one organization, the largest of its character in the United States, its membership numbering 3,000.

## THIRTY DEAD IN MINE HORROR

(Associated Press Morning Service.)

VICTORIA, October 6.—Thirty persons are dead as the result of the frightful explosion which occurred here yesterday in the Wellington colliery. The scenes around the mine were heartrending. Immediately after the first explosion, which engulfed the men, fire broke out, and the unfortunate victims were either burned or suffocated. Every effort was made to rescue the imprisoned men, but to no avail.

### PRESS HONORS TAFT.

SAN FRANCISCO, October 6.—President Taft is an honorary member of the newspaper craft of this city. Last night the President was the guest of honor at a function given by the San Francisco Press Club, and after the festivities the distinguished guest was unanimously elected an honorary member of the club.

### HEARST SUPPORTS GAYNOR.

NEW YORK, October 6.—William Randolph Hearst, proprietor of the great string of Hearst newspapers, yesterday came out in avowed support of Justice William J. Gaynor, Independent candidate for the mayoralty of Greater New York. Hearst issued a signed statement favoring Gaynor's candidacy.

### SALT LAKE CITY SHOCKED.

SALT LAKE CITY, October 6.—Three sharp earthquake shocks were felt here yesterday.

You want  
Your Ads  
Read?

## Here is some advice---

Honolulu more than any other city in the World, is a place where the EVENING PAPER gets the news first. The clock here is over two hours behind the clock at San Francisco, five hours behind New York and ten to eleven hours behind the clocks in the European capitals.

This means that when THE STAR is going to press The Day Is Closed In Washington, Chicago, New York and Europe and almost over in San Francisco. The news of the day is here for THE STAR.

Under modern conditions it takes practically no time to prepare and transmit news and

The Star gets every  
Evening the Cable  
Dispatches giving

# The News of all the World

For the day just ended

Here are some of the features that go to make the evening paper the predominating factor in an advertising campaign:

It is delivered at the home each night when the whole family has plenty of time to read it.

It is carried home by the business man when his day's work is done and it stays there. A morning paper is usually carried down town by the head of the family and hurriedly read.

The evening paper is not read hurriedly, but thoroughly, so that all the advertisements receive their share of attention.

It presents the store news a little ahead, giving the prospective purchaser time to plan a shopping tour for the next morning.

The evening paper presents the news the day it happens. The morning paper the day after.

The evening paper presents the news first. The morning paper merely elaborates it.
