CHOLERA.

BAD TYPE IN EUROPE. Cholera is raging in Galicia, of a far more virulent type than that which scourged Hamburg last year. Nearly all cases are fatal. There has not been a sin-gle case of recovery from the Asia-tic form. Whole families have died. Within twenty-four hours ten dis-

tricts have been affected. The plague is more virulent at

Hamburg than last year. At Kolomea there is a panie, the people charging the doctors with poisoning them to get rid of the poor. The cholera hospital was stormed by the excited populace, and had to be defended by the mili-

The Hungarian Government admits that over seventy communes in Hungary are affected. The water supply is very bad at Buda-Pesth, where the plague is certain to make heavy ravages. It has already reached the confluence of the Theiss with the Danube.
It is officially announced in Berlin

that the total cholera cases in Germany since the 15th numbered eleven, with eight deaths. Cholera has appeared at Vienna. Physicians who examined the body of a workman certify that there is

no doubt his death was caused by cholera. An epidemic of cholera has been raging at Nantes, France, for two weeks. As many as 25 new cases have been reported in one day, and 50 percent of the persons attacked

succumbed to the disease.

CHOLERA STEAMER AT BRAZIL. The Italian steamer Carlo R., which arrived at Rio Janeiro, Brazil, * on the 28th with many persons on board stricken with cholera, and upon which there were 103 deaths from the disease on the way across

the Atlantic, is anchored 20 miles

from shore. She took that position

after she was escorted out of the

harbor by the warship Republica. There has been no communication with her from the shore.

The Norwegian barks Bonita and Harold are total wrecks at the mouth of the Savannah river. A tug was sunk in the Delaware river at Philadulphia. At the Delaware breakwater a fishing schooner sank, the crew saving themselves by getting on the rocks. The German

in Alexandria and Georgetown were crippled. Not since the great flood of 1868 has such a storm been experienced in Baltimore. A furious gale prevailed all the afternoon, and rain

and buildings on the water front. Several schooners were washed up high and dry on the streets. At Annapolis great damage was

molished, and wires of all descriptions broken.

Two deaths by electricity resulted

from the storm at Philadelphia. Among other damage to marine property there, the dry docks of Cramps' shipyards were damaged to the extent of \$10,000 by the high

WEDNESDAY, SEPT. 6, 1893.

No "anti-missionary campaign" has been conducted or at tempted in the BULLETIN since its edi torial chair was occupied by the present editor of the Advertiser. " Missionary" was its extreme term of reproach then, as "royalist" is in the Advertiser to-day. Under pre sent auspices the Bulletin simply claims the privilege of criticising individual representatives of the so-ca fled "Missionary party," as it do as members of any other class or cornbination when it deems them to have gone wrong.

Minister Thurst on was at latest accounts in San Francisce. Hisdeputy, or the Hawaiian Charge d'Affaires at Washington, Major F. P. Hastings, was back in Maine inhaling the 'nemlock odor. There is no public mention of the Specia' Commissioner, Prof. W. D. Alex ander's whereabouts, but it is safe to say he is attending to duty, provid ing the Major left the key of the Hawaiian Legation under the door mat. Minister Blount, it is report ed, still holds his commission a Minister to Hawaii, and as sucl will represent President Clevelance in negotiations with the Hawaiian triumvirate at Washington, if eve he can find them there together. Judging by the foul partisan abuse of Mr. Blount by the San Francisco Chronicle, he must have said some thing since returning to give cold comfort to the supporters of the Hawaiian conspiracy.

Notes on the Passing Show

EDITOR BULLETIN:-That the water supply of Honolulu is falling short, brings to the notice of the public the fact that it is about time that the authorities were paying some attention to that department of the public works. An appropriation of \$63,880 for pump ing plant, etc., and for a dam and building reservoir at Makiki, etc... was passed by the Legislature last year, also a further appropriation of \$6000 for repairs of reservoirs. A great deal of rain has fallen on the mountains and in the valleys, at the heads of the water sources, during the past month or so, still there exists a shortage. If report be true sued at San Francisco the true cause of the short supply him to sell his great ranch in Southis, that there is a leakage in one or two of the reservoirs. The matter leged agreement, and take \$800,000 of leakage should be looked into. OBSERVER.

Dispositions of Teachers.

At the meeting of the Board of Education, noted in yesterday's issue, the following dispositions of teachers were made for the new term opening next Monday:

Miss Severance, to the place at Hilo School vacated by Miss West. resigned

Mr. L. Zumwalt, to Ulupalakus the winner hard. School, Maui. Mr. A. II. Crook, to Huelo, Mani.

Mr. Stanley, to be assistant in Royal School, in place of H. W. Peck, resigned Miss Emma Hatfield, to be assist. ant in Hanalei, Kauai, in place of

her sister, resigned. Mr. McCartney, formerly of Kaunakakai, Molokai, to be principal

at Hauula, Oahu. Mr. Moses Makuakane, to be assistant in Kailua, Kona, School.

The success of Mrs. Annie M. Beam, of McKeesport, Pennsylvania. in the treatment of diarrhoea in her children will undoubtedly be of interest to many mothers. She says: "I spent several weeks in Jonstows. Pa., after the great flood, on account

of my husband being employed there. We had several children with very badly. I got some of Chamber-lain's Colic, Cholera and Diarrho a Remedy from Rev. Mr. Chapman. It cured both of them. GOLD COINAGE.

Secretary Carlisle has ordered the presses the price of cattle and corn.

Secretary Carlisle has ordered the United States mints at Philadelphia and San Francisco to be fully man-ned, and the full capacity of both mints will be utilized in the coinage of gold bullion. The Treasury Department possesses from \$85,000,000 to \$90,000,000 in gold ballion, which is part of the gold reserve of \$100,000,000. The gold bars cannot be used as currency, so it has been decided in the present need to coin the bullion on hand,

SEARCHING INQUIRY INTO NAVAL CON-STRUCTION DEMANDED.

During the discussion on the navy estimates in the Commons Sir Edward James Reed, who at one time was Chief Constructor of the navy, declared that the disaster to the warship Victoria was just what was expected of that class of vessels years ago. There remained in the navy other vessels of the same type and he wondered how many more would capsize before the admiralty could be induced to abandon that

description of war vessel. Admiral Field said the standard for the navy should be based upon the work the navy had to do. This was not taken into consideration, but the framers of the naval estimates say ten more first-class ships are required, especially effective rams. A large sum of money has been spent upon vessels of that class, and they looked like rams, but they did not deserve the name. They could do no more execution than a man tilting against a stone wall with

a thimble on his nose. Right Hon. J. G. Goschen said such an assertion could not be passed over, and he demanded that the Government institute a searching inquiry into the construction of all vessels of a similar type to the ill-

fated Victoria. GENERAL ITEMS.

The putting upon the market of an article superior to anything in the same line ever sold here means something to the busy business man. When we went into the ready mixed paint line we did so with the idea of giving the public a better article than it has been used to seeing. What is the result? Hendry's Ready Mixed Paints are leading all others; people who have been averse to using prepared paints are now ready and willing to save fifty percent of the cost of painting their houses by using this paint. Then you ask "How can they save so much?" We'll tell you! Not the least important item in the profession of the painter is his knowledge of mixing colors, and there's a good many of them in Honolulu who can put Victoria's son, is the successor of the late Duke of Saxe Coburg-Gotha. It is said he refused to resign his succession on Emperor William's rethe paint on as even as the boards but who do not know the first principle of mixing. Very well then. A ten year he should have it. She, the daughter of the late Czar of Russia, has often felt sore that she had to yield prewages of a high priced man and employ one who never tried to learn the knack of occupying the ducal throne even temporarily, her rank and prece-dence would be advanced permamixing and you save twentyfive percent in wages. The "Hendry Ready Mixed" will cover twenty-five percent more space than ordinary paints or agreed to call a conference of the members of the Latin Union in Paris the average ready mixed article-there's your other twentyfive percent. If you do your own work you will save twenty-

five percent more. Try it. The assurances we have received from the Water Works department leads us to believe that there will be sufficient get practice, at Sydney, killing four water from the Makiki wells for people to take baths every day. Three plantations have lately added to their machi nery complete pumping plants for irrigating cane land. Be-fore making the improvements the managers thoroughly investigated the cost of steam pumps and windmills. A half dozen makes of the latter were in competition as to price and capacity and in each instance managers referred to above have simply fallen into line with others as their necessities required, there will be others to follow suit and we believe 14 Head of Horses that within another year every plantation on the islands will have its Aermotor for irrigat-

Barefooted Bill Pleads Guilty to Two More Burglaries.

William Hoopii, alias "Barefooted Bill," a nickname given him by the Bulletin, who is serving a heavy sentence in connection with several burglaries, was called away from his work in the Police Station to appear in the District Court to answer to two other charges of burglary, made while he was supposed to have been fast asleep in his bunk at the Oahu Prison. The first charge read was larceny in the third degree in Honolulu on July 8 by stealing certain property of B. F. Ehlers & Co. "Bill" pleaded guilty and Judge Robertson promptly sentenced him to six mouths' imprisonment at hard labor.

The second charge was larceny in the third degree in Honolulu on July 7, of one gold ring, two bottles of brandy and sundry articles valued \$10, from the store of F. A. Schaefer & Co. Again "Bill" pleaded guilty and again he was sentenced to six months' imprisonment at hard labor. Both sentences are to take effect at the expiration of his former

COURT CHRONICLE.

Exceptions Filed on Motion for a New Trial.

Christian Gertz by his attorneys, C. W. Ashford and F. M. Wakefield, has filed a bill of exceptions to conviction of importing opium. One of the grounds is that, when the jury was drawn, the names of twelve jurors drawn for the term had been withdrawn from the box, and were not available for service in this cause, they being then engaged in the trial of another cause in the same Court. Another is that coun-sel for defendant, after announcing that they should not call any witnesses, was refused the privilege of making the closing address to the jury. There are exceptions to the charge of the Court to the jury, and, finally, exception is taken to an amendment made by the jury to their verdict after announcing the

verdict to the Court. The Supreme Court term will open on Monday after next. Accounts of no less than nine holders of various trusts are docketed for hearing at Circuit Court

Report of the Foreman Painter.

TANCRED, July 21, 1892. W. S. PALMER, Esq., Engineer of Dis-trict No. 1, So. Pacific Co.

I find that the oil requires much less pigment than tinseed to make a paint of the requisite covering and spreading quarities. 100 ibs. of white lead will take no more than 4 to 4)4 gals, of linseed, while in my priming coat, I get even better results with 9 to 10 gallons of Lucol, and in my second coat with 7 to 8 gallons of Lucol to 100 lbs. of lead. This means a very material saving lead. lead. This means a very material saving (from one-third to one-half) in the amount of pigment necessary to cover a given sur-

In my roof color I used less than 100 lbs.

ince.

In my roof color I used less than 100 lbs. of "car paint" (Princes Metallic ground in oil) where a roof of this size has always required 200 lbs. of car paint with linseed oil. I mixed my roof color with 18 gallons of Lucoi to the 100 lbs of pigment and got a better body of color than I ever got with less than one-half that number of gallons of linseed. I give you simply the facts but I cannot understand or explain them.

The drying qualities of the new oil are perfect. The prining cost with white lead, dried strong and hard inside of 24 hours. The first coat for sand took the sand freely, firmly and in larger quantity than linseed and dried hard inside of 24 hours. The second coat of body color and trimming dried thoroughly without tack inside of 24 hours. It covered perfectly and dried with a fine smooth surface entirely free from wrinkles and blisters, and bore out remarkably well so as to develop a fine lustre, giving much better looking results than I have ever gotten with two coats of linseed on new wood. The car paint spread on the roof was mixed with raw Lucol and dried perfectly in 24 hours. Notwithstanding that only one-half the usual amount of color was used, the paint covered perfectly and did not run. The second coat of sand filled up solidly, taking up a larger quantity of sand more evenly than I have ever gotten on to linseed.

The Lucol has effected a saving of 215 lbs. of pigment or nearly one-third of the amount usually required for a building of this size.

With respect to the general appearance of the fine leaf area?

amount usually required for a building of this size.

With respect to the general appearance of the finished work, I must confess that I never saw its equal in two coat work with linseed, and if the oil wears as well at Tancred as it has worn with the Master Car Painter, Mr. Fitch, at Sucramento, there can be no question about the SUPE-RIORITY of Lucol over linseed, even at the same price per gallon, in ECONOMY, GOOD LOOKS and in DURABILITY.

Yours Respectfully.

Yours Respectfully, [Signed] W. H. MELLUS, Foreman Painter, Southern Pacific Co.

(Continued from 1st Page.)

Boston felt the storm as the worst

for twenty years. From Connecti-cut and Maine come reports of damage to fruit trees and crops.

In the midst of the gale a fire broke out at Rockaway Beach, the famous Long Island summer resort, and destroyed several hotels.

A New York despatch of last night says: The storm which swept

over the city and surrounding country last night from midnight till 8 o'clock this morning, like the one a few days ago, originated in the West Indies, but, instead of following the coast, swept more inland and reached out in every direction for a distance of more than 1500 miles. As almost all telegraphic connections are broken the Signal Service is unable to give a complete report of its course or its exact direction, but local observations indicate that it made its way to the sea through the

St. Lawrence valley. WORLD'S FAIR ITEMS.

Total admissions to the Fair on the 29th were 166,373, of which 135,-

912 paid. There was a parade of over \$2,000,000 worth of blooded horses through the fair grounds, including the finest specimens of the United States, Great Britain, Russia, France and

Germany.
Mrs. Zelia Nuttall astonished the learned people who attended the anthropological congress at the World's Fair. She read a paper giv-ing for the first time an interpreta-tion of the ancient Aztec calendar. Scholars declare it the most important discovery of the kind made this century. It promises to lead to the translation of the hieroglyphics on the ruins in Mexico and Central

The accuracy and perfection of the calendar, which is pronounced in advance of any system now in use, give evidence of a high civiliza-tion and advanced mathematical attainments among the ancient inhabitants of America. It is estimated that 4000 years of astronomical observation were necessary to perfect this calendar. The calendar furnishes a key to the religion, architecture and domestic life of the an-

cient Americans. The complete cycle of the calendar referring to the revolution of the moon and earth about the sun covers a period of 1094 years. It is entirely different from any calendar system known in ancient Europe, Asia or Africa. It shows that the ancient inhabitants of America were familiar with the movements of the planets Jupiter, Venus, Mercury and Mars, as well as those of the earth and moon.

The Washington State Commission has used all its money, and at a meeting held in Tacoma it was decided to sell the building to raise funds to continue the exhibit. Commissioner Rechester says this action was hasty, as the law requires that any money from the salvage or sale of the structure must go into the treasury. All the material was donated by the lumbermen and miners of the State, and they are opposed to the sale of the big logs and arrives material which they are and curious material which they sent

on for the glory of their State. ecial committees are investigating charges of bribery against Commissioners Beeson and Mercer and Juror Highee.

The foreign World's Fair Commissioners assembled in Elk Valley, South Dakota, where fourteen years ago was a wilderness, and watched the cutting and binding in less than four hours of 320 acres of ripe wheat.

MATTERS IN CONGRESS.

The silver men are much depress-ed over a defeat in the House on the 28th, when the Wilson bill to repeal the Sherman Act passed.

There was a duel over the rules between Speaker Crisp and ex-Speaker Reed. Crisp put a substi-tute in the chair and took the floor to reply to Reed. This action of the Speaker was reprobated by Reed, who held that the rules of the 51st Congress were sustained by the Su-preme Court. He said the Democrats had adopted half of those rules, and were on the road to adopting the whole of them. The matter dropped without a division.

A meeting of the Ways and Means Committee has been called to arrange for hearings on the tariff question.

The vote for the Wilson repeal bill was 240 to 110. A lot of amendments in favor of free coinage at different ratios were previously voted down.

SURGICAL OPERATION ON THE PRESIDENT. Serious reports about an alleged operation on President Cleveland, to remove cancer, have brought out a direct statement from Dr. Ferdinand Hasbrouck, dentist. He says the President's disease is or wasfor the operation may have been successful in removing it-a growth in the bones of his left upper jaw and adjoining the bones of his nose. The operation consisted in removing diseased portions of the bone and was performed July 1 on board the yacht Oneida. Dr. Hasbrouck does not think the disease is the same as that which caused the death of General Grant.

Mr. H. J. Mayers, of Oakland, Md., says: "I have sold thirteen bottles of Chamberlain's Cough Remedy to-day and am literally sold out. This is the largest sale on record of any one preparation in a day over our counters. It gives the best satisfaction of any cough medicine we handle, and as a seller it leads all other preparations on this market." For sale by all dealers.
