## ANGUS WINS IN A SPURT

The End of the Advertiser  
Race.

SLOWEST TIME ON RECORD.

Time, Thirty-seven and Three-quarter  
Minutes—Sylvester Forgot Lot's  
Wife and Looked Back.  
King a Good Wheelman.

"Stand back" shouts Captain  
Parker, "and do not crowd the  
riders; get up on the sidewalk and  
keep this road clear." And the  
captain cracks his whip and the

other boys would take it in the  
event of his getting a good lead,  
but the other boys were not to be  
caught napping, and they bunched  
again and remained together, guess-  
ing what time they would have to  
make to break the record for slow-  
ness. Just before Thomas Square  
was reached King touched the but-  
ton and flew until he got a lead of  
150 yards. It was King's race if  
he had waited, but he died quickly.  
He was anxious to win, but mis-  
calculated his powers and he could  
not stand the gait long enough to  
carry him across the line. Syl-  
vester quickly grasped the situa-  
tion and got down to a proper gait  
and closed the gap with Angus  
chasing him. At Kawaiahao Sem-  
inary it was Sylvester first, Angus  
and King, with everything point-  
ing toward Sylvester as the holder  
of the trophy but at the telephone  
pole opposite Punchbowl street  
Angus believing it was time to let  
the other boys know that he want-  
ed the wheel, shot ahead and

D. G. Sylvester. Geo. Angus. Tommy King.  
PARTICIPANTS IN THE ADVERTISER 10-MILE ROAD RACE.

man, who wanted to get a little  
further front, gracefully stepped  
back far enough to allow another  
fellow to get ahead of him.

Marshal Brown had kindly of-  
fered the ADVERTISER management  
all the assistance possible in keep-  
ing the roadway clear and the  
crowd orderly. The offer was  
gladly accepted, and a squad of the  
finest sent to the square and dis-  
tributed in ones and twos out King  
street wherever the people were  
liable to collect and interfere with  
the racers, and with the aid ren-  
dered by the officers, the road was  
kept as clear of obstructions as a  
race track, and it was a job to han-  
dle the three thousand people who  
stood in Union Square yesterday  
afternoon—their nerves stretched  
to the highest tension in anticipa-  
tion of the ADVERTISER bicycle road  
race. Bets were as mixed as they  
were numerous, and each of the  
men seemed to have friends galore  
who were willing to back favorites  
to the full extent of their purses.

Promptly at 4:43 the men came  
to the scratch—Sylvester first, fol-  
lowed by Angus and King. Syl-  
vester was dressed in white Jersey  
with maroon; Angus was resplend-  
ent in orange shirt and tights,  
which were evidently selected with  
a view to matching the color on the  
rim of his wheel; King had Jersey  
and tights of maroon.

Directly the racers were at the  
scratch they mounted their wheels  
and at 4:45 the starter shouted  
"Go!" and the men were pushed  
out from the line, Angus leading  
until Punchbowl street, when Syl-  
vester took the lead and kept it un-  
till the Waikiki turn was reached,  
and then the boys bunched and  
held merry converse all the way  
out the Waikiki road. Wherever  
there was a house along the course  
there was a crowd cheering the  
riders.

The boys seemed to want to stay  
together and enjoy what there was  
in it without having to work hard.  
On the road along Kapiolani Park  
King led slightly, but at the turn  
they bunched and remained in that  
position until they came to the row  
of cedars, when King shot ahead  
and Angus reached out for him, fol-  
lowed closely by Sylvester. King  
was evidently trying to see how

crossed the lead four seconds ahead  
of Sylvester. King had dropped  
back and was shut out by the  
crowd of people who flocked around  
Angus to give him an ovation.

The time made was 37 3/4 minutes  
and was probably the slowest time  
ever made by a rider in a ten-mile  
race on an improved bicycle. The  
boys made no attempt to make  
local records no attempt even to  
beat time they had made when  
at practice. Sylvester has made the  
time without any particular exer-  
tion in 28 minutes. Angus could  
have made better time if it had not  
been that he did not want to start  
the pace. The wheels selected by  
the riders were the Stearns, 20-pound  
racer, ridden by Angus; Cleveland,  
20-pound racer, by Sylvester; and  
the latest improved Tribune by King.

For the information of persons  
who have arrived in Honolulu dur-  
ing the past few days it may be  
said that the race yesterday was  
the end of the voting contest in-  
augurated by the ADVERTISER some  
weeks ago to encourage road racing,  
and to have the three persons re-  
ceiving the highest number of votes  
ride over a 10-mile course, the win-  
ner to be presented with any make  
bicycle he might select. At the  
beginning Ruby Dexter took a lead  
and maintained it until he was  
taken ill, then it was "whip-saw  
John" between Angus, Giles and  
King, when Giles met with an acci-  
dent and was obliged to withdraw.  
King took the lead and kept it un-  
till the last day, when, by deposit-  
ing a reserve fund of more than  
2000 ballots, Angus came out first  
man, with King only 275 votes  
behind and Sylvester third.

Angus will select a Stearns wheel  
as the prize for winning the race.

**Road Race Saturday.**

Entries for the H. A. A. C. road  
race to take place Saturday after-  
noon, closed at Thrums bookstore  
yesterday at 5 p. m. Following is  
the list of the names entered:  
George Angus, D. G. Sylvester, T.  
King, Edwin Paris, Percy Lish-  
man and Arthur Giles. These  
names have been handed to Dave  
Crozier who will attend to the  
work of arranging handicaps.

Toma, the Japanese police officer,  
has had his whiskers cut and now  
looks as any other Japanese.

## THE YATMAN MEETINGS

Interesting Sermon on Daniel  
Last Night.

HITTING THE WRONG TARGET.

Something About Having a Purpose.  
The Efficacy of Prayer—The Differ-  
ence in Men Here and at the Coast.  
Tonight a Sermon Will be on Paul.

"Daniel" was the subject of Mr.  
Yatman's discourse last night and  
Y. M. C. A. hall was well filled  
by people who were anxious to  
hear the celebrated evangelist.  
As a prelude Miss Boyer, a young  
lady who has been residing on  
Kauai sang "Are you watching day  
by day," most sympathetically.

At the close Mr. Yatman an-  
nounced that this talk about  
Daniel was the first of three char-  
acter addresses. "I wish you  
could all hear them. It may  
sound egotistical to you to hear  
me coax you to come and hear a  
preacher, but I am going to ask  
you to come to-morrow night.  
Some of you I dare say get tired  
of my telling you that a revival  
is needed in Honolulu, but it is a  
fact, and they need it in the  
churches too. I am a preacher  
myself but I need to be revived  
continually and I don't mind tel-  
ling you that I do.

This sermon of mine to-night is  
on Daniel and is in two parts.  
During the first you must keep  
awake; in the second you may  
slumber if you choose.

By my experience wherever I  
have preached or led revival ser-  
vices I have learned that it is a  
hard thing for the human mind  
and heart to get hold of Christ.  
In this sermon to-night I will  
show you a character that will be  
a stepping stone for you all. If  
you will read in the book of  
Daniel the life of this great man  
and ponder over it there should be  
no trouble for your hearts to be  
revived. Ah! my friends, I pity  
the man or woman who comes  
short of finding Christ. He has  
missed the most valuable thing in  
life. Daniel was a man of char-  
acter both marvelous and eminent  
and the secret of his life was his  
trust in God. You who have read  
the Bible know what his faith in  
God amounted to and knowing it  
I want to bring you to know God  
to-night—not at another time.  
Don't put it off my friends, to-  
night is when you should see God.

Daniel had several things to  
make him great and he had a  
God—the God of the heavens and  
earth. You know and I know  
there are lots of people on earth  
who have different things to wor-  
ship. Some of them, and there are  
lots of them who worship gold. I  
call that the yellow fever. Some  
people worship I wish I had a  
knowledge of your God. I would  
know better how to talk to you.  
There are may here to-night who  
think a great deal more of pleas-  
ure than they do of God but let  
me tell you that you do not have  
to wear long faces to be pious.  
It is all right to have pleasure, its  
all right to have gold, but let me  
advise you never to allow gold to  
come between you and your God,  
never gold before God, never  
dance before Deity.

Daniel had a purpose in life and  
you should have one too; and let  
your purpose in life be a noble one.  
You should find some place in the  
Church of Christ and there work  
until you die—let that be the aim  
of your life. Remember how easy  
it is to get a right aim and a wrong  
one. Let your purpose in life be  
the right one. I remember once  
attending an international rifle  
match and one of the marksmen,  
a bright looking man, raised his

gun and blazed away in the most earnest manner imaginable and he found when the smoke had cleared away that he had struck the target square in the center but it did not count because he aimed at the wrong target. If he had been as careful in the selection of his target as he was in his aim his object in life would have been attained. My friends be careful to select the right target.

You must have a purpose in life and let that purpose be a good one. Never do right for policy sake, do right because it is right. Stand by it whatever comes, stand by it for the sake of God. I know there are some people in Honolulu who are good and upright here because in this little community it is politic to be so but just let them go to the Coast and see how they turn loose.

Daniel used to pray a good deal, he had a prayer of the right sort. I would rather know how to pray than preach—I don't mean just saying things but to pray. How many of you really and truly pray? When you begin praying for yourselves you will be converted but you must pray. In this, my friends, religion will help you—it will make a man conform to the prayer he makes. The prayers of Daniel saved the wise men; when he asked for a little more time for the interpretation of a dream he wanted just a little more time to pray.

Daniel had an influence, you have an influence, everyone has. During the sermon Mr. Yatman gave a graphic description of Daniel and the den of lions. The illustrations and word pictures throughout the sermon were most touching.

To-night Mr. Yatman will deliver the second of the series. Paul will be the theme.

#### U. S. S. BENNINGTON AT HILO.

Reception to Minister and Mrs. Willis—Other Events.

The U. S. S. Bennington arrived yesterday morning twenty hours from Hilo, which place she left at 10 a. m. Tuesday.

While the Bennington was at Hilo she was anchored about a mile and a half from shore. The officers and crew remained aboard nearly the whole time during their stay at Hilo. Rain came down in torrents for all but one of the twelve days.

On Saturday last the captain and officers of the Bennington tendered a reception to the Hilo society people which afforded them a great deal of pleasure.

On Monday night the Americans of Hilo gave a reception to Minister and Mrs. Willis at Spreckels hall. Over 150 people were present. The reception lasted from 8 to 9:30 o'clock. The hall was then cleared and dancing indulged in until midnight. After that came an elaborate banquet and then dancing was resumed until 3 o'clock in the morning. The elite of Hilo was present to welcome the American Minister and Mrs. Willis. The Bennington officers were out in force.

**Schweinfurth May Escape.**  
ROCKFORD (Ill.), Oct. 25.—It is now almost certain that the case against George Jacob Schweinfurth, the bogus Christ, will be continued in the Circuit Court to-morrow until the next term of court in January. The State is unable to get its witnesses here, having no available funds for the purpose, and many now consider it doubtful whether the matter will ever come to trial.

## NOTICE.

All advertisements intended to be published in the Semi-weekly GAZETTE must be at the office of the Company not later than 5 o'clock P. M. on MONDAYS and THURSDAYS, and for the KUOKOA, THURSDAYS; otherwise no assurance can be given that same will be published in the first issue following.

HAWAIIAN GAZETTE CO.,  
GEO. H. PARIS,  
Manager.

MISS D. LAMB,  
Lawyers' Clerk  
AND  
Notary Public,  
Office: With J. A. Magoon.

## BY AUTHORITY.

### PROCLAMATION.

The past year has brought varied experiences to the Republic. With abundant crops and fair business prosperity, both foreign and domestic, have come the critical incidents of domestic disturbance and dangerous pestilence; from both of which the country has been mercifully delivered with small loss of life through the blessing of Providence on the efforts of the government and its citizens.

In view of these things and other countless benefits which have been vouchsafed to us, I SANFORD B. DOLE, President of the Republic of Hawaii, recommend that THURSDAY, the 28th DAY OF THIS PRESENT MONTH, NOVEMBER, be set apart as a day of National Thanksgiving to Almighty God for the blessings of the past year and the promise of the future, and of prayer for the continuance of His favor.

(Signed) SANFORD B. DOLE.

By the President:

(Signed) J. A. KING,  
Minister of the Interior.  
4147 1700-tf

#### Regulations of the Board of Health.

HONOLULU, November 13, 1895.

The taking of fish, shell-fish or any product of the sea, or water of any pond, stream, creek, inlet, bay or harbor, or upon the sea to a distance of two miles from the shore within that portion of the waters of the District of Kona, Oahu, lying between a line formed by the east wall of the enclosure for dredgings at Kakaako to its south-west corner, thence to sea in a straight line with the spar buoy, on the east and on the west by a line running from junction with shore of the west wall of the Kaili-Kapu fish pond near Moanalua to its most western point, thence straight to sea in line with the most western point of the islet known as Kahakaaulana, in the District of Kona, Oahu, and from mountain to sea is strictly prohibited.

The sale of fish and of all products of the sea is prohibited in the District of Honolulu, excepting at the new market building and such other places as are specially permitted, where scale fish, oysters, clams and lobsters from water outside of the above limits may be exposed for sale under supervision of Inspectors appointed by the Board of Health.

Such Inspectors shall have power to seize, condemn and destroy any fish or product of the sea exposed for sale, or brought to the market, which they shall have reason to believe was taken from the locality prohibited by these regulations, or which shall appear to be unfit for food.

The regulations of the Board of Health relating to the taking and sale of fish dated October 11, 1895, is hereby rescinded.

By order of the Board of Health.

J. T. WATERHOUSE,  
President.  
4149-3t

**DESCRIPTION AND TERMS:**  
Creole is the gamest, fastest and best bred stallion that has ever been imported into the Hawaiian Islands. He reduced his record of 2:30 to 2:15 in Petaluma, Cal., August 24, 1894, distancing his whole field in the first heat; then again to 2:15 in Stockton, Cal., September 23, 1894, winning the first heat in 2:15, fourth beat in 2:15, and fifth heat in 2:19 1/4, proving that he is a remarkably game as well as a speedy race horse. ("Creole by Prompter out of Grace by Buccaneer shows that he is capable of getting a mark of 2:10 and is one of the gamest stallions seen this year, and besides being game, is one of the best formed, and remarkably intelligent."—Breeder and Sportman, Sept. 25, 1894.) He is 15 1/2 hands high and of powerful build throughout. His color is glossy black with one white hind foot. His disposition is all that could be desired, and his action superb. He is a sure foot galloper.

Terms, \$50, with usual return privilege. Will make the season at the

# RACING MINIATURE YACHTS.

Big Time November 16th—Yachts in This Harbor—Luau.

Saturday, November 16th, is the anniversary of King Kalakaua's birthday. Arrangements have been made for exciting miniature yacht races to take place at the King's boat house on that day.

For several months past various people have been very busy constructing small yachts after the latest and most improved patterns. So great became the competition that a society called "Hui Moku-lili'i Honolulu" was formed. Cupid Kalaniana'ole was elected president and Lilikalani vice-president.

Since the formation of the society more yachts have been built and competition has grown stronger daily. Many people have stood on the docks within the last fortnight or so and wondered what was the meaning of so many toy boats out upon the water. Nor will the mystery be solved for some of these until they read this report. The owners have been testing their boats for the great races to begin at 9 a. m. Saturday.

Following is a list of the miniature yachts and owners: David Kawananakoa's "Lady Eva"; Kawa-wai's "Healani"; Frank Wai-ai's "Yacht Mano"; S. K. Kaika-lu's "Lawealilo"; Hugo's "Kapiolani"; Namaielua's "M. R."; Hoo-lu Napoleon's "Wild Bird"; Luio Kamoku's "Nukamakiu"; Kawa-nanakoa's "Umi"; Kalaniana'ole's "Nawemalie"; Kalaniana'ole's "Lady L."; Waia Napoleon's "Malali"; Kiri's "Pulumikai"; James Rice's "May" and Moses' "Kanoelani."

Queen Dowager Kapiolani has offered a cup which will probably be placed on exhibition today.

After the races Saturday a grand luau will be given at the boat-house, beginning at 2 p. m.

## THE FLOWER MISSION.

Arrangements for the Entertainment—Donations Invited.

At a meeting of the Hospital Flower Mission yesterday morning, the various committees reported on the work done so far and made preparations for the entertainment on the evening of November 26th. Following are the committees:

Refreshment committee—Mrs. T. R. Walker, Miss Pindar and Mrs. Andrew Fuller.

Fancy table committee—Mrs. von Holt and Mrs. Birnie.

Flower table committee—Mrs. Eleanor Graham and Mrs. H. H. Renjes.

Candy table committee—Mrs. F. R. Day and Miss Levers.

Committee on tickets—Mrs. C. L. Wight and Miss Castle.

Donations of ice cream, cake, fancy articles, flowers or candy will be gratefully received by the various committees.

Preparations for the entertainment are being pushed along. A magic lantern show will be one of the evening's features. The Flower Mission has made the admission fee to cover all events on the program.

## The Maybrick Case.

NEWARK (N. J.), Oct. 25.—New Jersey's State Federation of Women's Clubs refused at its closing session to-day to take any action in the case of Mrs. Florence Maybrick, serving a life sentence for murder, in an English prison.

Rev. Mrs. Hanaford brought the subject up at the morning session, and suggested individual effort in furthering the plans for Mrs. Maybrick's release. This idea met with approval, but the federation would not adopt a petition to Queen Victoria, as some of the members desired.

PERKINS

## THE PERKINS DIRECT MOTION Steel Mill. Simple, Strong, Efficient.

The Above Cut shows one of Perkins' Galvanized Steel Mills, mounted on a Galvanized Steel Tower.

NOTE THE FOLLOWING POINTS OF ADVANTAGE:

THE  
WHEEL.

obviates the bending and breaking of the ends of the sails, a serious objection to most steel mills. To make the sails still more rigid we connect each sail, near the middle of its length, with the sail on each side of it, by means of bolts. The sails are of best cold rolled steel, and are of such size as to give us more wind surface than is found in any other mill of which we have knowledge. The sails are set at just the right angle and curved to give the maximum power.

THE  
RUDDER.

Most careful attention is given to the construction of the rudder, making it firm, strong and thoroughly braced. The arms of the rudder are made of the best fire spring steel, which is better than angle or channel steel or gas pipe. Our truss rod brace will prevent the rudder from warping or swaying around against the wheel.

THE  
REGULATION.

The governing device has made the Perkins mill very popular, and has been acknowledged by competitors to be the best, and would doubtless be used by all of them but for the expense of making the change. By our adjustment of the rudder we place the wheel square to the wind while at work and edgewise to the wind when at rest. The same long and short steel hinges are used to raise the rudder when mill is out of gear or at rest. This plan has proved so satisfactory that eleven companies have adopted it since our patents expired.

THE  
CASTING.

The main casting of this mill has been carefully designed with a view to securing great strength and durability. In its construction only the best iron is employed. It is well adapted to its work.

THE  
BEARINGS.

All the bearings of this mill are of liberal length and provided with our graphite bushings or self-lubricating box. These do not require oiling at all. In fact, we are now making mills with no oil holes in boxes.

THE  
OTHER PARTS.

We make this mill in two sizes, viz., with ten and twelve foot wind wheels. The tower is made with four corner posts of angle steel, bands and braces of channel steel, all parts being fitted by template so that they fit exact, and all a workman needs to erect is a hammer, punch and wrench. The ladder is securely made and ready to bolt on tower. It is safe and far preferable to the short steps on corner posts used on most towers. The anchor post is five feet long, of good heavy angle steel, and a base eight to thirteen inches in diameter, according to the size of mill and height of tower, is cast on the end of same, serving the double purpose of a support under foot of tower and an anchor. Just at the top of ground we fasten a piece of 4x4 inch oak in angle of corner posts, letting it run down about two feet, to give it more size in the ground. The arrangement of the bands and braces is such that they support the corner posts at three different points, where other towers have but a single support, thus making our tower three times as secure against buckling in extremely strong winds. This plan was originated by us and is fully protected by patents.

Gould's Windmill Pumps of all sizes are furnished with the above mills. We have Steel Windmills 8, 10 and 12 feet diameter, also Wood Mills of 10, 12, 14, 16 and 18 feet diameter. We will furnish catalogues and descriptive matter to any one desiring information.

## E. O. HALL & SON,

Agents Perkins' Windmill Co. & Gould's Manufacturing Co.

## For Twenty Years

We have been tailoring at moderate prices.

Twenty years of experience to profit by.

Our KNOWLEDGE of CLOTHES for STYLE, FIT, and WORKMANSHIP, have stood the test as the liberal patronage we have received assures us of that fact.

We have just received our fall stock of woollens, which we are offering at prices that will astonish you.

## H. S. TREGLOAN & SON.

"Heywood is in it."

We lay special stress on the excellence of our goods, always keeping the quality up to the highest point, and while maintaining our reputation in this respect, we go to the other extreme in keeping prices down to the lowest point. We know of nothing that builds up business like the selling of first-class goods. We sell them and don't sell anything else.

## Read the ADVERTISER.

75 Cents a Month.

## Delivered by Carrier.

WALLACE R. FARRINGTON, - - EDITOR.  
THURSDAY, : NOVEMBER 14, 1895.

A BOURDEAUX inventor has discovered an explosive, which he calls "pyritine," that bids fair to be an active element in the revolution of the art of warfare. The substance is more powerful than melinite, and the inventor claims that, with the new repeating rifle which he can put on the market, a man can carry 240 rounds of ammunition without being overweighted.

SOME of the opposition harpists who have been twanging a discordant tune on the police regulation string will do well to call at the Marshal's office and get a copy of the new regulations that have recently gone into effect. They may get a new idea, although it is hardly probable that they can come to believe that anyone outside of their own select circle is doing or is capable of doing any thinking.

THE interesting description of the general working plan of the experiment stations of the United States, given by Professor Maxwell, ought to be carefully read by every citizen of this country interested in the development of our agricultural industries. During the few years that the experiment stations of the United States have existed the people have found that the public money expended for their support has been well invested, and is bringing in larger dividends every year. Certainly the people of Hawaii can ill afford to overlook the example given by these stations in the States. Careful scientific investigation by capable men with ways and means at their disposal cannot be neglected if this little country is to keep pace with its neighbors. We have the capable men, and it now remains to furnish the ways and means.

THOSE CHINESE LABORERS.

The statement published in yesterday morning's ADVERTISER regarding the Chinese laborers at the quarantine station contained certain errors which we desire to correct. On further inquiry we have ascertained that the attention of the Hawaiian Government to the trouble among the Chinese laborers per the steamer China was the result of our article of some four weeks ago and not the outcome of any official communication of British Commissioner Hawes. To make assurance doubly sure that no such thing might occur as had been reported in the previous article, the Hawaiian Government put Mr. Girvin at the quarantine station at this time, and invited Mr. Hawes to have some one to represent him there, so that he might be convinced that everything was being done fairly and squarely with regard to obtaining the contract signatures of the Chinese laborers. Mr. Hawes, however, declined to send anybody to the quarantine station, stating that he was quite satisfied that the work was being carried on in a thoroughly impartial manner under the auspices of the Hawaiian Government.

It appears that the laborers who arrive here from China are thoroughly acquainted before they leave their homes, with what work they are to do here; that \$12.50 per month is the regular rate of wages and that they must confine themselves exclusively to agricultural labor. But on the trip from Hongkong mischievous fellow passengers tell them that they can obtain work in the town of Honolulu at a much higher rate of wages and in consequence of such misstatements, there are in every lot a certain number of laborers who act in bad faith towards Lau Chong and the Planters' Labor and Supply Company by declining to

comply with the conditions under which they were brought here. We are convinced that many of the derogatory reports current concerning matters at the quarantine station have emanated from parties who desire to injure Lau Chong.

While we desire at all times to support and uphold small industries and protect the mechanics in every way possible, it is far from being the policy of this paper to cast discredit upon any other interests of this country or any of their representatives or their agents.

A MILLIONAIRE of South Australia with no amount of "political pull" recently found out, much to his chagrin, that it is not always "money that makes the mare go." He thought himself insulted by Premier Kingston, who is a self-made man and a friend of the laboring classes, and waited for the Minister with a horse whip seeking to redress his wrongs in his own peculiar way. The Minister captured the whip and gave his opponent a sound drubbing. Premier Kingston's political stock is now quoted above par and the millionaire is seriously contemplating retirement to private life.

HOW TO PREVENT CROUP.

SOME READING THAT WILL PROVE INTERESTING TO YOUNG MOTHERS HOW TO GUARD AGAINST THE DISEASE.  
Croup is a terror to young mothers and to them concerning the cause, first symptoms and treatment is the object of this item. The origin of croup is a common cold. Children who are subject to it take cold very easily and croup is almost sure to follow. The first symptom is hoarseness; this is soon followed by a peculiar rough cough, which is easily recognized and will never be forgotten by one who has heard it. The time to act is when the child first becomes hoarse. If Chamberlain's Cough Remedy is freely given all tendency to croup will soon disappear. Even after the croupy cough has developed it will prevent the attack. There is no danger in giving this remedy for it contains nothing injurious. For sale by all dealers. BENSON, SMITH & Co., agents for H. I.

Timely Topics  
THE  
AERMOTOR  
—AND—  
Steel Tower.

In as much as most of our remarks have been confined to the pumping Aermotor we wish to call your attention this week to the geared motor for barns. Undoubtedly sometime in the past you have concluded to equip your mill with shafting for grinding of corn and feed for your stock, and perhaps attach a grind stone and buzz saw, and sent away for a catalogue for estimated cost and the location of your building for horizontal and vertical shafting, but finally came to the conclusion that the cost and difficulties of constructing were too great to warrant the expenditure. Now here is where the Aermotor does away with all those great obstacles and petty annoyances. In our plan you have only to secure the vertical 8x8 mast in position, put the Aermotor on one end and the grinder on the other. The mast then holds it all. You can belt to different machines and drive your pump and feed grinder at one time. The feed grinder is always in position. You have only to turn a hand screw to adjust the lower grinding ring sufficiently close and it is already for use, or in an instant you can put on a belt to run any other machine. The saving of power effected by having all bearings rigidly connected in one casting and therefore in proper place, is no less important than the matter of convenience allowed too. The Aermotor runs in half the time required by other mills, and regulates in a strong wind as well as in a mild wind. It handles the pump the smoothest of any mill made. An eight inch stroke Aermotor will throw more water with less wind than any of the old style mills.

If you are in need of a mill buy an Aermotor and your neighbors will congratulate you on your foresight.

BRUCE CARTWRIGHT

THE HAWAIIAN SAFE DEPOSIT

And Investment Company  
STOCKS HAVE BEGUN TO MOVE!  
The favorable weather during the past summer gives promise of a large crop for 1896, and with an estimated shortage of the world's production of One Million Tons of Sugar, higher prices are looked for.

Persons alive to the situation are beginning to purchase now. During the present month we have made more sales of First-Class Stocks than for the past twelve months.

We are now buying and selling the following:  
Hawaiian Sugar Company Stock,  
Ewa Plantation Company Stock,  
Haiku Sugar Company Stock,  
Honolulu Sugar Company Stock,  
Hawaiian Agricultural Company Stock,  
Paia Plantation Company Stock,  
Mutual Telephone Stock,  
Hawaiian Electric Company Stock,  
Also Hawaiian Government Bonds, and Plantation first Mortgage Bonds.

We have some very secure boxes in the Safe Deposit Vaults to let by the month or by the year at very reasonable rates.

For particulars apply to

CALL EARLY AND GET FIRST CHOICE.

L. B. KERR, Wholesale and Retail Importer,

QUEEN STREET.

TO ALL WHO USE PAINT:

The undersigned, L. C. Ables and H. P. Walton, purchased from Charles J. Wagner, the inventor of Peerless Preserving Paint the exclusive right to manufacture, use and sell the PEERLESS PRESERVING PAINT in the Hawaiian Islands.

On the 26th day of September, 1895, the Republic of Hawaii granted to L. C. Ables and H. P. Walton a Patent No. 111, granting to them the exclusive right to make, use and vend PEERLESS PRESERVING PAINT throughout the Hawaiian Islands.

The Republic of Hawaii has also granted to L. C. Ables and H. P. Walton the exclusive use of the words PEERLESS PRESERVING PAINT as a trade mark throughout the Republic of Hawaii for the term of 20 years.

Certain parties in San Francisco have recently been sending to Honolulu under the name of PEERLESS PRESERVING PAINT a spurious article not only inferior to the genuine paint, but one which is positively injurious to any metal to which it may be applied.

We hereby warn all persons against being defrauded into using any but the genuine PEERLESS PRESERVING PAINT, which can be obtained only of Ables and Walton.

We also hereby warn all persons against buying, selling or using any article under the name of PEERLESS PRESERVING PAINT except that sold by us as such buying, selling or using will be a direct infringement of our Patent and Trade Mark, and a violation of our rights, subjecting the persons buying, selling or using such paint to a claim for damages by us in accordance with the Hawaiian Law.

L. C. ABLES.  
H. P. WALTON.  
Honolulu, October 19, 1895.

Romping Children

Will be parading our streets on Monday to school. Clothes that were good enough last year have been worn out during the long vacation. Every mother's heart beats with pleasure when her children leave for school clad from head to foot in a good, clean, substantial outfit. This fitting out for the school children will have our special attention for the next week. Do you want to be one of the many parents to be able to say that your children look as nice as so and so's? Let me assist you.

## EXPERIMENT STATION.

A Successful Institution Every-where.

## IMPROVEMENT IN CATTLE.

What the Station Has Done in Other Countries—Proper Food Supply, Increased Product—The American Hog Abroad is Now in Favor.

(Continued.)

It was in the year 1885 that Prof. Johnson established the station at New Haven, Conn., and the first founded in this country. More stations were being organized in other parts of the land, when, five years ago, that wise and far seeing measure—the Hatch Act, was passed, whereby the Congress of the United States enacted that each State in the Union should have an experiment station for the investigation of problems and the distribution of knowledge relating to its own particular needs. And, today, gentlemen, we have in this country, including branch places, not fewer than sixty experiment stations.

The question may be asked what are the stations doing? In the first place, each station is studying the problems and furnishing the information required by the farmers of its State. Feed stuffs and fertilizers are sent to the laboratory of the station and a statement of this composition and values is returned. The station is thus the bureau of agricultural inquiry of the State, furnishing the special knowledge which the individual farmer is unable to procure for himself. Again, the stations, as we have said, are busy with new problems. They are studying breeds of stock with respect to their fitness for given climates and particular purposes. The great questions are what breeds yield the greatest value in milk and meat for a given weight of food, and what are the conditions of management under which the greatest results are obtained? With milk, for example, it has been found that the largest volume does not necessarily mean the greatest amount of actual human food. Some milks contain five pounds of butter to the hundred, and others only two pounds. These are vital facts. Also the methods of extracting the butter from milk have been revolutionized, and today the butter can not only be obtained in half an hour after the milk has left the cow, but 20 per cent. more is recovered than by the older methods.

One other great work is the combating of animal and plant diseases that cause losses in our herds and crops which it is difficult to over-estimate. The losses from insect ravages annually in the United States are put at \$380,000,000. Prof. Comstock estimated the loss to the cotton States from the cotton aphis, in the year 1879, was \$30,000,000. And what is the total sum expended upon our stations in comparison with the loss caused by one insect eating upon a single crop?

And what are the stations doing for us in Louisiana? From Baton Rouge we learn that losses amongst live stock are being greatly reduced by the veterinarian's skill.

Again, the cotton caterpillar is no more feared as formerly, because its ravages can be checked. The orange orchards are being ridden of the scale insect by the hand of the entomologist.

At Calhoun experimentation is conducted, embracing grasses, forage, grain and cotton; and live stock experiments are carried on with oxen, sheep, hogs, and even poultry. The hill farmers have had demonstrated for them the fertilizers most suitable to their lands. They have also learned the value of mixed farming instead of trusting wholly in one or two crops. Moreover, special attention has been given to tobacco, and the endeavors which have been made with the "yellow wrapper" are already a pronounced success. As a direct outgrowth of this work we learn that a company has been organized at Calhoun with a capital of \$25,000 for the manufacture of plug and smoking tobacco. And the sugar station at Audubon Park has already spoken for itself. Eight years ago, and before the station was opened, the yield of cane per acre was twenty tons, and that was a good average. Today, from thirty to forty tons per acre are readily grown. Formerly, 125 pounds per ton of cane was considered an excellent result of the sugar house. Today the planter requires to know why if less than 200 pounds of sugar per ton are made, and the capacity of the houses has developed from 200 to 300 tons of cane per day, to 600 tons even up to 1000 tons per day. Also the most careful experiments are being made in order to demonstrate the fertilizers which give the best returns in weight of cane and sugar per acre. It may, with a very proper confidence, be said that in no State of the Union are experimentation and the station rendering a more palpable and abiding good than in the State of Louisiana.

Mr. President, we have, so far, considered the origin, purpose and work of the experiment stations of the individual States. We may now allude to our great National Experiment Station, the United States Department of Agriculture; and, sir, the person who does not regard that department of the Government as the country's experiment station has, in so much, failed to comprehend its purpose and possibilities. Like that of the State station, its primary function is inquiry, and a chief mode of inquiry is experimentation. In the first place, all the State stations centre in the Department of Agriculture, and from that centre the results of each are disseminated for the benefit of the whole. The department is also the National Bureau of Agricultural Information, furnishing through its statistical division all data upon production, dis-

tribution and consumption of agricultural products in this and all other countries. The great possibility, however, of the Department of Agriculture as a national power for good does not lie in its clerical and perfunctory offices, but in the course of actual experimentation. It must consist in engaging its scientific divisions in the study of problems which concern the broader public, and which cannot be adequately undertaken by the individual State station. For example: In the recent past efforts were directed towards forming two more zones in which the production of sugar will be possible in this country. In the one, experimentation has been pursued in order to found an absolutely new industry in the growth and manufacture of sugar from sorghum, with Kansas for its centre. In the other, the great beet sugar industry of Europe is being introduced, and its area will embrace vast tracts of land extending from the Atlantic coast west to California. Now, either one of these undertakings is too great for a State to take in hand. Each one requires, and has, an experiment station for its own especial end, and both these stations are very properly maintained by the public treasury.

One other great work is that of the Bureau of Animal Industry. The scope and results of this work probably exceed even the most precise calculation. It is true that the diseases of the hog are still baffling the most elaborate efforts to bring them within specific control. The work alone, however, which has resulted in ridding the country of pleuro-pneumonia in cattle has paid, more than a hundred fold, the cost of administering the Agricultural Department of the Government. These results enabled the late Secretary of Agriculture Rusk to present a clean bill of health with every cargo of animals which the American farmer offered for sale in European markets. Likewise, the microscopic investigation instituted by our late Secretary made it possible for the great "American hog" to be received where, hitherto, he had been rigidly forbidden. We have said that it is difficult to over-estimate the value to the American agriculturist of the results accomplished by Secretary Rusk. I have often stood in the meat markets of middle England and watched the sale of American and English beef proceeding side by side. The home beef sold for 20 cents to 24 cents per pound, and the American for 10 cents to 16 cents per pound. To a judge of meat, there was no real difference. But what were the poor people saying who bought the American beef and pork? One was heard to say: "Nobody knows what live things are in it?" Another said, "Well, it can't be worse than no meat at all." These remarks, with the prices of the American article, told the whole tale. It was a matter of no confidence. Now, the scientific work of the Department of Agriculture has not only resulted in obtaining for the meat products of this country an entrance into all the best markets of Europe, it is giving to the people in those countries a trust in the soundness of our meats, which will enhance their value several cents per pound. Only a few weeks ago, a committee appointed by the British House of Lords, gave its verdict declaring the general quality of American beef equal to, or perhaps superior, to that of the home beef of England.

And what is the cost to the country of our National Agricultural Experiment Station? Before we reply, let us recall a statement that the nation's losses annually by insect ravages, many of which are preventable, are \$380,000,000, or \$6 per capita of the whole population. Now, the appropriations made by Congress to the Department of Agriculture for the current fiscal year, including also the sums granted to the State Stations, were \$3,325,500, or almost exactly 5 cents per capita of our people. But the present Secretary of Agriculture says that that amount is too much, and, in the estimates for the forthcoming year, he comes forward with a huge proposal to save the people of the United States one half of one cent per head per annum. Let us hope that there will be no more talk of a depleted public treasury.

As a part of the experiment station, and usually affiliated with it, is the Agricultural College. On this phase of our present modes of agricultural inquiry we shall be brief and leave its consideration as a home topic to others who will treat it specifically. Yet we will just step outside for a moment to a related observation recorded in that wonderful little country, Switzerland. At the Agricultural School of the Confederacy one week is set apart for lectures by the professors to farmers assembled from all parts of the country. The object is to keep the farmers up to date with each new step of agricultural science, and with every technical discovery that may be of value. At one of those courses I observed farmers present varying in age from eighteen to sixty years.

We do not need to speak of the present day's need of stations and agricultural colleges, but the words of a very distinguished Judge may not be out of place here upon the subject. "I have often said, when we had occasion to interview the Permanent Secretary of Agriculture of the French Government in Paris upon the question of beet sugar production, we finally asked that gentleman if he considered the experiment station still essential to the development of the industry. He replied: 'The experiment station is more important to day than ever it was. And not only the station, I am arranging for opening a technical school, where our young men shall be taught the theory and practice of beet sugar production.' Since that time the French sugar school has been opened, and here, I believe, I am right in saying that the French authorities, before establishing their own school, fully informed themselves respecting the character and mode of conducting the Louisiana Sugar School at Audubon Park.

Mr. President, in conclusion, we repeat that the experiment station and the agricultural college are the great present modes of agricultural inquiry. They typify the evolution and development of agriculture, and illustrate the methods by which it is conducted. Their relation to farming today is comparable to those of steam and electricity to other great industrial processes of the present age. And the man who does not consider and act upon this truth locates himself some thirty years in the rear of his time.

And when we contemplate the career of the agriculturist and the future possibilities of agriculture, we are impressed with the scope and honorableness of the calling. All callings are honorable, providing they are honest; but consider that of agriculture: there is not a science that does not honor, and which is not honored by agriculture. To the dignity of the calling is added the freedom of the farmer's life, and dignity and freedom have composed the atmosphere in which the world's most notable examples of human greatness have been nourished; and there is still the beauty of the life, lived and engaged with nature and her most lavish endeavors to make beautiful the earth, and ample to nourish the sons of men. And yet, our young men go from the farm to the city. They leave the health, freedom and dignity of the country and the silent grandeur of the forest, and gather in the narrow streets and sunless hovels, and even frequent with the unwashed. And they choose this to the descended honors of ancestral homes. They measure the streets at the close of day rather than survey the future inheritance from their father's doorstep, and press into foul and heated halls, whilst their mother and sisters, from the old verandah, watch the sun go down over a bountiful land,—perhaps over the beautiful Teche! immortal with the song of Evangeline.

## HOW IS THIS FOR SPORT?

A Genuine Old-Time New Year's.

### SEVERAL GOOD RACES PROMISED.

The Track and the Horses—Bicycle Races—A Novelty Race—The Track in Order—Good Sport Promised on New Year's—Big Crowd Expected.

"Ho for the races! They're off! They're at the quarter! They're at the half! They're at the three-quarters! She wins, she wins! Here old sport you gave me the tip, here's a cool five hundred as half my winnings. Bunged up? Well I guess not. Did you see her on the stretch and old Jim a-leaping over as if he were part of the horse himself?"

New Year's Day need not be a dull one for those who enjoy seeing fast horses pull against one another on a fine track. That is just what is going to happen here on Kapiolani race track at 1 p. m. January 1st. next, and in order to make the affair a marked success, men have set to work cleaning the grass from the track and putting everything into ship shape. Preparations are being made for a grand meet and horses have been in training at Kapiolani track since last Sunday.

The name of Charles David need only be mentioned to give the sports a hint that something good will take place, barring a rainy day. Mr. David has the general management of the New Year's meet. He is being assisted by the little man with large glasses—an expert in the horse line—Mr. Jack Gibson.

Here are the interesting events of the day:

- 1st.—5-mile bicycle race. Prize: E. O. Hall trophy. Free-for-all.
- 2d.—Half-mile bicycle race (juvenile). Prize: not decided. Open to all non-winners under 16 years.
- 3d.—Bicycle race. Prize: not decided. Arrangements to be made later.
- 4th.—Running race. Prize: \$100 purse. One-half mile and repeat. Weight for age.
- 5th.—Trotting race. Prize: \$100 purse. 3-minute class; mile heats, best two in three. For Hawaiian bred horses.
- 6th.—Trotting race. Prize: \$100 purse. 2:40 class; one mile heats, best two in three. Free-for-all.
- 7th.—One mile novelty running race. Prize: \$100 purse. Free-for-all; first horse reaching the quarter to receive \$25; first horse reaching the half, to receive \$25; first horse reaching the three-quarter, to receive \$25; first horse reaching home to receive \$25.

This race will be of special interest since it will allow admittance of both long and short distance runners.

The bicycle races will be the first on the program in order to assure the contestants of a good track. The juvenile race will be open to amateurs who have never won a race in a regular track program heretofore. The senior races will be arranged for later. Prizes have been offered already.

An interesting part of the race proceedings is found in the list of horses that are now at the track stables in training for the New Year's meet. They are nearly all new arrivals so that there will be a good chance for guessing when the time comes. The track stables is not the only place however where horses for the New Year's meet are being worked. Maui, Hawaii, and the other side of this island claim some surprises also; but no one is saying a word just now. Each horse will be trained up to the standard and then when the test comes look out for the result.

Mr. David has lately instituted a kind of a training school for colts at which these receive their first lessons in the art of record breaking. He is doing good work there. Aside from this he has the regular training stables. In the two are contained the following horses:

Tootsie, 5-year old bay trotting mare, by Re-elect (2:28), foreign bred. Property of James Holt. Never raced on the islands before.

5-year old brown trotting mare (unknown), Hawaiian bred.

Nancy, 3-year old trotting filly. By Nutgrove out of Gerster. Hawaiian bred. Property of Tom Hollinger.

Trotting mare Lottie L. This animal is so well known as to need no description. She is in fine fettle and ready for work.

Marengo, 6-year old bay trotting gelding. By Richard's Elector. Property of Gus Schumann.

Four-year old trotting stallion. By Marine, Hawaiian bred. Property of Clarence Macfarlane.

Emin Bey, 5-year old gelding. Property of Charles David. From Maui. This horse is popularly known as the "Spotted Mystery" or the "Ghost of his Father." He closely resembles a leopard in the spots that cover his body. His father was an Arabian circus horse taken to California in a circus and then brought to the islands by W. Y. Horner. Emin Bey is of a very nervous disposition and shows this phase of his nature to good advantage when people gaze at his spots.

There remains still another horse in Mr. David's part of the stables and this a black thoroughbred stallion colt. He is now getting his first lessons and promises well for the future.

Coming now to Horace Crabbe's stables the following horses are found:

Yankee, 4-year old brown gelding. By Shenandoah out of a Stanford mare. Hawaiian bred. Property of Jim Holt.

Rainbow, 3-year old bay gelding. By Shenandoah out of Fashion. Hawaiian bred. Property of Horace Crabbe.

Boston, 4-year old gray gelding. By Stanford out of imported mare. Hawaiian bred.

James Kahea, a native Hawaiian, has charge of Horace Crabbe's horses. He understands horses thoroughly and does the training himself.

Frank Halstead has promised not to run Magnet in any of the New Year's Day races so as to give the new horses a chance. Although Mr. Halstead's horse is not barred from the races it would hardly be a fair contest were the animal to be entered.

To conclude, it might be well to mention that Mr. David is not without his mascot. This is in the form of an extra large game cock which has a stable all to himself and feeds upon the best that the country affords. He is proud of the prominence that his position of mascot has given him and stalks about in his stable as if he owned that particular spot. Mr. David has a language known only to himself and the rooster, to employ which is sufficient to cause a stagger. He will not cut a prominent figure in the races but he will give assurance that all will turn out well on New Year's Day.

Sarah I. Griffin.

### Only a Scar Remains

Scrofula Cured—Blood Purified by Hood's Sarsaparilla.

"C. I. Hood & Co., Lowell, Mass.: 'It is with pleasure that I send a testimonial concerning what Hood's Sarsaparilla has done for my daughter. It is a wonderful medicine and I cannot recommend it too highly. Sarah, who is fourteen years old, has been

Afflicted With Scrofula

ever since she was one year old. For five years she has had a running sore on one side of her face. We tried every remedy recommended, but nothing did her any good until we commenced using Hood's Sarsaparilla. My married daughter advised me to use Hood's Sarsaparilla because

Hood's Sarsaparilla Cures

it had cured her of dyspepsia. She had been troubled with that complaint since childhood, and since her cure she has never been without a bottle of Hood's Sarsaparilla in the house. We commenced giving it to Sarah about one year ago, and it has conquered the running sore,

Only a Scar Remaining

as a trace of the dreadful disease. Previous to taking the medicine her eyesight was affected but now she can see perfectly. In connection with Hood's Sarsaparilla we have used Hood's Vegetable Pills, and find them the best." Mrs. MARIA GRIFFIN, Xenia, Illinois.

Hood's Pills cure nausea, sick headache, indigestion, biliousness. Sold by all druggists.

## NOW READY

We have a full stock of the popular Beaded and Rocco Border Patterns, than which there is nothing more desirable or in keeping with the prevailing styles.

The most desirable, however, has been, and always will be, the Plain Ebony Back, with Handsome Raised Silver Monogram.

These we make up in a variety of styles to suit each individual taste.

Prices on these goods will be found lower than similar goods in the United States, being direct importations from Europe, whereby we save the high tariff on such goods into America.

"ROCKDALE OBSERVER" [May 3, 1890], remarks: "Some remarkable cures have certainly been effected by Sequah's medicines."

"WATERFORD NEWS" [Apr. 6th, 1890], speaking of Sequah's remedies, says: "The cures remain, and men are walking about to-day, who for the past ten years read novels in their beds during the intervals snatched from dry toast, potions and pills."

"MID-DERBYSHIRE STAR" [May 2, 1890], "The cures made by Sequah's Remedies, have excited a great deal of talk, because the patients art well known as having suffered a number of years. Some of them have been afflicted for 20 years."

"ROCKDALE STAR" [May 3rd, 1890]. "It cannot be denied that persons well known in Rockdale, known to have suffered from the poor man's curse, rheumatism, have secured permanent relief by the use of Sequah's Remedies."

*Mother's*

Nestle's Milk Food for infants has, during 25 years, grown in favor with both doctors and mothers throughout the world, and is now unquestionably not only the best substitute for mother's milk, but the food which agrees with the largest percentage of infants. It gives strength and stamina to resist the weakening effects of hot weather, and has saved the lives of thousands of infants. To any mother sending her address, and mentioning this paper, we will send samples and description of Nestle's Food. Thos. Looming & Co., Sole Ag'ts, 29 Murray St., N. Y.

## THE STANDARD DICTIONARY

Contains 301,863 Vocabulary Terms—more than twice the number of terms in any other single volume Dictionary, and 75,000 more than in any other Dictionary of the language.

Address: B. R. FOSS, Soliciting Agent. P. O. Box 480.

## LOCAL BREVITIES.

H. H. Williams has a new card in this issue.

A By Authority notice regarding fish is in this issue.

There will be a meeting of the Choral Society this evening.

There will be four new pieces performed at the band concert this afternoon.

Jas. F. Morgan will hold a sale of goods distrained for rent on Saturday, November 30th.

There was only one case reported at the police station last night and that was one of drunkenness.

The funeral of James I. Dowsett, Jr., will take place at 3 o'clock this afternoon from his father's residence, Palama.

A meeting of Kona-Kau Telephone and Telegraph Company is called for December 2d at Honolulu, North Kona, Hawaii.

Mr. Ed Paris gave a dinner to ten bicycle enthusiasts at the Riche-lieu last night. Angus was the honored guest of the occasion.

White Mountain ice cream freezers, piano and banquet lamps and shades, pictures, frames, etc., are advertised by the Pacific Hardware Company this morning.

Of the forty articles for which the Pacific Hardware Company put in a bid for the road bureau they were awarded twenty-one, a larger number than any other bidder.

Mr. Yatman will speak to the Kaumakapili people at 7 o'clock tonight, Rev. H. H. Parker will interpret the discourse into Hawaiian. All are invited.

Every member of the Y. M. C. A. orchestra should be present at the rehearsal this evening at 7:30 o'clock in the Y. M. C. A. hall. Those who took home their parts to practice must not forget to bring them this evening.

Minister Willis, wife and son and Dr. Cooper came back from Hilo on the U. S. S. Bennington. They report a fine time on the big island.

Mules attached to a dump cart on King street yesterday morning became stubborn and stood on the tramcar track, notwithstanding the fact that cars wanted to pass. They were hauled off by main force and did not vacate through abatement of stubbornness.

The lepers at Kalihi Receiving Station came before the board of physicians for examination Tuesday morning. They will be sent to Molokai at the end of the week. Besides Drs. Wood, Myers, Emerson, Day and Howard of the board, Dr. C. C. Ryder was present.

Horseback and bicycle riders and even pedestrians complain a great deal about a lot of dogs that live in the vicinity of the Chinese shops at the foot of Alapai street on King. They run out and bark in a most aggravating manner whenever anyone goes past. Two were run over by wheelmen following the riders in the bicycle race of yesterday.

Wong Look, the Chinaman who stabbed Ah York Sunday afternoon last, came before Judge Perry in the police court yesterday. He acted very queerly, which leads to the belief that he is either insane or feigning insanity. Wong Look had no lawyer to appear for him. He waived examination and was bound over to the Circuit Court. There is no bail for Wong.

## BOARD OF HEALTH.

Uninteresting Meeting—Petition from Leper Prisoners.

At a meeting of the Board of Health yesterday afternoon, letters were read from R. W. Meyers, agent at the Molokai leper settlement. These bore upon the subject of seven lepers, recently imprisoned for robbery, who had petitioned the Government and Board of Health to have them pardoned. Mr. Meyers wrote that the men were robbers of the deepest dye. When free they would steal everything they could get their hands on. When they could not get anything else they would make a raid on his cattle. He gave an example of one of the men, and related his robber exploits. He had been in jail two or three times already. It was the opinion of the Board that the petition of the men could not be listened to after Mr. Meyers' letters. The doctors on the Board thought that the quarantine on fishing, with the exception of Honolulu harbor, could be lifted in thirty days.

The Board voted that the combined districts of Waianae and Ewa be offered to Dr. Peterson at \$80 a month.

Correspondence from Father Conrardi, of the Molokai leper settlement, was read.

## Tools Recovered.

The case of dental instruments belonging to Dr. Robert Moore, and which dropped into the sea at the Hall wharf Tuesday afternoon, was recovered by a native diver at 12:50 yesterday afternoon.

The instruments were valued at a large sum and were in no way injured by their salt water bath, but some gold leaf, used for filling, was destroyed.

## KAUMAKAPILI CHURCH.

Mr. Yatman -:-

WILL SPEAK to the Kaumakapili People

== TO-NIGHT

AT 7 O'CLOCK.

Mr. H. H. PARKER will interpret the discourse into Hawaiian.

All Are Invited.
