### ADVERTISING HAWAII.

BY E. ELLSWORTH CAREY.

The way to advertise Hawaii is through the daily Honolulu press. Copies of one or both dailies should be mailed weekly to every county paper published in the U. S. The weekly editions are too bulky and contain too much matter.

Suppose a short, interesting article describing some point of interest in this country was printed in the ADVERTISER or Bulletin; then send a marked copy to each county weekly in America. The article would be copied into hundreds, possibly thousands of papers, and it would be read by half a million persons. To insure the insertion of the article in question, send with each paper a circular stating that each paper printing the article would receive gratuitously a specially written letter on Hawaiian topics.

Of course a bureau should be formed to take charge of the work of disseminating information about Hawaii. Give the American newspapers the proper kind of copy and they will send it broadcast over the continent free of cost. But they don't like to print stuff out of a book, pamphlet or paper which is an advertisement on the face. For this reason through the Honolulu daily press is by far the best means of distributing information.

All editors give the credit to anything which appears in a contemporary in the line of news or general information, and any rural weekly in the States would be glad to print every month a Hawaiian letter.

There is only one way to educate the American people about Hawaii and that is through the American press. Americans do not know anything that they do not read in their newspaper, and so we must reach them through their journals. Cuts of Hawaiian scenes can be

obtained and used to illustrate the articles; when published in one section or state, they could be returned to the bureau and sent out again.

The above is but the briefest outline of a plan for advertising Hawaii, which can be put in operation for a few dollars, and which promises to do more towards making this country known than all other schemes combined. It is a plan which would cause hundreds, probably thousands, of articles on Hawaii to appear every month in the American press, and which, in time, would dissipate the dense darkness which prevails on the Continent concerning the sea-girt nation. Another point in favor of this plan is its cheapness, as a comparatively small amount would carry on the work of the bureau.

### Sporting News.

Robert Bonner proposes to send the great Sunol against her record this Spring. He thinks she can beat 2:34.

The preliminaries for the great fight between John L. Sullivan and Jim Corbett have been completed, and both men seem anxious for the fray. Sporting men in New York say that Corbett, if well-handled and trained, may win, but his friends in San Francisco only hope for a draw. The winner will get \$30,000.

Senator Stanford has refused \$125,000 for Advertiser, a 3-year old colt with a record of 2:16.

Australians in England are confident that Peter Jackson will whip Slavin.

The first intercollegiate football match between the students of the State University and the Stanford University of California was won by the latter in good style.

### A Generous People.

America is proverbially generous, and the successful termination of the voyage of the Indiana with 3300 tons of breadstuffs for starving Russians is but one of many samples of its liberality. Not one cent was expended for any detail of the shipment of the Indiana's enormous cargo food. The cargo was a present to Russia. The railroads transported the grain and flour free, truckmen in Philadelphia carted it free, stevedores loaded it free—even the insurance of \$75,000 was contributed, the Insurance Company of North America giving \$50,000 of it. Such work Americans are justly proud of.—Ex.

### Tramway Service.

Through the kindness of Mr. Pain a special car will leave Pauoa for St. Andrew's Cathedral on Good Friday morning at 9:25 o'clock. On the evening of Good Friday the special car will leave Pauoa at 6:15 o'clock, and the return car from the Cathedral at 7:30 o'clock.

On Easter Sunday, a special car will leave Pauoa for St. Andrew's Cathedral at 5:15 o'clock to accommodate the worshippers at the early 5:30 o'clock service. The return car will leave the Cathedral at 6:30 o'clock. The car for the 9:30 o'clock morning service will leave Pauoa at 9:15 o'clock. The other special cars throughout the day will run as usual.

## RICKARD'S CANDIDACY.

By the tenor of a short note from Hamakua it would appear that Mr. Rickard still regards himself as a candidate for election in the district of North Hilo. The election was set for April 13, and the last day for receiving applications of candidates was accordingly March 30. Mr. Rickard's petition, however, was not received until 11.25 A.M., March 31, after the legal period had expired and the ballots had been ordered printed. It would seem very clear therefore that Mr. Rickard's candidacy will have to stand over. He does not, however, see the matter in that light, and has written to the Registrar of Election that, in reckoning the fourteen days set forth in the law, he counts both the day when the application was received and ELECTION DAY. This singular method of computation is not likely to commend itself to the Legislature or the Courts if the question should ever arise.

By our correspondent's letter it would seem that votes were actually to be cast for Mr. Rickard at the election. As his name does not appear on the ballots it is not at all clear how this was to be managed, as ballots containing any mark besides a cross must be rejected. It looks, however, as though there might be still another election, as the inspectors in Lahapohoe have not complied with the law.

Intelligence as to the result of the election may be expected by the Kilauea Hou to-day.

## LAWYERS' ATTENTION.

The letter of H. E. Cooper, published in our columns this morning, draws attention to what from now on will be, until it is settled, one of the living and pressing questions of Hawaiian politics. We

refer to the question of the modification or re-organization of the judiciary system. The law forbidding the filling of vacancies in the Court was passed from a consciousness of the defects of the existing system, and with a view ultimately to some remedial action on the part of the Legislature.

There can be no doubt that a change of some kind must be made. The Supreme Court, exercising the extended original as well as appellate jurisdiction which it does, is simply overburdened with work. That relief of some kind must be furnished, will probably be admitted on all hands, and the sole question remaining for consideration is of what nature this relief shall be.

Experience has shown that the appointment of five judges to the Supreme Court is not a satisfactory solution of the problem. The need of a separate Appellate Court is not thereby met. The difficulty of finding time, amid the warring claims of work in chambers, at the July terms, and on the circuits, for judicial conferences on banco cases, remains as great as ever, and the imperfect circuit system continues in full force and effect. Without attempting in the limits of a single article adequately to consider a question of such wide reaching consequences as this of the reorganization of the Courts, we will content ourselves with the intimation that changes on the general lines at any rate of the report of the Judiciary Commission to the Legislature of '88, would offer the most satisfactory solution of the problems presented.

It is not, however, the intention of this article to argue the question. We desire simply to remind the bar and the public that the coming Legislature will be compelled to deal with it, and that it is high time for the bar to bestir itself and to consider and discuss the matter.

In an affair of this sort, it falls to lawyers to lead in shaping public sentiment. They are experts on the questions involved, and the only persons qualified to form an authoritative judgment on the details. Our columns are open to all who wish to discuss this question, and it is earnestly hoped that members of the legal fraternity will devote to its consideration, without any delay, the thought and attention which its importance deserves.

## A MYSTERY SOLVED.

## A Chinese is Arrested for Murdering His Own Child.

On Friday, January 22d, a native woman, while fishing in the Pinaio stream, near Waikiki, found the corpse of a female infant of Chinese parentage, and supposed to have been about four days old when it died. The body was encased in a kerosene oil can, with a large rock fastened to it, and had evidently been in the water for about three days. The police at the time could not discover any clue to the guilty ones, so the matter was dropped and forgotten until the other day when a policeman overheard a conversation between two Chinese, in which one of the men accused the other of murdering a child. The arrest of the men followed, and they are now in custody. Yesterday the father of the child admitted something about the affair, but the wife after much questioning denied any knowledge of the crime. The expressman who carried the can containing the dead child, stated that he was hired by the father for that purpose, and that they started from Queen and South streets. The trial will take place to-morrow in the Police Court.

## FOR LIFE.

## Mr. H. Bergersen and Miss I. M. Larsen are Wedded.

Yesterday afternoon at 4 o'clock was the occasion of a gathering of a very pleasant character at the residence of Mr. William A. Bowen, on Kinau street, at which time and place occurred the marriage of Mr. Hartvig Bergersen to Miss Inga M. Larsen, the Rev. E. G. Beckwith, pastor of the Central Union Church, being the officiating clergyman.

Mr. B. Bergersen, brother of the groom, and Mr. Unwick were groomsmen, and Miss Nelson and Mrs. Unwick acted as bridesmaids. The high contracting parties on this occasion are very well and favorably known to a large circle of acquaintances, both of them having occupied with great fidelity positions of trust and usefulness in the community. It was therefore an occasion of much pleasure to the friends present. Everything passed off very quietly and happily to all concerned. Mr. and Mrs. Bergersen were remembered by many tokens of substantial and beautiful character that will serve as perpetual reminders of the warm regard of friends both present and absent.

Among the invited guests may be mentioned the names of Dr. E. G. Beckwith and wife, Mr. B. Bergersen, Mr. and Mrs. Unwick, Miss Nelson, Hon. W. R. Castle and wife, Wm. R. Castle, Jr., Alfred H. and Beatrice Castle, Mr. and Mrs. F. C. Lowrey, Miss Nellie M. Lowrey, Mr. and Mrs. Tolloffen and daughter, Mr. and Mrs. Ooss, Geo. P. Castle and wife, Dorothy and Margaret Castle, which about exhausts the Castle clan, Miss Isabella Renwick, Miss Marie Stover, John Farnsworth and wife, George H. Farnsworth, Mr. and Mrs. F. J. Lowrey, Frederick, Sherwood and Helen Lowrey, Miss Carrie Curtis, of the Kamehameha Preparatory Schools, and Misses Karen and Nora Nelson.

The report of this happy event would not be complete unless it were also mentioned that following the ceremony there was hearty enjoyment of a "feast of good things." Finally, as the newly-wedded couple took their way to their own place of future abode, the hearty goodwills and wishes of all followed them, amidst the usual showers of rice, etc. The ADVERTISER also adds its hearty congratulations personally to both Mr. and Mrs. Hartvig Bergersen.

A process has recently been discovered for making flour of bananas. Chemical experiments show that this flour contains more nutriment than rice, and that when eaten with beans, corn or sage it forms a very palatable and nourishing diet.

Easter may come as early as March 22d or as late as April 25th. The rule was adopted 1500 years ago, making Easter the first Sunday following the full moon after the sun crosses the equatorial line in the spring.

## Hawaiian Hardware Co., L'd.

Monday, April 11, 1892.

The weather this week is likely to be dryer than last.

The news of the settlement of the Behring Sea difficulty will be received here with profound pleasure. Had the matter ended otherwise it is difficult to tell just what the effect would have been upon this Kingdom. It would have been disastrous to many of the farmers, no doubt, because we might have found a difficulty in getting a sufficient supply of Aermotors to meet the demands of the cattle, rice and sugar plantation men of the Kingdom.

They must have Aermotors. Those we sold last year and that are in use now are the means of bringing us orders for others. People who bought them last summer are talking them up to their friends with the best possible result to us.

During 1891 there were 29,049 Aermotors sold in the United States. During the current year it is expected that three times that number will be added to those sold in previous years. Just fancy! 60,000 new wheels erected for the purpose of making life easier for the man who has stock or lands. 60,000 people who have been convinced that there is only one mill in existence and that the Aermotor. How many will be convinced here that there is no other mill suitable for use on these Islands.

The letter of Mr. C. L. Wight published two weeks ago is worth reprinting; if you read it before you will read it again and be just as much interested as you were the first time.

"Your Aermotor worked through the last big storm all right. It pumps 400 gallons of water per day, through a half-inch pipe, an eighth of a mile, and a thousand gallons of water through an inch pipe 800 feet, 50 feet above the pump. I find it advisable to oil the Aermotor every day. When the wind blows over 20 miles an hour we shut it half off although it has been left running when the wind was blowing at a greater velocity. In light winds it runs moderately fast, pumping as above—When a Union windmill that we have will not turn around. In heavy winds it runs more regularly than any mill I have ever seen. Further, your guarantee that the pumping Aermotor would do more in a wind that would not turn around the old mill, than the old 14-foot wooden mill would do under the most favorable circumstances has been carried out. I would say in conclusion that you cannot expect a windmill to run without oil any more than you can a wagon, and if an Aermotor is properly put up and properly cared for, I believe that it will give a better return for the money invested than any piece of machinery on the market. The geared Aermotor which I desire you to send me will replace a wooden mill that has been in use less than a year.

Yours Truly,

C. L. WIGHT."

This is Mr. Wight's second rattle at the Aermotor. He buys a geared mill only after giving the pumping Aermotor a very careful test. If the mills will work satisfactorily at Mahukona they will anywhere.

With a 16-ft. geared Aermotor you can run your corn mills—with a 12-foot geared mill you can run your rice mill and save a bushel of money every season. With an 8-foot mill you can irrigate your banana, pine apple or taro beds and increase your business 200 per cent.

## THE BANKER.

## The Chinese School Teacher is Called to Account.

The ADVERTISER had an account the other day about a Chinese named Wong Kwok Hang, bankrupt. About fifty creditors proved claims amounting to about \$6000, with little hope of getting any share of it.

Hang was arrested on a charge of embezzlement preferred by one of his countrymen. Alia, the prosecuting witness, stated that he was a cook, and on the 13th of February he gave the defendant \$250, in hard silver, to take care of for him. He received \$130 of the money from Hang, and when he requested the return of the balance, the defendant informed him that the money had been spent. The defense tried to have the witness admit that the money had been lent, but did not succeed. Alia was certain that the money was only left in defendant's hands for safe keeping.

Judge Foster held the defendant to answer before the Supreme Court.

## THE SCHOLARS OUTING.

## A Merry Time Spent at Remond Grove Yesterday.

The excursion to Remond Grove yesterday consisting of 148 girls and teachers from the Kawaihae Seminary, and sixty-one boys with two teachers from the Kamehameha Preparatory School, was a delightful and much needed outing for both teachers and scholars.

A well chosen day, a safe and joyful carriage both to and from the Grove, an obliging superintendent of the railroad, a pleasant conductor, last but not the least, a well spread and tempting assortment of good things for the appetite, made the time pass merrily and quickly; as happy girls and boys always enjoy themselves when kind and cheerful teachers accompany them for a day's change from study.

One of the exciting and pleasant hours of the day was spent on the "diamond square" back of the Grove. The final result of the seven innings is herewith appended:

Umpire—Abraham Kaulukou.  
Time-keeper—Charlie Arnold.

At the close of the game the girls were heard to say, "the umpire no play fair to us," "no girls runs to us girls." But to even matters the boys washed the dishes and at the same time admitted that although they (the boys) were the best base ball players, the girls took the palm when called on to compete in singing. Try it again girls.

## A RUN IN PORK.

## A Chinaman and Some Pigs Have an Interesting Time.

Yesterday afternoon, about 5:30 o'clock, a Chinaman and a number of hogs had an interesting time in Pensacola street. The Chinese was driving an express wagon loaded with porkers, and came down the hill at a lively rate of speed; as the wagon was about to turn into Lualaba street the wagon upset, throwing the driver and his precious charge to the ground. The hogs ran in all directions afterwards, causing much sorrow to their owners.

The Chinese driver received a good scare and a few bruises. The wagon was demolished.
