THE WISDOM OF SANITATION

Legislature to Grapple With the Proposed Sewerage System.

Pecuniary Loss to Three States This Year from Yellow Fever Estimated at Sixty Million Dollars.

Among the matters to come before the next Legislature one of the most important to the future welfare of this city will be the consideration of the proposed sewerage system for this city. To guide legislators in arriving at a correct estimate of what ought to be done and how it should be done—there is no question as to when it should be done—the government has caused at considerable expense elaborate plans to be drawn and estimates of expense prepared by Engineer Herring. This gentleman has viewed the ground, acquired the necessary facts, is fully competent to devise a system most suited to the city, and his plans and report will be entitled to the greatest respect and the largest consideration.

It is to be hoped that the Legislature will not haggle over a few dollars more or less in carrying out Mr. Herring's plans. Expense should be no object compared with the conservation of the public health. Any sewerage plan adopted should be comprehensive enough to cover the whole city, not only with a view to present needs but to those of the future. As the future generation will largely reap the benefits of any large outlay for this purpose they should also share in the burden of providing the money necessary. This is becoming a recognized axiom in municipal life. Hence, the Legislature may find an easy way to raise the money by issuing Honolulu Sewerage Bonds, redeemable in not less than twenty years.

The necessity of building at once a proper system of sewerage for this city was brought home in no uncertain tones by the short visit of King Cholera two years ago. The money spent in controlling that slight epidemic would have gone far toward building the new sewers. The present epidemic of yellow fever in the Southern States conveys another warning, and a more powerful one. It is estimated that the pecuniary loss to the three States of Louisiana, Mississippi and Alabama from the present epidemic will not be less than \$60,000,000, and that does not include the general business stagnation which each State has suffered. This is considerably more expensive than the alternative of first class public sanitation, and the lesson may well be applied to Honolulu.

The Last Christmas Mail.

Theo. H. Davies & Co. expect the steamer Aorangi on Friday. She comes from Sydney and is on her way to Vancouver. This boat will take the last mail for the Coast until the departure of the Moana on December 9. The Aorangi will present the last chance of reaching Europe with Christmas remembrances.

Every day or two a new Hawaii bicycle is seen on the streets. There is no doubt that they are fast growing in popularity with the Honolulu cycling fraternity.

THE TANTALUS LOT SALE

Populace Scrambles for Country Homes in the Mountains.

Big Prices Realized for Small Tracts—Something of the Land and the View it Presents.

People went land crazy at the Executive building at noon today when the Tantalus lots were put up by Chief Clerk Hassinger for sale. Bidding was rapid and came from every hand. Many of the lots brought a hundred percent and more above the upset prices.

The lots sold are protected by the crown of the mountain in the rear from the strong trade winds, and were especially selected and surveyed as property suitable for country mountain homes. The lots are from one to two and a half acres in extent, all border on a good mountain carriage road and are of an elevation of 1500 to 2000 feet.

The view from this height is magnificent. It takes in the ocean over and beyond Diamond Head to the right, and across the Pearl Harbor lochs to Barber's Point to the left in the west. In from this point toward the north the Waianae mountains are clearly demarked on the landscape, with the splendid green cane fields of Ewa plantation on the broad plain at their feet.

The following were the lots sold, the upset prices, the buyers and the sums paid:

Number 2, upset price \$400, bought by L. A. Thurston for \$900; No. 3, \$300, A. C. Lovelock, for \$635; No. 4, \$400, J. Rothwell, for \$730; No. 5, \$175, Luther Wilcox, for \$460; No. 6, \$300, Andrew Brown, for \$540; No. 7, \$450, Jas. B. Finney, for \$665; No. 10, \$300, C. F. Peterson, for \$530; No. 11, \$400, J. F. Hackfeld, for \$400; No. 12, \$400, H. Schultze, for \$845; No. 13, \$400, F. Harrison, for \$850; No. 14, \$300, A. V. Gear, for \$600; No. 15, \$200, Dr. C. B. Cooper, for \$610; No. 16, \$200, Judge A. W. Carter, for \$420; No. 50, \$300, Judge W. F. Frear, for \$1125.

Total upsets, \$4525; total realized, \$9310.

DECORATE TAVERNIER'S GRAVE.

Uncle George Bromley Remembers an Old Bohemian Friend.

"Uncle George" Bromley was the central figure in an impressive ceremony in Nuuanu cemetery yesterday afternoon. With his own hands he decorated the grave of Tavernier, the great French artist, who was a Bohemian of the first water, and whose travels ended in Hawaii a few years ago.

Tavernier was as well known in San Francisco as here, and he and "Uncle George" were fast friends. The artistic monument over his grave was erected by the Bohemian Club of that city. Mr. Davey secured excellent prints of the old Bohemian in the act of placing flowers on the tomb of the dead artist.

An Important Sale.

Auctioneer Morgan advertises the sale of the furniture and personal effects of the late A. G. S. Hawes on Wednesday, December 1, at auction. The sale will include a valuable collection of African, Japanese and Hawaiian curios, family and other carriages, a span of fine grey horses, and it will take place on the premises at Palama, which will be open to the public on the day before the sale.

The Company A Election.

Company A's election for lieutenants will take place on Saturday evening of this week. Lieutenant Fetter will be reinstated, he not having opposition. Lieutenant Klemme will be opposed by Sergeant Thoenes.

SECOND DAY'S PROCEEDINGS

Valuable Report from the Special Committee on Forestry.

Planters Adjourn Their Annual Session—Steps Taken to Procure Better Representation Next Year.

At the opening session the newly-elected president J. B. Atherton took the chair and called on the secretary to announce the proceedings of the meeting of trustees held yesterday afternoon.

Secretary Bolte said the election of officers had resulted as follows: President, J. B. Atherton; vice president, H. P. Baldwin; treasurer, P. C. Jones; secretary, C. Bolte; auditor, F. A. Schaefer. The trustees had considered the report and estimates of Treasurer Jones and arrived at certain conclusions which they preferred not to be published. A discussion then took place on the report of the trustees which lasted some time, it being finally adopted.

The reading of reports came next. Professor Maxwell read a very elaborate and carefully prepared report on the manufacture of sugar. This with the discussion which followed its reading will be noticed at length in a subsequent issue.

W. M. Giffard, chairman of the special committee on Forestry, presented his report in printed form. It contains a long letter from Professor Farnow, Chief of Forestry, U. S. Department of Agriculture, which recommends the employment by the government of an expert to make a physiographic description of the islands with special reference to forestry problems. After such an examination and report is made, which may be accomplished with an expenditure of less than \$3000, it will be time to formulate further measures of a permanent character.

Mr. Giffard's report and recommendations were deemed of such value to the association that on motion of Theo H Davies a vote of thanks was tendered him on the spot.

A motion to appoint a special committee of three to confer with the Minister of Interior with reference to the recommendations of the Forestry report was carried, and President Atherton appointed Professor Maxwell, W. M. Giffard and J. F. Hackfeld as such committee.

J. B. Atherton's report on Labor on the Plantations will be found at length in another column.

After its reading W. W. Goodale suggested that the next Labor Committee should incorporate in its report some data on the labor used in other industries. In the vicinity of Hilo there were some 4000 Japanese laborers on the various coffee plantations. It looked to him as though the sugar men were really importing all the laborers and paying the expenses for the benefit

Continued on 8th Page.

SOME LABOR STATISTICS

Mr. Atherton Furnishes Figures on Plantation Laborers.

About 5000 More Laborers Will be Required on Hawaiian Sugar Plantations for the Coming Season.

At this morning's session of the Hawaiian Planters' Association, J. B. Atherton, chairman of the Committee on Labor, made a partial report. Several weeks ago a circular letter was sent by the committee to every plantation manager in the islands asking answers to a series of questions propounded therein. Some of the answers were not received until yesterday and from one large plantation no answer had been received. Hence the data in the hands of the committee was necessarily incomplete, but he would read the statistics as far as compiled.

Taking the average of the year through there were 21,764 laborers of all classes employed on sugar plantations. Of Japanese there were 6109 contract and 5285 free. Of Chinese 4950 were contract and 1911 free. Of Portuguese 369 were contract and 1533 free. Of Hawaiians 430 were contract and 926 free. The remaining 416 were South Sea Islanders and a scattering of many nationalities.

Forty-five plantations reported that they were well supplied with laborers and six that they were not. The number of desertions had been large during the year, principally of Japanese, accounted for by the majority of laborers being of that nationality. Managers reported that Japanese gave the most trouble, probably for the same reason.

The number of laborers whose contracts expired during the year was 2017. As a rule they did not re-ship.

Twenty-eight managers reported no difficulty in securing laborers, while 22 reported otherwise.

Average wages paid to laborers who re shipped varied. Six plantations paid the lowest, \$13, and a few \$14. Others paid from \$17 to \$22 according to nationality. Portuguese who re-contracted received the highest wages, \$18 to \$22. Hawaiians came next.

From the answers received the committee estimated that 4273 fresh laborers would be required from some source during the coming year. Including the large plantation not heard from and one small one these figures would be raised probably to an even 5000.

Seventeen plantations preferred Japanese to any other labor, while six wanted all Chinese. A number of others preferred both together, while two plantations expressed a preference for Hawaiians only.

In conclusion Mr. Atherton stated that, as soon as the missing data were received from the two plantations referred to, the complete report would be published.

Veteran Firemen.

John Nott, who presided over the recent meeting of exempt firemen in this city, has appointed the following committee to prepare a constitution and bylaws for the new organization to be formed for charitable purposes: John A. Hassinger, Hose No. 1; C. B. Wilson, Engine No. 1; Henry Smith, Engine No. 2; Jas. H. Boyd, Engine No. 4; L. H. Dee, Fire Police.

Kilohana Art Exhibition.

On account of the illness of Mr. Hitchcock and the lecture by Mr. Churchill in Y. M. C. A. hall, the attendance upon the exhibition of the Kilohana Art League last night was quite small. The next open night will be announced later in the week.

SOME VALUABLE REPORTS

Read Before the Planters' Association Yesterday Morning.

An Elaborate Essay on the Soils of the Islands in Course of Preparation by Professor Maxwell.

At the meeting of the Hawaiian Planters' Association yesterday, Dr. Maxwell, chairman of the Special Committee on Soils, stated that the report was not ready and would not be for some five months yet. When finished the report would be the most complete and exhaustive of any yet attempted on the subject. It would cover everything embodied in the subject on all the islands. Some 1400 analyses of soils from various plantations had already been made and many yet remained to be made. The whole question of soils will be gone into in this report, paving the way for a future report on the study of the cane itself.

When called on for a report from the Committee on Cultivation Professor Maxwell regretted the tendency of the planters to leave everything to the experiment station. While he was at all times at the service of the planters for committee work or otherwise he thought that in their own interests members of the association should take more interest in its affairs and not leave everything to the director. He suggested that many of the planters might prepare papers on various subjects which might be valuable and interesting.

Mr. Baldwin thought the suggestion was a good one and that the members ought not to shirk any work that would be for the common good.

Mr. Horner liked the suggestion. It had worked well in former years but lately planters had got into the habit of throwing all the work on Dr. Maxwell's shoulders.

REPORT ON CULTIVATION.

In reading from a long report Professor Maxwell only picked out those portions of most interest. The report itself dealt mostly with non irrigated plantations. For these deep plowing and frequent loosening of the soil was recommended. Harrowing between young cane shortly after a rain was discouraged, it being found that numbers of young roots were cut off which seriously affected the growth of the cane. The practice of hilling up young ratoons received favorable notice. A new plow introduced by H. P. Baldwin at Makaweli was declared to be the finest made for deep plowing on rocky land. The system of continuous planting on mauka lands was strongly condemned. Such lands should be rested. Too much effort was made toward getting in a large acreage. It was not the acreage that a planter should look to but the net profits of his plantation. Many planters were now finding out to their cost that it took much of the profits on the makai lands to pay the debts of the mauka. This was a serious

matter and should be carefully looked after. A single acre of this cane cultivated at a loss affected the paying powers of the whole plantation.

Mr. Horner corroborated from personal experience the recommendations of the report. He found that deep and fine plowing has a tendency to retain the moisture longer and drain off the excess in case of heavy and prolonged rains. The finer the soil the more moisture it will retain and the longer it will retain it.

REPORT ON FERTILIZATION.

In reading the report of the Committee on Fertilization Professor Maxwell stated first that the manufacture of fertilizers at San Francisco had undergone a remarkable change in the past two years. The production of phosphate fertilizers had fallen off more than one-half while those containing a large percentage of ammonia had nearly doubled. This was in consequence with the advice given from the experimental station for the past two years. If Ewa Plantation had used the old phosphoric fertilizers instead of the new nitrogenous ones the yield would certainly have been lessened two tons to the acre. This seemed a remarkable statement to make but Professor Maxwell was prepared to furnish scientific data to prove it.

The report then went on to detail the loss to plantations caused by irrigating lands that had been fertilized and gave some details of experiments now being made at the farm to determine the effect of water on different soils and fertilizers. He also said that some planters who were irrigating on high lands had informed him that natural springs had broken out on the low lands beneath.

Lime in some form must be used in successful cane cultivation, especially in the wet Hilo districts. Analysis of the Kau soils showed 40,000 pounds of lime in an acre, while in Hilo the natural lime in the soil amounted to only 2500 pounds. Lime was best applied freshly powdered and unslaked, it should be put in furrows and covered up so that the process of slaking could be carried on under ground.

The report also went into the value of natural manures and waste fertilizers, farm-yard manures and molasses being specially mentioned. It was not advisable to mix these two. Mr. Hind of Kohala had his compost heap analysed and found it was worth \$6000 to him for fertilizing purposes. The value of the molasses used on Ewa plantation was also estimated by analysis to be worth \$12,000 to the managers last year, that is the use of refuse molasses in the irrigating ditches saved the company buying that amount of fertilizer.

REPORT ON MANUFACTURE.

In the absence of Andrew Moore, who had prepared a report on Machinery, it was read by Mr. Renton. The report dealt principally with machinery used in handling trash and cane. It also referred to great improvements several plantations had made in introducing wire rope carriers both for carrying cane to the mill and sugar to the landing. For loading steamers these rope carriers were far preferable to the old crane system.

At the request of many members Mr. Horner detailed at length the system of wire carriers in operation on his plantation. He had one line a mile and a quarter in length from the mill to the cane fields on the high ground with a switch about half the length. This switch could be moved around as needed to any angle in about 20 minutes. The line passed over gulleys 500 feet deep and in some places was 1400 feet long between supports. The greater the fall the fewer supports needed. Another line from the mill to the landing had handled 1200 tons of sugar this season without any trouble. Much trouble had been experienced in getting the line to work in the first place but it was because no one understood the actual workings. When these were learned the trouble was quickly remedied. He would be pleased to give further information on the subject to anyone, as it was by all means the cheapest mode of handling cane he had yet come across. To have handled the cane by wagons that this single rope carried would have required the doubling of the wagons and teams on the plantation.

CHURCHILL ON POLYNESIA

Talks on Samoans and Origin of Other Pacific Nations.

Theory that Hawaii was Peopled from Samoa
—Ancient Relics Exhibited—Hawaiian Historical Society.

More than a hundred people enjoyed the lecture of Hon. W. Churchill at the Y. M. C. A. yesterday evening on the subject of Samoa and the origin of Polynesian races. The speaker interested his audience for more than an hour. He talked in an easy, conversational way, reading at times from a portfolio.

Many of the speaker's deductions from Samoan folklore differed from accounts supplied by Hawaiian ethnologists from Polynesian traditions. It was a surprise to many to learn that Samoa was the center from which the people of the Pacific sprang. Hawaiian traditions point farther south. In the papers of the Hawaiian Historical Society is evidence of migrations higher from Tahiti. Possibly there were different arrivals here from the south.

Mr. Churchill displayed a Samoan "talking stick," also exhibited a war club with a clear tradition five hundred years back. He believed the club was older still and used, as its name indicated, at the battle of Matamanoa. This was a fight between natives of the island of Upolu with trespassers or invaders from other islands, whom the Upoluans called Tongans and managed to chase off to their canoes. The people thus repulsed went to various lands including Hawaii. Savaii, name of the largest island in the Samoan or Navigator's group, was suggested by the lecturer as having been the origin of the name "Hawaii."

Mr. Churchill gave the native account of the origin of the royal lines of Samoa, most of it silly as aboriginal Polynesian tradition usually is. Such matter is, however, of importance to the ethnologist from the points of similarity between traditions of different nations or tribes.

At the conclusion of the lecture, President W. R. Castle asked if there was any business to come before the society. W. F. Allen rose and proposed Mr. Churchill as a corresponding member, and the proposition being seconded by J. S. Emerson was carried unanimously. The president then announced the annual meeting next Monday evening, when it was hoped members and others would have the pleasure of hearing S. Percy Smith, Surveyor General of New Zealand, who is a corresponding member of the Hawaiian Historical Society.

The Anchor.
P. T. Ryan still continues in charge of the Anchor and is ably assisted by William Carlyle. At the Anchor, Seattle beer on draught can always be had as well as the best brands of whiskies, etc., including John Dewar's Scotch whisky. A full stock of other liquors, wines, etc., is kept on hand also.

British Seamen.
A parliamentary return states that the number of British seamen employed in March, 1896, on steam and sailing vessels was 125,069, as against 127,537 on April 5, 1891. The number of lascars employed was 27,911 in 1896, as against 21,322 in 1891.

Pure Milk and Fresh Eggs.
What is nicer and more refreshing than a fresh egg shaken up with pure milk, shaved ice and flavored to suit your taste with fresh syrups; invest 10c. and try one. Also shake made with pure milk and any desired flavor 5c.

EVENING BULLETIN.

A. V. GEAR, - - - Manager.
DANIEL LOGAN, - - Editor.

TUESDAY, NOV. 23, 1897.

It is said that the Hawaiian sugar crop has its amount exaggerated in the United States by the wrong assumption that it is given here in long tons. Newspaper statisticians over there reduce the figures to short tons, making a considerable error. Last year's crop of 248,555 tons, as reported to the Association, is given in the short tonnage. It would be only about 222,000 tons of the long weight standard.

In its own way, the Hawaiian Historical Society has proved second to no local institution, in keeping these islands in touch with other countries of the Pacific. Several of its corresponding members have contributed valuable information on the history of the group to its records. Mr. Churchill, the latest elected, is a notable acquisition, being an eager ethnological student. His late incumbency for several years of the United States Consulate in Samoa has been made the opportunity by him of becoming a pundit in Polynesian history and ethnology.

Anyone who has doubts of the progress of art in Hawaii should visit the exhibition of the Kilo-hana Art League now open. While there is not such a number of paintings on canvas, what there is of that is mainly of a promising order and, besides, there are beautiful specimens of decorative art applied to articles of utility. The ladies contributing decorated china and porcelain and knife and burnt carvings on furniture and utensils cast a really lustrous reflection upon Honolulu's refinement.

Handicraft makes a strong plea for the maintenance of the Kauai industrial school, that lost its main support when Dr. Jared K. Smith was struck down. Each of the other large islands has industrial training in schools either public or private, and hitherto Dr. Smith and his sisters have made Kauai to be no exception. It would be well if the Koloa institution could be provided for in the coming period's estimates of the Department of Education. There is a field for more schools in which useful industry is taught along with the rudiments of learning, and, while the public educational system is coming up to the desired position in this respect, a grand opportunity is open to men of wealth to establish such institutions. An old hobby of the BULLETIN, still believed in, is that of training the youth of the country in agricultural science. Hawaii's soil is and must almost certainly continue to be her greatest resource of wealth, and to retain a population born and bred to the country her rising generation should, in the main, be able to cultivate the soil. Thus would a backbone of civilization, and a truly patriotic element ensuring good government, be best provided.

Progress in the chief industry of the Hawaiian Islands has been as remarkable as anything that appears in the past history of the group. Both respecting individual managements of plantations and factories and their association for mutual benefit, the Hawaiian sugar planters have been continually pressing forward to new triumphs over the difficult problems nature had interposed between soil and sugar. The advances in economies of cultivation and manufacture of the past ten

years have been wonderfully great. There are not many kinds of industrial works extant, taking the world for it, which combine more of interesting matter for study—in engineering, mechanical and chemical science, together—than a Hawaiian sugar estate in its fields and factory. Dividends are gathered today from what was formerly thrown away, and what would once have been esteemed a throwing away of good money, in matters of higher cultivation and fertilizing, is now realized to be but a sowing of nickels to reap five dollar gold pieces. The United States ought to be eager to adopt a family of orphans including so many bright exemplars of the highest type of American enterprise as are comprised in the united body of Hawaiian sugar planters.

DEFENSE IS PROGRESSING.

Murder Trial May Close Tomorrow—
Other Court News.

A native jury for the trial of Colho was secured before Judge Stanley yesterday afternoon. Trial now on.

The prosecution rested and the defense began in the Kauai murder trial yesterday afternoon before Judge Perry. Attorney Rosa said at noon that the defense hoped to close tomorrow. They were hard put to it for time to arrange details, owing to the holding of night sessions.

Judge Stanley has heard evidence on application, through Attorney Poeper, for guardian ship of James Kahoana's minor children.

S. K. Kane, administrator, has made return of the sale of the late E. Helekuhiki's property, conducted by Auctioneer Morgan and previously reported in this paper.

Fred. Waldron by his attorneys, G. A. Davis and Paul Neumann, has discontinued his damage suit against Sheriff Andrews of Hawaii, for unlawful search, the defendant having by written apology declared the act done in good faith under misinformation.

Judge Stanley suspended sentence for opium in possession, upon Ah Chung on his plea of guilty, and discharged the defendant. Deputy Attorney General E. P. Dole had requested the suspension.

Judge Stanley has discharged Walter A. Wright from bankruptcy. C. F. Peterson and J. A. Magoon for petitioner.

FRANK HEWITT CLEARED OUT.

With a Sentence Over Him He Escapes to the States.

Frank Hewitt, a former patrolman, left the country by the bark Ceylon yesterday. He will not return. A few days ago Hewitt was sentenced to six months on the reef on an assault and battery charge. Sentence was stayed for a few days, and the man made good use of his grace.

While on duty Hewitt, with four others, entered the house of some natives on Punchbowl street at night and joined in a carousal. The fight came when the gin gave out. It was shown that the officers assaulted the natives and then took them to the lockup. In the District Court Hewitt was given six months. This sentence was confirmed by Judge Perry upon a jury's verdict.

Preparing to Move.

Lade of No. 2 fire house were engaged this morning in dismantling the building of many articles belonging to the department. The long flag pole that has stood a quarter of a century will come down shortly. Then the historic old bell will be removed. Sometime next week the department will move from the place, leaving the old house to the rats and the weather.

That New Barber Shop.

Pacheco & Fernandez are preparing to move into their new shop in the Arlington block. The fine new glass for five chairs has been placed and the new pole was set up this morning. If all goes well this firm of barbers will move to their new quarters tomorrow evening.

Auction Sales by Jas. F. Morgan.

Auction Sale of The Property of the Hawaiian Coffee and Tea Co. Kona, Hawaii.

I have received instructions to sell at public auction at my sales room in Honolulu, on

MONDAY, Nov. 29, 1897,
AT 12 O'CLOCK NOON,

All the property of the above Company, comprising about 780 acres of leased lands and 482 acres in Fee Simple. Of the above area, about 200 acres are planted in coffee, the trees varying from about 1 year to 5 years in age.

There is a large mill on the place, fully equipped, from which an income can be derived in clearing and marketing coffee from the adjacent plantations. The place is well equipped with water tank, tools and implements, wagons, horses, mules, manager's and laborer's houses, piping, office furniture, etc., etc.

The coffee fields are well fenced and roads built to the various portions of the estate.

A large portion of the coffee trees are now in bearing and are ready to go to produce maximum crops.

For further particulars in regard to leases and all necessary information, apply

JAS. F. MORGAN,
750-td Auctioneer

Refreshing

— AND —

Healthful.

Every being who has suffered from sick-headache caused by derangement of the stomach can appreciate a preparation which will at once give relief and does not lose its effect after taking a few doses, the result generally experienced after taking many saline aperients.

Magnesia

The cooling and refreshing effect produced by taking a dose on rising will convince even the skeptic that it is just the thing for this climate. It has a pleasant taste and never fails to act. A dose taken before breakfast regularly will insure good health.

Sal

The ingredients that enter into the composition of MAGNESIA SAL FRUTAS are salts obtained from fruit and are harmless when taken into the system. The preparation can be taken indefinitely without injury.

Frutas.

The sale for this preparation has surpassed all others of a similar nature. Put up in two sizes 50c. and \$1.00. Don't forget the name MAGNESIA SAL FRUTAS.

Corner Fort & Merchant Sts.

It is very fine to see the sunrise and the dew sparkle like gems in the early morn in the country, but a little later in the day comes that hungry feeling.

A bountiful supply of hearty foods will assist nature in making your stay in the country pleasant.

Diminutive sized tins of meat and fishes, little tins of fruits and cheese, small tins of biscuits and puree of foie gras, individual bottles olives for a bicycle luncheon or excursion.

The latest novelty in biscuits especially for bicyclists.

For those away from home we offer perfected facilities for prompt shipment of mail orders.

small orders shipped quicker than big ones and just as cheerfully.

Do as we do—get the best for your money. Quantity counts; but what is the use of food if it isn't good? True of Hawaii and the whole country: Plenty of food, not plenty of good food.

To live well need not mean extravagance; it means good taste and knowing where to buy.

Our store is the where to buy. It's big, bright, up-to-date, busy, alive to the march of prosperity; importing direct from the fountain heads of production, and selling direct to families.

That ought to count, and it does. Our prices are the lowest.

FOR THIS EVENING.

Frawleys Will Produce a Beautiful
Drama—Matinee Prices Reduced.

"The Railroad of Love" will be the bill for this evening. It is a comedy of the higher order and is constructed on subtle and delicate lines. Running throughout the whole play are situations that are brilliant, pregnant and charming. And they are handled so skilfully by the clever Frawley company that one almost loses sight of the fact that they are witnessing a play and, instead, feel rather that they are peeping into the drawing room of the charming Mrs. Osprey.

The play is full of bright lines and humor and the motive carried throughout is the delicate love-making of Lieut. Howell Everett and Valentine Osprey, a widow.

The story explains how the lieutenant is railroaded into a love affair with Mrs. Osprey, and the characters that are mixed up in the cross purposes, together with these two, bring about many amusing incidents.

The matinee bill for this week is "The Great Unknown" which made so great a hit last season. The prices have been reduced the remaining two matinees, so the little ones will have a chance to laugh at the merry pranks of the two rollicking daughters of the Great Unknown.

Herbert on a Whaler.

The whaling bark Greyhound, with her flag at halfmast, arrived in New Bedford, Mass., November 4, completing a five years' voyage. The crew were stricken with beriberi about a month ago, from which disease three died and five others were brought into port still suffering from its effects, one of them in a dangerous condition. The bark is consigned to Antone L. Sylvia, her owner, and brings 560 barrels of oil. She had previously sent home 2000 barrels of oil and forty-seven pounds of ambergris.

An Affronted Dog.

A pet dog who had grown old and gray in one family and had been always used to much kindness and petting became at last so fat that when the dinner bell rang—a sound which used to bring him rushing down stairs—he would sit on the top step of the staircase and whine piteously till some member of the family went up to him and carried him down.

Just at this time a puppy Newfoundland was introduced to the family, greatly to the chagrin of the old terrier, who would not make friends with the newcomer. On one occasion when the dinner bell rang the puppy, seeing the old dog sitting on the top step as usual, ran up to him and in clumsy play upset him so completely that the fat fellow rolled to the foot of the stairs, growling all the way.

The sight was very ludicrous, and several members of the family who had seen it could not refrain from laughter. But the pampered dog's behavior was curious. Gathering himself together, he refused to enter the dining room as usual, but slowly toiled up stairs again and retired to the wicker basket where he usually passed the night. Humble apologies were made to him, more than one child friend offered him dainty food, but though he must have been hungry, everything was refused and he passed the evening fasting. His pride had been too deeply wounded by the unfeeling laughter of his friends, and it was not until another day had dawned that he seemed to forgive the slight which he had received.

Worth Remembering.

Be slow to make promises, but when once made always keep them. Have few intimate friends. When you speak to a person, look him in the face. If you are careful of your company, you will be careful of your conversation.

Island Views.

Over our establishment on Hotel street is the sign Island Views. For the benefit of those who may not know, King Bros. have opened the place as a branch to their store. Colored and uncolored photos, oil paintings, water colors, pastels and menu cards of Island scenery are specialties.

If you want a nice phaeton or surrey for a Christmas present, with fine harness to match, call at Oahu Carriage Repository, in rear of Wright's Carriage Factory, Fort street, opposite Club Stables.

Just Like Gold Coin.

For more than fifty years has PERRY DAVIS' PAIN KILLER stood the test against all remedies prepared to eradicate pain, and today stands at the head of the list among the medicines that are so essential to keep at hand in the home.

It is not a new fangle remedy nor do the proprietors lay claim to any wonderful revelation of the ingredients that enter into the manufacture of this ever popular remedy.

It is perfectly harmless, you need have no fear of becoming habitually inclined to its use.

For Colic, Cramps, Dysentery, Colds, and all painful affections, a few doses will certainly give relief. You cannot afford to be without a bottle in the house.

Your forefathers used it and found it beneficial.

Why experiment with some remedy that is new and its effect on the system unknown?

It has many rivals but no equal.

The new 35c. size contains over double the quantity of the 25c. size.

Rev. G. L. Pearson will deliver the sermon. Rev. T. D. Garvin and Rev. D. P. Birnie will assist in the service.

Captain Gregory Returns.

Captain James Gregory of the steamer Waialeale returned on Saturday last by the steamer Claudine from San Francisco after an extended visit to relatives on the Coast. He left Honolulu in the Miowera on October 1 and went to Portland, where his brother, Captain Wm. E. Gregory, is in command of the U. S. light-house tender Maunaloa. The Maunaloa had a few days before Gregory's arrival been thoroughly overhauled and refitted at a cost to Uncle Sam of \$32,000. A trial trip was given up the Columbia and Willamette rivers and our Honolulu mariner had a chance to see the wealth and beauty of the Webfoot State. Captain Gregory had an elegant time. He spent most of his vacation in Astoria with his four little nieces with whom he has promised to regularly spend his annual vacation hereafter. He shows with pride a photograph of himself and these pretty girls. In Seattle Captain Gregory saw Wilson, late of the Hawaiian band, drumming in a theater, and in San Francisco he was taken around to see the sights by Charlie Wall, of the I. S. N. Co. Ltd., and other friends. Captain Gregory is called "Doctor" alongshore since he came down listed as surgeon in the Claudine. He will take command of his old steamer, the Waialeale, when she goes into service.

How to Make Pretty and Convenient Pillow Shams.

Hem one side of 3 yards of dotted Swiss (a 2 inch hem); also ends 1 inch. Measure from bottom of hem 32 inches, and if Swiss is too wide to balance off and sew tiny hem. Baste on lining and turn 3 inches down top. Run 2 threads across, leaving 1 1/2 inches for heading and half an inch for tuck, through which run a heavy cord. Being finished, you have a deep flounce. Suspend same by fastening ends of cord to small nails driven in back of headboard, bottom of flounce to touch spread. These have to be removed only when soiled, as they rest against bed when not in use.

How to Make Koumiss.

Allow two tablespoonfuls of sirup and about a sixth of a cake of yeast for every quart of milk bottled. Prepare the sirup by boiling half a cup of sugar with half a cup of water for two minutes. Fill quart bottles about a quarter full and add the yeast, dissolved in lukewarm water and the sirup. Cork the bottles and shake them thoroughly and then fill with milk. Cork them tightly again, and tie down the corks securely. It is a little more convenient to use beer bottles with patent fasteners, because they hold only enough for one glass of the koumiss, and they are not as likely to break open as corks tied down with even the stoutest twine. They are also easier to open, as the koumiss, if good, is very effervescent. Set the bottles for at least four days in a cold, dark cellar, or in the refrigerator. At the end of this time the koumiss should be ready for use.

How to Make Pineapple Sweet Pickle.

This requires 2 1/2 pounds of sugar, a pint of vinegar and half a cupful of whole spice to every 4 pounds of shredded fruit. The spices should be stick cinnamon, cassia buds, allspice and cloves, tied in a bag. Boil all together and skim before adding the fruit. Cook until tender, skim out and put into stone jars, pouring over the sirup after it has cooked an additional five minutes. The next morning drain off the sirup and cook another five minutes and pour back boiling hot. Repeat this three mornings, the last time packing the pickle in airtight jars.

The Oliver Typewriter is pronounced by experts, the best machine in the world. It has many valuable features, which have to be seen in order to be appreciated. The Oliver can be seen at the office of A. V. Gear, No. 210 King street.

Route—Barkentine S. N. Castle on the Berth.

The steamer Claudine finished discharging today.

The schooners Rob Roy and Ada are off the marine railway.

The schooner Transit is discharged and will await a cargo of sugar.

The bark Aethelbeht with 400 tons ballast cleared for Astoria this morning.

The bark Ceylon will not sail until the arrival of the bark Archer for San Francisco.

The trusses are up for the roof over the new brick warehouse erected by Theo H Davies & Co, Limited, near the market.

The steamer Waialeale is up and loading at Fort street wharf for sailing tomorrow afternoon for Kilauea, Kalihiwai and Hanalei.

The steamer Helene goes out this afternoon on the regular Maui route. She includes in her trip Honoum and waypoints and will not return until the end of next week.

The barkentine S N Castle went on the ways this afternoon to be cleaned and painted. The first of her cargo of sugar is on Oceanic wharf awaiting her, 2000 bags from Kilauea plantation. The Castle will sail for San Francisco December 3.

The new ventilator in the tug Eleu has worked a great change in the temperature of the hold. Formerly it was very hot, while now there is a constant current of cold air from the bow to the stern, making also a much better draft for the boilers.

The steamer Claudine is up and loading for Lahaina, Olowalu and Mahukona for departure tomorrow afternoon. The Claudine will sail from Mahukona on her return by way of Kahului on next Saturday, thus re-uming her old route upon which she will continue, while the Helene will run between this port and Honoum.

A hungry seagull snatched the report of the American ship Lae, as it was being thrown to the Merchants' Exchange reporter in a boat, while the vessel was being towed into San Francisco bay. Being pursued by others of the tribe for the prize, the bird swallowed the document at a gulp. Captain Anderson made a new report.

U. S. Shipping.

The total documented tonnage of the United States on June 30, 1897, 4,769,020 tons, is the largest for twenty one years, except in 1893, when it was 4,825,071 tons. Our largest documented tonnage was 5,539,813 on June 30, 1861.

MEMORANDA.

Per Mikahala from Kilauea Nov 23—Weather very rough and rain at Kilauea, Kalihiwai and Hanalei the last four days. Did not land any freight till Friday, Nov 19, when we landed the Hanalei freight. Landed the Kilauea freight on Saturday morning but could not take any sugar that afternoon on account of the weather. On Monday, Nov 22, landed the Kalihiwai freight and went to Kilauea that same morning and took on sugar. The steamer Keauhou was taking in sugar at Waimea yesterday, Nov 22, when we left. Left on Kauai—Makaweli 2500 bags sugar, Kakaia 1600 bags sugar, Koloa 1700 bags sugar, Hanalei 3000 bags paddy.

IMPORTS.

Per stmr Mikahala—4000 bags sugar.

CONSIGNEES.

Per Mikahala—Wm G Irwin & Co, Ltd.

Three Baby Thieves.

The three boys who stole \$32 from the pockets of A. Long at the Healan bathhouse Friday evening are scarcely in their teens. They are all bright lads, but bad eggs. The money was divided between them, each getting a \$10 gold piece. Next day they laid out their ill-gotten gains in new clothes. Fearing detection the purse, which contained a diamond ring, was thrown away. This property was recovered by Detective Kaapa.

Army of Defendants.

Deputy Marshal Hitchcock has made return of summons served on one hundred and twelve persons named in the suit for partition of M. F. Scott and Nettie L. Scott against Mrs. E. N. Pilipo and 141 others. Fifteen defendants are reported as being dead, and the rest answered cannot be found. Three names given are believed to describe but one person.

Band Concerts This Week.

Prof. Berger announces the following program of band engagements for this week: Tonight, at Opera House; 4 p. m. tomorrow, concert on grounds of Executive building; Thursday afternoon, play for football game at Makiki; 10 a. m. Saturday, concert on grounds of Executive building; 4 p. m. Saturday, concert at Emma square.

Hawaiian Historical Society.

The annual meeting of the Hawaiian Historical Society will be held at the Y. M. C. A. hall at 7:30 o'clock next Monday evening. Among the features will be a paper by Hon. S. Percy Smith, the Surveyor General of New Zealand. The public will be welcomed at the meeting.

The Warrimoo which sails Nov. 26 will take the last mail to reach Europe in time for Xmas. Hawaiian Xmas cards and colored photos make excellent remembrances. King Bros., Hotel street.

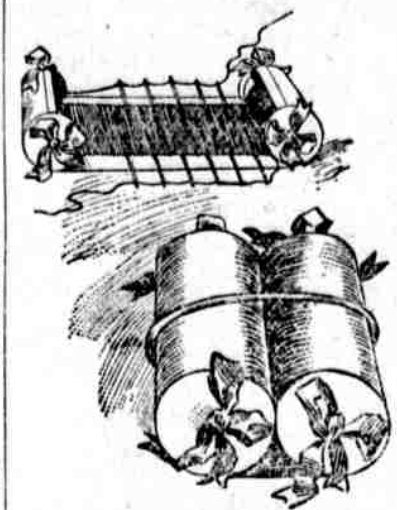

Drop in to the rear of Wright's Carriage Factory, Fort street, opposite Club Stables, and see what the Oahu Carriage Repository have to show you in vehicles of all kinds, at prices that defy competition.

GIFT FOR A TRAVELER.

A Convenient Contrivance Known as the "Bachelor's Blessing."

A handy contrivance for carrying needles and thread called "bachelor's blessing" can be made of stiff cardboard covered with silk, linen or velvet. It will, however, be more serviceable for a man if it is made from two small baking powder tins, having a section of the sides cut out. Standard Designer gives an illustration of one of these conveniences and tells how to make it, as follows:

To cover these tins cut two pieces of soft leather, bronze, red or blue, the size of the round ends of the tins. Cut a long strip of leather as wide as the tins are long and measuring about 12 inches. Turn under and paste down the

BACHELOR'S BLESSING.

edges of this to make a hem and sew to the long ends the round pieces. Paste a little strong glue along the back ends of the tins and slip them into the leather case. Select a white and a black spool of cotton or silk the exact size of the tins. Punch a hole in each end of the tins and after putting the spools in place run a strong wire or slender steel rod (a knitting needle cut the right length is good for this) through them from end to end.

With a pair of nippers twist each end of the wire to keep it in position and hide the twist with a ribbon bow. Make a needlebook of flannel, with the edges either pinked or bound with narrow ribbon, and put it in the center of the strip of leather as shown. Select 24 needles of assorted sizes. Run them in the book with 12 heading one way and 12 the other. Without cutting the thread carry it from the black spool through one line of needles and from the white through the other. The bachelor can cut it off in lengths to suit himself. To the outside of the case attach an elastic band that will hold all snugly when the case is rolled up.

Riding Habits.

There is little change in the fashions of riding gear, the chief points being that the basques, instead of meeting in the front, are rounded off like a man's morning coat. The rage for gray cloth has given place abroad to dark mixtures and plain dark tints, such as olive green,

READY FOR A RIDE.

browns, blues and drabs. So much for fashions abroad, which, by the way, are closely followed here, even in the matter of riding gear. An illustration in Vogue shows a habit the basque of which is cut away as described. It is worn with a white linen shirt and waistcoat of contrasting color.

A Family Treasure.

Hicks—Jove! I came near giving you one of Mr. Barton's cards instead of my own.

Cesar—Dat's all right, sah. Ef yo' sen up Mr. Barton's card, Miss Polly sho' to come down.—Harper's Bazar.

SECOND DAY'S PROCEEDINGS.

Continued from 1st Page.

of the coffee planters. The sugar men were required to import 10 per cent European labor and, incidentally, Mr. Goodale remarked, this cost Onomea plantation \$240 per head for Portuguese last year. The coffee planters got the benefit of all this and had their labor brought to their doors free of charge. The sugar plantation laborers could not be got to contract a second time but instead drifted to the coffee plantations.

By motion it was adopted as the sense of the meeting that Dr. Maxwell should continue to act as chairman of the committee on Soils and Fertilization.

Theo. H. Davies thought some special steps should be taken to secure a better attendance at the annual meetings. Most valuable and exhaustive reports were being furnished by Professor Maxwell and others which those in charge of the agricultural and mechanical work of the plantations ought to hear and discuss. It was true they would be printed but there should be open and free discussion at the meeting. He would even go further and say that the interests of the stockholders made it imperative on those in charge of the plantations to take more interest in such affairs. He then offered a resolution to that effect.

Mr. Morrison thought the matter was largely in the hands of the agents to give instructions.

Mr. Baldwin agreed with Mr. Davies and seconded the adoption of the resolution.

President Atherton said he had intended to bring the same matter up but in a different shape. He was heartily in accord with Mr. Davies' views.

The resolution then passed unanimously and there being no further business on hand the meeting was adjourned sine die.

The largest line of vehicles of all kinds for pleasure, business and farm uses, can be found at the Oahu Carriage Repository, in rear of Wright's Carriage Factory, Fort street, opposite Club Stables.

J. T. WATERHOUSE

If you wish to get your groceries fresh and cheap, give us a trial and we will endeavor to show you what we can do in this line. Now that Thanksgiving is drawing near it will pay you to call and inspect our stock. We suggest the following which will help to make a Thanksgiving Dinner a success:

Fresh Cranberries and Apples, Cranberry Sauce in bottles and tins, Guava Jelly, Olives, Fresh Apple Cider, Fresh Lemons, Hams, Asparagus, Corn, California and French Peas, Boiled Cider for making Mince Pies, Lemon, Orange, Citron and Mixed Peel, Spices, Mince Meat, Morton's and Atmore's Plum Puddings, Bottled Pie Fruits, Nuts and Raisins, Morton's Candies, Etc., Etc., Etc.
